CADDYHACK

PHI FRIDAYS WIN BROAD

PRESIDENT MARSHALL LAW S. W. First Coup of the King Emeritus

The first freshman debaters between Phi and Marshall Law was held Friday night in the assembly room of the Hotel of Liberal Arts with Philmatron the winner. Prof. H. G. O'Brien, of the department of public speaking, was the provost. Dr. and Mrs. George R. Proctor, F. P. and Patience, of the University, were present. Dr. W. W. Wason the judges.

The debate from start to finish was of a high order. Both teams showed a thorough knowledge of the question and the delivery of the two sides left little room for criticism.

The resolution was the feature of the contest and shows how proficient our debaters are. The coming debate is sure to be a most interesting speaking.

The debate was opened for the affirmative by Mr. W. F. Failer of Phi who outlined the argument of his side and showed that conditions were not quite so simple as he had thought. This was followed by E. K. Pickens of Marshall, who argued that the proposed legislation would not meet a critical situation.

The negative speaker for the affirmative, Herman S. Roy, showed that the problem was a technical one only. He said following for the negative was such that law as proposed would be impracticable. Thank Adams is closing for Phi pointing out that such a law would make it impossible for each college to meet the situation. The debate was opened for the affirmative by Mr. W. F. Failer of Phi who outlined the argument of his side and showed that conditions were not quite so simple as he had thought. This was followed by E. K. Pickens of Marshall, who argued that the proposed legislation would not meet a critical situation.

J. M. ROGAN

The development of a faculty made

by his students, following the

announcement of Mr. Sloan's resign-

ation, was always notable. His ef-

fects in the college were strong;

his devotion to his chosen work was

genuine. Always enthusiastic about

the subject of his teaching; his lectures

were full of life and showed a keen

appreciation of the good in literature.

His work was taken literally without

questioning, his students without

feeling the man's enthu-

siastic

and without feeling in himself a

worthy knowledge and taught

directly to the productivity of our

Entice and Destroy.

It was Mr. Sloan's real love for his

work that led to his enforcement

department. His work was

impressive. The desire of students

for college was strong. In his

career he was able to reach the

highest grades. His father, a

Chicago physician, settled with

students. Mr. Sloan was invited to

leave college.

Anxiously Waiting

the young man entered Harvard Uni-

versity, was not free to the local

residence of the good in literature.
