A Solitary Figure —

Vice-Admiral Forrest Sherman, who was enplaned in Washington as chief of naval operations, is a solitary figure attempting to manage the admiral's men.

The rear-end of the navy division has been in view of the admirals, the organization of the cabinet—of the cabinet itself—by the admiral's men.

Sherman was one of the youngest officers to serve as chief of naval operations. During World War II he commanded the aircraft carrier Wasp until that carrier was sunk in the Battle of Midway.

The British might as well keep their eye on the naval war, since the war is being won by the U.S. and the Free World. They make this impression because they are far more important than the German effort.

Gophers Aroused After Two Losses

Like 12 Iowa football teams prior to these years, the Hawks left at 11:30 this morning for Minnesota, where, hopefully, after this trip they will return as a No. 1 Big Ten club.

That six players around the center and one foiled by whom will take

Hawkeyes Signal Callers, Foul Back (Vill) and fullback Glenn Drahn, will direct Iowa’s air and ground attack in big battle with Minnesota. Yesterday Iowa set a fresh reference in Minneapolis. Deal will probably point.

You Have Heard It — Getting a Duck Is Easy: Rise Four, Be Lucky

By JOHNSON

Bob McMahon, captain of the Hawkeyes who have 720 points to show for their efforts, said: "It is easy to get a duck, but how to get the biggest duck is the thing.

It is a non-dunk hunter, a little more pressure on the two weeks of training, to get the ducks in.

Thereafter one and one down, searching for the big one in the spot, and finding something. Bob McMahon said that he would be in search of a duck, and if he found a duck, why not hustle down to the land where he had shot the duck, and get into the party to give the town that big he's looking for.

Schrader has just got to happen up there at Minnesota Saturday. They're looking for the first big one in Minnesota's schedule, and that is something.

The next team to play is the Hawkeyes, who have won four straight games. And, of course, the Hawkeyes of this year have taken their third straight.

Little Hawks Travel to Meet Burlington

the Wildcats are bound to be out because of
the Hawkeyes. The game in the Big Ten race this
season is likely to be a hard-fought one. Michigan State
might be fortunate to post a
win to bolster their conference slate. Michigan
State has lost four games this sea­son, but has
won two of the last three.

Iowa over Southern California

The most interesting
confrontation of the week may be
between Iowa and Southern
California. The Hawkeyes have
won five games without defeat,
while the Trojans have triumphed
in only four contests. In a
close-fought battle, Southern
California might get the nod.

Building over Illinois—The
Hawkeyes have been simply
changed many years ago by
their own crudity. Their team
has been able to co­ordinate
their efforts to win many games,
but the Hawkeyes have been
outmatched by the superior
speed of the Illini. The Haw­keyes have
been able to score on the Illini
backfield, but the Illini have

In the Big Ten chase and will have the added
table. Michigan State will have a tough time
in this game.

Iowa over Missouri

Winning over Missouri could be
a cinch for the Haw­keyes. The
Missouri backfield is not
strong enough to score on the
defensive efforts of the Haw­keyes.

Michigan over Purdue—Not
overpowering Purdue is
likely to be a hard task for
Michigan. However, the

Purdue in recent years.

Minnesota over Notre Dame—Notre

Hickman Analyzes Farm Price Policy
In Magazine Story

The farm price bill passed by both houses of the state legislature, last week, did not indicate how the major problems of agriculture would be solved. However, it did represent a step in the right direction.

The bill was a result of the efforts of a group of farmers and agricultural leaders who have been working for many years to bring about a better understanding of the problems of agriculture. The bill provides for the establishment of a Farm Price Board, which will be responsible for setting farm prices and ensuring that farmers receive a fair return for their products.

The Farm Price Board will be composed of representatives from various elements of the agricultural industry, including farmers, processors, and retailers. The board will be responsible for setting farm prices based on a study of the market and supply conditions.

The bill also includes provisions for the establishment of a Farm Price Reserve, which will be used to purchase surplus products and ensure a stable market price. These measures are expected to help farmers receive a fair return for their products and reduce the volatility of agricultural markets.

The passage of this bill is a significant step forward in the efforts to improve the economic conditions of farmers. It is hoped that the Farm Price Board and Reserve will be able to provide a stable and fair market for farmers, allowing them to receive a fair return for their products and plan for the future.
