A P. L.

A P. L. 1, when it meets next to elect new officers and to organize the senior class, faces an issue that is typical of the high school and college years—and in a lesser degree in the world in general. The question here is one of considerable criticism.

The seniors of Mrs. Turner’s class are faced with the problem of trying to decide what the senior class contains in the way of leadership for the next year. The question of who is to take charge of the class, and how they are to organize, is of fundamental importance to the success of the class.

Our leaders in the class, therefore, must also be leaders in the school. They must be able to carry the confidence of other students and to be able to lead the class toward success. In this way, they can help the junior class to understand what the senior class is doing and to learn from their experience.
