"This little shoe is symbolic of many of the things of which the typical Chinese life is composed," said Miss Ruth Pasdon, Iowa, "at the last regular meeting of the Y. W. C. A. yesterday evening. As a matter of fact, this little Chinese shoes scarcely two inches long. The old Miss Pasdon has been the only Y. W. C. A. secretary in China.

"The Chinese are afraid of people stepping through their hats, but I am getting them to understand that it is quite all right for their friends to step through them-

nally, for they seem to take some of the interest in them.

All think she of their little shoes is very much taken with and the little Chinese shoe doesn't take much of time either.

Then she has her neighbors. An article of the little shoes was written because it looks like Chinese dancing and nothing else to talk about. And yet they are just as capable as we are of thinking and acting.

This little shoe because very much taken with, is quite all right for their friends to step through them-

nally, for they seem to take some of the interest in them.

Mrs. Florence Peason, formerly a student in the college of liberal arts, who left less than three years ago to take the graduate training course at Johns Hopkins, will be graduated this week from that institution. When Mrs. Florence Peason left the University, it was her intention to fit herself for hospital service in India where her husband and sister are now engaged in missionary work, but, owing to the present war conditions, she has decided on to go India to present.

A most startling revelation was made yesterday. Sylvia and the Iowan Beach have uncovered a problem that has been worrying certain "management" classes. The threat of a wave was followed from Iowa City to Cedar Rapids and from Cedar Rapids to Waterloo. There the wave stopped for three days. It was again discovered when the wave reached the Interurban station. Again the wave was taken up and followed to Iowa City. Pressey Paxson is married. "It is true," just as true as the wave. Sylvia, a student at once. Pressey left Iowa City and his cage in the new college. OUT May 18 and he said that he was on his way home. The man who is to announce it is named Capt. While visiting (17) at home, the popular Sigma Nu senior received a letter from Milledgeville, Kansas. No, it wasn't Pressey. She lives in Wilmot and besides she sent him his pin some time ago. Sylvia was able to answer. 

The whole story will be glad to hear that the social butterfly has settled in town and has sworn off dating. But the thing that led Sylvia to place every ounce of integrity in the story is that Pressey when asked about the affair, denied the whole thing and said that he would go on record as saying "there is nothing to it."

The story of the wave is interesting to anyone. It is an example of the things that can happen in a college town. The wave is a little hard to understand, but it is interesting to see how it works. The wave is a little hard to understand, but it is interesting to see how it works.

Coal Buyers Beware

The high prices charged for good coal have brought onto the market a quality of cheap coal under normal conditions could not be sold at all. Coal mines that produce a coal that is not salable under ordinary conditions could not be sold at all. Coal mines that have already bought from some of these concerns are in a position to buy good coal as cheaply as any other in the country and so essential to the military establishment.

This war is a contest between democracy on the one side and autocracy on the other for the control of the world. If we lose now by our inaction or unpreparedness all the fighting and suffering of the Revolutionary and Civil Wars will have been for naught.

Our patriotism is in trial and the test is whether or not our people will help with their accumulated wealth by lending it to the Government in this trying hour. A kindly Providence and a Government in which the individual is supreme have made all our people happy and prosperous. Now in order to preserve this liberty, it is our patriotic duty as a people to assist the Government in helping with this wealth that is ours.

This is the hour when you can render real service to your country and to the world. If we do not respond with our accumulated wealth, in the days to come it will mean sacrifice of millions, in the years to come of billions of lives of the young manhood of our State and Country.

So loyal citizens will concern themselves with the question of acquiring more wealth. His whole thought should be to preserve the principal and give the Federal Government the benefits of whatever can be made of it. Prosperity is as nothing when human life is at stake; human life is as nothing when the fate of democracy is in the balance. Therefore, all our citizens are called upon to respond to this "Liberty Loan" to the point that it becomes a sacrifice.

All banks and bank houses are authorized by our Federal Government to receive subscriptions to this "Liberty Loan." The bonds have been issued in denominations within the reach of all and the payment of any is as easy as to suit the purchaser.

Therefore, virtue of the law now passed as Governor of the State of Iowa, I call upon all our people to subscribe to this loan and in accordance therewith set apart and designate the period beginning May Twenty-seventh and Ending June Second, 1917.

"LIBERTY LOAN WEEK" and I earnestly urge that you make this week a time of generous participation and statewide manifestation of patriotism.

I therefore urge you to set your hand and heart to the work of creating the Great Seal of the State.
