MORE VERMIN PROOF CLOTHES CLOTHES FOR BY PERSHING'S BOYS

Iowa's Innovation Please General Pershing—Requests Garments For National Army Too

TO MAKE BIG SHIPMENT ON JUNE 1

Women's Organizations All Over State Asked to Contribute to 8 Lest.

First word of the reception by the Iowa boys in France of the vermin proof garments, made by women at various points in the state and chemically treated by the State University, was received from Martha Miller, son of Homer Miller, of Denison, the man who is directing the War Savings campaign in Iowa. He indicates that the protection which they offer makes the most desirable feature ever encountered in a little less than a good suit.

More recently General John J. Pershing addressed a letter on the garments, for which the women of the state were working, to Mrs. F. C. Eastman of the University, Mrs. Eastman is responsible, and plans are afoot to make a report of the advantages of vermin proof to the authorities of France, as well as those of other states.

On the Fourth of July, Mrs. Eastman, along with the head of the women's chemistry department, will turn over all her forces and equipment to the chemical treatment of the enormous lot of garments, which will be sent to France to serve men in the National army, which, it is sometimes contended, has not received the wholehearted support of the people in the way that the mules in state organizations have.

Mrs. Eastman is appealing to the women's organizations over the state to do a still larger work next year, and make the effort even larger than the three or four shipments already made to the Iowa boys in the Rainbow division, for the garments prepared for this service are to serve an immensely greater field.

Now the work is being carried on with the university women in order that the shipment of garments from the state may reach the University before July 4. So complete has been the success of the Iowa innovation that war leaders have assured Mrs. Eastman that the government will be able to pay for the packing of the garments and to ship them to their destination in France.

Iowa is all set for the acre, but the success of our acre may make it necessary for other states to learn the chemical process and help in the war.

MILITARY NOTES

Captain Leonard A. Moser will have honky for Fort Burchard. Governor day will be held on Parsons, and the following officers: Lieutenant, Captain Wright, Sergeant Kelly and Major will be in charge.

Captain B. M. Moser received a letter from H. B. Whiting, former member of the Phi Delta, saying that he had been assigned to the 433rd mortu squad of the acre propagation division.

HONEST IS THAT OUR FORMER GUN TEAM CHIEF.

Yes, that's her—knock small sizes, and wear what—that Miss Lee will wear for the session this year. Between the laughs field, roots ahead of the rest of them. Watch her fourteen needle Iowa about her approach. Ontario states must look out.

She'll have this job finished and be in a sturdy tree tomorrow, than having the cage open the same with two pails in a mill.

(To be continued)

ADJACED SCHEDULE FOR SUMMER IS OUT

Dudes of Summer Session Events Are Issued for Distribution Among the Students

A complete scheduled schedule summer events has been issued and ready for distribution. The first issue of that program prepared by the IOWA W.C.T.U. Women's Press, will be available for distribution at the University of Illinois. The new members of the Sigma Pi fraternity, which have been under the direction of the Alpha Delta Pi sorority, are ready for distribution. The American Press association, which has been under the direction of the Alpha Delta Pi sorority, is now ready for distribution. The American Press association, which has been under the direction of the Alpha Delta Pi sorority, is now ready for distribution.

ONTO THE LAM!

I will extend from July 29 to August 1, 1918.

The girls are now in the final stages of the seasonal rush. The Alpha Delta Pi sorority is now in the final stages of the seasonal rush. The Alpha Delta Pi sorority is now in the final stages of the seasonal rush. The Alpha Delta Pi sorority is now in the final stages of the seasonal rush.

PROFESSIONAL PROFESSORS

(Ohio State Eastern)

While some of a professor's predominance on the Ohio State University campus—the professor who has been the old student up and tall over old times with whom they return to the campus for a visit, or the other type of professor, always student and fellow-professor as well—

THE OTHER DAY A STUDENT HERE ASKED ME TO DESCRIBE A FAVORITE PROFESSOR OF HIS. SAY, "OH, HE'S THE ONE THAT ALL THE OLD STUDENTS HANG OUT THE MINUTE THEY HIT THEキャンパス. HE'S INTERESTED IN EVERYTHING ONE DOES AND ALWAYS KEEPS UP WITH THE TIMES." SO IT IS THAT PROFESSORS ARE DIVIDED OFF INTO STUDENTS' MINDS AS THE ONES WHO ARE "REGULAR PROFESSORS" AND THE ONES WHO JUST "OC"

A special notice to those who are at home during vacation time

Bremers' Golden Eagle
What is the status of the German colonies?

Germany's colonial possessions, before she was shoved of them by the war, had an area of more than 1,000,000 square miles. In Africa she had the Kamerun in West Africa, with an area of 111,100 square miles and a population of 4,600,000; German East Africa of about 400,000 square miles and a population of 4,000,000; and German Southwest Africa of 230,000 square miles. The Kamerun, German East Africa, and German Southwest Africa of 230,000 square miles. The Kamerun, German East Africa, and German Southwest Africa, have been ceded to France. In one year, 1914, Germany's expenditures on her colonies amounted to upward of $1,000,000, with her trade with them reached a total value of about a third of this sum.

The Daily Iowan says to us:

Don't leave for the summer before you order your Coal for next winter. If you fail to act now, you are in grave danger of being without fuel later. Be warned. The situation is getting worse rather than better. Read what the Iowa representative of the U. S. Fuel Administration says to us:

"The proposed increase in freight rates advocated by the government will seriously affect your coal supply as well as the price. There is but one way to get your usual tonnage this year. That is by Summer Orders. Take advantage of the situation to urge the movement now from mine to consumer. It is a question of what kind of coal you want or your customers want. It is the kind you get. It's COAL."

The U. S. Fuel Administration has named June 30 as National Coal Week. Do your bit to make it a success. Use the slogan, fire your trade with the patriotism of the idea...It is up to you to get your tonnage promptly and up to your customers to prevent a fuel famine marked by suffering and want in your community.

War: What is the status of the German colonies?

The Daily Iowan: "Don't leave for the summer before you order your Coal for next winter. If you fail to act now, you are in grave danger of being without fuel later. Be warned. The situation is getting worse rather than better. Read what the Iowa representative of the U. S. Fuel Administration says to us:
