ISOLATION HOSPITAL NEARING COMPLETION

Real baseball for Iowa begins today. The games will be on the varsity diamond at 4:30 o'clock, with the mainline at the third basemen the following the opposition.

The year's work has been completed, but there is an ungratified, trust, for the leaguers are reporting for the week. The university for Monday will be given a chance to work with some of the other members of their team. After a series of games, however, it is expected that both teams will have been able to get into the regular season opposition.

The Iowa town has been working in the diamond during the past week, but will be in little better shape than the Iowa town has been working in the men groups, but working much of the time with the Iowa town.

The Iowa town in the future, with the object of the Iowa town.

Morris Has Received No Word From Chicago Alumni as to Registration of Iowa Town.

Although songs entered in the contest for the prize of $250 offered by the Chicago alumni of the University of Iowa have been sent in the same time the committee has been formed to the outside, no information has been sent out about the selections made for the prize. I confide that the results will be announced this evening by the Chicago alumni of the University of Iowa.

Iowa has been given as an extension of the opposition as much time during the course of the game that the president, said yesterday afternoon. "The transcription was sent in about March I, and since then we have heard nothing about them."

UNIVERSITY OPINION

To the Editor:

It is said that Bouvaros' wife, Xan- tippa, was the first person to dis- cover that one could not live on love and philosophy alone, but that many
jars lacked it alone. To us, there
seems to be a great deal of truth in
this statement, and the sooner a con-
science number of college people, of
eye, every year take the field step-
wise and appreciate this fact, the
better. At any rate, the university becomes a very fertile
field for the production of matrimonial
fruit. When over three thousand
young people are thrown together in
their mutual pursuits, for nine
months out of each year, it would
be advisable if something solid did
not result in a few cases, at least.
And the more criticisms that I have
after is on the apparent lack of head
work upon the part of those who dis-
like the idea. The idea of an interfer-
ence given to the future. If
the idea of an interfer-
ence given to the future. If
the idea of an interfer-
ence given to the future. If
in the field of matrimonial
interests, it could only be made to real-
ize its full extent and magnitude with
the means with which to pre-
pare the desire necessary of life.
Less, indeed, is there as many
students in the Iowa
universities in
concerned.
