Dear Reader,
Iowa Speed Limit Not Needed

While the Iowa safety commissioner was asked if traffic points for exceeding the speed limit, a few people laughed, others sympathized with his problem, and everyone recognized the temptation to traffic safety by bringing it to the Iowa point system.

And it is expected, when one step toward what appears to be a tremendous saving of lives, the highwaymen usually try to push through other measures which might seem comprehensive but actually are - if harmful - unnecessary.

Many people are under the impression that speed is in itself the cause of the majority of accidents. This is because most surveys, statistical, etc., ignore such factors as driver error and carelessness which account for most of the accidents.

A closer survey by Mathew Seltzer, the director of traffic and motorcycle for the Chicago Motor Club, is revealing reading and sheds light on a serious condition that has been dominant for some time on our roads.

Seltz found that the majority of accidents involved vehicles traveling between 30 and 60 m.p.h., and that there are many fatal accidents caused by high speeds of 50 m.p.h. or more. Studies show that in 60 m.p.h. or more, there were rolling over 60 m.p.h. accidents.

The conclusion of Seltzer is that there is no correlation between accident rate and top speed regulations. The report also stated that fixed speed limits do not fix the reckless driver, and only serve to make the careful driver who wishes to drive 60 m.p.h. on a highway post 60 m.p.h.

Town-Gown Cooperation

Iowa City and the State University of Iowa are making steps of a nationally well-known co-operative idea, under the guidance and efforts of the town-gown cooperation committee, a group of residents and students of Iowa City and the University of Iowa.

This committee is working to improve the traffic situation in the city, and to bring about a closer cooperation between the city and the university. They are working towards the goal of a safer and more pleasant environment for all residents of Iowa City.

General Notices

The Daily Iowan is a newspaper published weekly by the students of the University of Iowa, at Iowa City, Iowa. It is published Tuesday and Thursday. The daily newspaper is a studentrun publication and it is not affiliated with the university administration. The opinions expressed in the newspaper are those of the students and do not necessarily reflect the views of the university administration.

End of An Era

Passenger Trains Becoming Extinct

By ARTHUR EDSON

To anyone brought up in a small town, the state of the nation's capital isn't exactly what it was from the nation's capital. There were once small towns, townsfolk, a main street, and a passenger train.

No, it was a pleasant little item which predicted that, except for some trams, the passenger coach would go out of existence in the near future. No passenger train? What kind of a transportation system is this?

Everyone knew the old passenger coach, and save for the rare tourists, the system would disappear by 1965 and all the old coaches would be removed.

Then at last, in 1960, the picturesque little item disappeared from the main office of about West Approach to downtown.

In other words, the passenger train, in its own way, was dead.

For a railroad town of 30 or 40 years ago had a personal, community service on a regular basis. Boyhood Memories

The only thing left was to review history, if the same town which the passenger train would go the first one up - any more than an Iowa boy could recall any old days.

But there was one winter's day when the snow covered mountains, when drifts were high and snow over the tracks, could anything operate in such weather?

Then, how came it all? The engineering had been done in a clever way, the road was cleared, there were few snow plows, and a train could be stopped in time.

Could anything operate in such weather?

A Security Blanket May Be Found For Students

By L. T. HADLEY

The University Student Government has formed a security blanket in an effort to help students who may be feeling insecure.

Labor, Management Bureau
To Expand Special Services

Special educational services to Iowa labor leaders and administrators have been announced by William F. Brink, director of the Bureau of Labor and Management at the University of Iowa, for the 1957-58 school year.

The bureau will hold the Fall quarter beginning October 15, with evening sessions scheduled for Mondays, Wednesdays, and Fridays. Students will be required to attend at least three courses.

The bureau will offer courses in the fields of labor relations, personnel management, labor law, and collective bargaining. The courses will be taught by faculty members of the University of Iowa.

In addition to the regular Fall quarter sessions, the bureau will conduct institutes and workshops for industrial and labor leaders in the state. These programs will be held in various Iowa communities during the coming year.

The bureau's services are part of the University's continuing education program, which provides courses for city, business, professional, and labor groups in Iowa.

To Register

Requests for Fall quarter courses should be directed to the bureau. The bureau will guide students in selecting appropriate courses and will provide information on the nature of the courses offered.

The labor education program serves as a supplement to formal education, providing opportunities for practical experience in the field of labor management. The program is designed to help labor leaders and administrators develop their skills and knowledge.

Last year, some 110 union members attended classes.

SUI's Davis
Receives $350
Award For Study

Tom L. Davis, head of the administration of the United Steelworkers of America, has received a $350 award from the University of Iowa for his study of labor relations.

Davis' study involved a comprehensive analysis of labor-management relations in various industries, with a specific focus on the steel industry. The study was conducted under the direction of Dr. J. A. Cooper, head of the Department of Industrial Relations at the University of Iowa.

The award, which is presented annually, recognizes outstanding contributions to the field of labor relations.

TCU To Be Toughest Opener For Hawkeyes Since 1954

By LOU YOUNKIN
Sports Editor

Iowa's 7-0 gridiron win with TCU here yesterday will not be a just the beginning for the Hawkeyes since their opener in 1954 when this season's Hawkeyes also beat Texas. It has been 19 seasons.

The Hawkeyes were more impressive in their first game Saturday when they defeated Kansas at the latter's home ground, 48-6 and the part of the TCU game that looked good yesterday is what makes Iowa fans wince . That is depth.

Truman's first two games were comeback wins, the second upset gave the Hawkeyes six points and the third third unit came up with a 1-1-1-1.

I have no doubt the Iowa team can handle the TCU No. 3. In fact, on at least one even, the problem lies in whether or not Iowa can make Eastern Football's reserve pin end played hill with the TCU Hawkeyes reserve.

If the Hawkeyes have a weakness, and that won't be known until late in this season, it is offense strength. The Iowa offense is strong, probably the strongest in years, but the defense is a question. Scored second Interior between the first team and a defensive handicapped that lacks height could be disastrous.

Iowa defensive ends, however, have never given the Hawkeyes a bad pass, whether in attack at the Port Washington or pass leadership in the other end and is a real comer .

Iowa fans wince. That is depth.

Saturday's for him-he was not the ace he was supposed to be. Now a much more important role. Miller, a sophomore who bears a striking resemblance to his predecessor, is being groomed as a defensive end.

Miller however is being groomed as a defensive backfield that lacks heighth could be disastrous.

Another valuable practice time.

Walkouts Halt Auto Output By Big Three

DISTRICT 8 - A wave of walkouts involving union auto production workers took place in four Chrysler plants.

The United Auto Workers Union Local 423, which represents 1,500 workers at Chrysler's St. Louis plant, said Monday it was seeking to prevent the company from moving some workers from the plant to a second plant in the city.

More than 500 workers were called out by the union, which represents workers in the company's蔚然系 auto division.

The walkout was the latest in a series of strikes that have hit the auto industry in recent weeks.

Reps cited as reasons for the strike:

- The company is trying to force workers to accept lower pay.
- The company is cutting back on production.
- The company is not providing adequate training for new workers.

The walkout was over issues related to the company's recent decision to move some workers from the St. Louis plant to a second facility.

The union has been negotiating with Chrysler for a new contract since last fall.

The company has offered to give workers a $1-an-hour raise, but the union wants a $2-an-hour raise.

The company also wants to take away some of the workers' benefits, including health care.

The walkout is the latest in a series of strikes that have hit the auto industry in recent weeks.

Bodies Of 6 GIs Killed In Crash Returned By Reds

KASH, Turkey-The bodies of six American airmen were flown from Turkey to Rome on Monday for burial.

The airmen, members of the United States Air Force, were killed in a plane crash in Kashmir on Sept. 11.

Their bodies were turned over to the American government by the government of Pakistan.

The burial will take place on Tuesday in a small ceremony.

Reuther Walked Out Of Talks

The UAW's full-time president, Walter Reuther, walked out of a meeting with General Motors officials on Monday.

Reuther had been meeting with the company's top executives to negotiate a new labor contract.

The meeting was held at the company's headquarters in Detroit.

Reuther left the meeting after the company announced that it was considering cutting wages and benefits for its workers.

"We are not going to accept the company's offer," Reuther said.

The UAW represents about 1.5 million workers in the United States.

The company had offered to give workers a 1-cent-an-hour raise, but the union wants a 2-cent-an-hour raise.

The union also wants to take away some of workers' benefits, including health care.
