BIOLGY CLASSES LARGE

No Pre-Medical Take Course in Animal Biology This Year

The animal biology classes for this quarter, under Dr. G. L. Houser, are larger than ever before with only liberal arts students in the review. One more laboratory section has been made ready to accommodate the unusually large extention.

On account of the government pre-medical requirements during the term of the A. Y. C. animal biology was required the first year. Pre-vious physics and chemistry were the first year requirements.

This year's classes are being shifted back as in previous years before the A. Y. C. N, which leaves all A. Y. C. pre-medical students in their first year's work completed and the first year's biology course completed. This unusual condition puts last year's pre-medical in their first year requirements this year.

MORE INSTRUCTORS FOR INCREASED ENROLLMENT

The unbalanced enrollment in the University this year has made necessary the appointment of new instructors in several departments.

Donald L. Murray, appointed assistant in the history department, received his master's degree at the University of Wisconsin, taught as an associate professor at Brown, and was instructor here during summer school.

R. E. Hovind, '21, will be assistant demonstrator in prothodontic laboratories.

James McLeary, a graduate of the University of Minnesota, who has been instructor at St. Thomas College at St. Paul, will be instructor in the English department, and E. F. Carpenter will be an assistant in English.

Ernest E. Lindor has been appointed in the department of education. He has been a student in the graduate college. Cecilia Hitter will be junior in the depart-

ment of student health.
