Board of Control.

Writer in The Daily Republican

That is What Three Educational Institutions in the State Want—Know—History of the Movement and What It Means.

The three educational institutions of the state are much exercised at the present time over the nature of the report which will be submitted to the state legislature this winter in regard to educational reforms in the state. The three institutions are the State Agricultural college at Ames, the State Normal school at Cedar Falls, and the Iowa College of Medicine at Des Moines.

The Agricultural college is at the head of this great educational reform movement. Iowa is well acquainted with the great advantages gained not only in Iowa but in other states by the putting up of university building programs. The present one was planned by Lieutenant Weeks, commandant of the old battalion, who was stationed at the State Agricultural college at Ames. The State Agricultural college at Ames is maintained at both Iowa City and Ames. Two large buildings there have been built, either one of which would be sufficient in size to take care of the educational needs of both colleges and two forces of instructors are employed either one of which would be able to perform the same service. Other departments are said to be duplicated at all three places.

(Continued on Page Two.)

GOOD SCRIMMAGE.

Freshmen Make Touchdown and Play Brilliant Ball—Varsity Weak at Among Iowa's Student Body Who Would Like to See It Improve.

Coach Chalmers and Assistant Coach Paul Goddard put the Varsity through a fast practice to develop their tackling facilities. After the tackling practice the Varsity divided into two teams and played through signals. Neither Rockwood, Knapp, nor Atkinson were out, so the line-up was seemingly evenly divided. The first team comprised Moore, center; Pitt, left guard; Nurnberg, right guard; Sch świna, left tackle; Seidell, right tackle; Streff, left end; White, right end; Frizzell, quarter; Tupper, left half; Allen, right half; McIlvane, fullback. White will probably play right end and Saturday.

The second team was made up of Topping, center; Allbright and Read, guards; Washburn and Beaillon, tackles; Simmons and Bryant, ends; Chalmers and Davis, halves; Kent, quarter; Green, fullback; Both Chalmers and Kent are in bad shape, but ran the signals with the second bunch.

The freshmen and Varsity lined up at 4 o'clock, and for three-quarters of an hour the several hundred spectators witnessed brilliant running and tenacious defense. Kent, McIlvane, Chalmers, Knapp, Murphy, Atkinson, and Rockwood were absent from the Varsity line-up. The freshmen kicked off to the Varsity and the Varsity returned the ball by steady gains to the middle of the field, where they lost. Captain Kirk and his freshmen showed exceptional form and surprised the Varsity before they knew what hit them. The freshmen made a gain through the Varsity line, Kirk making a hole for the carrier of the ball, usually Johnson or Brooks. Then Kirk went around the Varsity end for a thirty-yard run and a touchdown.

The Varsity immediately got down to business and by straight line backs and three long gains by Streff, Allen, and Davis, made a touchdown. The freshmen showed strong defense, however, and often the Varsity failed to gain. The freshmen are good tacklers.

As it was fast growing dark, a kickoff was done away with and the ball given to the freshmen by the Varsity on the Varsity's ten-yard line. The freshmen, after repeated attempts, failed to gain and the Varsity took the ball to the middle of the field, when time was called.

Davis is showing up exceedingly well, having much speed. Allen is also a good grounder. It took him to the Varsity some time to get down to business last evening, but when they did, they swept everything before them. Though the practice was not overly good, it was good considering the conditions, so many registers being absent. And the freshmen were not under-rated, as there are many fast men among them and several in individual stands. The strong freshman team this year certainly points to an exceptionally strong Varsity next year. And there are many others among Iowa's student body who would add materially to Iowa's squad, if they would only come out.

Incorrect Report.

Some "yellow journalists" has got it out that Iowa wants a change in her football coach staff, and intimates that Chalmers is wished removing. This is all rot, Coach Chalmers has put his whole soul into his work and after many years of football all stand by him. He is loved by all the athletes and others who know him. Coach Chalmers has had too much to do for one man to handle, but he has done his work well and there is no kick coming from Iowa.

NEW MILITARY ORGANIZATION.

Military Drill to be Pulled to Perfection by Volunteers.

For the first time in the history of the institution, a volunteer military organization is now in existence at the University. The project, which was planned by Lieutenant Weeks, commandant of the old battalion, was launched last evening at a meeting of those interested, and received enthusiastic support among sixty men, or more than a third of the battalion. Lieutenant Weeks was unanimously elected captain of the organization, and L. W. Lowell and W. D. Middlebrooks, were chosen to the position of first and second lieutenant, respectively. The non-commissioned officers will be appointed later.

The principal object of the new society, which will probably be known as the "Varsity Rifles," is the cultivation of proficiency in military affairs, and its organizers hope to make it also somewhat social in nature. Drills will be held every Wednesday evening, at 6 p.m.

Ames, Normal and the State university are all favorable to a board of control provided they will be assured that none of their present rights shall be sacrificed or transferred to any of the other institutions for the benefit of the state. The kind of a board of control that each is supposed to wait is one whose members shall be favorably disposed toward it at the expense of each of the other two. This is precisely what the backers of the board of control idea do not want. They desire that the board shall act fairly in the interests of all three parties concerned, but that nobody should have a say in the matter. This shall be the agent of the people of the state of Iowa rather than of any one of the educational institutions.

Such a board, it is believed, would accomplish inestimable good providing a sort of a balance wheel that would equally adjust the claims of the three rival institutions. "It would make an influence between those impossible because it would put a stop to the duplication of departments and could do away with any duplication that now exists. As for liberal".

The Hahn Festival Orchestra

The first number of the Lecture course, Saturday, Oct. 28, at Coldren's Opera House, 30 fine musicians Helen Carter McConnell, Contraio Solost.

EDUCATIONAL BOARD OF CONTROL

In this number we reprint an article appearing in yesterday's issue of the Iowa City Republican, regarding the educational board of control. The writer reaches some conclusions that have been reached by a number of other people, but which are hardly warranted by conditions existing. The statement is made that the duplication of departments is a serious matter. The engineering department is the one taken as an example, and the statement is made that two large buildings have been built, either one of which can accommodate all the students in both.

In the first place this is not correct and if it were, would not prove the justice of the charge of extravagance. Ames has more than six hundred engineering students. For the gift of the engineering building to be completed by January 1 at the University will accommodate 130, and there are 100 students. When the engineering quadrangle is completed there will be enough room to accommodate the students now in both institutions.

Would it be a wise policy for Iowa to build only large enough for today? This size of policy was followed in the early history of the University in regard to grounds. The difficulty and expense experienced in finding adequate room for buildings demonstrates the incorrectness of this policy.

The facts are that the engineering schools will grow. In the last five years the number of engineering students in the country has doubled, and there is no reason to believe this will not be repeated in the next five years. It would be poor policy for Iowa to wait until students demand entrance to our schools before she begins to provide accommodations for them.

The truth is that with only her natural growth, Ames will have all the engineers she should try to accommodate in five years from this time. By the time the buildings are completed, they, the same condition will probably prevail. Michigan has three engineering schools, at least two of which are full.

The growth in high schools in Iowa in the last fifteen years is a case that is somewhat similar. The buildings which were erected at that time, and were thought ample, are now overcrowding.

Educational sentiment is growing in Iowa. There is no use to worry about duplication. There is plenty of work for all three schools. Each of them should have 6,000 students in less than twenty years.
