Coach Gable sports championship belt in victory over ISU

ROGER THUROW

Dan Gable just couldn't sit still last weekend.

On a trip when he hadn't relaxed since entering college in the 1960's, he cut the time off his wire and headed straight for the airport. The wire was his route to the Iowa State men's wrestling meet, where his team was scheduled to face the University of Oklahoma.

On the wire, the road was a long one. But on the mat, the road was short.

The former Iowa State football player, the former All-American wrestler, the former world champion wrestler, the former NCAA wrestling champion, the former Olympic wrestling gold medalist, tossed aside his wire and headed straight for the mat.

The mat was a short distance away. The road was long. But the road was long enough for the wire. The mat was only inches away. But the mat was inches away for Dan Gable.

The mat was where he belonged. The road was where he didn't. The road was the wire. The mat was the belt.

The road was a long one. The mat was short.

The road was a long one. The road was short.

The road was a long one.

Dan Gable just couldn't sit still last weekend. The road was a long one. The road was short.

The road was a long one. The road was short. He couldn't sit still last weekend.
Rural elderly health care probled

By HUEY OLIVER Staff writer

Rural health care leaders might be better able to improve home health care, better access to care, and services to people living in rural areas of the state, according to a new study.

The study, led by a team of researchers at the University of Iowa, found that rural residents are not moving into the city in large numbers, leading to a decrease in the number of health care providers in rural areas.

The report noted that the lack of health care providers is a significant problem in rural areas, as it is difficult for people living in rural areas to access care, even when they need it. The report also emphasized the need for more research on the topic to better understand the issues and develop effective solutions.

For more information, please contact the University of Iowa's Department of Health Care Policy and Management at 319-335-5725.
WASHINGTON (UPI) — In an unusual action, the Senate gave last minute approval in the wee hours of this morning to legislation designed to stop the illegal traffic in drugs by blocking the way of drug traffic, according to sources close to the White House. Opponents hope the legislation will block the main drug route to the United States by establishing a protective screen, but officials of the War on Drugs believe the bill will do little good.

The Senate, following a custom observed several years ago, passed a resolution granting the President a clean bill of health for an entire week of debate on the Panama Canal treaties. Four conference committees are scheduled. Later in the week, the House plans action of a treaty bill to authorize the use of 80 million dollars of the highway trust fund to repair “unscrupulous” and “worn” bridges.

President Reagan also has handed out instructions in a memo that the Congressmen are debating the treaties, which begin in the wee hours with three days of opening statements before the floor vote and a delay in the action. It is expected to go on for six or more days before a resolution is reached.

The current UPI tally has 51 senators for the treaty, 31 against, with 7 members of the Senate refusing to sign the roll call. Senators for the treaty are predicted to be won by the margin of three to one.

The Senators are considering the following treaties, because the Senate has already approved the Senate's treaty last week, and there are no further action in the House: Panama Canal treaties.

The House plans to adjourn after the reading and has scheduled only one hearing to interrupt Washington's legislative schedule — Secretary of State James Baker testimony on the possible impact of gas.

The Senate, following a custom observed several years ago, plans a “one-day” public hearing to prepare for the debate on the Panama Canal treaties. Four conference committees are scheduled. Later in the week, the House plans action of a treaty bill to authorize the use of 80 million dollars of the highway trust fund to repair “unscrupulous” and “worn” bridges.

Senate sources also have handed out instructions to stop the action on the treaties until they are placed on the Senate schedule. The treaties begin in the wee hours with three days of opening statements before the floor vote and a delay in the action. It is expected to go on for six or more days before a resolution is reached.

No, we would simply fix their differences, which brings us to the second argument that needs addressing because there is an alternative. In this final section, I will outline some potential solutions for the drift we've been discussing.

Cope, having recently recognized the need to be forthright and clear on this issue, has offered a detailed response to Mr. Bobo's piece. He writes:

"I appreciate the opportunity to respond to Mr. Bobo's comments. His article is well-reasoned and I respect his passion for the field of digital humanities. However, I believe it is important to clarify a few key points.

First, I would like to address the issue of transparency. While there may be some concerns about the lack of transparency in the digital humanities, I argue that this is often a misunderstanding. Many scholars in the field are actively engaged in efforts to increase transparency and make their work more accessible to a wider audience.

Second, the concern about the potential for commercialization of digital humanities projects is valid. I fully agree that this needs to be addressed. However, I believe that commercialization can also be a positive force, providing new avenues for funding and collaboration. It is up to us as a community to ensure that these opportunities are used responsibly.

Finally, I would like to emphasize the importance of collaboration and community in the digital humanities. Many of the challenges we face are not insurmountable, and by working together, we can create a vibrant and dynamic field that benefits all.

In conclusion, while there are certainly legitimate concerns about the state of the digital humanities, I believe that it is important to approach these issues with a spirit of openness and collaboration. As we continue to develop and use digital tools to explore the richness of our cultural heritage, let us strive to ensure that these tools are used in ways that are fair, transparent, and inclusive.

The Role of Data in Digital Humanities

As we continue to develop and use digital tools to explore the richness of our cultural heritage, it is essential that we approach these issues with a spirit of openness and collaboration. We must be mindful of the potential for commercialization and ensure that these opportunities are used responsibly. By working together, we can create a vibrant and dynamic field that benefits all.

The Future of the Digital Humanities

I believe that the digital humanities is a field that is still in its infancy. As such, it is important that we continue to engage in critical self-reflection and evaluation. We must be mindful of the potential for commercialization and ensure that these opportunities are used responsibly. By working together, we can create a vibrant and dynamic field that benefits all.

Conclusion

In conclusion, while there are certainly legitimate concerns about the state of the digital humanities, I believe that it is important to approach these issues with a spirit of openness and collaboration. As we continue to develop and use digital tools to explore the richness of our cultural heritage, let us strive to ensure that these tools are used in ways that are fair, transparent, and inclusive.

FDA to test Israeli oranges

PHILADELPHIA (UPI) — The Food and Drug Administration will send a safety check on 20,000 Israeli oranges to America and Europe to inspect the oranges for any sign of illness or disease.

A territorial group has claimed responsibility for preparing the Israeli oranges to shipments to America and Europe. The inspection will be conducted as part of a larger trend of food inspection.

Oswald book reveal Soviet spy theory

WASHINGTON (UPI) — The book speculates that Lee Harvey Oswald was a KGB agent who defected to the United States after a failed assassination attempt in Cuba.

The book suggests that Oswald was a KGB agent who defected to the United States after a failed assassination attempt in Cuba. The book also claims that the CIA and FBI were aware of Oswald's deflection but did not take action.

The book's author, a former CIA operative, says that the CIA and FBI were aware of Oswald's deflection but did not take action.

Now you can buy two components from Yamaha for the price of one.

Yamaha's HP-3 headphones are ultra-lightweight with wide frequency response and low distortion to give clear and uncolored sound reproduction.

Tuesday, February 28 is your last chance to get a free pair of Yamaha Orthodynamic headphones with the purchase of any Yamaha stereo receiver or integrated amplifier. That's a $35 value - absolutely free!

Yamaha's HP-3 headphones are ultra-lightweight with wide frequency response and low distortion to give clear and uncolored sound reproduction.

The Navy needs some very special college graduates who aren't afraid to find out how good they really are, who can complete their extensive and demanding training program and then make the most of their special training and challenges of their lives. A challenge that leads to an exciting future as a Naval Officer aboard a nuclear-powered surface ship or submarine at a starting salary of $16,000.

A Navy representative will interview on campus at OSCC on Feb 21st and 22nd, Engineering Program on Feb 23r, Congressional Program and Collier's G. Gurley (210) 871-7171, 7001 University, Suite 207, Tampa, 58130.
IRA admits bombing 'with regret'

WASHINGTON, D.C. — House Foreign Affairs Committee Chairman Robert Michel said yesterday that the admission of responsibility for the IRA bombing of the American Legation in Beirut was "a step forward in the fight against terrorism." Michel, who headed a House delegation to the Middle East, said he was pleased that the admission came after the United States had "sent a clear message to the IRA that terrorism is a show of force that cannot be tolerated." Michel said the admission was an important development in the effort to bring peace to the Middle East. He added that the United States would continue to work with its allies in the region to achieve a just and lasting peace.

Carter’s arms policy arms sales to Arabs

JERUSALEM (UPI) — President Jimmy Carter said yesterday that the United States will continue to supply arms to the Arab states to bolster their militaries and to help protect them from external threats. Carter made the statement in response to questions about his administration’s decision to end a ban on direct military sales to Arab states.

Carter said that the United States will continue to supply arms to the Arab states to help protect them from external threats, such as Iran and Iraq. He added that the United States will continue to work with its allies in the region to achieve a just and lasting peace.

End of embargo on arms to Libya

ABU DHABI (AFP) — The United States has lifted its embargo on arms sales to Libya, administration sources said yesterday. The move comes as part of a broader effort by the United States to improve relations with Libya.

The sources said that the United States will now begin negotiating arms sales with Libya, and that the sale of offensive weaponry to Libya is on the table. They added that the United States will continue to work with its allies in the region to achieve a just and lasting peace.

Soviets deny plan to launch nuclear attack on Chinese island

MOSCOW (UPI) — The Soviet Union officially denied yesterday that it was planning a nuclear attack on a Chinese island, as Chinese officials said that they had intelligence indicating that the Soviet Union was preparing to launch a nuclear attack.

The United States has been monitoring the situation closely, and has warned that it would respond forcefully if the United States were to launch a nuclear attack.

"We have no plans to attack any country," a senior Soviet official said, "and we condemn any threat to the peace of the world." The official added that the United States was monitoring the situation closely, and would respond forcefully if the United States were to launch a nuclear attack.

"We are confident that our actions will deter any aggressive moves by the United States," the official said, "and we will continue to work with our allies to achieve a just and lasting peace.

Freeze-thaw cycle breeding plotholes

WASHINGTON (UPI) — Potholes — those nasty pits in the road that will cause millions of dollars in damage each year — have been found to be more common in the West, according to recent research, and appear to be a reaction to freeze-thaw cycles.

"We have been seeing more freeze-thaw cycles in the West," said Dr. Robert Butler, director of the National Geographic Institute of Research. "These cycles can lead to the formation of potholes." Butler said that the phenomenon is most common in areas with significant snowfall, where the temperature drops below freezing and then rises above it again, causing the asphalt to expand and contract.

Potholes are formed when water from snow and rain seeps into the pavement, freezes, and then thaws, causing the asphalt to crack and fragment. This process can be accelerated by the freeze-thaw cycles that are common in the West.

"The freeze-thaw cycle is a major factor in the formation of potholes," Butler said. "It's not just a matter of the asphalt cracking up, but the water pressure inside the cracks can cause the asphalt to come apart and make potholes." Butler said that the phenomenon is most common in areas with significant snowfall, where the temperature drops below freezing and then rises above it again, causing the asphalt to expand and contract.

AUDITIONS

for University Theatre Summer Rep

"78 Company"

The University Theatre will hold open auditions for the Summer Rep "78 Company" on Friday, March 3, and Saturday, March 4, in the E.C. Mabie Theatre. Needed for the summer season are 3 women and 4 men. The season includes:

- Moliere's - The Guardman
- Shakespeare's - Comedy of Errors
- Heffner's - Vantines

Sign up now for audition time in the Mabie Theatre lobby. For further information call the University Theatre, E.C. Mabie Theatre, 353-5664.

Also needed are designers, technicians, and stage managers. For further information call or contact David Thayer at the University Theatre, 353-5664.
Busy weekend for Hawkeye athletes

Swimming

A combination of the win and loss of last week's dual between the University of Iowa and Minnesota this week didn't do much for the Hawkeyes. The girls defeated Minnesota 170.5-162 while the boys were defeated 172-159.5. The Hawkeyes were able to win with the help of captain Baty. Sue Woodside said she was "disappointed" and "tired" after the competition.

The Iowa men's team took first place at the NCAA meet in two weeks, and the Iowa women captured the third spot. Sue Marshall took 15 seconds off the Iowa record.

Track

Two school records were set last week at the Hawkeye track team's meet against Drake Field House. Lexi and Bobbi won the indoor dual meet.

Drake Field House

The Hawks were defeated 90-38 by Iowa on their home court. The Hawks were down by 21 points in the first period, but battled back to win.

Basketball

A 3-point barrier in their 200/2000 was broken by Iowa's Sue Marshall. She finished by scoring a total of 30 points. The team broke the 200/2000 barrier in history.

Gymnastics

The Iowa men's gymnastics team is ranked fourth in the nation. They are looking to avoid a defeat of the Hawkeyes, who are ranked 15th. Sue Finlay finished third place in the state.

The star of the meet was Iowa's Bobby duRoy. He captured the all-around title with 36.3, a season high, and was first on the parallel bars. His team scored 191.3 points against 185.0 for Minnesota.

On the women's side, Iowa finished fifth in the meet. Sue Mosley took first and second place in the all-around and the floor exercise respectively. The team won the meet 191-187.

The Dally

The Dally is a series of events that take place throughout the semester. It is a way for students to enjoy a variety of activities and socialize with others.

The Mini Series: An Introduction to the Arts

The Glenn Miller Story

The biography of the fabled Glenn Miller, Jimmy Stewart, who authentically captures the spirit of the 40's. Directed by Anthony Mann.

The Glenn Miller Story

(i)
No. 1 Iowa trips ISU

By WHITE O'MALLEY

The story has it a few years back Iowa State wrestling coach Dan Gable decided to give the Hawkeyes a shot in the dark by inviting them to play each other for the rights to the top spot in the nation. It was a cold, hard fact of the sport that Iowa had no experience against the Hawkeyes, and that Steve Huot, Iowa's heavyweight, would likely be no match for Charlie Gadson. But Gable had a feeling the Hawkeyes could be a match for the Cyclones, and he was proved right.

The Hawkeyes showed up at Allen Fieldhouse on the Iowa State campus for the meet, and they found their record still in the corresponding seats in the arena. Charlie Gadson and Iowa State's 126-pounder Dan Glenn had pushed Iowa to its first-period lead, and with a 9-3 victory over NCAA runnerup Joe Zuspann as the difference, a mark of 1-0 in the dual, the Hawkeyes put Nichola and his Iowa teammates in the driver's seat.

Dan Gable and his Iowa team were up against the top-ranked Hawkeyes, and Gable said, "I think after the Iowa trip ISU will be better to sit than the trip to Iowa. And Iowa State will be better to sit at home." The Hawkeyes were up against the Cyclones again, and Gable said, "They've been better in their own weight and for us as well." Nichola had pushed Iowa to its first-period lead, and with a 9-3 victory over NCAA runnerup Joe Zuspann as the difference, a mark of 1-0 in the dual, the Hawkeyes put Nichola and his Iowa teammates in the driver's seat.

"Even though Zuspann looked the part, I had to think I wasn't really competing as much," Zuspann said. "And when I stepped off the mat, I heard the Hawkeyes were upset with a 1-0 dual loss to Iowa." Gable said, "I'm surprised Zuspann was upset, but I'm proud of the Hawkeyes for coming through with our best win against his former mentor."

The victory marked his first win over the previously top-ranked Hawkeyes, particularly satisfying, as Iowa had been ranked No. 1 in the nation at 138 pounds. Zuspann took a 1-0 lead into the first period, but Zuspann and Iowa State's Kelly Ward then came through with their best duals ever. Zuspann dropped to 4-0 for the season, and the Hawkeyes won the dual, 25-10, in the final minutes. It was the first dual win and a hard-earned victory for Iowa, and Iowa State's Nichola experienced Zuspann's injury and scored the deciding pin in the Hawkeyes' dual against Iowa.

Gable said, "As far as it being an upset win, all that was missing was the Iowa City's best basketball player. The Hawkeyes have been able to come through with their best duals ever. Zuspann, and upped his winning record to 10-3 for the season, and the Hawkeyes won the dual, 25-10, in the final minutes. It was the first dual win and a hard-earned victory for Iowa, and Iowa State's Nichola experienced Zuspann's injury and scored the deciding pin in the Hawkeyes' dual against Iowa."

"I want to thank Mike McGivern for coming through with his best duals ever. Zuspann dropped to 4-0 for the season, and the Hawkeyes won the dual, 25-10, in the final minutes. It was the first dual win and a hard-earned victory for Iowa, and Iowa State's Nichola experienced Zuspann's injury and scored the deciding pin in the Hawkeyes' dual against Iowa."

You didn't believe the Hawks,
but they are in the NCAA tour-
ament. Illinois dropped its last
game to Michigan State, but
beat Iowa in the last few sec-
onds. ...
