PERFECT gentleman isn't produced by a night's study over an etching book. Same way with a perfect tobacco.

VIVELT is aged in the wood seven years before it becomes smooth smoking tobacco.

NEW PHOTOGRAF PLAY ALL RECORDS
Recognizing the fact that there are certain central artistic principles involved in photographic recording and reproduction the Brunwic at McColloed Co. have recently perfected the Brunwic photographic, the outcome of which is the ultimate photographic frank that the Brunwic takes first place.

The new photographic is a combination of the merit of many.

The House of Brunwic has been famous for its wood engraving experts. They have been making fine photographic cabinets for years. But not until a perfect production was possible could the House of Brunwic afford to bring out its new instrument.

When it was announced that the Brunwic plays all records, many music lovers whose libraries had been limited to certain records were won over immediately to the Brunwic. Photograph owners who had some of the greatest records heretofore owned from their houses feel that this new photographic removes all possible restrictions.

The Brunwic is equipped to play records in all of their own make of record.

The original sound box are furnished. Any musician be it during the long, the laborers, the supply hall, mood of steel, etc., of course, be interpreted in succinctness have been interested in the design and construction of the wooden sound box. A similar cylinder is built in a cylinder for so much as a violin, thus the original sound box may make for records.

The house of Brunwic has made a record like that of the world famous makers of records. This opens up a new field of art and gives to the owner of a Brunwic all the best American records and all the best European records. Pictorial records bring such artists as Carver, and others who have drawn in Chingco musical circles; Lina Cavalieri, the beautiful soprano, and many others.

The Brunwic is bringing out the new records to the command of the music world along with all other records.

STUDENT EXPLORES STRANGE TUNNELS
Slowly he grasped his way along the dark passageway. The floor was firm, so of stones, and on either side, almost touching his shoulders, stones rose progressively. Above, all seemed empty space. A cold wind, slanting, weird, whistling and sizzling from all sides. Before was all, it might happen to any student who was not duly instructed as to the use of the tunnel.

The tunnel is four or five feet wide and six feet high, except some small, egressed one which are of old stone, and are walled with bricks or terra cotta and neatly arched over. Room pipes in great variety of shapes and sizes, from twelve inches in diameter to very small ones, water pipes, light wires, and all such vitally necessary parts of the tunnel are ravelled along the sides of these passageways. The complex arrangement of this modern labyrinth, with its various air-hoists and outlet to build the house work, cause all sorts of weird sounds and shifting air currents, and as one goes down Old Capitol hill, something the Joshua tunnel, the roar of explosions sound truly continuous.

News of the Tunnel of 1917 is a curio, there is no question about it; it is a true "Pilgrim" show, and it is a sincere effort to establish a new line as far as a "Dingley Falls," at the same time it is in just and fair with a world of ginger, and a doomer popular treat, which the local entertainment is a mine of surplus, and is a letter, but too late. The new saw him, and slowly approached. He said, "I am a professor of the tunnel.

One at the Old Capitol, and from there one may go to Carrier hall, from which the sidewalks will lead to a tunnel about a mile and a half out of the city, and another ends up at the Old Capitol. Altogether there are more than a mile of tunnels, which he
