Bonnardt describes Play as 'Sex, Religion And Loneliness'

Robert Bonnardt, New York playwright and director of "The Green Pastures," has written a play that is set in the deep South of the country. The play will be produced by American Shakespeare Festival in Stratford, Conn., and is scheduled to open in theaters in New York next month.

The play is set in a small town in Mississippi. It tells the story of a young man who is lured into a life of crime by his father's friend, a notorious gangster. The young man becomes involved in a drawn-out legal battle with the police, and finally, he is sent to prison for many years.

"This is a story of the conflict between the law and the people who believe in the law," Bonnardt says. "The play will show how the body of the law can be used as a weapon against the people who are being oppressed by it."

The play was written in collaboration with Norman Mailer, the famous American writer and journalist. Mailer has been involved in many political causes and has published several books on social issues.

Snow Flies in Sioux City, Cold Weather Moves In

By THE ASSOCIATED PRESS

The wind chill temperature in the Midwest dropped to around 30 below zero Friday morning, bringing a sharp drop in temperatures for the region.

The severe cold is expected to continue through the weekend, with temperatures expected to remain below freezing for the next few days. The National Weather Service has issued a winter weather advisory for the area, advising residents to take precautions against the cold.

SUI's Herky Hawk Ends A Poor 2nd

Herky the Hawk, former student of the University of Iowa, has been leading the university's football team. He is now the subject of a new book, "Herky's Tale: The Story of a Hawk at the University of Iowa." The book, written by University of Iowa historian Richard Carlin, is scheduled to be released this fall.

"Herky's Tale" tells the story of Herky the Hawk as he leads the Hawkeyes to victory in the Rose Bowl game. The book also explores Herky's life off the field, including his relationship with the University of Iowa and the city of Iowa City.

Weather Forecast

Mostly Cloudy: Showers

TYPICAL WINTER WEATHER

The temperature will be in the low 40s, with a chance of scattered showers later in the day. The wind will be from the northwest at 10 to 15 miles per hour.

Reports Fail To Categorize Caffeine

BY JAMES LANDSMAN

The recent reports on the effects of caffeine on human health have failed to categorize the substance into clear classes or categories.

The reports have been published in major medical journals, including the New England Journal of Medicine and the Journal of the American Medical Association. However, many experts agree that the reports are too vague and do not provide clear guidelines for the use of caffeine.

Doomsday Bug, Undetected, Deadliest Ever

A new strain of the "Doomsday Bug" has been discovered in a remote corner of the world. The bug is highly resistant to existing antibiotics and could pose a serious threat to human health.

The bug was discovered by researchers from the Center for Disease Control and Prevention, who have been studying emerging infectious diseases for several years.

"This is the most dangerous strain of the bug we have ever encountered," said Dr. James Landman, lead researcher on the study. "It is resistant to all known antibiotics and could cause a global pandemic if left unchecked.

Reports: Low Doses of Radiation May Protect Against Cancer

BY DOUGLAS SCHUYLER

A new study published in the Journal of the American Medical Association has found that low doses of radiation may protect against cancer.

The study, conducted at the University of California, San Francisco, found that people who received low doses of radiation for medical purposes had a lower risk of developing cancer than those who did not receive radiation.

"This is a significant finding," said study author Dr. John Smith. "It suggests that low doses of radiation may have a protective effect against cancer.

Tungsten In The News

A new study has found that tungsten is being used in the manufacturing of high-tech materials.

The study, conducted by researchers from the University of California, Berkeley, found that tungsten is being used in the production of advanced ceramics, which are used in various industries, including aerospace and electronics.

"The use of tungsten in high-tech materials is growing rapidly, and it is becoming an important material for the future," said study author Dr. Mary Brown.

Studying the Effects of Caffeine on the Brain

A new study published in the Journal of Neuroscience has found that caffeine has a significant impact on the brain.

The study, conducted at the University of California, Los Angeles, found that caffeine affects the brain's ability to process information and can improve memory and attention.

"This is a groundbreaking study," said study author Dr. John Smith. "It suggests that caffeine may have a significant impact on the brain and could be used to improve cognitive function.

The Death of John F. Kennedy: An Investigation

A new book, "The Death of John F. Kennedy: An Investigation," has been published by the investigators who were involved in the investigation of the assassination.

The book, written by Robert Kennedy, the brother of the late president, provides a detailed account of the investigation and the events leading up to the assassination.

"This is a comprehensive account of the investigation," said Kennedy. "It is filled with new information and provides a detailed look at the events surrounding the assassination.

See You Next Month!
Good Listening—Today On WWSI

SWINGING AND "Real" Patti—University Radio Station WWSI will be featuring a discussion of the Christian interpretation of the Gospel on "Beyond the Pulpit," the Thursday morning radio show. The show is located on the fourth floor of the Old Chapel, and features music and poetry from the nights of the week. The show also features a discussion of the Christian interpretation of the Bible, with a discussion of the role of the Church in the world today. The show is broadcast weekly, and is hosted by Dick Brunkan, a member of the University's staff. The show is broadcast on the morning of Thursday, November 9th.

Books: Mystery Writer Analyzes Feminine Readers

BY MARILYN HENCH

NEW YORK — Women, as any other group, have their own reading tastes and preferences, and one of the most interesting things about literature is the way in which it reflects the changing attitudes of the times.

The recent publication of the book "Women's Reading" by Prof. Helen S. Breslin, a member of the English Department, is a useful contribution to the study of literature and the role of the book in society. It is a study of the ways in which women read and the reasons why they choose to read certain books.

The book is divided into two main sections: "Women's Reading" and "Women's Reading of Women." The first section deals with the general issue of women's reading, while the second focuses on the reading habits of women who have written about other women.

"Women's Reading" is a valuable contribution to the study of literature and the role of the book in society. It is a study of the ways in which women read and the reasons why they choose to read certain books.

A Grant For Lasansky, Students Opens This Week

By ARTHUR RUSSELL
Staff Writer

Marvin Lasansky, EIU professor of art who has made considerable contributions to ETU's fine arts program, has organized an exhibit which is opening this week at the new city courthouse. Evansville Times, January 26, 1958.

Lasansky is the chairman of the art department of the University of Illinois, which is one of the leading art institutions in the Midwest. He has been instrumental in establishing the art department at the University of Illinois, and has been recognized as one of the outstanding art educators in the country.

Lasansky's exhibit is being held in the courthouse's new art gallery, which was constructed specifically for this purpose. The gallery is located on the first floor of the courthouse, and is open to the public during regular business hours.

The exhibit features works of art by students from the University of Illinois and other institutions in the Midwest. The paintings, sculptures, and drawings are widely varied in style and technique, and provide a rich and diverse selection of art for visitors to enjoy.

Lasansky's students, who are majoring in art, are also being featured in the exhibit. They have created a variety of works, including paintings, drawings, and sculptures, which showcase their unique talents and styles.

The exhibit is free and open to the public, and is a wonderful opportunity for visitors to appreciate the artistic talent of the students at the University of Illinois and other institutions in the Midwest. It is a testament to the quality of education being provided in the field of art, and is sure to be a hit with visitors of all ages.

New SUI Recreation Society To Discuss Job Opportunities

The newly organized SUI Recreation Society will host its first meeting at 7:30 p.m. on Wednesday, February 2, in the SUI Union. The society will be open to all students and faculty members.

The meeting will provide an opportunity for members to discuss job opportunities and how to best utilize their skills and experiences. The society aims to create a supportive and inclusive environment for all members, regardless of background or experience.

The first meeting will feature an introduction to the society and an opportunity for members to share their ideas and suggestions for future meetings. The meeting will be led by the society's leadership team, which is currently being formed.

The society is open to all students and faculty members, regardless of background or experience. If you are interested in attending, please contact the society at recreation@siu.edu for more information.

The society's mission is to provide a supportive and inclusive environment for all members, and to encourage networking and collaboration to achieve academic and professional success.
Banks Becomes 1st To Repeat
As National League's MVP

By Jon Tucker
Staff Writer

Minnesota's football team had a dream season in 1937 when it won a national championship. The Gophers were the national champions for the second consecutive year, and they did it with an impressive 11-0-1 record. The team was led by the legendary coach Bud Grant, who built the program from the ground up.

Grant was a master strategist, and he had a winning formula. The Gophers played a fast-paced offense, scoring an average of 42 points per game. They had a powerful running attack, led by tight end Ernie Banks, who had 323 rushing yards and 87 points. The Gophers also had a strong defense, led by the star linebacker Bill Hewes. He had 56 tackles and 8.5 sacks.

Minnesota's offense was the most dominant in the nation, averaging 42 points per game. The Gophers had a balanced attack, with the running game and the passing game both providing key contributions. Quarterback John Blandon was a key player, completing 27 of 46 passes for 301 yards and 4 touchdowns.

The Gophers also had a strong defense, led by the star linebacker Bill Hewes. He had 56 tackles and 8.5 sacks. The Gophers also had a strong defense, led by the star linebacker Bill Hewes.
