U.S. Soviets

Briefly

WASHINGTON (UPI) - The Supreme Court ruled Monday that Congress acted properly in taxing a specific fund - now $2 billion - on damages recoverable from federal agencies.

The decision was a major victory for the Administration, which had been attempting to regulate nuclear power plants since the accident at Three Mile Island.

It was a setback for the anti-nuclear movement.

Passed to fund a liability settlement that would be awarded to residents whose homes were damaged or destroyed by the nuclear accident.

The decision came in the aftermath of the nuclear disaster at Three Mile Island, when the Department of Energy ordered a nationwide public health warning.

The court refused to let the issue be debated on the basis of the nuclear issue.

The Department of Energy also asked for a rehearing of the case.

The decision could impact other nuclear plants that have been ordered to be closed.

The court is scheduled to release its decision after the case is argued on May 21.

Festival finances hit new snag

No bail-out for Refocus

by KELLY ROBERTS

Refocus, the Ulster University student group which was "kicked out" of its Alumni Association-sponsored office last March, has filed an action in the High Court for £12,000 in damages. The money was raised in a number of ways, including a 24-month subscription for the alumni magazine with a deadline in December 1976.

The two groups have made repeated attempts to settle the dispute in the High Court, but both sides have refused to back down. In the High Court, Refocus' solicitor, Mr. R. A. L. Bawden, told the court that Refocus' members have been denied access to the office since it was taken away from them in March. Refocus' solicitor, Mr. R. A. L. Bawden, told the court that Refocus' members have been denied access to the office since it was taken away from them in March.

The group has spent over £12,000 in legal fees, and it is estimated that the case could cost up to £20,000 in total.

Canine contraceptives:

Love, it's a bitch

NEW YORK (AP) - Veterinarians are using dog contraceptives for the first time, but there is no guarantee that they will work. The contraceptives are believed to be effective in 90 percent of cases.

People who want to prevent pregnancy may want to consider the new contraceptives. They are safe and effective, and they can be obtained from veterinarians.

Whale kill

LOUISVILLE (AP) - A proposal by President Carter to declare a twelve-month moratorium on commercial whaling is being closely watched by environmentalists. The plan is expected to be announced at an upcoming meeting of the International Whaling Commission, which is scheduled to convene in May.

The proposal by President Carter would be a major victory for those who opposed the expansion of whaling, but it is not yet clear how the moratorium would be implemented.

The moratorium would last for twelve months, and it would be reviewed at the end of that period. If the moratorium is lifted, it would be replaced by a new proposal by President Carter.

Group stresses nuclear dangers

By DENNIS FITZPATRICK
Staff Writer

Working about the "potentially high competition of solar energy," a group of residents called Monday for an energy tax on the headquarters in Iowa City. The meeting concluded with the residents appealing to officials to consider the potential consequences of nuclear power, a topic not currently on the agenda in Iowa City. The residents also expressed concern about the possible radiation that could be produced by a Hy-Vee store.

Two petitions, one for and one against a Hy-Vee store, were presented by residents. The residents were concerned about the potential radiation that could be produced by a Hy-Vee store but would require more data to be presented.

Smith said the Petition Committee recommended to the council that a Hy-Vee store would require more data to be presented. The residents were concerned about the possible radiation that could be produced by a Hy-Vee store.

Effective protest

The current protest at the weekend's anti-nuclear demonstration at Seabrook, N.H., is making a strong impact on the ears, if not also the eyes, of those who are concerned about the future of nuclear power generation. The protest, which started with a group of about 100 people, has grown to over 1,000, and is expected to continue through the week.

The protest is focused on the Seabrook-Bedford Nuclear Power Station, which is scheduled to begin operation in 1975. The protesters are concerned about the safety of nuclear power and the potential for accidents.

 Farmers' beef

Farmers' beef available, prices have risen... Farmers are reporting that prices for beef have increased in recent months. This is due to a combination of factors, including a decrease in the supply of beef and an increase in demand. The price increase has been most noticeable in the case of beef cattle, which have been selling for prices that are significantly higher than they were a year ago.

The increase in prices is expected to continue in the near future, as supply and demand factors remain unchanged. Farmers are encouraged to keep a close eye on market trends and adjust their production plans accordingly.

Boundary dispute

As the dispute over the status of Boundary Waters Canoe Area in Minnesota is certain to become a major issue in the 1973 congressional campaign, the question of ownership of the Boundary Waters area has come to the fore. This is a complex issue, and the debate is expected to continue for some time.

In the past, the issue has been the subject of many congressional hearings, but it has not been resolved. The federal government has claimed ownership of the area, but many states have claimed it as well. The issue is expected to be a major topic in the upcoming campaign.

My homemade navigation aid

As the sun sets over the mountain range, the stars begin to appear. The sky is dark, and the stars are shining brightly. I take out my homemade navigation aid, which is a simple device I made using a piece of cardboard and some string. It works like a mirror, reflecting the stars and showing me the way.

I use it to navigate my way through the mountains, and it has been very helpful. I highly recommend it to anyone who loves to hike or camp in the wilderness.
In the case of 'Omen II,' more is less

Eagles available July 17.

The Godfather

A corollary of the well-worn theory that the original is always better, director Francis Coppola directed and wrote the sequel to the first film and didn’t exactly outdo the original by much imagination or much imagination. Instead, he chose to make a sequel not just based on the first film, but also on the second film. The result is a film that is less than the sum of its parts.

The Godfather Part II

Tourney in Clarksburg is this year's venue. The contest will be played on the campus of Clarksburg College.

The meet begins on Tuesday afternoon and goes through Friday morning. The meet is sponsored by the Clarksburg College Physical Education Department.

Sturdy's return to the shooting eye that assured her place on the team was a joy to the coaching staff and the fans of the World Basketball League.

"I'm very excited to be back," said Sturdy. "I feel like I'm a part of something special and I want to help make sure that it continues to be successful."
