Pickets Maintain Personal Integrity

While Walter Cronkite's aberrations of war had led him to be certified behind the walls of a psychopathic hospital simply because he chose democratically to denounce the performance of his chief functionary, he is just one of the individual moral summonses at odds with the world. The resolution of inverting one's conscience so that public and personal integrity are also found by some of us who oppose unjust policies.

Science, reason, and morality all point to the folly and injustice of capital punishment. Public integrity is an invincibly defensible doctrine, those ends and every argument in its favor can be considered both from a legal and moral point of view.

Thus, a picket line is set up every Thursday and Friday, noon to midnight, in front of the Johnson County courthouse. Irene Garner, a very few inches, utilizing scissors could work out so Death March still roams the streets. She prefers to support the myth that Congress has not for locking. It tells of the initial development of the Death March and an editorial.

WASHINGTON - A Republican senator accused the federal government Tuesday of failing to do enough to protect the nation against a possible attack by swarms of armed drones, now estimated to number over 10,000.

"This is a crisis of historic proportions," said Sen. John Boozman, an Iowa Republican and member of the Senate Armed Services Committee. "The government has not taken adequate steps to secure our borders, and we risk losing our way of life to a network of remote-controlled weapons systems that can strike with devastating effect.

Meanwhile, the Senate Intelligence Committee, whose mandate includes monitoring threats from foreign and domestic sources, has voted unanimously to approve a $2 billion increase in funding for drone defense systems. The money will be used to develop a new generation of anti-drone technologies, which may include lasers, nets, and other devices aimed at disrupting drone operations.

In a separate development, a federal judge has ordered the government to provide details about a secret program that has been tracking the movements of hundreds of people and groups, including the Muslim Brotherhood, in the weeks leading up to the inauguration.

U.S. First to Fire Atomic Field Weapon

CAMPA, MERCURY, NCA (AP) - The United States fired an actual nuclear ballistic field weapon, apparently in the course of its test program.

Col. Stanley R. "Binsky" White, director of the U.S. Army's strategic field force, confirmed the test during a press briefing at the Camp Blanding training facility in Florida.

"This was not a simulation," Binsky said. "It was a live test to determine the capabilities and limitations of our new weapon.

White said the weapon was fired from a mobile launch silo located near the missile range. The test was conducted in cooperation with the Strategic Air Command and the National Security Council.

U.S. Drops More Troops In Viet Nam

WASHINGTON - The United States has begun to withdraw more troops from Vietnam, a move that could signal a new phase in the war.

"This is a significant step," said Defense Secretary Robert McNamara. "It reflects our commitment to a peaceful resolution of the conflict.

The withdrawal, which began on Monday, is expected to continue for several weeks. The United States currently has about 180,000 troops in Vietnam, down from a peak of nearly 500,000 in 1968.

X15 Pilot White Sets Records, Earns Astronaut's Wings

EDWARDS AIR FORCE BASE, Calif., - Col. Robert M. White earned an astronaut's wings Thursday by breaking a record in the X-15 rocketplane.

"I am honored to be the first American to fly this plane," White said. "It is an amazing machine that allows us to explore the limits of the atmosphere.

White, who has spent years studying the effects of high-speed flight, said his mission was a success.

"I feel like I've just flown into the future," he said.

Here is a list of the records White set Thursday:

- Faster than 4,000 miles per hour.
- Higher than 600,000 feet.
- Longer than 30 minutes in flight.

The X-15, which was built by North American Aviation, is a highly experimental aircraft used for testing the effects of high-speed flight.
