Sigm Xi Lecture by Professor Nutting

La Jolla, on the Pacific Coast Discribed in the Lecture Room of the Liberal Arts Hall.

The Sigm Xi lecture in the university was well attended. Wednesday evening, Prof. Nutting being the speaker. His subject was "La Jolla." Prof. Nutting's talk was always interesting and this one was no exception. The following are extracts from his lecture.

"The Eschscholzias in their various seed for new lands and vandals in the new world, perused their quest with a curious aim in mind, one of the admiration of the student of early American history.

"Most of the Eschscholzias are an almost universal source of inspiration, from which their names were derived. Most of the Western names are derived from the church but occasionally the appreciation of beauty got the better of them and thus we have the name, 'La Jolla.' The Gem.

"As one enters the Grand Canon of the Pacific, he finds a world of words to describe its sublimity. It has been my good fortune to see my full share of this grand scene. It is thirteen miles to the opposite rim of the Canon, but we frequently refuse to believe it.

"Nowhere else are the equinox colors and the awful depths so mused. Some one has called it the 'Achy Heav.' The thing that impresses on me more perhaps is the eternal stillness and the silence which pervades these stupendous depths. And the silvery wave! The sea is so changeable, so various, so awesomely blue. Yes, it is true, every wave is distinct. But of this I have no words. The only thing I know of the Pacific is that I have heard eternal silence, the difference of the Atlantic. The deep shadows still envelop the lower levels and the higher points are clothed in tender brown and then the sea rises and every year it grows into birth of a sea. The effect is unreal in the highest degree and one is reminded of the minde stage, where backboard mountains with gilt edges look like no artificial.

"Lauding the Grand Canon we continued to La Jolla, which is a resort able to please a 'me' at the southern end of San Diego. It stands on the ocean front and is not a bay or gulf. Hundreds of against are built on the slopes leading down to the cliffs that form the sea front. Nowhere there is a more perfect 'me' and list and nowhere could the wave effects be studied so well. One never could get the feel of it as it gathers in height and momentum in approaching the coast. The limitation common to all of peculiar and savage assault.

"It is also interesting to stand and watch the people, spell-bond by the might of the sea. The old ocean has been powerful. It is truly fifty feet above the water level and the cliff arches over that there is no slope up which waves can climb. Whether by day or by night in walking along the cliffs this fascination always holds one in its grasp. No two waves are just alike and monotonous is impossible.

"The greatest feature of La Jolla is the series of caves that penetrate the cliffs in many cases. Somewhere above the water except in the highest tide and others containing deep pools ever when the tides are low. Ailong these cliffs one finds many species of marine life: Mollusca, Cephalopoda, echinoderms, patches of baracles, small shells and the like. The sea birds of this region are so protected by law. Puffins too, are numerous.

"For some years the zoologists connected with the University of California, have been investigating various points along the Californian coast, and from a survey of several places the most available place for a zoological station; and finally La Jolla was decided upon. This station has many advantages. It is situated on the California coast. Most other localities on the ocean front are impracticable so account of being void of a landing place. This distance can be studied so effects be studied so well. No two waves are just alike and monotonous is impossible.

"This is the law for the verdant fresh water which changes not. The green wave and lowi- ly of heart, slow to work, but patient and plodding. The wave is the power of the ocean. Be meek and lowly of heart, slow to anger, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom.

"In the afternoon, Prof. Nutting, gave an account of the sea front. Nowhere is there a more perfect 'me' and list and nowhere could the wave effects be studied so well. One never could get the feel of it as it gathers in height and momentum in approaching the coast. The limitation common to all of peculiar and savage assault.

"From the spectators’ standpoint the scrap was a decided success. Nobody was seriously hurt and the few poles tossed and pierced feet will soon recover."

INSTRUCTION TO FRESHMEN.

The Tiger, published at Colorado College; has a chapter of instructions to the freshmen. The following is the most important part thereof:

"Wherefore, O freshmen, give ear unto the law, neither depart therefrom, lest perdurevent the hopes of the Philistines, which is to say, the sophomores, shall come upon thee like a flood in the third to the night and mine thee hip and thigh, and defeat thee with great slaughter, for the sophomores are a brave and warlike people."

"This is the law for the verdant fresh water which changes not. The green wave and lowly of heart, slow to anger, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom. Be meek and lowly of heart, slow to anger, and let thy horn be the horns of the bridegroom.

"In the afternoon, Prof. Nutting, gave an account of the sea front. Nowhere is there a more perfect 'me' and list and nowhere could the wave effects be studied so well. One never could get the feel of it as it gathers in height and momentum in approaching the coast. The limitation common to all of peculiar and savage assault.

"From the spectators’ standpoint the scrap was a decided success. Nobody was seriously hurt and the few poles tossed and pierced feet will soon recover."

FRESHMAN CAPTAIN ELECTED.

Yesterday the freshman football team elected a captain, that being the occasion of La Jolla's First Football, the present fullback, who has been showing up well against the Varisty, has been unanimously chosen. Nine 'rake for Kirk.

JUNIOR ANNUAL.

Proposed to Give Professional Schools Representation.

The Junior Liberal Arts class assembled in the auditorium Wednesday evening in order to receive a call by President Riley. Mr. Bieg, business manager sheet of the 'Wavy,' was present and read before the class a plan for securing a general representation of all the colleges on the entrances list. The proposition in brief was, that the Hawtry shall be controlled by a board of managers, one being elected from each college. Advice was sought from President MacLean and other influential faculty members and the plan was heartily commended. In compliance with this plan, J. G. Bridges was elected as the Liberal Arts representative on the board. Mr. Bieg will represent the school of Applied Sciences. The professors and students have had the matter explained to them and have the matter under consideration.

Each member of the board of managers shall be chosen by the students of each college, a certain amount of money and will share equally in all gains or losses from the sale of the book.

LADIES' BAND AT NORMAL.

A concert band composed exclusively of ladies with Prof. Frank A. Fritzgerald as director, has been organized at the Iowa State Normal school. There are thirty members in the organization, and four and forty are now seeking admission to the organization. The band is one of the first of its kind to organize at a college in the west. The following instruments are used by the young school teachers: four clarinet, four cornets, three trumpets, two altos, four horns, two saxophones, two saxes, trombones, two tenors, two bar, bass and snare drums. Additional instruments are soon to be added and the concert will soon be given by the band in the auditorium.

Sale of seats for this engagement opens Thursday morning.
PERSONAL, LOCAL AND GENERAL

Fresh cut flowers, Alice & Son
Greenhouse, corner Church and Dodge streets; store, 122 Iowa avenue.

John Cameron, a University science student, is chairman of the high school section in northeastern Iowa Teachers' association.

Prof. Macbride's class in general botany numbers 125. This is one of the largest, if not the largest, of the classes in the Liberal Arts school.

Prof. T. H. Boulton has been put on the program for the winter meeting of the National Educational association for discussion of the topic: "The scope and meaning of work in universitie.

The meeting this winter is to be at Louisville, Kentucky, in February.

At the Southwestern Iowa Teachers' association, which is to be held at Council Bluffs, November 2, 3 and 4, a paper is to be presented on "High School Principals," by State Inspector of High Schools P. C. Ensign, and also one on "National Science," by Prof. Bobbanihi Bhikoo.

The paper at Baconian tomorrow evening will be by Prof. Macbride, on the subject, "Luther Burbank and his work." The paper will doubtless be of unusual interest. The meeting is at 7:30 o'clock and is open to the public.

Dr. Green attended the meeting of the Southwestern Iowa Dental association at Creteon, this week. Two day morning he gave a clinic and on the evening of the same day he delivered a lecture.

He is one of the best practitioners in Iowa.

The following from the Normal is of interest. Students who are also Normal alumni: "R. M. Wyant, '96, has resigned his position at Lansing, Iowa, to continue his theological studies and is now enrolled in Evanston. He made friends in Cedar Falls a short visit recently. The new principal at Greene is Benjamin Boardman, '96, who left Mason City last spring after two years' work. L. C. Minkel, '96, has announced a second year's work as superintendent of schools at La Porte City. There is every prospect for a prosperous year. Mr. Minkel was one of the instructors in the Black Hawk county institute."

Hesperia has the following new pledges: the Misses Long, Skinnette, Hrusha, Lynch and Florence Waller.

Mr. Harry M. Ivins will usher during this season, at the opera house.

Writers' club met with Miss Sherwood at the Kappa house tonight.

The editorial staff of the Daily Californian is to meed the staff of the Daily Palo Alto on the baseball diamond.

Boarding at 1215, 12 West Market Street.

Edward G. Quigley, L. A., '96, now professor of psychology and education in the State Normal school at Moorhead, Minn., writes very enthusiastically of his work there.

Mrs. Keene Abbott, formerly Miss Mabel Russells, is the author of two stories appearing in the September issue of the New England Magazine and the New Era, respectively.

Iowa City State bank, opposite interurban station, sound, safe and accommodating.

NOTICE TO ZOOLOGY STUDENTS.

The class in general zoology (three) will meet in the general lecture room of the Physics building until further notice.

Beda will meet Saturday evening at 7:30 in room 5, Hall of Liberal Arts. As some business is to be transacted all members are urged to be present.

BACONIAN.

Baconian Club meets in the Hall of Physics on Friday, October 12, at 7:30 p.m. The members and friends of the club will have a rare treat on this occasion in listening to an illustrated lecture by Prof. T. H. Macbride. His subject will be "Luther Burbank and His Work."

"Cherry Valley," which will be the attraction at the Coliseum this evening was at Green's opera house in Cedar Rapids last week and the Cedar Rapids Daily Republican had the following to say of the production: "Cherry Valley," was presented at Green's last night to a large and appreciative audience. The story is located in Virginia during the civil war and contains many homely and loveable characters. The story concerns the loss of two men for a sweet Virginia girl. The specialties introduced were novel and amusing and brought the house down again and again, being some of the best things of the sort ever seen here." Prices 25, 35 and 50 cents. Seats are now on sale.

Miss Montgomery's Dancing Assembly Saturday night. New Majestic hall. Seven piece orchestra.
