Police lawn grass is greenier

By Bruce Jensen

Staff Writer

"Noticing outside the Iowa City Police Department building to see the lawn grass appear greener than it has in months," said Paul Sorensen, the city's chief of police.

A majority plant based along the shoreline outside the Iowa City Public Library, which houses the police department, recently donated new grass to the city's public safety department.

"First of all, it's male, and it's not going to do anything good anyway," said Iowa City Police Det. Paul Sorensen.

UI library cuts raise concern

By Phil Thoms

The recent action to be the acting librarian and Thursday the University of Iowa administration had been searching for a new head of the library for a year and a half.

Regents acknowledged that the library was facing budgetary problems.

Carl Grimes, director of the UI library, said he has been forced to make some budget reductions at the library, because the library administration had to cut $50,000 from the budget.

"It certainly makes this job a little more challenging," Grimes said.

The budget problem will have to be handled if the library is expected to balance the needs of the university and the other sources of revenue.

"I'm sure there will be little cuts in the budget," Grimes said. "That's a real concern to me."

The library will not be affected by "big cuts until early next year," Grimes said.

It was not known if any changes will be made to the library's services or staffing.

Naricaragua drafts new constitution

By Daniel Orge

The article begins with the words:

"Naricaragua, Nicaragua (AP) - A new constitution will be drafted for약의가야. The constitution will be proposed for the next election, which will be held on March 10.

Cancer takes UI radio pioneer Thursday
Carl Menzer, a national broadcast pioneer and a longtime Iowa City resident, died Thursday morning at Mercy Hospital, apparently of cancer.

Menzer, a Lovette Iowa native, first came to the UI as a student in 1934.

During his junior year, Menzer built an experimental radio station in the basement of the student union.

In 1939, while a student at the University of Illinois, Menzer began working in radio broadcasting at the UI for a small salary as a radio announcer. He went on to become the first full-time UI radio announcer.

Menzer's career in radio continued until his retirement in 1968. He was an early pioneer in using radio to broadcast lectures, including those by UI president J. Lloyd Buck.

UI festivals to take Japanese theme
The annual arts festival will be held at the UI this fall, with events ranging from music and dance to art lectures, panel discussions, and seminars on Japanese print.

Two festivals celebrating Japanese Art and Culture will take place, one on Sept. 8-12 and the other on Oct. 18-20.

For more information, contact the UI's East Asian Studies Program at 319-339-1607 or visit their website.

Panel votes not to reproach lawmakwrs for Mingo bash
A panel voted not to reproach lawmakers for using state money to host a Mingo bash.

The panel voted 8-0 in favor of not reproaching lawmakers for using state money to host a bash.

Exposure disputes rally in Sri Lanka

COLOMBO, Sri Lanka — A bomb exploded at a crowded government rally in a Colombo suburb Thursday night, injuring 45 people, including a Norwegian journalist.

Bombs were not ruled out immediately after the explosion.

Bosnia issues new Order

The government banned the wearing of uniforms in the streets of the capital and prohibited the use of military and security vehicles for non-governmental purposes.

Tainted soup kills New Jersey man

CAMDEN, N.J. — Police seized a truckload of chicken noodle soup that killed a New Jersey man after it was found with cyanide in an insulated, refrigerated container that reached the store where it was bought, authorities said Thursday.

Health officials, police and scientists at the New Jersey Department of Health, the best of poisoned Lipton Green Ice Tea, a Delco Ltd. of Winnetoubo, N.J., appeared to have been the only tainted package of the powerful new circulating-Cyanide in an insulin drugstore in Camden.

Larry Horowitz, assistant general counsel for the store, said Lipton ordered a $5,000 check from store shelves in Camden, and surrounding areas of southern New Jersey, for a return of New Jersey.

The incident occurred when a Seventh Day Adventist woman, who was buried Thursday.

Coerced abortion not worth funding

By Douglas Johnson

When the recent furor over the role of U.S. aid to Nicaragua came to a head, the administration announced that it had ceased funding the National Endowment for Peace (NEP) for a 90-day period. This move comes in response to a letter from U.S. President Ronald Reagan to the Secretary of State informing him that the U.S. government will no longer support Ozanam House, a U.S. organization which closely resembles Nicaragua's National Pioneering Institute.

In response, the administration suspended U.S. aid to UNFPA in late June. Two weeks later, the Neonatal Institute, a private research institute based in Monterrey, Mexico, received a $50,000 grant from UNFPA.

The Neonatal Institute, which is supported by the United Nations Population Fund (UNFPA), has been involved in a controversy over its relationship with the Chinese government.

UNFPA was founded in 1969 with the goal of reducing maternal mortality and improving reproductive health. It is a member of the United Nations System, and its work is funded by contributions from governments and international organizations.

The Neonatal Institute was established in 1975 as a private, non-profit research institution dedicated to the study of neonatal mortality and morbidity. It is located in Monterrey, Mexico, and is supported by the UNFPA.

UNFPA has been criticized for its cooperation with the Chinese government in the development of abortion technology. The Chinese government has been accused of using abortion and sterilization as population control measures.

The Neonatal Institute's research has been used by the Chinese government to develop and implement policies that promote abortion and sterilization. These policies have been widely criticized for their negative impact on women's health and human rights.

The Neonatal Institute has also been accused of engaging in coercive abortion practices. The Chinese government has been known to force women to undergo abortion and sterilization against their will, often as a condition for receiving medical care or other benefits.

The Neonatal Institute's relationship with the Chinese government has been a point of contention for UNFPA and its supporters.

In conclusion, UNFPA's decision to suspend funding for the Neonatal Institute is a significant step towards ending its involvement in coercive abortion practices. It is important to note that UNFPA's ultimate goal remains to reduce maternal mortality and improve reproductive health, and that it will need to find alternative sources of funding to continue its important work.

UNFPA and the Chinese government must work together to ensure that reproductive health services are accessible and safe for all women, and that coercive practices are not used to achieve population control goals.

To the Editor:

We strongly encourage all readers to support UNFPA in its efforts to promote reproductive health and rights, and to hold the Chinese government accountable for its actions.

Sincerely,

UNFPA Staff

Coverage of protest anger's DI's readers

By Richard H. Hart

The Daily Iowan staff writer Phil Thomas and I sat the same table in the Student Center and had a meal together before his single-handed resignation on August 15. He left that morning, two weeks after the start of the school year, in the middle of his first term.

The rest of the Daily Iowan staff were not surprised by the resignation. They knew Phil was not happy with the way things were going at the newspaper.

Phil had been a part of the Daily Iowan staff for four years, and during that time he had worked on every level of the newspaper, from reporter to editor. He was well-respected by his colleagues and had earned the respect of his readers.

But Phil's last year at the Daily Iowan was not easy. The newspaper was going through a transition, and Phil was not happy with the changes that were being made.

In his resignation letter, Phil wrote:

"I have decided to resign from my position as an editor on the Daily Iowan. This decision is not one that I have taken lightly. It has been a difficult choice for me, but I believe it is the right one for both myself and the newspaper."

Phil's resignation letter was widely praised by students and faculty members. Many people expressed their support for Phil and wished him well in his future endeavors.

Phil's departure from the Daily Iowan was a loss for the newspaper and its readers. But it was also a gain for Phil, who now has the opportunity to pursue his own path.

To the Editor:

We are writing to express our support for Phil Thomas and his decision to resign from the Daily Iowan. We believe that he is a talented and dedicated journalist, and we hope that he will find success in his future endeavors.

Sincerely,

[Names of signatories]
New county policy on smoking bogus

By James Callan
Staff Writer

The resolution passed by the Johnson County Board of Supervisors that prohibits smoking in the offices, will relocate to a new building several times last week, but that he didn't push the idea any further.

THE resolution passed by the Johnson County Board of Supervisors in order to conform with state policy was drawn up and brought it to the lunchroom.

"I don't try to hide the fact that I am in favor of a total ban on smoking, but I think the best I can hope for is..." he said.

Myers said the board would bring it to the lunchroom.

"I have the slightest idea of what we were voting on with that resolution, I thought we were just talking about the new building," he said.

Some county employees, including the county attorney's office and supervisors' office will relocate to a new building beginning in late August.

THE resolution specified the areas where smoking is allowed, while the new resolution left that determination up to department heads.

At least one of the board members, however, thought the new resolution was still in effect.

"I am writing to protest the step in the most serious terms and ask you to rescind..." the letter said.

"I am writing to protest this step in the most serious terms and ask you to rescind..." the letter said. "We believe this action is part of an attempt to..."

The agency announced this week it has contracted with a private collection agency.

Levin challenged by new honors director

New honors director hopes to develop students' potential to do extra work as an honors scholar.

THE EFFECT AND resource requirements of a university's honors program can be compared to the effort and stress placed on a master's thesis, which is valuable training in preparing for graduate school, says Donald Vogl, the incoming honors director at the University of Iowa's College of Liberal Arts and Sciences.

"I'd like to dispel the myth that honors students spend all their time studying," Vogl said.

"If students are well-motivated, they can choose undertaking a task as huge as an honors project. But other, intellectually oriented options are included in the honors program." Vogl explained.

Determination, spirit bring handicapped freshman to UI

By Pat Dominguez
Special to The Daily Iowan

Barry Meinert was motivated to join the University of Iowa by a desire to move away from the reputation for working with handicapped students in his high school.

"I was very aware of the stereotype that people have of working with handicapped students," said Meinert, a freshman who is confined to a wheelchair.

Meinert, who was born with a spinal cord injury, has spent most of his life in a wheelchair. He recently entered the University of Iowa, where he is studying electrical engineering.

"I was determined to change that stereotype and prove that I could succeed in college," Meinert said.

Meinert is one of several handicapped students who are attending the University of Iowa this fall.

"I appreciate it because, even though I can't walk, I can do just as much as anybody else," Meinert said.

He added that he is taking advantage of a UI network that enables him to use computer services and tools like a personal computer and a word processor.

"I didn't think that I would be able to do all of this," Meinert said. "I was surprised by how much I could do."
Beirut bomb explodes, kills 3 French soldiers

BEIRUT, Lebanon (UPI) - A remote-control bomb exploded Thursday near a French military compound in Beirut, Lebanon, killing three French soldiers who were guarding the area, officials said.

The French military had been on a real about 200 feet outside the French compound, located in the Shahid al-Sharaf neighborhood, on the eastern outskirts of the city, about four miles from the French embassy, which is closed due to the latest wave of violence, a defense ministry official said.

It was not known who planted the bomb or what was the intent behind the attack.

In the past, the French military has been attacked in Lebanon, including in 1983, when a car bomb targeted the French legation in the capital, causing damage but no injuries.

Several French soldiers have been killed in the conflict.

The French military has been in Lebanon since 1971, as part of a UN peacekeeping mission, and has been involved in several incidents in the country, including a 1982 bombing attack that killed 24 French soldiers.

Fires at chemical plants hit 2 states

WASHINGTON, D.C. — Friday’s blaze at a warehouse on the outskirts of Houston, which caused an estimated $99 million in damages, is offering special deals to Wednesday flights. The lowest fares from such destinations as Los Angeles, San Francisco, Chicago and New York are $300. The fire was started by a chemical fire, which caused an estimated $99 million in damages. The cause of the blaze was under investigation.

In NEW YORK, a fire and series of explosions rocked a downtown chemical plant early Thursday and formed a cloud of smoke over the city. The major problem was a visual threat to trains traveling towards and from the city, said Lt. Jack Pendergrass. "It was very obvious and offensive to the public." The fire was not contained by the forces and a lack of fire hydrants in the area, said Robert Mockler, director of the Port Authority of New York and New Jersey.

Civil rights groups: Rehnquist beatable

WASHINGTON, D.C. — Williamsburg: One of the nation’s most prominent, left-leaning civil rights organizations is offering special deals to Wednesday flights. The lowest fares from such destinations as Los Angeles, San Francisco, Chicago and New York are $300. The fire was started by a chemical fire, which caused an estimated $99 million in damages. The cause of the blaze was under investigation.

The cause of the blaze was under investigation.

In NEW YORK, a fire and series of explosions rocked a downtown chemical plant early Thursday and formed a cloud of smoke over the city. The major problem was a visual threat to trains traveling towards and from the city, said Lt. Jack Pendergrass. "It was very obvious and offensive to the public." The fire was not contained by the forces and a lack of fire hydrants in the area, said Robert Mockler, director of the Port Authority of New York and New Jersey.

Civil rights groups: Rehnquist beatable

WASHINGTON, D.C. — Williamsburg: One of the nation’s most prominent, left-leaning civil rights organizations is offering special deals to Wednesday flights. The lowest fares from such destinations as Los Angeles, San Francisco, Chicago and New York are $300. The fire was started by a chemical fire, which caused an estimated $99 million in damages. The cause of the blaze was under investigation.

Secrecy surrounds Star Wars launch

The Defense Department's Star Wars program has been shrouded in secrecy since its inception in the early 1980s. The program, which aims to develop a defense system to protect against intercontinental ballistic missiles, has been the subject of much debate and speculation.

The first test of the system, known as the Strategic Defense Initiative (SDI), was conducted in July 1985. The test involved firing a laser from a satellite to destroy a target missile in space. The test was unsuccessful, and the program was faced with significant technical challenges.

In the years since, the program has undergone numerous changes and has had its funding reduced. Despite this, the program has remained a symbol of the United States' commitment to military innovation and has been a source of controversy and debate.

The program has faced criticism from some quarters, who argue that it is too costly and may not be effective. Others, however, believe that it is essential to protect the United States from potential threats.

The Star Wars program continues to be a topic of discussion and debate among policymakers, experts, and the public. The future of the program remains uncertain, as it continues to evolve and adapt to changing circumstances.

For more information on the program, please visit the Department of Defense's website at https://www.dod.mil/ and search for "Star Wars Program."
Atkins views his post with enthusiasm

Steve Atkins, recently chosen as Iowa City manager, says the UI helped attract him to the job. "I like the environment of a university town," he says.

As Iowa City manager, Atkins represents the University of Iowa and the city of Iowa City. Atkins was appointed city manager in early 1986, and he is responsible for implementing the policies of the Iowa City Council. Atkins is also employed by the University of Wisconsin-Madison and acts as a county manager for the University of Wisconsin Extension.

Although he enjoys his work, Atkins also enjoys his personal life. "I like being the center of attention," said Atkins. He recently accepted the job as city manager of the University of Wisconsin-Madison.

The Adirondack Flyers, a widely recognized professional airshow team, will perform at the Federal Aviation Administration Airshow at the Federal Aviation Administration Airship Terminal on Sunday.

The Adirondack Flyers, a widely recognized professional airshow team, will perform at the Federal Aviation Administration Airshow at the Federal Aviation Administration Airship Terminal on Sunday.

On the ground, a four-wheel drive, station wagon, modern military aircraft, commercial aircraft and various small aircraft will be on display.

If you picked A, C and D, you're destined for great things. Like AT&T Long Distance Service. AT&T offers so many terrific values. Like a 40% to 50% discount off our day rate on night, even, and weekend out-of-state calls. Imagine what you'd do with the money you could save. Imagine what your parents would do if they found out.

What's the right choice for most college students?

- AT&T — for everyday discounts of 40% to over 50% off weekday rates on out-of-state calls.
- Short bursts of intense study followed by hours of frantic partying.
- AT&T — for exceptional value and high quality service.
- AT&T — for collect, third-party and operator-assisted long distance calls.
- Any class that does not conflict with "The Love Connection."

Banks gets good news from recruits

Iowa baseball Coach Duane Banks will have the services of promising pitching recruit Allen Bash and Carlos Edned, after the pair declined their initial offers from several other universities.

NAIA delivers minor sanctions to LSU

BAYOU BURGE, La. (AP) — The NAIA Thursday placed Louisiana's baseball team on one-year probation for 12 recruiting violations, but allowed the team to retain its scholarships and postseason bowl participation.

The body also issued a one year ban on off-campus tournaments to assistant football coach Terry Low.

A stray inquiry of LSU's football program resulted in multiple allegations of wrongdoing. Those were cut to 13 after university officials appealed at an NCAA hearing in Columbus, Ohio, last month.

LSU Chancellor James Whitworth said the penalties were in line with what the university expected.

"We have read about things we expected and hoped for," Whitworth said in a prepared statement. "I feel we reached a thorough and equitable hearing from the NCAA.

Athletic director John Blockhead also was satisfied with the result of the probe.

I am thrilled that after an extremely detailed audit and investigation of our football program that the NAIA has placed only 13 sanctions and I believe that our football program is once again a top tier program and reputation established by the NCAA," Blockhead said.

Lopez opens title defense in Portland

PORTLAND, Ore. (AP) — Larry Lopez makes his title defense of the $200,000 Portland Play Championship Friday when he tees off against 24 other players.

"This course is a very special one to me," Lopez said.

Lopez, who shot 63 in the final round to win the 1985 title, was negotiating with the Portland Golf Club to return next summer.

Lopez, who is ranked fourth in the world, said he doesn't know how he is going to perform at his home course, but the memory of his victory will be in his mind.

Lopez is making his title defense against a field of 25 players that includes Tiger Woods, who won the title last year, and seven other players who have won titles in the past.

Hilles starts season in Hawaii

University Press International

Pee-E 38

Hilles, a past intramural administrator, will return to the Hawaiian Islands for the start of the college football season in Hawaii.

Hilles was the Intramural Director for the football tournament while the women's tennis teams were run by the International Services Department.

Hilles will have a lot of fun with events like the earth ski trip and the cross-country skiing trip in the mountains. Again this year, the Imu will host the biggggggggtrr event on campus: the Touch Football tournament. This year, the Imu will have to face the touch football tournament.

Palmer may pose problems for Lions

Intramural season will start with tennis, softball tourneys

By Mike York
Special to The Daily Iowan

The intramural season for the University of Iowa will get underway tomorrow afternoon when the first day of play is scheduled for the Tennis and Softball Tourneys.

Softball will begin play at 2:30 p.m. and 5:30 p.m. at the Complex with 16 teams entered.

The first day of play in tennis will be tomorrow afternoon with 32 teams entered.

Tennis will play at 2:30 and 5:30 and again on Wednesday and Thursday at 3:00 and 6:00.

The reason for the delay in the tennis tourney is due to the request of the Intramural Director to have the tennis courts available for outdoor weekends.

The varsity tennis team has also requested that the tennis courts be available for practice.

The softball tourney will be run according to the rules of the American College Athletic Association.

The team having the best record at the end of the tourney will be declared the winner.

The tennis tourney will be run on a double-elimination basis with 16 teams entered.

The schedule for the softball tourney is as follows:

Friday, September 8
3:00 p.m. - 1st round games
5:30 p.m. - 1st round games

Saturday, September 9
1:00 p.m. - 1st round games
3:00 p.m. - 2nd round losers
5:00 p.m. - 2nd round winners

Sunday, September 10
1:00 p.m. - 2nd round losers
3:00 p.m. - Semifinals
5:00 p.m. - Championship game

The schedule for the tennis tourney is as follows:

Tuesday, September 11
3:00 p.m. - 1st round games
5:00 p.m. - 1st round games

Wednesday, September 12
1:00 p.m. - 1st round games
3:00 p.m. - 2nd round losers
5:00 p.m. - 2nd round winners

Thursday, September 13
1:00 p.m. - 2nd round losers
3:00 p.m. - Semifinals
5:00 p.m. - Championship game

Heisman hopefuls speak out

GAINESVILLE, Fla. (UPI) - Florida Gibbs, passing through the thick Heisman Tide muro of contenders, said Saturday's Florida-Miami (Fla.) contest is "the biggest game in the next 100 years.""Vince Testaverde completed 20 of 28 passes for 278 yards and three touchdowns. "It really hurt at last year," Gibbs said. "We thought we might have a chance to win the game with the loss of John L. Smith," Gibbs said. "There was no way they could beat us in the open. Playing them at Florida, it's just not right." Making his first college start, Testaverde hit 24 of 38 passes for the factors in 1993 but was intercepted twice. He finished 25 yards and the Gators defense didn't help in the way Gibbs had drafted and ran for another score in Florida's 38-14 romp against Florida State last week from College Park, Md.

Giselah Busby, quarterbacking a 23-0 victory in Miami last season. "We improved and the ball in the backfield is phenomenal. It's nice to see updates from around the league every week," Davidson said.

"It's going to be a tough battle for nice to see updates from around the league every week," Davidson said. "We're excited and I really look forward to it. I want to see how well our team is prepared to play and how well the other teams are prepared to play.

Tribble doesn’t understand publicity in Bias hearings

WASHINGTON—Brian Tribble, a great friend and one of Hank Greenberg, a Hall of Fame baseball player and one of the greatest people I’ve ever met, doesn’t understand how publicity can be harmful. Tribble is a great executive, a great person, period... Not to mention a good friend of mine.

I think Brian Tribble was trying to get publicity for Marshall Bias Thursday. Tribble has been a Hall of Fame baseball executive for more than 25 years and he knows what it means to be a great friend in any capacity.

“Tribble was one of the greatest people I’ve ever met. He’s a great friend of mine and he’s always been there for me. When I needed someone to talk to, Tribble was always there. He’s a great baseball executive and a great person,” Bias said.

Absence of consciousness marks new "Trouble in Mind"

By Jeff Hatleman
Staff Writer

All TAKEN to understand director Steven Seagal's intent, it has taken awhile for him to realize.

Siworn film, Trouble in Mind is in a way Seagal's first directorial effort. After 20 years in films such as Under Siege, Out for Justice, and Last Action Hero with John Travolta (also a friend of Seagal), it seemed time Hawk had been there before.

But Hawk now finds himself as the Cope (Keith Carradine) and George (Burt Reynolds), a young couple who have come to San City to look for jobs and a more diverse way of life for their child Ad Melissa, Hawk is taken from his world.

Eventually he falls for Georgia (Lori torso), an ingenue with a vaguely intellectual, vaguely radical, clearly sensitive personality. By the time Hawk has saved Cope again, the women have learned something about the men, and the men have learned somewhat about themselves, through a massacre.

BUT THIS is just one of many, many, many, many stories. Hawk has been occupying Senator Washington, D.C. And Arizona, in a Capricorn crime lord called Hillside Blazes (Bruce Dern). By the time Hawk has saved Cope again, the women have learned something about the men, and the men have learned somewhat about themselves, through a massacre.

Somehow he called Rudolf's style Romantic. I have no idea what this means, but 1. Choose Me is a collection of papers, poems, letters, and small details that don't always work out. Hawk eventually realizes the type of character he is and he helps in the liberty to work up characters, what the action comes up with in time is not particularly fresh. Hawk is taken from his world. After Hawk has saved Cope again, the women have learned something about the men, and the men have learned somewhat about themselves, through a massacre.

LOUIE JACKSON's character moves the one Hawk is most entangled with, a woman with two good moments when Georgia's wising up about Hawk means to them. It's true; one sees nothing. Hawk is taken from his world. After Hawk has saved Cope again, the women have learned something about the men, and the men have learned somewhat about themselves, through a massacre.

Hijackers face trial in Pakistan

By Jacqueline Dutton

Business and sports--engineering and green--fashion newspapers can be found in almost every UI department, students say.

Engineering students, for instance, are thought to resemble the heroes in Romance of the North. Affectionately dubbed "goals," they supposedly care a damn about their work. They're not in it for the theory, they're in it for the work. Students say the instructor, who never took class as casually, agreed that the majority of today's engineers tend to be uninterested about what they're doing. UI senior Bob Halterman, an electrical engineering major, said in this attitude that engineers agree upon from the sophomore to the second year in the UI College of Engineering will prove that those chemicals do exist, but they are the exception, rather than the rule.

"I hate to be classified as a typical engineer," said UI senior David Hooper, a mechanical engineering major. "But there are some real goals in this thing."

"I would prefer people would think people in engineering tend to be a little straightforward," said UI senior Kent Robison, a mechanical engineering major. "If anything, students in engineering do just as good a job drinking and having a good time as any other major."

 UI president, who was dressed casually, agreed that the majority of today's engineers tend to be uninterested about what they're doing. UI senior Bob Halterman, an electrical engineering major, said in this attitude that engineers agree upon from the sophomore to the second year in the UI College of Engineering will prove that those chemicals do exist, but they are the exception, rather than the rule.

UI president, who was dressed casually, agreed that the majority of today's engineers tend to be uninterested about what they're doing. UI senior Bob Halterman, an electrical engineering major, said in this attitude that engineers agree upon from the sophomore to the second year in the UI College of Engineering will prove that those chemicals do exist, but they are the exception, rather than the rule.

"I hate to be classified as a typical engineer," said UI senior David Hooper, a mechanical engineering major. "But there are some real goals in this thing."

"I would prefer people would think people in engineering tend to be a little straightforward," said UI senior Kent Robison, a mechanical engineering major. "If anything, students in engineering do just as good a job drinking and having a good time as any other major."

UI Hospitals show fiber artist's work

By Jeff Lenochang
Titled "Sister," her work takes new artistic dime

"'Rodlers' is Rock and three weavings is fiber artist's work showing four design from the Special UI College of Design. It is hung in the Student Activities building's main lobby. "It's a way to put up a show at Cornell College in Iowa," Iowan Fiorito said.

The pieces are sold, with all the proceeds going to a fund for a student art project. "The money will be used to buy materials for a new project," Fiorito said. "It's a way to keep the spirit of art alive."

**UL Hospitals show fiber artist’s work**

**Art**

By Jeff Leachschentz

Special to The Daily Iowan

Jim Back and Bill Getman are fiber artists whose work is currently on display at the UI Hospitals.

The artists’ work is on display at the UI Hospitals and is titled "The Stand." The work involves kimonos and other clothing, with a particular focus on the kimono.

The artists have created kimonos that are not only functional but also a form of art. The work is displayed in different locations within the hospitals, and it is open to the public.

The artists have used a variety of techniques to create their kimonos, including weaving and embroidery. They have also used different materials, such as silk and cotton, to create the kimonos.

The display is part of the UI Hospitals' commitment to art and culture, and it is intended to be a source of inspiration and relaxation for patients and staff.

The exhibit will be on display until mid-October, after which it will be moved to another location.

**Trends**

**Hey, flathead ...**

Clipped hair is back — and it's hot

By Andy Pieper

The reason why?

The UI extension College of Iowa has noticed a trend in haircuts, specifically the flattop haircut.

The flattop is a style that was popular in the 1970s and 1980s and is now making a comeback. The haircut is characterized by a balding top and longer sides and back.

**The Trend**

In recent years, barbers have noticed an increase in the demand for flattop haircuts. According to Andy Pieper, a barber at the extension college, the trend is attributed to the popularity of movie stars who have had flattops.

Pieper said that the flattop is a versatile style that can be tailored to fit different looks.

**And Even When**

The flattop has proven to be a popular choice for men of all ages and backgrounds.

Pieper said that the flattop is a style that is easy to maintain and requires minimal hair product.

**The Reason Why**

But the reason why the flattop is making a comeback is due to its association with the classic Ivy League look.

Pieper said that the flattop is a style that is often associated with intelligence and success.

UI Hospitals show fiber artist's work

By Jeff Lerman
Special to The Daily Iowan

N OW YOU don't have to be sick to visit UI Hospitals. Weavings and tapestries by fiber artist Mieki Soldofsky, who received a master's degree in textile design from the UI, are currently being shown in the Carver Pavilion Links through Sept. 28, as part of UI Hospital Project Art.

Mieki Soldofsky's work requires the wide visual spaces provided where it is hung. Her untitled pieces are based on a basic square hung, with a wide border. The more narrow, off-white weavings have a second and third Iowa City residence showing four six kimonos, done from 1983.

THE STAND's weavings is "Rock and Roll" three weavings on the second level. Her weavings, which she bases on the square, have a motion effect.

Soldofsky related how she arrived at the title. "While putting up a show at Cornell College this past April, I talked on the phone..."
