
The program for the College of Liberal Arts for 1909-10 is now ready, and copies may be obtained at the offices of the Dean and the Registrar. The program for the College of Applied Science is also ready. Last year the program of the Liberal Arts program had been issued before the summer vacation, and a number of students took advantage of the opportunity to register before leaving for the fall term.

In the meantime the staff of the program is in process of revision, and the students are urged to examine the program carefully and to make any necessary adjustments before the opening of the university on Monday, June 3.

The program for the College of Liberal Arts is divided into two parts: the first term, which covers the first six weeks of the fall term, and the second term, which covers the last six weeks of the fall term. The program is divided into eight sections: English, Mathematics, History, Economics, Science, Law, Education, and the Arts.

The program for the College of Applied Science is divided into four parts: the first term, which covers the first six weeks of the fall term, and the second term, which covers the last six weeks of the fall term. The program is divided into six sections: Chemistry, Physics, Mathematics, Economics, Science, and the Arts.
