Shenandoah, Aug. 25 (AP) - Saved by two newspaper editors from Kansas, student peace records in Pedro High School were found among the newspapers in the hands of two of the editors yesterday. The papers were handed over to the school yesterday.

Terrorist strikes on wall

FBI, as police and private security forces searched the area near the Student Service Co-op yesterday, discovered two packages of dynamite in a basement of the building. The packages were removed and removed from the area. The building was closed to the students. The packages contained 15 pounds of explosive material and were believed to have been placed by members of the All-American Youth Corp.

Myers, of Chicago, said the All-American Youth Corp has been warned to remove the materials. The group has been active in the past in Chicago and has been suspected of involvement in several bombings in the city.

The packages were found during a search of the building by the FBI and the Chicago Police Department. The FBI has been conducting a nationwide investigation of the All-American Youth Corp.

The packages were placed in the basement of the Student Service Co-op yesterday afternoon. The students were notified of the finding and were instructed to leave the area. The police and the FBI were on the scene yesterday afternoon.

The students were later released, but the building was closed to the students. The packages were removed from the area and the area was sealed off by the police and the FBI.

observers were somewhat relieved when they saw that the invasion was not to be.

Signed by, and headed by, no substantial foundation, the action was very

naturally rather a hasty matter of the day, and the German border on the

southern part of the country was invaded by German forces.

The best possible information on the possibility of a new German attack was

gathered from the beaten nations of Europe, but the German invasion

of Poland took place without warning.

The last fact known for cer- 

tain was that Hitler had ordered the invasion.

It was reported that for these
