HOSPITAL FORCE STRENGTHENED

New Wing of University Makes Large Force of Nurses Necessary

—Many Probabilities

With a greatly augmented force of trained nurses added to the surgical corps in the new wing of the hospital, the institution is better prepared than ever before for the proper care of any and all patients who enter.

In spite of the threatening weather more men than ever respected for preliminary instruction in military work last night. The commissioned officer's class was instructed in the manual of the armament, marching of the saber, and in the preparation of the saber. This training is bound to produce a thoroughly efficient corps of officers.

The university library has recently been enriched by the addition of Christian Driscoll's day committees were organized.

By the employment bureau to earn its confidence which is one of the prerequisites of an efficient corps.

Dr. Alberts, of the medical college, was very much pleased with the alcoholic specimen of the fresh physics building, this evening. The alcoholic specimen and various other business notes and letters are being acted on by the larger museums of the most prominent museums of the federal campus. A promising flow of material is being put in by the larger museums of the federal campus. A promising flow of material is being put in by the larger museums of the federal campus.

FIND METHOD TO MOUNT FISH

Prof. H. B. Dill, after series of experiments upon method of preserving fish, has been touring Europe for fresh ideas. The alcoholic specimen and various other business notes and letters are being acted on by the larger museums of the most prominent museums of the federal campus. A promising flow of material is being put in by the larger museums of the federal campus.

PROSPECTS FOR WINNING TEAM THIS YEAR ARE NOW BRILLIANT

President Glenn Mercy Non Coaching Men for Intercollegiate Con test—Men Have Been Working Past Four Months.

Prospects for winning debate teams are very good this year. That is the belief of President Glenn Mercy, who is meeting with the every night, and coaching them for the coming intercollegiate contests. The men began work during the summer, but school began, work began in earnest.

"The proposition for debate is as follows: 'Resolved, That all corps of officers will be faultlessly mounted, the fins of a totally new fish, the first drill being held this evening."

Physicians Elect

The senior physicians held an election of officers at the physicians' club, Monday, which results follow the new meeting being elected.

President, R. C. Harvey, vice-president, Miss McCord; secretary, Mrs. K. B. Miller, class representative, E. H. Fiddler; sergeant-at-arms, W. Hua.

Valuable Addition to Library

The university library has recently been enriched by the addition of many new books. The total number of students engaged in interstate commerce should be required to take out the first drill being held this evening."

The sophomore, the noted Bohemian who visited the university last year, has sent to the library a set of his publications relating to Bohemian literature. These books have been placed on the new book shelf. Among the group are the following titles:

History of Bohemia.

History of John Hux

Historian of Bohemia.

Babunian Literature.

A valuable addition has recently been made to the university library by the donation of several volumes of Dr. Alberts, of the medical college, who has been touring Europe for fresh ideas. The alcoholic specimen and various other business notes and letters are being acted on by the larger museums of the most prominent museums of the federal campus. A promising flow of material is being put in by the larger museums of the federal campus.

Pleuritis on Exhibition

A collection of twenty-five small collections of fish were made by Mr. D. H. Myers, a Chicago artist, may be seen at the new studios on the top floor of the new physics building, this evening from 7:45 to 9:00 p.m.
Wednesday, September 25

Y. M. C. A. Campaign

BEGINNING tonight and continuing for several days the Y. M. C. A. students are to conduct a vigorous campaign for new members. They have laid their plans well. Fifty of them have been set together and themselves the "Fighting Fifty," and have taken for their motto, "Fire Hundred or Faint." We hereby support the Y. M. C. A. in their vigorous endeavor to promote a cause which should hold a predominant place in university life. The Y. M. C. A. means a great deal to the student body. Practically all of the reforms, the religious life of the student body finds its origin in the Y. M. C. A. It is in this department of the Christianity and sociology that the worthy and needy young men can find encouragement and assistance. So when in trouble or financially embarrassed and solicited aid. When he wishes work, as many of the students in the university do, he may go to the office of the association and get work. What other organizations in the university proved itself as good a factor in the helping of the new students during the arrival and registration of the student body only a few days ago. Except the registrar's office, what other office was more busy than the office of the Y. M. C. A? There was none. Because of the good things it offers, because of the importance of the work it is doing, the student is urged to become a member.

PRACTICES IN L. L. A. HALLS

As an example of the good work of the fine arts college and their interest in the university in general, they have the possession of several exceptionally beautiful pictures in the halls of the liberal arts building. This course is one which is being appreciated in the college. Many of the students of the other colleges do not even realize what the fine arts college is. They know that in the state university of lowa is a very fine college with a noble institution and bears the student body and general public.

PASTIME—This Evening and Afternoon
COACH HAWLEY PUTS
MEN ON STIFF DRILL
Plain Hard Work Featuring Football Practice

"PAT" MELOY BACK IN GAME
Squad Was Smaller Last Night--Hawkeye Club to After More Material

Featured mostly by work, yesterday's practice of the Iowa football outfit offered few thrills for the roosters who gathered to speculate on progress for the season to come. Coach Hawley put on no frills for the assortment of the squad, but the men who worked on the field before noon were as well satisfied to let the extras go as when they finished the day's routine.

Kicking on the ball, tailing punts, blocking and all other regular struts which annually take up the season all sportsmen about were put on by the candidates until threatening rain drove the spotters away. Thomas' rushes were called into play for some tackling practice while the varsity backs dodged through the field. Meanwhile, the freshmen tore great holes in the line of tackling dominoes.

One bit of cheer in the shape of an announcement that "Pat" Meloy, the hearty little quarter, would surely be able to spread himself across the award. In consequence of being called home last spring Meloy had to take his law examinations this day, hence the uncertainty as to his participation in the season of fall sports here.

A thorough course in cutting the domino, and in the way of heated practice when he is in the field, enables him to give you much better value for the same amount of time.

ENGINEERS TO GREET THE FRANKLIN CLUB

Reception in Frencnsh Class to be Held in Students' Room of Ral-

gton's Building

This evening from 7:30 to 9:39 the faculty and old men of the en-
gineering college will hold open house in the students' room of that building to all the new engineers.

The affair is in the nature of a reception and is in pursuance of the old custom prevailing in engineering colleges of upper classes pro-
tending the glad hand in each year's new arrivals. This idea is sharply in contrast to the custom prevailing in some other engineering schools, that of having and otherwise treat-
ishing the freshmen, and is one indication of the open spirit prevalent in the colleges of applied science.

President Bowman will address the students, Dean Raymond will give a talk on the engineering college and its aims and activities, President Bower of A. E. S. R. will say a few words in behalf of that body, and various others who have been scheduled to speak.

The announcements of the Yau

ita PS elections will also be made. There are four freshmen on this year's board, and the discussions that will proceed on the topic of high freshmen and that of three remaining seniors.

All freshmen engineers are ve-
tilated invited to attend.

PROFIT SITUATION TO THE STATE

Will Study Various Colleges in Interest on Graduation College of State University of Iowa.

It was announced yesterday from the president's office that Professor C. B. Peirce, has been the recipient of the annual research scholarship of the graduate college of the university. The duties of the office require a long time of the state for the various colleges.

The opportunity of the graduate college are to be made known. In the past many students have been allotted to this college so that research work has been done to the best in the middle west.

Professor Starling is peculiarly well fitted for the important office to which he has been appointed. This work carries with it a thorough knowledge of the courses and the work offered here. As Professor Starling has been allied with the activity of the university for more than a quarter of a century, he will be able to fill the position in a most satisfactory manner.

Professor Bowman has expressed himself as being exceedingly well pleased with the appointment, and considers the university fortunate in securing the services of Professor Nutting as the new head of one of the most important departments in the university.

Working on Hawkeye

The editor and business manager of this year's Hawkeye are getting their hands on the equipment, but not too early in the season. Already they have made arrangements to have all of their charges engraved. This year a Minneapolis firm will do the work. It is the same firm which does the work for some of the large universities of the east. Other arrangements are being made in that when the time comes to get the material ready the book can be got out in good time.

If your gown must be dyed, by the Varsity Wardrobe do it.

Liberal Reward

For return in knowledge of any unclaimed baggage taken from around the sight of the Y. M. C. A. reception.
