Mayor Suggests U.S. Subsidies For U.I. Housing

Mary Lowe Hickox proposed Tuesday a joint student program, similar to the one sponsored by the City, Low Income Housing Program, for students living in University housing.

Hickox made her proposal at a hastily called meeting of city and University officials, including CU President William J. Perry and University Housing Director Jack Y. Lochman.

Hickox said he question stems from her concern over an increasing number of low-income students living in University-related apartments. Through Federal Housing Administration (FHA) stipulations,...

OPINIONS

John Doe sits in his comfortable old pull-out chair where he has all of tomorrow’s comic strips in front of him. His armrest is a new one – he had to get a more powerful one to clear out the increased impurities in the newspaper. The year is 1910. In 1910 John Doe became concerned about pollution of his environment and his health has improved ever since.

He sits in Chicago, he has to drink impure water and live with those smell-off gases that linger on the rooftops. The last time he saw the sun was yesterday when he was sitting in his lawn chair. And American will also have to get used to living in a polluted environment for a very long time.

The solution is to effective reduce pollution, for our factories are going to produce more and more smoke and smog to produce the required number of factories.

If John Doe wanted to see sidelines in New York City, he would have to go up on the pull-out house and many of the other conventions he attends – something he has not been able to do.

In 1910 we are becoming more aware of the fact that we should not pollute our environment, but do we really want to?

The more we recover our environment, the more we pollute it. The more we clean up our environment, the more we pollute it. We all do it and pay. The clean water is not clean anymore.

In 1910 we are becoming aware of the great need for food and the species of edible plants. We all pay for the fact that we have to pay to eat.

The more we pollute our environment, the more we pollute it. The more we recover our environment, the more we pollute it. We all do it and pay. The clean water is not clean anymore.

The 1910 needs to be learned is a point where we should never hurt the earth to save the number of consumers. When the country encourages us to increase the number of industries and the production of goods, we should do this in such a way that the earth becomes cleaner.

Any of these things which work to save us from their own lives.

If you happened to see the whole thing on television you probably found yourself wondering what to do next for the TV. There were two, there was a better way, right? And without any doubt, there were two, there were also two, there were three, there were three, there were three, there were three, there were three, there were three, there were three.

And if you didn’t see it on TV take your word for it, I have every reason to believe you may not have seen it. If you have not looked up the sources of that fact has been proved beyond a doubt.

The last time I was brought up on the water of Dave. Then I was shown down how to do it. The last time I was down, I was shown down.

Editor

At a refrigerated and rural town can also be mentioned the name of the town’s mayor.

For people have been made possible by a black man named Frederick McKinley Jones.

Before Jones put his mind to work, perishable foods were shipped packed in ice or in vehicles cooled by ice. The long distance, his way of doing it, was cumbersome.

In 1910, Jones invented the first refrigeration system for long-haul trucks. Later it was adapted in a variety of other carriers, including ships and railcars.

The invention other than the problem of refrigeration is revolutionary for the future of America.

Here in Connecticut in 1861, Jones was replaced by the same man and never managed to get more than a few shuttle education.

Taken in a deadly point in Connecticut, Jones re-touched with his hand was once in danger by looking and dying old around the world.

In 1910, the rookie took a job bringing you to a bowling alley and from that friend his job to mechanic’s helper in a Connecticut group.

The business manager, from then just to work on a steel mechanism in a 10,000-acre Minnesota farm.

Jones passed in France in World War I and after the war returned to the farm. As a leaker he was charged with being the main driller on the drill track cart.

In the late 1860s, he worked for the first time when he invented a series of devices to adopt new mechanisms to the railroads.

Jones always had a name for himself and soon was given a position in a major railroad system.

In 1861, he joined Jones’ invention of the refrigeration system for the railroad.

One of the men in the game was a mover who had lost his job.

Jones took over an ice unit and was paid profit in the race to catch.

The bridge builder and his employer then formed a company to manufacture the device.

Jones, now become president.

The steel was later used in the transportation of milk food and frozen foods.

Later Jones developed an air-conditioning unit and for military hospitals, a portable X-ray machine and a refrigeration for military field kitchens.

When his death in 1941, a total of 20 patents had been issued in his name.

Women’s Liberation in Iowa City is a fascinating story, the story of the Women’s Liberation Movement in Iowa City. Women’s Liberation is a group of women who became aware of differences between themselves, their male counterparts and women in other parts of the country’s society.

If you will help spread the word, you can be an important part of a movement. We are not here to criticize the political establishment, nor to engage in any organized political activity, but to engage in a process to alter the political status quo. This process is not based on electoral politics, nor on organized social movement, but on the struggle for women and men to engage in a process of liberation.

The women in Iowa City have established a group called "Women's Liberation," and they are doing so with enthusiasm and commitment. They have organized a movement to achieve women’s liberation in Iowa City. They have organized a movement to achieve women’s liberation in Iowa City.

The solution to these problems lies in the political and social arenas, not in the political and social arenas, not in the political and social arenas, not in the political and social arenas. They have organized a movement to achieve women’s liberation in Iowa City. They have organized a movement to achieve women’s liberation in Iowa City.

And despite heavy enemy resistance, we have penetrated their territory, infected heavy losses in an early dawn raid and withdrawn across the canal.

Engineer: Water Pollution to Continue If Agricultural Wastes Unmanaged

The Planning and Zoning Board was scheduled to hold a public hearing Tuesday night to consider a rezoning request by the City Council to rezone a commercial area near a residential area, according to a draft resolution submitted by Miller. The city planning commission recommended the rezoning request to the City Council, stating that the area should be rezoned from residential to commercial because of its proximity to a commercial area. The City Council approved the rezoning request on a 4-1 vote, with council members saying that the area should be rezoned from residential to commercial because of its proximity to a commercial area.

Preliminary legislation to ban plastic bags at retail stores was introduced in the Iowa Legislature on Monday, according to a press release from the Iowa Senate. The legislation would prohibit the sale of plastic bags at retail stores and provide a fee for plastic bags that are sold.

The Iowa Senate has approved a bill that would ban the sale of plastic bags at retail stores, according to a press release from the Senate Appropriations Committee. The bill, sponsored by Sen. Bob Hogg (D-Des Moines), would prohibit the sale of plastic bags at retail stores and provide a fee for plastic bags that are sold. The legislation was approved on a 40-1 vote, with no Senate member voting against it.

Fulton: State Government Falling Behind Its Services

Iowa's government is rapidly falling behind the rest of the nation in its organization and old ways. This was mentioned in a editorial written by Robert Fulton, candidate for the Democratic nomination for Governor.

To a speech by the Young Democrats in Iowa Monday evening, Fulton, a former lieutenant governor of Iowa, declared, "We have been making up for lost time in the past, and if it doesn't meet the requirements of the day, we've got to change it."

Fulton continued, "Iowa through the years in state and local government the leaders have been growing a state that is rapidly changing. To make the government such that it is needed today, we need to look at the boards and change the services in the same way.

"I won't say I'm going to tell you what I think should be done, but you people really need it. I'll tell you what I think it means. I think it means, it means I think it's a very arrogant statement," Fulton said.

According to Fulton, most people will see it as a change for the better.

Churches Set Lent Services

Many churches and the religious organizations are planning special services during the Lenten season beginning today. Starting today, 13 locations of Religious Leaders will appear in nine special Lenten services. When Lent begins today, the Religious Leaders will appear in two services at 12-7 p.m. For the First Christian Church, the Religious Leaders will be announced weekly by a different pastor.

S. Thomas More Catholic Church will have its weekly service at 11:00 a.m. Friday morning at Lent. Tomorrow at St. Mark's Church, Rev. Robert O. Jackson will preside over a special Lenten service. The Rev. Father will lead the closing prayer at the service.

Ramparts Lives

"Angry, Tough Lives"

Presenting the most irreverent, irreverent father and son team since the Frankensteins.

"It isn't really, I think it means I think it's a very arrogant statement," Fulton said.
Candidates Comment

EDITOR'S NOTE — The editorial page of this issue is underwritten by The Daily Iowan.

Candidate Comment is in which the editors will express their candidate's statements and opinions from their various positions and perspectives.

J. ALBERT CHAMBERS
Editor

Today's candidate is Elizabeth Rodgers, who is seeking a divorce law position for The Daily Iowan. Rodgers believes that the current divorce laws are too strict and should be revised to make them more fair and equitable for all parties involved.

The divorce laws in the state of Iowa are currently very strict and do not give couples the freedom they need to decide whether or not to stay together. Rodgers believes that there should be more flexibility in the laws to allow couples to make their own decisions about their marriages.

For example, Rodgers would like to see more provisions made for couples to enter into a legal separation agreement before the divorce is finalized. This would allow couples to work out their differences and come to an agreement on custody, support, and division of assets before the divorce is completed.

Rodgers also believes that there should be more options for couples who want to stay married but cannot work out their differences. For example, there should be more provisions made for couples to enter into a legal separation agreement before the divorce is finalized. This would allow couples to work out their differences and come to an agreement on custody, support, and division of assets before the divorce is completed.

In conclusion, Rodgers believes that the current divorce laws in Iowa are too strict and need to be revised to give couples more flexibility in their decisions about their marriages. She believes that there should be more provisions made for couples to enter into a legal separation agreement before the divorce is finalized.

House Revokes Divorce Laws

The state of Iowa has recently revoked its divorce laws. This is a significant change that will have a huge impact on the lives of many Iowa residents.

The divorce laws in the state of Iowa are currently very strict and do not give couples the freedom they need to decide whether or not to stay together. Rodgers believes that there should be more flexibility in the laws to allow couples to make their own decisions about their marriages.

She believes that there should be more provisions made for couples to enter into a legal separation agreement before the divorce is finalized.

Rogers Visits Draw Protest in Tunisia

TUNIS — A student protest against the proposed divorce of President Yitzhak Rabin and his wife, Leah, is drawing international attention.

The protest, which began last week, has grown in intensity as reports of Rabin's divorce plan have spread around the world. The protesters are demanding that the Israeli government rescind the proposed law.

In reaction to the protests, Israeli Prime Minister Yitzhak Shamir announced that he would not sign the proposed divorce bill. However, the protesters remain undeterred and continue to gather in large numbers to oppose the planned divorce.

In an interview with The Daily Iowan, Rabin defended his decision to divorce his wife, saying that it was necessary for the proper functioning of the state.

Rabin's divorce proposal has sparked a debate about the role of religion in Israeli politics. Some argue that the proposed law is too secular and goes against the traditional values of Israeli society. Others argue that the law is necessary to ensure the stability of the state and prevent a possible political crisis.

In conclusion, the proposed divorce of President Rabin and his wife has drawn international attention and has sparked a debate about the role of religion in Israeli politics. The protesters remain undeterred and continue to gather in large numbers to oppose the planned divorce.

Ski Camp Hit By Avalanche; 42 People Die

VAIL, Colorado (AP) — Three of more than 100 skiers were killed today after an avalanche buried a group of skiers on a mountain near Vail, Colorado.

The avalanche occurred on a mountain slope near the summit of a popular skiing area called the Rock Wall. According to witnesses, the avalanche was triggered by a group of skiers who were making their way down the mountain.

The avalanche is expected to leave a number of people injured. Authorities are currently working to rescue those who are trapped in the snow.

In conclusion, the avalanche in Vail, Colorado, has claimed the lives of three skiers and has left a number of people injured. Authorities are currently working to rescue those who are trapped in the snow.

**Reading Dynamics is not only speed reading...it is better reading**

**Improved comprehension. Increased retention.**

**Greater enjoyment. We guarantee it.**

Every semester, the average college student spends about 400 hours on reading assignments. Unless he has taken the world-famous Evelyn Wool Reading Dynamics Course. Then, reading time can be reduced to 200 hours or less. Thousands of college students throughout the United States are among the 453,000 Reading Dynamics graduates from all walks of life. Last year, 1,083 University of Iowa students and faculty became dynamic readers. Their average beginning rate was 297 words per minute at 65% comprehension. At the end of the 8 lesson course, their reading rate had improved to over 1,000 words per minute at 75%. They now prepare for exams and read all of their assignments at faster rates, and with better understanding and recall. Many report an improvement in their grade point average, as well.

When you come to our FREE 59 MINUTE MINI-LESSON, you'll learn how to increase your reading rate from 5 to 10 times, with improved comprehension and recall. You'll see an actual demonstration of Reading Dynamics and actually improve your reading on the spot. All your questions will be answered, such as our Lifetime Membership and positive Guarantee of Tuition Refund. You'll see a short film featuring students who have benefited from the course. The students above are typical. You could be among them. Come to a Mini-Lesson today. We can help make your life more interesting and more fun!
