Jews Were Undismayed

The president, with his dedication to the embarkation for world peace, was shown yesterday in his speech to the United States Atomic Energy Commission.

Jews were undismayed by his reference to a "Jewish' Chair, said to be in the cards. 'We should be able to write a chapter that will make it difficult to say that the Jewish idea of world unity and democracy is not a part of the modern world."

The speech of the president was an encouragement to the Jews, who have been used to the idea of a "Chair".

The Jews are not undismayed by the reference to "Jewish'

Chair, but they are not discouraged by it.
