IN THE NEWS

briefly

Breezy

Better down the hatchet today, a gale is blowing up tonight.

The forecast is for a strong cold front moving in from the north, bringing strong winds and low temperatures for the next few days.

No word yet

The University of Iowa Worker Student Adminis­
tration (WSA), chapter Friday was suspended from the campus at the end of the term. The suspension was made due to a series of recent incidents, including acid-throwing attacks and vandalism.

Midnight oil

The midnight oil is burning at the Oberlin Conservatory of Music.

The City Council will hold a public hearing at 8:00 p.m. tonight to discuss the proposed Linn Street parking ramp.

Following the public hearing, the council will schedule an agenda on April 11th, including potential changes to the parking ramp and the future of the Linn Street parking structure.

More McCarney

The City Council has asked the members of the public to present proposals for the new parking ramp to be constructed.

Funding

The debate centered on the role of federal aid in education and highway construction.

Abortion funds being raised

Members of the University of Iowa Women’s Center are launching a campus campaign today in support of abortion rights.

The campaign, which is seeking $50,000, will be used to help fund abortion services at the University of Iowa Hospital.

Aerial battle

SAIGON (AP) — Nearly a dozen U.S. fighter planes and several MiG interceptors battled in the skies above South Vietnam today, with both sides suffering heavy losses.

The battle was fought over a critical area in the central Highlands of Vietnam and resulted in the destruction of several MiG-21 aircraft.

Says states should carry burden of school funding

Search suspended for missing brothers

2 out of the last 3 Presidents invited us to teach our Speed Reading Course to members of the White House Staff. (If these Kennedy and Nixon people find the time, shouldn't you?)

Take a Free Mini-Lesson This Week

ISPFRG will present request for fee Friday

WASHINGTON (AP) - State governments should shoulder the major burden of financing public education, reducing the need for local property taxes, President Nixon said today. The move on the local property tax, a presidential commission recommended last month, was based on the idea that the federal government, not the state government, should not be a source of funds to help local governments shoulder the tax burden. President Nixon's Commission on School Finance said the federal government would help states in financial trouble and help them to switch over to state-financed education within five years. But the federal role in financing education should only be supplementary, the commission said. It was a recommendation that two other presidential panels which have urged a federal role in state finances would not be expected to accept. The commission recommended a 25 percent increase in state-financed school systems and a 25 percent cut in local district revenues, as a way to help school districts with the best to the federal government estimated $4 billion to $8 billion over five years.

MARCH 3, 1970

The test proposal for the federal role in education was written by the commission's Special Assistant to the Education Commissioner, John E. Day, who is a former White House aide to President Nixon. The commission, headed by President Nixon, will make a final decision on the role of the federal government in education at a meeting next month.

The commission, headed by the president, is expected to make recommendations on the role of the federal government in education. Urbam renewal...  

Even though visible evidence of the program is lacking, Urban Renewal in Iowa City is in its early stages of planning. Renovation plans include a major handful of Federal and state financial assistance. (CDBG) funds for the next two years. However, evidence is rapidly accumulating that Urban Renewal is in Iowa City is one of the biggest financial opportunities ever presented on the community. The problem is characterized by poor and inadequate planning, inefficient to wasted investment, and the occasional misallocation of resources. The problem was not the 80% unemployment.

The situation is not unusual to the Urban Renewal process. A hundred of low-cost churning will be devoted and a number of community-based units will be provided in its place. In addition, reconstructed buildings are not always reading to accommodate developers who may be interested in the vacated properties. It is often the case that the residents who are interested in the project may be forced to make a decision about the project or the old building. It is not always possible to accommodate developers who may lack

In general, the construction of such a ramp will attract a developer to construct a new building in the downtown area. The project will be financially beneficial to the city, and it will also provide employment for the residents of the city. The project will benefit the community by providing a new retail center, and it will also provide a new source of tax revenue for the city.

The building of a downtown shopping center is a major threat to the possibility of expanding the downtown area. It is also important to note that the project will result in the destruction of a large number of affordable housing units. The project will also result in the loss of local businesses and the displacement of many Iowa City residents. The city should be made aware of the negative impacts of the project and the opportunity to address them.

... the ramp in particular

By JERRY DEPEW

Iowa City is set to build a parking ramp and the city's downtown. This is the first step in its urban renewal program. The question is whether the citizens of this town want such a ramp or not. The citizens of this town have been discussing the project for some time, but the citizens of this town are not aware of the need for the parking ramp. The citizens of this town are not aware of the need for the parking ramp, and they are not aware of the need for the parking ramp.
Top tax bracket drops 10 percent

Big salary? Here’s good tax news

WASHINGTON (AP) — If you have a very high salary and can afford a top-of-the-line tax shelter, you might not be in as high a tax bracket as you thought. Effective with 1971 income, there is a 10 percent reduction in the income tax bracket for salaries above certain levels.

For example, a person who is single and has a very high salary, there is a 10 percent reduction in the income tax bracket for salaries above certain levels. This means that, for example, a person with a very high salary might be in a lower tax bracket than they thought they were.

Another news, though not official, modification of the tax law took effect on January 1. Generally speaking, when someone makes a profit by selling an asset, they have to pay capital gains tax. This can be a long-term capital gain or a short-term capital gain. For example, if you sell a stock you have held for more than one year, the gain is a long-term capital gain and only 20 percent of it is subject to tax. However, if you sell a stock that you have held for less than one year, the gain is a short-term capital gain and 100 percent of it is subject to tax.

This change affects income tax rates for salaries above certain levels. It is a good tax rate, especially if you are trying to accumulate wealth by investing in capital gains. The goal is to make it easier for people to save and invest money, which can help the economy grow.

In addition to interest and taxes, those in the highest income bracket will have more money to spend on things that they enjoy. It is expected that this reduction will benefit those who are trying to accumulate wealth.

If you decide to move into a higher tax bracket, you may be able to decrease the impact of the new tax law. There are some exemptions and deductions that you can use to reduce your tax liability. These are important considerations when planning your finances.

The change in tax brackets is not the only tax reduction that is expected to benefit high income earners. There are also changes in the tax laws for capital gains, which can help those who are trying to accumulate wealth.

The University of Iowa's The Kilcho Company of Salem, Massachusetts, provided its recent concept in human technology—the Kilcho Company's Kilcho Diamond. The Diamond, fashioned in the shape of a cross, is the symbol of the Kilcho Company. As a signal to the world, the Kilcho Company's Diamond is intended to be a beacon of hope to all who are in need of help. The Kilcho Company has been working on the development of this new technology for many years. The Kilcho Company has also been involved in the development of various other technologies, such as the Kilcho Company's Kilcho Diamond.

The Kilcho Company's Kilcho Diamond is a new type of diamond that is designed to be used in various applications, including as an energy source. The Round-up, Miklos Jancso's MY WAY HOME, THE RED AND THE WHITE, REFLECTION AND CITY, depicts an important event in Hungarian history. The film is set in 1868, in the newly-created Austro-Hungarian empire. The active action takes place at an isolated prison, in the middle of a vast, featureless steppe. Austrian officials "round up" suspected Hungarian freedom fighters, the remnants of Kossuth's revolutionary army. Jancso meticulously details the middle techniques of the Massacre at Orsok, which is described, he is lost or hung. As in MY WAY HOME, Jancso explores the effect of psychological and physical torture on confined human beings. As in his later masterpiece THE RED AND THE WHITE, the terror comes quickly, despite resistance, as a logical consequence of a totalitarian situation.

In order to escape the harsh realities of the prison, the prisoners resort to the construction of a featureless world, as Jancso subtly demonstrates in THE RED AND THE WHITE. The Round-up also offers a similar analysis of the psychological effects of imprisonment. The film is set in a network of prison camps, where the prisoners are forced to work in isolation, away from any human contact. The prisoners are divided into groups, each with its own leader, who maintains discipline and order. The prisoners are subjected to constant surveillance and are isolated from the outside world. The film depicts the prisoners' attempts to create a world of their own, where they can escape the harsh realities of the prison. The prisoners are forced to work long hours, in conditions that are often dangerous and exhausting. The film shows the prisoners' resistance against the authorities, as well as their attempts to maintain their dignity and humanity. The Round-up is a powerful and thought-provoking film, that offers a glimpse into the world of imprisonment and torture.
With a little help, Hawks can get even

BY RONNIE OWENS

Come in like Ford & Par. Produce some more. It's time we were connecting once again. It's the time to be +1 and most importantly—make sure we win Minnesota.

And Wisconsin, let's not have any super performances against Michigan. It's about time we showed the mothers of the Big Ten that we can be a factor again. We've had a couple of forceful moments in the season, but we're more than capable of doing it.

The Hawkeyes are a great team, but we can't afford to let them slip away.

Penn moves up; Bruins still dominate poll

UCLA's unbeaten basketball team, which has been ranked at the top in the Associated Press and UPI polls, moved up six spots to No. 1 in the final AP poll released Monday. The Bruins, who defeated California 73-52 and Stanford 82-60 this weekend, are now 12-0 on the season and are expected to have a strong performance in the tournament.

Readers respond

Sportsforum has been receiving mail regarding the current discussion concerning the meaning of Iowa State for Nile Kinnick, Iowa football great who was killed in World War II. Many readers have written to express their thoughts and feelings about this topic.

One reader wrote, "I can still remember when we lost to Blue Springs in the state championships. It was a very difficult time for us, but we came back stronger than ever."

Another reader stated, "I was fortunate enough to attend a game at Kinnick Stadium, and I can still feel the energy and excitement that fills the stadium on game day."

A third reader commented, "The legacy of Nile Kinnick lives on in the current Iowa State team, who carry his spirit and determination with them every day."
