THE STATE CHAMPIONSHIP:

On What It Depends and What Teams Look Best.

Grinnell's defeat of Drake, a lower team than the one above, has given the determined a great deal to talk about. Last year's Drake beat Grin- nell badly, but also Amos and Iowa. Iowa's score in the Iowa-Grinnell game was 9 to 0, or thereabouts. These were used almost entirely by Iowa in that game.

One thing is certain. Grinnell is very much stronger than Drake is considered weaker. Grinnell's having a very much stronger team than the one above, which was held Drake one to 15 to 32 score. Grinnell, however, turned around and defeated Drake by the same score. Iowa defeated Coe 27 to 3, the last school making first place and Grinnell has been held Coe to the same score.

The present situation in championship circles points to Ames and Iowa as favorites, Grinnell coming next. Iowa plays Grinnell again, and Iowa plays Ames and Grinnell one again. The same teams the week following. A good line-up on the two teams can be expected after the games with Grin- nell.

PROF. CALVIN'S LECTURE

Professor Calvin's lecture on "Jellos." The Class in Astronomy on Monday next.

One of the Most Widely Advertised Books is From the Pen of An Alumnus of S. U. I.

One of the most widely advertised and talked of books is "Ben Blair," by William Lilliard. The graduate of the dental department of 98.

The story is a romance--one dealing with Dakota life. Cerny & Louis have had a window display of this book for several days, and the sales are good.

The author is a personal friend of both Mr. Cerny and Miss Louis. For a time he was in Dr. Broome's office.

After graduating from the dental department Mr. Lilliards spent a year in the liberal arts department as a pupil of Prof. Amesley. He is prac- ticing dentistry at Sioux Falls.

A recent bulletin issued by the de- partment of commerce and labor con- tains a report of a conference on the weights and measures of the United States held at the bureau of standards in Washington on January 17th this year. The principle results of the bulletin is a paper on the his- tory of the United States weights and measures by Mr. t. A. Fletcher, a member of the bureau. Among other remarks printed in full are those of Prof. L. G. Woolf, state superintendent of weights and measures for Iowa.

The Waterloo Daily Times-Tribune of Saturday gives a lengthy article about Prof. E. B. Bolton's lecture to the teachers at that place. It was one of the strongest and most interesting papers at the meeting. Some of the salient points are given below:

"In former times, the colleges and academies were designed for the few, it is, the choicest instead of the mass. The original college and large number of students in its halls, and the now are designed for the people of the era of education, or rather, the people of the education rather than the few."

"The new idea of education as a more disciplined, as a process, is to replace the ideal of results ob- tained. We no longer believe that it is important to go through the process for the sake of the process. By putting the teacher of education in an equal importance with the education of farmers? Is it not more important to train boys and girls than to raise boys and turnips?"

The class in astronomy on Monday morning discussed an unusually large and well attended class in the eastern edge of the sun's disk. While under observation it showed changes in form which, considering its dimensions, imply great activity. It will traverse the sun's disk during the next few months with interest. Brilliant auroral dis- plays are likely to be seen during this period.

The University of Minnesota has re- ceived a large gift of $10,000 for the purpose of erecting a students' hos- pital. Any sick students will be cared for at the hospital at the expense of the medical students in clinical work.

EVILS OF THE GAME.

Football is a matter over which people differ radically. There can be no possible agreement at present. Perhaps it will come some day. Now it must be mutual forbearance.

The extract below is quoted from an exchange and credited to the Alumn i Weekly. It is rather hard on the supporters of the game, but there is some truth in it:

"Of late years it has been dangerous to even hint that there could be anything wrong with football. West has been passed along not to say anything about this and that acknowledged rank condition of affairs for fear the prospects of the team would be injured, 'at least don't say anything about it until after the game.' After the game, if we won, 'Don't say anything to mar the fruits of the victory,' and if the team lost, 'Don't kick a man when he is down.' Whatever came, whatever was done, one must not say anything against the sport or in criticism of the way in which it was conducted.

"The man who dared to speak otherwise than in praise of what was being done has been termed a 'nuisance.' If President Roosevelt's action has done nothing else than to break this spell it will have been worth the effort.

"The evil at which President Roosevelt has aimed is real, and ought to be eradicated, and its eradication will improve the game from all points of view. But we very much fear that this brutality which it is aimed to abolish is but one expression of a greater evil which threatens the game of football. Brutality is, we think, but the outgrowth of the spirit of 'anything to win,' which in turn, is largely if not wholly the outgrowth of the professionalism which has come to permeate the noble game. Deny it as we will, the ugly fact remains, glossed over it may be with specious explanations and even that, football has become irri
tively professional."

We give below an extract from an article by Henry Van Dyke at Cor-

cull.

This is strongly friendly to ath-

tics but to the best kind. It is as fol-

ows:

"The subject of athletics is one re-

ceiving a great deal of attention these
days. But it is my opinion that we have
too little of college athletics. Vigorous,
museum exercise should be diffused throughou

the university. True gentlemanly sport should be
generally cultivated. Let us be proud of our

teams because they have been
clearly chosen and clearly trained, and

are going to play fair. I don't want to

hear any criticism of college

athletes from men who have never

been in college athletics, and

don't know what they mean. But let

us have honesty and straightforwardness

rule supreme in all sport, and let the

undergraduate bodies of our universi-

ties engender a spirit which will

broaden and strengthen the proper sort of

athletics.

We think it is not the proper thing for

any of us to take a stand against

athletics. This will not prevent us from speaking against the faults that

may be apparent. Yet our attitude should be one of helpfulness.

At the same time we want the ath-

letic people to bear in mind that a
day will soon come when they will be

called upon to support the conten-
tants in forensic and other lines. They ought to be ready to do this with

a will.

Let us all look upon the thing that

interests our fellow student. Let our

attitude be one of mutual helpfulness

and co-operation.
