STUDENTS PRAY REGISTRATION

Juniors and seniors in the college of liberal arts are very much chagrined by the new system established by the Registrar. In sending out a statement of their requirements for graduation.

The letters to each student outline in printed form the requirements of the degree of Bachelor of Science. At the same time, is a help to emancipation. In most cases, the student was at fault for not having carefully looked up his standing, and having taken for granted that each group was complete.

Under the present system much superluminal known his exact standing, and what credits he must make in order to be graduated. Sending out instructions to juniors gives them an excellent chance to plan their courses for a year ahead in order to meet the graduation demands. The entire plan is a very commendable one, and it is proving of great value to the student in engineering, and at the same time, is a help to emancipation. In most cases, the student was at fault for not having carefully looked up his standing, and having taken for granted that each group was complete.

A BOOST FOR HEALTH

Every man is school even to himself" to take a daily walk out at the graduation. It will make him feel better towards his work, make him able to concentrate in his studies, and give him a more pleasant feeling towards the world in general, and enable him to look at all around him with more interest, than before.

Among the many ways in which one can get the full benefit of the graduation a canned one is the system of a group that "Jack White" is getting the track men through in their preliminary indoctrination. "We walk around the track five times before morning of time. Then a short dash unless you get a clear signal. Then a long cold shower, and you go back to bed without washing. Those are the direction Jack has given to the men, and it followed out so exactly.

GATHERING PHOTOS

The classes in descriptive, graphic, and topographical art are making a collection of photographs of prominent drawing rooms over the country. These are to be framed and hung on display in the proper buildings to acquaint students with equipment of large and important commercial draughting.

A. F. Ford, professor of electrical engineering, returned home early Saturday morning from a business trip to Chicago.
