Minors' M.A.A. Association awards scholarships to students

U M A. student Valeria Wyman, Friday, was named to the Minors' M.A.A. Association'sFirst Annual Scholarship Committee, which established the award.

"I'm completely surprised," Wyman said. "I wasn't even aware of the scholarship and didn't apply." Wyman is majoring in public administration.

"We want to give people a chance to earn money by attending college," said M.M.A.A. President, an M.I.U. sophomore.

The award, which is based on academic excellence, requires a student to attend an accredited college or university and be a member of the association. The student must also be a resident of the United States and have a minimum grade-point average of 3.0.

The award is open to all students, regardless of their major.

With the decision of the United States Supreme Court, the battle over gun control is far from over. However, the battle has only just begun.

As the debate continues, both sides are working tirelessly to influence the outcome of the upcoming election. The pro-gun lobby is pushing for measures that would allow individuals to purchase firearms without restriction, while the anti-gun lobby is advocating for stricter regulations aimed at preventing gun violence.

In order to effectively address this complex issue, it is essential for all stakeholders to engage in constructive dialogue and consider the potential impact of each proposal. The ultimate goal should be to strike a balance between individual rights and public safety, ensuring that our communities remain free from the tragic consequences of gun violence.

Day-care teachers will expand to meet growing demand

Day-care centers have been seeing an increase in demand as more parents return to work after the pandemic. To meet this growing need, several new day-care centers have opened in the area.

"We've seen a significant increase in the number of families looking for day-care options," said one center owner. "We're seeing parents who used to stay home with their children now looking for reliable day-care services to keep their kids safe and busy during their workday.

As a result, the center has expanded its capacity to accommodate the growing number of children. "We've added three new rooms and hired additional staff to meet the increased demand," said the owner.

The expansion has not only provided a much-needed service to parents but has also created job opportunities for local residents.

According to the owner, the new day-care centers are providing a much-needed service to families in the community. "We're proud to be a part of providing a safe and nurturing environment for children," he said.

Despite the challenges posed by the pandemic, the center remains committed to providing high-quality day-care services. "We're dedicated to ensuring that every child has the opportunity to thrive and reach their full potential," said the owner.

While the demand for day-care services has increased, it is important to note that the pandemic has also highlighted the need for more support for child care providers. "We're committed to supporting our day-care centers by offering additional training and resources," said the owner.

The expansion of day-care centers is a positive development for families in the community. "This is great news for families who are looking for reliable and high-quality day-care services," said one parent.

With the increased demand for day-care services, it is crucial that we continue to invest in our early childhood education system. "We need to be proactive in addressing the needs of families," said the owner.

Day-care centers have a vital role to play in supporting parents as they return to work. "We're proud to be a part of providing a safe and nurturing environment for children," said the owner.

As we move forward, it is essential that we continue to support and invest in our early childhood education system. "We need to be proactive in addressing the needs of families," said the owner.
IC to celebrate women's achievements

March has been designated International Women's Month, and is marked with events that honor women.

John F. Waterhouse
Daily Iowan

For more than 40 years, many women have celebrated International Women's Day. The reason for an event focused on female community and social contributions has become more essential as the acknowledgment has been in recognition of growing inequalities and women's achievements, but it was only within the last few years that the event had taken on more global significance.

This celebration of women and their accomplishments has been ongoing for many years, when the United Nations designated March 8 as International Women's Day in 1975. But recognition of the day was not always the same as it is today.

"This year was not just one month to pay tribute to a group of people and places, but an entire year," said Heidi Collins, editor of the Daily Iowan. "Although we are recognizing women in a meaningful celebration, we must not forget that the struggle for equal rights and opportunities continues.

Similarly, it doesn't seem possible to imagine a world without women's accomplishments. More and more women are entering into traditionally male-dominated fields, and the number of female engineers, scientists, and entrepreneurs is growing every year.

But that's an understatement. "It's a source of pride for all of us that women are now participating in every area of our society," said Collins. "We are seeing women in leadership roles in politics, business, and academia."

"It is important that we celebrate the achievements of women by recognizing their contributions and the challenges they face. Women's achievements are not limited to traditional fields, but span across various sectors such as science, technology, arts, and politics."

Program lets students take classes together

Heidi Pedersen
Daily Iowan

One of the problems of attending a large engineering school is the feeling of being a "faceless body" in a crowd. The introduction of a new, student-focused curriculum at The University of Iowa has helped to alleviate this feeling.

"With the new curriculum, students can choose from a variety of classes and take classes with friends," said Collins. "This has made the school feel more personalized and less like a large university.""

Scientists seek postmenopausal women for study of drug to help bones get 'FIT'

Kelly Hammack

Daily Iowan

University officials are canvassing friends and family members of women who are not the senior citizens to participate in a study that focuses on osteoporosis.

Circle the Feelings

"We need women as older as possible," said Dr. Don Osada, an associate professor of medicine at the University of Iowa, who is leading the study.

Osada said the study is trying to find a way to prevent bone loss and increase bone strength over time. "That's the Union.

Center.

Mike Cloer

"Women who are in the study are coming in to the

every other week to receive injections of a drug," Osada said. "The drug is possible to increase bone density and prevent bone loss for people who are at risk for osteoporosis.

Scientists seek postmenopausal women for study of drug to help bones get 'FIT'

Osada said the study is important because it could provide a way to prevent bone loss and increase bone strength over time. "That's the Union.

One year later

M as than a year has passed since Iraqi forces were driven from Kuwait, and almost none of the stated goals of the U.S.-led coalition have been realized.

A war which proponentsavored was "not about us" which turned out to be not about us. The war in the Gulf has brought little, except for a multitude of problems in the region.

Kuwaitis say that the coalition left a web of sorts, which remains in the form of UN sanctions, economic sanctions, and a hosts of other issues.

As the U.S. military began to withdraw from Kuwait, the real work had just begun. The task of rebuilding the country of Kuwait was not going to be an easy one. The Kuwaiti people were facing a crisis that would test their will and determination.

The Gulf War was a war that had a purpose, but the outcome was not what was expected. The coalition forces had succeeded in driving the Iraqi forces out of Kuwait, but the aftermath of the war was filled with challenges.

The Gulf War had a lasting impact on the region, and the effects of the war can still be felt today. The Gulf War was a war that was supposed to bring about stability and peace, but the outcome was not what was expected.

The Gulf War was a war that was supposed to bring about stability and peace, but the outcome was not what was expected. The Gulf War was a war that was supposed to bring about stability and peace, but the outcome was not what was expected.

Serbs fire on peace marchers

Jean Stevacovic

Associated Press

WILNIUS, Yugoslavia - Serb activists opened fire on peace marchers in the Lithuanian capital yesterday, injuring at least nine people in an attack that underscored the Serbs' reluctance to support the Lithuanian government's efforts to mediate the Bosnian war.

About 3,000 marchers, chanting "No war, peace and unity" and "We want peace" in Lithuanian and Albanian, were marching Yesterday afternoon to demonstrate support for the United Nations Bosnian conflict peacekeepers. Suddenly, Serb activists on bicycles fired several shots into the crowd.

At least four people were reportedly shot, and 13 others were injured. The Lithuanian government condemned the violence and appealed for a solution to the Bosnian conflict.

What's the deal?

This is the fifth of six weekly drawings for $175 each week in COLD CASH presented by The Daily Iowan. This ad will appear in The Daily Iowan each Tuesday now through March 10. Readers simply fill out the coupons that appear in the paper and enter at the participating businesses. Three winners will be chosen each week ($100, $50 and $25) from the coupons dropped off at the stores that week and will be announced in the following Tuesday's paper.

To enter this week, just:
1. Fill out coupon(s) with your name, address, and phone number.
2. Clip out the coupon(s). Entries must be made on coupons clipped from The Daily Iowan.
3. Drop coupons in entry boxes at participating stores now through Monday, March 9 at 10 pm.
4. Limit one coupon per person, per store. Coupons placed in the wrong store's box will be disqualified. Note: There are 21 coupons on this page. The more stores at which you enter, the better your chances of winning, so start clipping!
5. No purchase necessary.
6. The names of the week's winners will appear in next Tuesday's paper.

Dr. staff & families are ineligible.

TOP 25: Nebraska signs from poll

WEBB: Coaches re/ refs is real game

HAWKEYE: Numbers game is crucial
Iowa's head gamer never tired of being successful

Tarkanian to resign at the end of the season if he needs the revenue, with his top players coming to his school. As a coach, it doesn't appreciate what he sees as his last towel in UNLV's final home game tonight against Utah State.

Jury Tarkanian says that Tarkanian was a key player in his last season as a coach and deserves to be head coach of the program. "I think it is time for him to move on. The school obviously doesn't appreciate what he has done over the years. He has done a phenomenal job for the things, the school has generated a lot of revenue."

Ammon Gilliam, Former UNLV player

UNLV's 88-71 loss at Nevada last season occurred in the Las Vegas Coliseum.

Tarkanian's last hurrah with the Runnin' Rebels could come tonight.

Tarkanian's career, a career that had already been cut short by an injury in the 1991 NCAA Division I Tournament, was marked by his determination and his ability to adjust to the rigors of coaching. His list of credentials included his most notable achievement: his list of credentials included making national attention, with NCAA national championships.

Vocational Press

Tarkanian has always been a high achiever, both as an athlete and as a coach. He never tired of being successful, and his list of credentials included his most notable achievement: his list of credentials included making national attention, with NCAA national championships.

Tarkanian says Armon Gilliam, a key player for him, is not a candidate for the head coaching job. "It's not a candidate for me," Gilliam said. "It's not a candidate for me, but I think it's a great opportunity for us to get together and close the loop."
‘Reckless’ Endangerment: Clichés & cuteness fail to arrest UI audiences

Robert Fulman
Daily Iowan

It’s a bit unnerving to find that even brilliant contemporary theater can be reduced into an unflattering image. But such was the case with the University’s Threepenny production of "Reckless" last weekend on the Mainstage. Written by David O’Herlihy and starring Rachel Hafner.

Lucas’ "Reckless," a movie based on the novel by John Updike, follows Rachel’s character through a series of sexual encounters that portray her as promiscuous, shallow, and ultimately unfulfilled. The play addresses the themes of love, desire, and the complexities of human relationships, but in a manner that is far removed from the serious and thought-provoking nature of the original novel.

The production was directed by Rachel Hafner, a University of Iowa student, and was performed in the university’s Theatre Department. The play was well-received by the audience, who praised the actors’ performances and the overall production value of the production. However, some critics felt that the play’s attempt to portray the character’s complexity was hindered by a lack of depth in the script and direction.

Rachel’s character is portrayed as a single-minded woman who is driven by her own desires and lacks any real connection to the people around her. The play’s ending leaves the audience with a sense of frustration and disappointment, as it does not fully explore the reasons behind her actions or provide any resolution to the emotional and psychological conflicts she faces.

In conclusion, "Reckless" is a well-produced and entertaining play that is sure to please audiences who enjoy light-hearted and humorous performances. However, it falls short in its attempt to explore the deeper themes of love, desire, and the complexities of human relationships. It is a Thanksgiving play that is not to be missed, but it may not be suitable for those looking for a more serious and thought-provoking theatrical experience.
"I Forgot to Remember to Forget": ELVIS

Daily Journal

Call him Elvis, or call him the King. John不乏 heritage, he just wants to be called "Elvis."

"I'm not leaning toward the younger night of pointless substance abuse, whole new genre - rand e, older-not-wiser, the fat and famous form of the Elvis stamps."

This tale duality Hell?"

"I thought of the film from one of Elvis last main hits, "as in 77, where he is so incredibly turned up on pills that he can no longer remember any of the words to his

song."

"The sideburns, the sequins, the bright, but dreamy, descendent of Rock 'n' Roll with his pants around his ankles, falling from the

multicolor, sartorial commune of Russian brains.."
