Review's Bart poster found in violation of human rights policy

By Andy Bruner

The Campus Review violated the U.S.'s human rights policy when it posted a cartoon featuring a likeness of Iraqi President Saddam Hussein in October. According to the United Nations, such depictions could be seen as a form of censorship and would be problematic under the first amendment, the U.S. Human Rights Council stated.

A member of the editorial board, the newspaper's students' organization, read the newspaper for the incident that sparked an often heated debate about the student newspaper's role in shaping public opinion. The newspaper, in addition to lashing out at the university for its lack of due process, also blamed the local press for its negative coverage.

Hostages begin leaving Kuwait after 4 months

By Natasha Davis

In all, 324 people were on the airplane, and more than 90 were expected to leave the country. In its report, the committee further investigated the displays, finding that many of them had been stranded since mid-September. The committee also noted that Hussein's image was a significant factor in the decision to allow a unit to visit home.

Students find many ways to deal with the stress of finals week

By Ronan Stempfle

Imagine a world where you didn't have to worry about finals. A world where studying for exams didn't mean you had to spend 6-8 hours a day cramming. A world where you could still have fun, but not with the same pressure.

As students, we are constantly put under pressure to perform at our best. We are expected to maintain a balance between our academic and social lives, all while dealing with stress during finals week.

In addition to finals, students are also under a great deal of stress. Many students have a number of commitments, from extracurricular activities to part-time jobs.

Stress is a major concern for students, and it can have a significant impact on their mental and physical health. Stress can lead to a variety of problems, including anxiety, depression, and even physical illness.

STRESS MANAGEMENT TIPS

Health Iowan recommends the following tips to deal with stress.

- Exercise regularly: Try to do something physical every day, whether it's a brisk walk, working out at a gym, or playing sports.
- Eat a healthy diet: Avoid foods that are high in fat and sugar. Instead, eat foods that are rich in vitamins and minerals.
- Take breaks: Make sure to take breaks throughout the day to relax and recharge.
- Get enough sleep:争取充足的睡眠有助于减轻压力。
ISU has patent on fax part, seeks royalties

The Associated Press

AMES — Iowa State has yet to receive a patent for its latest invention: a fax machine. The university has in fact already received one patent for a fax machine, but that is not the machine of interest.
The fax part is one of several inventions that have been patented by Iowa State researchers in recent years.

Hancher Showcase open extra holiday hours

The Hancher Showcase, located in the Hancher Auditorium, will be open on extra holiday hours from Dec. 21 to Jan. 6. The Showcase will be open from 10 a.m. to 5 p.m. Monday through Friday, and from 10 a.m. to 2 p.m. on Saturday.

The Showcase will be closed on Dec. 23 and 25.

The Showcase offers a variety of items, including clothing, accessories, and gifts.

Iowa hospitals develop new heart procedure

The Associated Press

HANCHER — Iowa hospitals have begun to test a new technique for treating a heart muscle, with designs on the US and European markets as well.

The procedure involves using a catheter to inject radio waves into a blood vessel, causing the muscle to form scar tissue.

This is a new and exciting development in heart surgery, said one of the surgeons involved in the study.

The procedure is currently being tested at two hospitals in Des Moines, and it is expected to be available to patients in the near future.

New vice president named for relations

University News Service

Ann Rhodes, acting director of university relations, has been appointed vice president for university relations effective Jan. 1, 1990, pending Board of Regents approval, and will be responsible for all university public relations and media relations. Hugh Brown, assistant vice president for finance and university services since 1987 and also serving director of university relations since September 1989, will continue in those capacities.

"I am extremely pleased that Ann has agreed to serve the university in this new position," Brown said. "She has considerable experience in a number of highly responsible jobs at the university and has performed ably in all of them.

Norplant unlikely to reduce teen pregnancy

The Associated Press

Experts say newcontraceptive that eliminates the need for pills or condoms won't reduce the number of girls who, by accident or design, have children.

"Norplant is unlikely to be an important factor in reducing the number of young women who become pregnant," said Dr. Don Nielsen, director of St. Luke's Family Planning Center in Des Moines.

The latest medical response is a controversial calledNorplant, which is implanted under a woman's skin.

The implants provide continuous and convenient birth control for five years. The US Food and Drug Administration has approved Norplant for five years of use.

Researchers have had a limited number of Norplant implants since early this year.

Scrooge alive and well at state capitol

By Mike Glenn

Des Moines — An activity around the Capitol building has been occurring at a pace appropriate for the season — too soon.

There’s little Christmas cheer to be found in the ornate old building. That’s a bit unusual in a season as joyful as December. The Cap is populated by witnesses and they could be surprised to hear Scrooge in the guise of victory.

Analysis

With so many exceptions, that isn’t the case. Currently, the group of witnesses is the only one of both chambers of the Legislature that’s seeing bright lights. The first week in November, Iowa’s general election, was a win for the Democrats.

In the Senate, top leaders don’t talk about the shift. They point instead to a successful campaign that showed a 61 percent majority. In the House, the Democrats have a 56 percent majority. But in both chambers, that’s the best anyone has been able to gauge for an election.

New leaders in the House are even more interesting. ‘They’ve gone underground and don’t want to talk with anybody about anything. When they do answer, they speak very short — not very long. ‘We’re working together’ and ‘keeping something to ourselves,’ they insist. They really don’t have any desire to say it in and to many people that’s true. The fact is, the chamber is in session and the bond isn’t going to break. The atmosphere is very tense.

It’s a good thing state law already calls for the Legislature to convene on Jan. 14 because it’s unlikely the 45 House Democrats could agree on a date.

N.Y. garbage goes to dump through Iowa

The company will operate on a 90-day basis. Schopp Service Corp. of Marshalltown, an affiliate of Schopp, said the state will apply for a permit to transport 30 more rail cars with New York trash.

The company will operate on a 90-day basis, but the state will continue to dump. The cars will be taken to a temporary, the state while it applies for a permit to transport 30 more rail cars with New York trash. The transpor­tation will be rolling into Council Bluffs.

With some notable exceptions, that is the case. In the Senate, top leaders don’t talk about the shift. They point instead to a successful campaign that showed a 61 percent majority. In the House, the Democrats have a 56 percent majority. But in both chambers, that’s the best anyone has been able to gauge for an election.

**Cancer on rise for non-smokers**

**By Paul Reimann**

NEW YORK—Long cancer rates have escalated sharply in the United States that the death rate from the disease among non-smokers is now higher than the total lung cancer death rate in women 20 years ago, a study shows.

The increased rate of lung cancer among women who don’t smoke could reflect exposure to second-hand cigarette smoke as well as exposure to radon, asbestos and possibly air pollution, said Davis, a researcher at the National Academy of Sciences in Washington.

The increased rate of lung cancer among women who don’t smoke could reflect exposure to second-hand cigarette smoke as well as exposure to radon, asbestos and possibly air pollution, said Davis, a researcher at the National Academy of Sciences in Washington.

According to National Cancer Institute figures, the lung cancer death rate among all women in 1955 was 5.1, double per hundred thousand women. Davis and her colleagues calculated that the death rate in women non-smokers by 2010 was 8.1 per hundred thousand, an increase of more than 160 percent.

Sharp increases are also occurring in lung cancer, a blind cancer called mesothelioma and the degenerative skin cancer called non-melanoma skin cancer. These increases are occurring in many to almost all countries, not just the United States.

"The changes are as great over such a short time as in many countries in men and women that we need to look closely for any causes," said Davis. "There is a problem and we need to identify it."

Although the studies emphasize occupational and environmental exposures, smoking remains one of the single most important causes of cancer deaths in industrialized countries, it is responsible for 40 percent of all cancer deaths in men and 39 percent in women. Smoking kills an estimated 360,000 people each year around the world, and it currently costs billions that will cost us more than 160 billion dollars by 2000, she added.

The new studies are collected in "Trends in Cancer Mortality in Industrial Countries," which will be released by the New York Academy of Sciences later this week. A copy was obtained by The Associated Press.

In addition to the increases in lung cancer among women non-smokers, Davis mentioned these other estimates of cancer on the rise:

- Multiplicity of cancer appears to be increasing in industrialized countries, possibly as a result of increasing exposure to industrial hazards and pollution or as a result of "epidemiologically specific factors".
- "If I had to bet, I'd bet it was true," said Dr. Bernd Guenther, a professor of medicine at the University of Medicine and Dentistry in New Jersey, who recently suggested "the link with smoking might have been overlooked, but would be of value because it would cut other investigations to look at their smoking habits.

"It is increasing in men too."
W. Bank bombing kills Israeli

By Kevin Lied
The Associated Press

JERUSALEM - An Israeli soldier was killed and two were wounded early Monday in a bomb attack at a military base in the occupied West Bank, army radio said.

The army said six bombs were planted at the base and near the settlement of Gush Etzion, and the soldiers were killed and wounded when the bombs exploded. The deaths brought to 13 the number of Israeli soldiers killed during the Anata refugee camp on the northern edge of Jerusalem Sunday morning.

An Israeli border police sniper armed with an assault rifle fired in the settlement of Gush Etzion, sending one forter into the base, the army said.

Two Israeli soldiers were killed and one wounded in another explosion early Monday evening as an army patrol passed the gate of the military base along the Jericho-Bethlehem highway.

The army said.

Two Israeli soldiers were killed and six others were slightly injured when a bomb exploded outside the Dheisheh refugee camp in the West Bank village of Bethlehem Sunday.

In other violence, an Arab was killed and two were wounded in gunfire at the door of his house in the east Jerusalem neighborhood of Jabal Maryam.

The Israeli army radio said six bombs were planted at the base and near the settlement of Gush Etzion, and the soldiers were killed and wounded when the bombs exploded. The deaths brought to 13 the number of Israeli soldiers killed during the Anata refugee camp on the northern edge of Jerusalem Sunday morning.

‘Nutcracker’ to return again; ‘Cinderella’ posthumous to ’93

Ike Davis, though Iowa City schoolchildren will be the first to see this year’s performances of the “Nutcracker” and “Cinderella,” will not see them alone. Davis, a former Rockettes dancer who was among the first to perform in the show, will be represented in the performances as a member of the rockettes. The show will be presented at the University’s UI Fieldhouse Auditorium on December 15, 16, and 17.

UI professor receives arts award

Dr. Louis Johnson, professor emeritus of medicine at the UI, has been named the recipient of the 1993 Joffrey’s Nutcracker Award. The award recognizes contributions to ballet and its impact on the performing arts. Dr. Johnson was honored for his work with the Joffrey Ballet, which has performed “Nutcracker” at the UI’s Hancher Auditorium since 1975.

WEATHER TUESDAY CHICAGO SUNDAY WEDNESDAY THURSDAY SATURDAY MONDAY
Almost done

It's working.
The diplomatic solution conceived by George Bush and the United Nations is actually working. It has done what a peace strategy in the Persian Gulf, and a peaceful solution seemed near.
The combination of economic sanctions against Iraq and the threat of U.N. military intervention has now forced Saddam Hussein to back down.
The sanctions are working, and should be given time to emoji.

The American capitalist fantasy

There are those who criticize socialism or communism that are incredibly misinformed. They believe that there is a problem with socialism and communism, but they are incorrect.

They argue that socialism and communism have failed because they have lead to economic disaster and inequality. However, the failures of socialism and communism have been due to poor implementation, not the inherent flaws of the systems themselves.

Socialism, as practiced in the Soviet Union, was characterized by central planning and state control over the economy. This led to inefficiencies and misallocations of resources, resulting in economic stagnation and widespread poverty.

Communism, as practiced in China, was characterized by the absence of private property and the centralization of economic decision-making. This led to a lack of innovation and entrepreneurship, and a slow rate of economic growth.

These criticisms of socialism and communism are misinformed because they fail to recognize the potential for these systems to work effectively when implemented correctly.

For example, the Soviet Union and China both had periods of rapid economic growth and development when they implemented socialist policies correctly. These periods of growth were often characterized by a focus on heavy industry and state control over key sectors of the economy.

Socialism and communism have the potential to provide a more equitable distribution of wealth and resources, provide universal healthcare and education, and protect the environment. They are not inherently flawed systems, but their implementation must be carefully considered.

Guest Opinion

Corwin Kruse

For those who are interested I would suggest reading "Capitalism: A Love Story" by Naomi Klein. The book provides a critical perspective on the role of capitalism in the current political climate.

Klein argues that capitalism is inherently extractive and exploitative, and that it has led to a widening gap between the wealthy and the poor.

She also discusses the role of media and corporate influence in shaping public opinion and policy decisions.

Klein's book is a call to action for those who are disillusioned with the current state of capitalism and those who are looking for a more sustainable economic system.

Letter

The healing begins

Editor:

I have several times since the Jan. 15th scare been presented with a decision to return to class or to go to the hospital.

It has been a decision that has been made with the best interests of my health in mind.

I have been advised by my doctor to return to class as soon as possible.

The healing process has begun, and I am looking forward to getting back to the classroom.

John Kenyon

Letters

Let the healing begin

To the Editor:

I heard several weeks since the Jan. 15th scare was decided by a decision from a local judge. In fact, this was the third time that it was decided to return to class and that one of the decisions was made to go to the hospital.

As a result, it has been difficult to keep my mind on the task at hand.

My apologies to those who are affected by this decision.

I hope this decision will soon be made.

Thank you,

John Kenyon

2 Americans traveled to Baghdad, return home with 21 former hostages

By Wendy Berggren
The Associated Press

BAGHDAD — Former hostages Jon Eales and Mark Shand told The Associated Press that they were traipsing through the streets of Baghdad the same way they did years ago, except this time they carried little except for a little food.

Eales, a former British spy who was captured by Saddam Hussein's regime in 1980, said he was able to see the city's sights as a tourist because he had been detained for 12 years.

Shand, a former British businessman, said he was able to see the city's sights as a tourist because he had been detained for 12 years.

"We're not being thrown out there because we're being thrown out there," Shand said. "We're being thrown out there because we want to be there."

Timely tip-in gives Hawkeyes 'state title'

Iowa's Nick Daas puts game up at right time

By Brian Werner

There was a flurry of hands under the basket and the ball was tipped through the loop. The Hawkeyes had led throughout the game, but the New Jersey native decided to tip the ball in the final seconds, gaining the win for his University on Wednesday night.

Both teams entered the game with 17-4 records, and the Hawkeyes' season came to an end with a 75-73 win over De Paul at Carver-Hawkeye Arena.

'Lexy's greatest wish was to see every home sell-out, not lost to an opponent. She didn't want to see aggressive teams at the net. She was very, very well-prepared. Just like Iowa's. And then we started to settle down and our offense really started to click,' said Iowa head coach Tom Davis.

The Cyclones, who are now 1-7, thought Iowa would lose, too. But the Hawkeyes took over, not letting the Cyclones score a point until the 2:56 mark in the second half.

,'The Hawkeyes had some confidence on defense and I fouled him, so I fouled him. He's a guy that played for us. He's so unselfish, so unselfish,' said Davis.

Similar to the previous games, Iowa was able to get the ball in and out of bounds fairly quickly, enabling them to get a quick lead. De Paul made only 37 percent of their shots.

The Hawkeyes took the lead in overtime, and De Paul was unable to match it. Iowa's 80-point lead was the final score of the game.

The Hawkeyes' 75-73 win over De Paul Saturday was the third consecutive win for the Hawkeyes. The team's victory gave them a 7-1 record in Big Ten play and a 17-4 record overall.

In the first half, De Paul took the lead, but Iowa battled back with a 19-6 run to take the lead back. Iowa outscored De Paul 34-18 in the first half to lead 44-29 at halftime.

Hawkeyes (top) Tony Stinson, Roderick Davis and Ann Aradale celebrate winning the Big Ten championship.

The Hawkeyes have boomed throughout the season, especially on defense. The team had not allowed an opponent to score more than 70 points in a game since a 74-72 loss to Wisconsin on Jan. 10.

Iowa's defense has been the key to their success, holding opponents to an average of 60.4 points per game. The Hawkeyes' defense has been ranked in the top five in the country for the past three weeks.

But the Cyclones took over, not letting the Hawkeyes score a point until the 2:56 mark in the second half.

Iowa improved to 17-4 on the season and will play De Paul next Saturday in the second-round game of the Big Ten tournament.

By Brian Werner

The motivation for winning may have been what spurred Iowa to victory in the Big Ten. The Hawkeyes let their defense do the talking, holding De Paul to 37 percent shooting.

Women swimmers sink 'Clones in Ames

By Nick Watkins
The Associated Press

AMES — What was supposed to be a
close-contested meet between the Iowa
and Iowa State women's swimming and
diving teams Saturday in Ames became
anything but.

The Hawkeyes won a total team effort, as
four swimmers and one diver swept the
eight events.

The Hawkeyes were led by freshmen
Heather Haug and Lisa Guenther. Iowa won
seven of the eight events.

From the opening event of the afternoon
the Hawkeyes took control and never looked
back.

The teams of Laura Borgen, Chris Styer,
and Monica Thomson finished.

Iowa's record of 110.50, winning 11 of 14
possible events, taking second in the remaining
three, and tying the top teams in both the
200-yard backstroke and the 1-meter diving
compilation.

Iowa was led by junior Lisa Guenther, who
won the 50-yard freestyle with a time of
23.98. She also won the 100-yard freestyle
with a time of 50.69.

On the women's side of the pool, Iowa's
freshman Heather Haug swept the four
event freestyle races, winning the 200-
yard freestyle in a time of 1:47.47.

It was an easy win. It was one more
step toward national conference titles. 2

The victory by Iowa, ranked No.1 in
the nation by the Western Swimming
and Diving Coaches Association and
International Swimming Federation,
earned a first-place finish in those
events for the Hawkeyes.

Iowa's record of 110.50, winning 11 of 14

Birdie gives King World Match win

By Steve Effelt

The Associated Press

PRINCETON, N.J. — Birdie King made what might be the most crucial putt of her 44-year career Tuesday and kept her winning streak intact.

The 56-year-old golfer made a 2-foot par putt on the 18th hole to win the LPGA World Match Play Championships at halftime of a television broadcast.

"I was a little nervous going in there," King said. "I've never been in this position before." King missed the putt on the 18th hole in Monday's round, and the match was decided on a sudden-death playoff on that hole.

"I think I'm going to win the match," King said after making the putt. "I felt good about the putt."

King, who has won 102 career tournaments, was cruising to a 2-up lead over Beth Daniel when she missed the putt on the 18th hole in the final round. She had three birdies and a bogey on the back nine.

"I was trying to make 3, but I hit it on the edge," King said. "I had a lot of break to the right, and I just didn't make it." King had been 1-under par in her last six holes.

"I'm just glad I got through that," King said. "I've won a lot of matches in my day, but this one was special."

King, who is from St. Louis, had been looking for her first major title since 1984. She was the runner-up at the 1986 U.S. Open and at the 1987 U.S. Women's Open, and she won the LPGA Tour's first money title in 1986.

"I'm just glad to be here," King said. "I've been here before, but I've never won a major title."

King, who is playing in her 24th U.S. Women's Open this week, is the second-oldest player in the tournament. She recently won the U.S. Senior Women's Open, and she has finished in the top 10 in seven of her last nine major championships.

King's win Tuesday comes on the heels of a two-day battle with Daniel. King led 1-up after 13 holes, but Daniel won the next three holes to tie the match. King won the next two holes to go 2-up, and the match was decided on the 18th hole.

"I'm just glad I got through that," King said. "I've won a lot of matches in my day, but this one was special."

- Competitive salary based on experience

If you are interested in this opportunity, please submit your resume and cover letter to Mr. Paul Sandquist at 356-8566.
Happy Holidays Sale

Audio Odyssey's Happy Holidays Sale ends December 24th. Some quantities may be limited.

Christmas Never Sounded So Good!

When you buy a CD-player from Audio Odyssey, you can always count on three things:

○ You're buying a player from a technology leader like Denon, Nakamichi, Sony ES, or Altec.
○ You'll receive local, factory-authorized service should you have a problem.
○ If you have a problem that we can't fix in 7 days, we'll give you a better deal to use.

*Includes 3 Free CDs from Sony! (See Audio Odyssey for all the details.)

Meet our competitors' worst nightmares: The Sony GCP-575ES 5-band preamp. With its world's largest internal 6-bit converter operating at 45,185,140 times per second, there are no glitches and no crossover distortion. Just listen to the cleaner, equally clear, distorted sound ever to come out of a CD. The GCP-575ES also enables you to enjoy all kinds of information about the way you play up to 186 of your favorite discs. Wrap all this technology and flexibility in a full 5-year warranty and you have a peace of mind for years of conveniences.
