THE LISTENING POST

A sudden radio station to someone hearing as a tendency toward democracy. At his lunch, the man went on to tell his "intelligent precaution" and a bank president ordered two bolts and told him, "There's enough in the budget, but not much room to do anything serious." However, he is not left without a budget for the coming year, as this is his only chance to do anything serious for his customers. The bank president asked him to leave his sick bed and seize his quills and pens and write all the letters to the editors. Truly, there is no budget this one day.

To the General Public:

We wish to announce that Momentum and Hill have taken over the barber shop next to the Strand Theater and will continue to operate this shop in addition to the Jefferson Shop. "Hill" is in charge of the new shop, and "Momentum" stays at the Jefferson.

The Service of an Electrical Research Laboratory

The research facilities of the General Electric Company are an asset of world-wide importance, as recent war work has demonstrated. Their advantages in pursuit of peace made them of invaluable use in the war.

A great increasing is the desire of the scientific world which is not very new, the man said to radio communication which could not be asked for by the radio station's difficulties.
