WHAT ECONOMY MEANS

When an American citizen, instead of spending $5 for something he wants, docilely lends his money to the government, he performs a serious duty.

First he has reeived to the extent of 5% the use of his own property "goods and services." That is, materials and labor. To make the article or article of clothing, the factory or machine manufacturer others to take their place in the market would require materials and labor. In addition, to get the article to him in time and freight space would be required. But doing without the article, he has left free a certain amount of material to be used for his own purposes, a certain necessity of American participation amount of labor to be used in the same way, but rather in the same way, to a certain extent the transportation facilities of the country. This is the work which the government has earned to do, or to do as a matter of course. And, if it does not do, the citizen is perfectly justified in changing the policy of the government.

In the present day, it is not uncommon for large numbers of American men to be unable to find work. The days of the mass movement to work on the open road are few. There are many who are unable to find work in their own industries or who are unable to find work at all. Even in the smaller towns, the demand for labor is great and the supply is small.

Now, America has completed tremendous quantifies of foreign freight. A certain amount of freight must be done to a certain extent the transportation facilities of the country. This is the work which the government has earned to do, or to do as a matter of course. And, if it does not do, the citizen is perfectly justified in changing the policy of the government.

There was but one course for the working men to take into the war has justified and proved the wisdom, the imparative need of the country. Every American worker has some necessary amount of material which must be paid for by the government, and a certain amount of labor which must be paid for by the government. The world has no idea that any American is free a certain amount of material to be used for his own purposes, a certain necessity of American participation amount of labor to be used in the same way, but rather in the same way, to a certain extent the transportation facilities of the country.

The working man's idea that the man with a certain amount of material which must be paid for by the government, and a certain amount of labor which must be paid for by the government. The world has no idea that any American is free a certain amount of material to be used for his own purposes, a certain necessity of American participation amount of labor to be used in the same way, but rather in the same way, to a certain extent the transportation facilities of the country.

The working man in saving time. The working man in saving time. The working man in saving time. The working man in saving time. The working man in saving time.

INTELLIGENCE WORK AT WASHINGTON

Monday, March 12, furnace, heavy, Assistant professor of English in the University, has been ordered to return to Washington, D. C. for secret military duty under the intelligence department. He is to proceed to Copenhagen as assistant to the German Embassy. This information comes from a letter received by Dean W. G. Hammond from Louis, Yanco Home, New York, March 12.

STUDENTS TO WORK THIS SUMMER

Men Have Realized Scarcity of Help and Are Ready for Hard Labor.

Probably more students will spend their summer vacation doing some kind of work this year than many years past. Those students who intend to work to help with the war during the summer must be divided into two general classes: those who have had some connection with the farm and farm life and those who have never worked at the "hard chores" on the farm. The most of the men in the first class will undoubtedly be sent to the training schools, though the boys who have parents on farms are beginning to learn that farm labor is already scarce, and that they will be needed at home. In fact several students are leaving homes for this reason now.

Those in the second class will seek various kinds of employment. The seasonal and munition factories are offering alluring wages for labor; and no doubt many of our university men will work in places of that nature. Probably a large number of them will be called to the others remaining at the university who do not have the legal number of terms in federal prisons. In places of employment, the farmers and others, who have never done much manual labor, will be doing something to help along the government. Things will go on as much as they have in other years, but there will be greater determination and somberness put into the fight by those who will hold up their end of the war at home.

ROSENBURG ELECTED CAPTAIN FRESHMEN

Arthur Rosenbough, of Green- wood, was elected captain of the freshmen track team, last evening at a meeting of the freshmen squad in the gymnasium. Tryouts for spritiiers who will represent the freshmen in the set-piece varieties of athletic sports will begin tomorrow, and the team members will be selected at that time.

Captain Rosenbough wishes to announce that arrangements have been made with the military authorities to select the men to be selected for the team in this year, and that Rosenbough who runs in the best in the 100 yard dash will require to make only one hour of drill.

About thirty freshmen reported for practice yesterday, the discussion of this man and that man's high school records was enjoyed by all, and much enthusiasm and confidence was maintained over the coming meet.

HAYEKES WILL BE DELIVERED BY MAY 1

Annuals Are Completed Earlier Than Usual—1200 Copies to Be Sold This Year.

The Hawkeyes will be ready for delivery on or before May 1. They are being completed now by the publishers, Castle-Frisco Company of Oakfield, Wis. The J. M. Rich- ards, of the Hawkeyes staff, say the only cause of delay will be in the amount of transportation.

1200 copies have been ordered and will be sold, the same as last year, on the Old Capitol steps.

Mr. Harold Bigler, business mana- ger, requests that all men who expect to have next year's work, have their orders and mail addresses with him, otherwise these copies will be put on the general sale list.

The Castle-Frisco Publishing com- pany commanded the University of Iowa for being the first school to have a complete draft ready for pub- lication.

The committee also asks that all comments be made on the Hawke- eyes page, as soon as possible.
Five Hundred Thousand American Soldiers in France

We dare not delay the VICTORY now. American lives are at stake, our own safety, the safety of the whole world. If we are not to prolong the slaughter and the suffering, if we are not to risk defeat or an inconclusive peace, we must act quickly, we must put forth our every effort now.

The army is doing its part. Five hundred thousand American soldiers are in France today. There will be more tomorrow. And more the day after. We are going to send an army large enough so that when we strike, with our Allies, we can drive the German hordes back across the Rhine — so that we can win the decisive VICTORY that will make American freedom safe, and establish a just and lasting peace.

But the whole nation must take part. Our armies in France are looking to us to furnish them in ever greater abundance, the ordinance, the munitions, the supplies that will make their VICTORY possible. We must not fail them.

The Third Liberty Loan is our share in the winning of this war. Upon it depends the safety and success of five hundred thousand American soldiers in France.

LAN ORED CROSS IS
FILLING ITS QUOTA

Refugee Department Opened Under Direction of Dr. Mary K. Heard.

The Red Cross quota for the month of April is 46,000 compresses, 75 inches, 24,000 have been sent to Chicago ready for the packets used by first five thousand men.

The Red Cross supervisors are greatly pleased with the response which is being made by the United city fathers. The shop is open three nights a week to women with an average attendance of sixty a night.

The refugee department of the Iowa City chapter of Red Cross has its shop at 224 E. Washington St., directly west of the City hall. This room is furnished to Red Cross through the courtesy of Mr. E. J. Records and Mr. T. O. Loveland.

Dr. Mary K. Heard, who is chairman of the Refugee committee, says that the chapter hopes to have the room opened by May 1. The work will be done under the unit system, that is, one person will learn the work and teach it to others. University girls are invited to help make these garments. Old and new clothes will be used, but cloth clothes when demanded will be of dark color, clean and not wholly worn out. The garments when finished will be sent to headquarters at Chicago and from there sent to Belgium and France for the women and children.
