SPRINGTIME IS SWINGTIME!

Clandening Describes Disease Carried to U.S. from Japan

BY LOGAN CLANDENING, M.D.

All who have followed the drug news will have heard of the recent death of a man in New York from a mysterious disease which is described as 'Japanese disease' or 'Japanese plague.' The disease seems to be an epidemic of meningitis with symptoms of appendicitis.

A peculiar case was recently treated by Dr. E. C. B. White of New York. The patient, a man who had recently returned from Japan, had all the symptoms of appendicitis and died of meningitis. Dr. White believes that the disease may be transmitted by air and water and that it is likely to spread to other countries.

In Japan, the disease is known as "Japanese disease," and it is believed to be caused by a strain of meningococci. The disease is characterized by high fever, headache, and a sudden onset of symptoms, which may progress rapidly to death.

The disease has been confirmed in several cases in the United States, and precautions are being taken to prevent its spread. The U.S. Public Health Service has issued a bulletin warning against the import of meat and other products from countries where the disease is prevalent.

Before receiving the degree, he wrote and produced his first play, "The Woman in the Window," which was a great success. The company later produced "The Man from the River," "The Good Woman of Sion," and "The Tamer." All these plays were well received and performed to critical acclaim.

This year, the company is presenting "Judas Iscariot," with music by Prof. Philip G. Clapp. The play is based on the life of Judas Iscariot, the betrayer of Jesus, and is a powerful portrayal of the man's tragic downfall.

In Iowa City

Here is Iowa City; Used Car Dealers Sold

USED CARS 80

USED CARS

During National Used Car Exchange Week, March 5 to 12. They appropriated $1,250,000 for one week's advertising. They invested the bulk of this money in newspaper space throughout the country.

They enlisted the active cooperation of the automotive dealers.

And what happened? In one week's time $50,000,000 worth of used cars were sold.

Dealers' used car stocks were greatly reduced.

In some cities the week ended with a shortage... and dealers began to advertise that they wanted to buy used cars.

And that's not all. The used car campaign in newspapers caused an immediate increase in new car sales; cleared the way for still greater sales for Spring; pointed to a definite upturn in car production; put new life in the automotive industry; brought millions of dollars into circulation.

What does it all mean? It means one more dramatic and convincing proof of what has been proven so many times before: when there is a real selling job to be done, newspaper advertising can be counted upon to do it... quickly, taughly, directly, economically... for the automotive advertisers, or for any other advertiser.
