Committee system negotiations completed

By MAUREEN CONNORS

Staff Writer

Heads of family, staff and student constituencies have negotiated a new committee system with the University of Iowa administration. Controversy over constitution approval, the system will begin a two-year test period on July 1.

Constitution preparatory

Constitution preparators met last Monday to work on the new system. Although much of the paperwork had already been completed, preparators still had some work to do as they prepared for the July 1 deadline.

Constitution preparators say the new system was a product of constituent pressure and the committee system selection committee. The new committee system was designed to improve the present system, an all-campus committee that does not meet between the JSCCG recommendation and the present committee system.

Faculty, student and committee preparators say the new system was a product of constituent pressure and the committee system selection committee. The new committee system was designed to improve the present system, an all-campus committee that does not meet between the JSCCG recommendation and the present committee system.

Unlike the JSCCG system which gave committee constituency groups the power to appoint their own members, new committees are appointed by the University of Iowa and the students have no say in the matter.

The new system is intended to be a step toward satisfying the desire for non-campus committee representation on the Senate and the appointment of it.

New committee system will be

New committee system will be introduced to the student Senate Thursday and student Senate members will have the opportunity to participate in the transformation.

Citizen co-operation crucial
City recycling plans progress

By JIM MELLONDORE

After nearly two years of citizen cooperation, the City of Iowa City may finally begin implementing a system to recycle its domestic paper waste.

Mayor Don Snee announced Monday that he has set a goal of January 15 to begin an actual recycling program. He also indicated that he would meet with the Citizens Committee to discuss the possibility of employing a private firm to handle the whole recycling project.

Mayor Snee emphasized that the city is not in the position of employing a private firm, since there are no funds for such a purpose. He said, however, that the city will consider the possibility of employing a private firm to handle the whole recycling project.

Mayor Snee also announced that the city has set a goal of January 15 to begin an actual recycling program. He also indicated that he would meet with the Citizens Committee to discuss the possibility of employing a private firm to handle the whole recycling project.

Starchy, greasy, invariably cold

Students petition for better food

By KARL JENKINS

Half Write

Approximately 400 people signed a petition complaining about the quality of food served during dormitory dinner Monday evening.

The petition, which was distributed by resident of Burge Dormitory, resulted in a meeting of the petitioners with dining and dormitory officials Tuesday morning.

At a hastily called 3:30 p.m. meeting in the Burg University Diner, Resident Assistant Manager Chuck O'mara, Resident Assistant Manager George DeVilbiss, Assistant Manager Michelle Gulley, and several students attended.

David told students he would review procedures with general, but was not able to guarantee any change, except that the petitioners were heard.

He also recommended that students who complain about the dining staff to bring their complaints to the residence director and that if or when a food service change is decided, they should expect to take part.

According to Mary Norton, A2C, one of the petitioners, her students were told that "the peti- tioners themselves had been misunderstood by the administration and that food will be taken care of for them."

A jury of six men and women was selected Tuesday in the trial of Richard J. Patton, charged with murder in the death of a young Chicago woman. Patton, 22, was charged with killing eight-year-old Elizabeth Pelham in the Public Square Arena in downtown Chicago in October 1971. The jury was se- lected from a pool of 400 people.

The cause of the death of Elizabeth Pelham, who was last seen alive on Nov. 19, 1971, was a mystery until the trial began. The police had said she was last seen alive on Nov. 19, 1971, at 6:30 p.m. in the Public Square Arena in downtown Chicago. She was last seen alive on Nov. 19, 1971, at 6:30 p.m. in the Public Square Arena in downtown Chicago.

The trial was delayed because of the snowstorm that hit the area the previous night. The trial was expected to last four days.

The trial was expected to last four days.

The trial was expected to last four days.

The trial was expected to last four days.
CAC and Senate: clean up mess

The current conflict between Student Senate and the Collegiate Association (CAC) brings back bad memories of the political games between student groups. Although there has been no sense of "constructive co- ordination" between the two groups, there has existed a kind of alien harmony.

The ripple of discontent has surfaced over proposed amendments to the student association constitution. These amendments would:

—Call for the election of a student body president in large student bodies.
—Allow the student body president to appoint vice presidents who would preside over CAC and Senate.
—Exempt CAC from academic affairs while Senate deals with non-academic affairs.
—Call for a tripartite council over Senate commissions: Commission for University Entertainment (CECU), Hancher Entertainment Committee (HEC), and Protective Associations for Tenants (PAT).
—Transfer funds: now appropriated by the student senate, to the student body president.
—Allow the student body president to appoint students to the Curriculum Committee.
—Call for the establishment of a new Student Senate.

There is a sentiment that student government has been greatly reduced from a previous level.

Allowing the student body president to appoint students to the Senate would help the student body in its efforts to maintain student autonomy and to pursue the objectives of this university. The Senate, as a representative body is a part of the university community. Don Racheter, 1973 student body president, wrote recently that an elected student body presidency would appear to be a step in the right direction. The student body president is an elected representative of the student body. This unique position has been used by the student body to be a strong voice in the university. The student body president is the link between the student body and the administration.

The student body president needs to be an influential leader, and this is best done by the elected student body president. The student body president is a strong voice in the university. The student body president is the link between the student body and the administration. The elected student body president is the leader of the student body and is the representative of the student body in the university. The elected student body president is the leader of the student body and is the representative of the student body in the university. The elected student body president is the leader of the student body and is the representative of the student body in the university. The elected student body president is the leader of the student body and is the representative of the student body in the university. The elected student body president is the leader of the student body and is the representative of the student body in the university.

This hitchhiker was wrong in thinking she could defend herself. You are too.

By RUTH A. ANDERSON

Another 7 p.m. Friday night was just about the same as the others. I was coming home from the Cement in my VW Beetle. I was too busy listening to the radio to notice that someone had stopped in front of me. I was about 25-30 years old with light brown hair and dressed more like a cowgirl than a typical young woman. The guy was driving a slanted back stopped red-orange American car with a woman in the passenger seat.

I wascredibly, I was worried about nothing as we passed several things without stopping. He never stopped to look anything up or ask any questions. He never asked me anything about myself. He didn't say much. He just kept snarling and saying things like, "Shut up!" and, "Told you not to get back into the car."

I was crying and couldn't raise my left arm to defend myself. You are too. Around 7 p.m. Friday night I was waylaid by a gang of men in a pickup truck. They were all around 5' 10" to 6' tall and heavy. One of them had a weapon. I was terrified. He was yelling at me to get into the car. I was crying, but it might have been rage. I thought I would say something to him. He grabbed me. He pulled my hair back and started hitting my head down over it.

Tears ran down my face. I couldn't look. I couldn't think of that. I was just getting up to the police station, where I said, and we agree.

Finaly get refund

A few months ago I wrote you concerning refunds for money lost at the Florence Street Landmark. I said that I had lost many photos, and you replied that the manager assured telling you that it must have been the photos were lost. So I left the store alone and have had no response. This is so much money when you consider that over the past two years I have lost and have never seen how money doesn't work for me in my business. So I wrote a letter to the store to get my refund.

This is a heavy populated student neighborhood, and it seems that something is taking advantage of our dependence on the landmark. I would like to see this situation rectified.

We called the manager of the landmark against whom you have your money back. The manager insisted that she never saw your phone number and always believed you were within a week or a few weeks. It just hasn't happened. She said she never saw your phone number and always believed you were within a week or a few weeks. It just hasn't happened. She said she never saw your phone number and always believed you were within a week or a few weeks. It just hasn't happened.

We hope our suggestion that we put a notice in the landmark will help you get your money back. We wish the best of luck to follow up on a complaint because as a matter of principle. We've had to tell all callers that next time you go to the landmark, your complaint will be handled and you will be refunded. We have had to tell all callers that next time you go to the landmark, your complaint will be handled and you will be refunded.

"Ludwig"

Opulence backdrops tale of mad king

By DAVID B. BENTON

Those who have heroine the relative deaths of foreign films on campus this year should find "Ludwig" metaphorically perfect, a paradoxical term, to the experience which many have had of the New York Theatre. The Laura Thesaurus should be considered appropriate for bringing this film to the screen, which, as far as I know, has had but very limited showings in the major commercial areas of New York, Chicago, and Los Angeles.

Ludwig is certainly ideal material for the screen. It is a film which could have been handled in an imaginative scriptwriter in the first place, but since it is one of those, there's nothing like its being done for the first time.

First, and most important, in his portrayal of the great musical genius, Wagner, a perfect supporting actor has been found. Second, the film is a remarkable document of the great and ongoing development of Wagner, the man, the musician, and the master of the operatic form. And third, it is a remarkable expression of the development of the film itself, the way the camera,structure and script have been used to develop a story which is at once familiar and new.

"Ludwig" portrays the mad king of all his many eccentricities, a man whose devotion to music was not only a part of his life, but the dominant force which shaped his character. Ludwig was a ruler born several centuries before his time, a man whose music was more suited for the king of Bavaria, than for the king of Italy. This is a man who lived in a world of music, a world where the sound of the trumpet was the only instrument that could be heard. Ludwig was a man whose music was more suited for the modern world, a world also of music, a world where the sound of the trumpet was the only instrument that could be heard.

"Ludwig" is a film which has been seen in a number of places, but its effect is not that of the kind which illuminates escapes. It is a film which has been seen in a number of places, but its effect is not that of the kind which illuminates escapes. It is a film which has been seen in a number of places, but its effect is not that of the kind which illuminates escapes.

**Hawks drop fifth straight**

**EAST LANSING, Mich.** (AP) - Senior guard Mike Robinson scored 27 points and pulled down 13 rebounds as the Michigan State basketball team dropped its fifth straight game with an 89-76 loss to Michigan in the Big Ten Conference opener Monday night at St. John's Arena.

"We had 15 points in the first half," said the former All-American, who scored five of those points after MSU rallied from a 10-point deficit. "It was a little tough being on the road, but we just kept fighting."

"We've just swept it under disclosure Monday in the "Traveling Cooperstown," N.Y."

Irish

Note Dame's basketball team joined Arts Sherman's unbeaten hockey team at the top of the polls in this week's Associated Press poll. Dick "Finger" Strickland, head coach of the Fighting Irish men's basketball team, anticipated the outcome when he selected ten his team as the No. 1 team in the country.

Stat

The Notre Dame basketball team is riding a nine-game winning streak in college basketball, a surge in the final three minutes of the game at South Bend, Ohio. President Gary Davidson, who has been the moving force in collegiate basketball in the United States, declared the winning streak as a "miracle." The team has won 72 of its last 73 games, taking over the No. 1 position in the polls.

The team's success can be attributed to several key factors. The team has a strong defense, averaging 70 points per game, and a high-scoring offense, averaging 90 points per game. The team's heart is the four seniors, who have been playing together for four years. They are led by senior forward George Altman, a six-year veteran in the league. Altman is known for his ability to make the difficult shot and his defensive skills.

The team's success has not gone unnoticed by the national media. The Associated Press poll, released on Wednesday, ranked the team as the No. 1 team in the country, ahead of the previously unbeaten Sherman team. The Notre Dame team's victory, 89-82, over Sherman last week and is now cashing $85,000, a total of 72 players.

Meanwhile, Buffalo's Bob McAdoo retained a slim lead in the American Basketball Association, will preside at the draft rotation will be New England, Florida, Toronto, and much more. The team's victory means a total of 72 players.

Lefebvre

Los Angeles (AP) — Jim Lefebvre has been the moving force in collegiate basketball in the United States. The team's heart is the four seniors, who have been playing together for four years. They are led by senior forward George Altman, a six-year veteran in the league. Altman is known for his ability to make the difficult shot and his defensive skills.

Oil executive shun crisis blame

WASHINGTON (AP) — Oil executives shun blame for an embargo they say was caused by low commodity prices and other economic factors.

The oil industry has been under fire for months, with some executives blaming the embargo on the Arab nations for causing the energy crisis.

"The Arab nations are responsible for the embargo," said one executive. "They have caused the crisis by their actions." Another said, "The embargo was a mistake, and we should have worked to avoid it." A third executive stated, "The embargo was not our fault, and we should not be held responsible."
