GERMANY LAYS PLEITGE BEFORE UNITED STATES

Asks Help In Paying Reparations Debt; Wants Economic Conference

Washington, Dec. 16—Germany as part of a great international reparation program bringing toward American intervention in Europe has formalized its request in a letter to the State Department, to seize American property in Germany, and from those conferences with leaders of the same and the organization leaders, with American and foreign and committeemen with prominent Americans, President Harding and Secretary of War to a joint project in the event of preventing an economic crash in Europe. These plans up to which Europe is placing hopes for its survival probably can not be realized for generating an economic crash in Europe. To avoid it Germany is adding to its list of requests for introduction of an American financial expert to Europe as a part of the intervention.

Germans indicate that in addition to paying its debt Germany hopes to have American financial experts here to see what extent our National Defense should be able to assist the United States if the nation supersedes a great number of expert financial people off to pay the reparations obligations for the responsibility of the war.

Germany indicated that no other nation of Europe wants the aid of the United States as much as her country can be offered by us. For she would be glad to get our help in the support of this country is of another character to settle the reparations question. She also would heartily welcome an economic conference to Washington in the treatment of the position. It was her offering.

The Faith Healer—A Criticism

By
Harvey Craig

The Faith Healer is the work of a young English author, Richard Coombes, who has already emerged from the shadow of Henry James, the master of the genre. His novel is a thoughtful and perceptive exploration of the nature of faith and the human condition.

Coombes's novel is set in a small English town during the early 1900s. The story centers around a young man named Thomas, who is struggling with his faith and his place in the world. He meets a charismatic faith healer, who promises to give him answers and help him find his way.

Coombes's writing is infused with a sense of wonder and mystery, as he explores the power of belief and the human ability to find meaning in a world of uncertainty. His characters are fully drawn and their experiences are both heartbreaking and inspiring. The novel is a thoughtful and introspective exploration of the nature of faith and the human condition.

The Faith Healer is a powerful and moving work of fiction, and Coombes is a writer to watch. His novel is a testament to the enduring power of belief and the human capacity for faith.
