Spring...
And Official's Fancy
Turns to Leaky Roof

The recent flurry of activity at Iowa City may be welcome to students, but it promises trouble for University Library authorities.

Each winter when a heavy frost is followed by a sudden thaw, the temperature falls below 40 degrees, the roof of the Library usually begins to leak. The water is driven into the steel beams, and drips down through the ceiling.

Davis Lentz, assistant director of the library, explained that the problem is due to a plastic covering that is used on the roof of the building.

"The plastic makes an air seal, but it doesn't stop water. The water trickles through the covering and soaks the insulation without making a noise."

Grassroots movement supporting two candidates who want to unseat Japanese leaders... "Some arguments are not very persuasive..."

Diefenbaker Sets April 8 For Elections

For Elections

In Canada, 3.2 million people are expected to vote in the general election of April 8, even though polls show the election will be a close contest.

The economy is improving, but the government's policies are and will be a close contest.

The government of Canada, led by Prime Minister John Diefenbaker, will hold elections on April 8, even though polls show the country will be a close contest.

A Chance To Move Ahead

A WEEK ago today the State Board of Health voted to adopt in principle the recommendations of U.S. Surgeon General Leroy Tam regarding the advisability of instituting polio immunization programs with Babylon and vesting them in public health authorities.

Medical authorities have said that the Babylon vaccine affords more permanent type of immunity and is easier to take than polio purulent vaccine. The vaccine has already been used in many cities.

IOWA CITY, was one of many Iowa municipalities that had scheduled mass immunization campaigns for last fall, but postponed them because of reports among those who had taken Types I and III of the illness and suffered paralyzed polio.

After intensive study of these reports, the Surgeon General gave his seal of entire confidence in the people involved in the polio immunization campaign.

Loyola Does Top-Notch Job Of Recruiting

CHICAGO—A recruiting coup by Loyola University’s basketball team will be a key factor for a successful season. Loyola coach Bob Fottler has landed a 10-man recruiting class that he believes will help the team achieve a near-record-setting 15 wins.

Three years ago, after a much brothered season in which the team lost 7 of 12 games, Loyola’s recruiting efforts were severely hampered.

In the past, the team has had a 30-game winning streak, but this year, Fottler said, the class will be a game changer.

‘I Understand He Adheres Strictly To The Old School Of Coaching’

Potent Northwestern Is Foe—Wildcats To Throw Varied Attack at Iowa

By HARRELL M. THOMPSON
Assistant Sports Editor

LAWRENCE (Kan.)—Northwestern, a potent basketball team, will visit Kansas this week to face the Jayhawks. The Wildcats, who are undefeated this season, are expected to pose a stiff challenge for the Jayhawks, who are currently ranked second in the nation.

Northwestern is known for its quick and precise offense, which is led by senior guard John Smith. Smith, who is averaging 18 points per game, is expected to be a key player in the game.

Iowa Students To Compete In Union Tournay, Feb. 14

Here will be represented by 17 student players in the Kansas district tournament, which will be held in Wichita. The tournament is open to all high school boys and is scheduled to begin on January 25.

The tournament will feature boys basketball teams from the Wichita area. The teams will be divided into four brackets, and each team will play in one of the brackets.

Robby Walter, 5B, and Allen, 6B, were selected to represent Iowa at the tournament.

Iowa will field four teams in the tournament, with each team consisting of six players.

The tournament is open to all high school boys and is scheduled to begin on January 25.
Maury Wills To Be Honored As 'Athlete of Year' Tonight

CASSIDY CLAY

Maury Wills, former Penn State American Studies student, will be honored tonight as the 1963 Pennsylvania Daily's "Athlete of the Year" for his outstanding contributions to the Penn State athletic program.

Wills, a two-sport star, played football and baseball at Penn State. He was a first-team All-Big Ten selection in football his senior year and was drafted by the New York Giants in the first round of the NFL draft. He also played football at the College All-Star Game and the Senior Bowl.

In baseball, Wills batted .340 with 20 home runs and 85 RBIs in his senior year. He was selected in the first round of the Major League Baseball draft by the St. Louis Cardinals and played in the majors for parts of three seasons.

Wills is currently studying sports management at the University of Pennsylvania and will be recognized for his athletic achievements and contributions to the university community.

Robbie Doesn't Quit

ROBINSON Signed by Reds

Robbie Robinson, former Baltimore Orioles outfielder, has signed with the Cincinnati Reds. Robinson, a 24-year-old switch-hitting outfielder, was traded to the Orioles from the New York Yankees in December.

Robinson, who batted .281 with 14 home runs and 66 RBIs in 1962, was expected to be a key player for the Orioles in 1963. However, he struggled with his bat in the early part of the season and was traded to the Yankees.

The Orioles acquired Robinson from the Yankees for pitcher Dave McNally, who had a strong season in 1962.

Robinson's signing with the Reds is seen as a major coup for the team, which has been looking to improve its outfield.

EXCELLENT CAREER DEVELOPMENT OPPORTUNITIES FOR ENGINEERS AND PHYSICAL SCIENCES

The Naval Ordnance Laboratory (NOL) is located in a beautiful area of Washington, D.C., near the center of the nation's capital. NOL offers excellent career opportunities for engineers and physical scientists.

NOL is a leader in research and development in the fields of ordnance and propulsion systems. The laboratory conducts research in areas such as guidance, control, and propulsion systems for missiles, aircraft, and submarines.

NOL also offers opportunities for engineers and scientists in the fields of physics, chemistry, and biology. The laboratory is home to a number of cutting-edge research programs, including work on materials science and aerospace engineering.

If you are interested in joining the NOL team, please visit our website for more information on career opportunities.

On-Campus interviews will be held on March 26th and 27th. Please contact NOL at 202-877-5200 or visit www.nol.navy.mil for more information.

Getting Voting Rights Is a Problem
For Mississippi Negroes, Says Keller

As the state Constitution was being
drafted, efforts were made to create
the Negroes by including a section
providing that no Negro could vote.

The Constitution was adopted in 1890,
and the voting rights of Negroes were
abolished. However, in 1901, the state
Constitution was amended to give
Negroes the right to vote. This act
was challenged in the courts, and
the U.S. Supreme Court ruled that
the amendment was unconstitutional.

The issue of voting rights for Negroes
in Mississippi continued to be
contentious. In 1946, the state
Governor appointed a commission
headed by Robert L. Goode to study
the problem of Negro voting rights.

The commission issued its report
in 1947, recommending that the
state Constitution be amended to
abolish the poll tax as a requirement
for voting. The recommendation
was adopted by the state legislators
in 1948, and the poll tax was
abolished in Mississippi.

The issue of voting rights for Negroes
in Mississippi has remained
controversial. In 1965, the U.S.
Congress enacted the Voting Rights
Act, which prohibited voting
practices that discriminate against
minority groups. This act has been
effective in ensuring voting rights
for Negroes in Mississippi.

For more information on
voting rights in Mississippi,
please visit the State of
Mississippi's official website.

**SUI, Iowa Banks Begin Special Loan Program**

...MID and several banks throughout the state now are offering a special loan program to make home loans to students who have taken the Act and meet the cost of education.

The program, known as the "Iowa Federal Home Loan Program," has been sponsored by the Iowa Bankers Association and is authorized by the act.

The program is designed to provide assistance to students who have taken the Act and are in good standing with their educational institutions. The loans will be made on a non-taxable basis and will be available at a reasonable rate of interest.

Why a Joke is Funny

by CILE FERNER

"Why" is a word not often used by many, for fear of making fools of themselves. It is a word not often used in public, even by people who are not afraid of making fools of themselves, as they feel it will look foolish to do so.

"Why" was the word that started the whole thing. It was the word that brought the whole town to a standstill. It was the word that brought the whole world to a halt. It was the word that brought the whole universe to a stop. It was the word that brought the whole planet to a freeze.

But why? Why did people start using "Why"? Why did they start using it in public? Why did they start using it in their daily lives? Why did they start using it in their conversations?

The reason is simple. People started using "Why" because they wanted to know the reason. People started using "Why" because they wanted to understand. People started using "Why" because they wanted to learn.

"Why" is a word that opens up the door to knowledge. It is a word that opens up the door to understanding. It is a word that opens up the door to learning. It is a word that opens up the door to enlightenment.

"Why" is a word that can help us understand the world around us. It is a word that can help us understand the people around us. It is a word that can help us understand the things around us.

"Why" is a word that can help us grow. It is a word that can help us learn. It is a word that can help us understand.

So why not use "Why" more often? Why not use it in your daily conversations? Why not use it in your daily lives?

"Why" is a word that can bring us closer to understanding. It is a word that can bring us closer to knowledge. It is a word that can bring us closer to enlightenment.

So why not use it more often? Why not use it in your daily conversations? Why not use it in your daily lives?

Because "Why" is a word that can help us understand the world around us. It is a word that can help us understand the people around us. It is a word that can help us understand the things around us.

"Why" is a word that can help us grow. It is a word that can help us learn. It is a word that can help us understand.

So why not use it more often? Why not use it in your daily conversations? Why not use it in your daily lives?
