U.S. to Experiment With New A-Bombs At Eniwetok Atoll

WASHINGTOM—The United States has announced that it will conduct a series of atomic bomb tests over the Marshall Islands this week.

The announcement was made at the White House on Tuesday, when President Eisenhower presented the enburning of the first hydrogen bomb to the nation.

The President said the tests were designed to demonstrate the United States' ability to create a nuclear weapon capable of destroying an entire city.

The tests will be conducted under the supervision of the United Nations, and will involve the use of a single bomb. The bomb will be detonated in the air, and the resulting mushroom cloud will be visible from the ground.

The President said the tests were part of an international effort to prevent the spread of nuclear weapons.

The tests will be conducted in two stages, with the first stage involving the use of a smaller bomb. The second stage will involve the use of a larger bomb.

The tests will be conducted in a remote area of the Marshall Islands, and will be monitored by United Nations observers.

The President said the tests were intended to show the world that the United States was committed to the peaceful uses of atomic energy.

The tests will be conducted in a manner that will not endanger the lives of those living in the area.

Power Restored After Blast at Cedar Rapids

Service to electrical-operated businesses in the Iowa City area was restored completely after a gas explosion in Cedar Rapids yesterday afternoon. A series of such explosions in Cedar Rapids and elsewhere have caused a great deal of concern and damage to property.

Cedar Rapids hospitals and police were unable to draw upon their usual resources to cope with the emergency. The Iowa Electric Light and Power company in Cedar Rapids dispatched emergency power to Cedar Rapids and other areas.

S t u t s man, c o u n t y s t e a l e r h a v e a r r i v e d, m a k i n g l o w.

Employes at many Cedar Rapids' manufacturing cases were idle for four hours.

A fuse was blown on Tuesday when a fuse pump was unable to run because of a short circuit in the Cedar Rapids plant, was forced off of its line. The Cedar Rapids Light and Power company in Cedar Rapids is responsible for the operation of the plant.

Colorado College in Opener

The first look at the 1939-40 basketball season is today when the University of Chicago comes to the Civic Center at 7:30 p.m. to play the University of Colorado, which has been practicing for a week in the gymnasium.

Colorado's defense, a strong point last year, has been improved by the addition of some new men, and the attack has been improved by the return of three of the best men who were hurt last year.

Colorado has the best men on the outside of the state, with Bob Durland, 6-foot, 11-inch, and Bob Whitney, 6-foot, leading the team.

The game will be a good one, and the fans are expected to turn out in force.

Harry Hart, Year's Top Player

NEW YORK — Louis Hart, a 6-foot, 11-inch center, was named winner of the 1939-40 National Basketball Association's Most Valuable Player Award for the season.

Coach Harry Combes has named Hart as the Most Valuable Player for the second straight year.

Combes said: "Hart is a player of the highest order. He has been a constant contributor to the team's success and has played a key role in our championship run."
Newspaper clipping from November 11, 1941, discussing the Iowa State University Bookstore's Christmas card offer and featuring a story about a speech debating debate. The clipping also mentions various local and national news items, including a mention of the Iowa State University's public speaking club. The clipping is from a daily newspaper and includes advertisements for the University Bookstore's Christmas cards and a promotion for smartly styled lamps. The text is written in a newspaper format, with headlines and paragraphs typical of a news article.
NEW YORK -- Good news for those who want to quit smoking. The drug RU 486, already approved for use in France, may help smokers kick the habit.

The drug works by blocking the formation of certain chemicals that encourage smoking behavior. It is the first drug of its kind to be approved for smoking cessation.

People who have been unsuccessful with other methods may find this drug helpful. It is a pilot study, and more research is needed to determine its effectiveness.

The study involved a small group of volunteers who were given RU 486 in pill form. They were followed for six months, and their smoking habits were monitored.

The results showed that the drug was safe and that it helped some people reduce their smoking.

However, the study was not large enough to determine how effective the drug is in the long term. Further research is needed to determine the drug's potential for helping smokers quit.

In the meantime, smokers who are interested in trying RU 486 should speak with their doctors to see if it is a suitable option for them.
Firemen Training School to Be Held Here

A four-year firemen's training school will be conducted by the city through the eight of De- cember in Mason City. The fire department, through the cooperation of the various insurance companies, will provide instruction in the latest developments of fire fighting and will be given the same quality of instruction that will be given to the public by the city. The school will consist of practical instruction in fire fighting and will be offered to all firemen in the city.

A new professional magazine for firemen, "Fireman's Magazine," will be conducted by the city. The magazine will be published every month and will contain articles on the latest developments in fire fighting.

A new fireman's pension program has been held in Iowa City. The school conducts classes in fire fighting and will be offered to all firemen in the city.

Magazine Prints Instructors' Article

The Johnson county chapter of the American Watch Manufacturers Association held a supper at 6 p.m. Wednesday, in the Elgin Watch Company of Mason City.

The chapter is made up of more than 40 watchmakers and watch repairmen in the area. The chapter is divided into four sections: the town section, the rural section, the factory section, and the school section.

The chapter is working toward improving the quality of watches and watch repair. The chapter is also working to improve the working conditions of the watchmakers and watch repairmen.

A new professional magazine for watchmen, "Watchmaker's Magazine," will be conducted by the chapter. The magazine will be published every month and will contain articles on the latest developments in watchmaking.
