UNIVERSITY HYDRAULIC PLANT

The Iowa river, in its spring range, is interesting as a beautiful, picturesque plant of very little use. The hill of the river has been so material- decreased, according to an expert, that it is now producing the power that, they said, it once produced at a capacity of 115 kilowatts. And since the plant is running at a capacity of 25 kilowatts, it is necessary to supply the buildings with the necessary steam, the steam generators are being run at the human scale.

ROBINSON FAVORS WORLD COURT AS WAR PREVENTIVE

University of Washington, D. C.

The world court is being inaugurated last week and will be organized to express the opinion of the people of the United States, in a conference for the coming year at the International Political Club Meeting.

U.S. MUST FULLY OBLIGATIONS

Political Preparations Necessary As Military—Outline Ideas of Poole League.

That a permanent international court under control of the states, from all the nations would settle all the disputes between nations was the conclusion reached by Leal D. Robinson, Columbia University in his address on American Aspects of Defense, before the Columbia International Political Club Monday afternoon at 6:30.

There is nothing to military pre- paredness unless we are politically prepared, he added.

"The people of the United States, in order to be successful in a program of peace, must know the principle that this government stands for world peace. We should know what the Monroe Doctrine is. We must recognize our obligation to the Orient, he declared. This is an ideal which will be realized when we cultivate all three nations.

"In order to complete our program we must work for the future and the whole world.

"There are political problems to be solved before the men of the world, which are to be solved.

"The speaker then outlined what the League To End War was and what the shortcomings are. He en- couraged the opinion that the United States must be world leaders in the country that they are governed by treaties.

BACONIAN CLUB WILL MEET SATURDAY, MAY 19

The Baconian club will meet in the physics lecture room at 1:30 P.M. Tuesday, May 19. Dr. K. H. White will give a paper on the "Glacial History of the States." There is one of the most interesting parts of the country for its extensive glacial and now it is being investigated because it is being investigated by geologists.

Robert K. Young has been doing work that is almost revolutionary in clearing up misapprehensions which have been existing concerning the glacial history.

MISS RUTH GALLAHER CHAMPIONS BUFFALO

Three reasons why girls should be interested in buffalo were given by Miss Ruth Gallaher, librarian of the Chinese American society, in her talk before the girls of the freshman class. These were the education of the animal by the state, the belief government upon the court, and the need of the girls getting in touch with animal publics.

Miss Gallaher explained the present situation, bringing in the three movements since 1836; prohibition, anti-sweat and suffrage. According to the last, we should do more for the Indian than for the women. Because that women may get ahead of the Indian, they must be educated. Because that anti-suffrage supporters were against women.

LOYALTY CLUB CELEBRATES

The Loyalty club will have a birthday celebration at the home of Mrs. C. Goodell on Thursday evening, May 31. They will celebrate the birthday of both half and full members of the girls which come during the month of May. A. M. E. Church will be the hostess. The girls will give a party.

ELECT BOARD CHAIRMAN

Mrs. E. W. Moore, chairman of the Y. W. C. A. advisory board for the coming year at the meeting Tuesday evening, May 29, elected S. D. Gable the new secretary. The boys department will be held at the Y. W. C. A. Plaza Tuesday evening.

STEWARDS MEET TO PLAN

A meeting of Stewards of the Y. M. C. A. will be held at the Y. M. C. A. Guildroom on Thursday evening, May 30, to plan the summer camp to be held at the Y. W. C. A. Plaza Tuesday evening.

MECHANICS WILL HAVE GUIDES FOR 1917 PILGRIMAGE

Determined The Public Shall Not Miss Its Opportunity To See Pilgrimage Display.

Mrs. T. L. Brumley, graduate of liberal arts '18, who has been teaching at the Y. M. C. A. Guildroom, will be a guest at Cowles Hall this week.

MUST REORGANIZE IOWA MATT SQUAD

Reignation Of Alexander Makes Necessary This Action By Schroeder.

An eleventh hour resignation has caused a new classification of the football team that will play Iowa at the conference meet Friday and Saturday.

Paul Alexander, Iowa's representative in the 150-pound class, drop- ped out of the class on the morning he was about to wrestle. Schroeder, his opponent, said, "It's no use trying to talk sense to a傻瓜 who didn't want to wrestle any more.

"We can't have you calling my act a selfish one," the sophomore added.

The Iowa boys will also meet the University of Nebraska in the dual meet at 2:30 on Saturday.

There will be other dual consecu- tives that will look after the other in the light heavy weight class, and national court backed up by public his own particular interests.

It is evident that the plan was inaugurated last week...

The plans were made by the sub- committee consisting of forty-four pages and approved.

The students in the Hamilton club con- sider: lightning striking a...

"WINTER TRACK WORK"

The Columbia Minnesota River.

"Winter Track Work" is a title of a book dealing with railroad work, written by Edward Bootin Lewis, B. U. I., C. E., '16, and dedicated to the American trackman. Mr. Lewis is assistant to the general manager of the Duluth, South Shore & Atlantic railroad. He spent many years in engineering work in Africa after finishing his work at Iowa. Mr. Lewis divided his book into his chapters which deal with the following subjects: climates and track, frost and snow, shovels, winter track tools and supplies, snow fences and snow shovels, snow handling equipment, spring floods, storing and using equipment. The book is published by the Railway Educational Press of Chicago.

It is written in simple style and is intended to be a handbook for railroad trackmen. According to W. H. Chamberlin, secretory of the railway school.

"The American people have decreed the abilities of child labor, but the task is far from being as completed. Recent investigations show children, hardly more than to-
paint, pulling the heavy roots from the field, working at night in ownership, and laboring dangerous hours in the shipyards along the coast. Who will emancipate the child workers on the farms, esteem normal growth and schooling by short-sighted parents? We do not wish to

DESCRIBE MUSEUM WORK
IN SERVICE BULLETIN
"The Call of the Wild" as the title by a recent University ses- sion lecture on the courses in muse- um sciences to be offered during the latter session, has attracted much attention in neighboring states. Prof. Stone Hill has received letters from institutions and private collectors expressing interest in the success of the work.

The bulletin brings us the differ- ence between the artificial "stuffed stuffed" animal of the old-fashioned muse- um and the modern specimen with its exact reproduction of color, shape and pose. The rapid disappearance of wild- life in every form is given as the basis of moving colored nature pictures for the motion picture screen.

The lecture will be given to the Illinois State University in Chicago. This is the first of a series of lectures to be given to the various universities in this state and neighboring states.

DURATE THURSDAY
The Irving Zenegonii speakers series will be held Thursday, March 22, as originally planned somehow to an announcement.

Dr. N. A. Bitoon addressed the business meeting of Newton on the sub- ject of "Planning Competition" last Tuesday evening.

DEMAND OF INDUSTRY FOR CHEMISTS MAKES IMPENDING DANGERS

Dr. Boyum Believes Attractive Offers May Cause Student to Regret Training.

ADVISES RESEARCH PREPARATION

Theoretical Knowledge Entirely Inadequate, He Says. Lab Experience Necessary.

Dr. Louis H. Boyum, assistant professor of chemistry and research professor for the University, has been in the growing demand for chemists for the industrial danger that students may be detracted from making adequate preparation for work.

"Going to the recent incentives which the chemical industries have revealed research chemists are in demand," he points out. "The temptation to the improperly trained chemical student to accept an apparently attractive offer after a short time to enter the industrial chemical laboratory. "Most of the men have their Ph.D. degree and have carried out original investigations before they seek employment.

"Research experience is a.extent which cannot be priced high enough by the ambitious chemical. Theoretical knowledge alone is entirely inadequate. Laboratory experience is a 'condito sine qua non.'"
