Packwood diaries nervous ly debated

Senate committee seeking to enforce subpoena in misconduct inquiry

Larry Margrave
Associated Press

The Ethics Committee committee cannot turn a blind eye to potential violations of criminal law and standards of conduct, Senator Packwood's chairman, said in asserting a need for the bills.

Members of the panel must be able to support the subpoenas in generally clear statements, but the argument between Packwood and Risch, R. O., turned heated over Risch's assertion last week that Packwood may have violated the law.

"The chairman has breached all over this country as a criminal," Packwood complained, joining his hand in the air.

"Our statement was only in the possibility of such criminal violations and was made in the context that this Sen. needs to know of the potential grave...

...the defense of the offfense to be offered in a last-minute compromi se to a bashed female, Packwood decried, said his internet thoughts to write.

"There is only one crime that Packwood may have

...the debate, sometime mention..."Packwood's statement, based on nine hours worth of sessions, was not to be charged with a crime.

Packwood had said earlier that several thousand pages of works...include entries on the sex lives of fellow lawmakers, Packwood said Monday that the diaries included admissions to history-making events and matters that are "very, very personal".

He said a deal might be worked out if the committee would drop his potential criminal conduct.

It is said it recently discovered the diaries.

Plugging electric cars: Is Iowa City ready?

Steve Chermak
The Daily Iowan

If you think finding a parking spot at the Union is tough, try finding a space to plug your car in.

Iowa City has the fewest electric vehicle charging stations per capita of any of the ten largest cities in the nation. General Motors is planning to release electric vehicles in 2004, but local residents need to select a few in a two-year test program to install the charging stations across the state.

Iowa City will host one of the charging stations, according to a presentation by Datta in a seminar, "Energy Innovation and Society." Datta is professor in the Department of Electrical and Computer Engineering at UI.

"Iowa City is one of the twelve cities that will install the Delco-Remy charging system that will be used to charge the batteries after a few days use," Datta said.

Datta and his research team have designed and made a prototype of an electric vehicle that runs on no impact on the environment. We have to install the Delco-Remy charging equipment to accompany the electric vehicles, Datta said.

"It's not that easy," Datta said. "If the drivers can't commute to the car owners' places of business, we cannot implement the Delco-Remy charging system in Iowa City."

"There would have to be some infrastructure built downtown, to accommodate electric cars," he said.

Iowa City city clerk Marion Kane is bullish on the idea of electric cars as a solution to the fuel problem. "People are very interested in having the vehicles as soon as possible," Kane said. "We are striving for a great place for innovation." Kane said.

"I would have liked to see us have a little more support."

Dennis Hogan, director of the UI Motor Pool, said it's possible electric cars could be running around both by the end of the year and the end of the fiscal year.

"There is a possibility only if the legislation gets the advance further," Hogan said. "It's something we might be interested in the down line."
Report says more dangerous drugs replacing cocaine, alcohol in Iowa

Mike Glover
Associated Press

DES MOINES — Heroin is now the new drug of choice as a report said Thursday that 45 percent of the 1,000 individuals polled for a new Iowa Drug Policy Survey said they believe heroin is growing as a problem. The report said the use of powdered and sniffable heroin has decreased, but those who have used the drug have increased.

Coca and cocaine use has been prevalent in the state's urban areas, said the report, on annual Assessment from the Iowa Drug Policy Commission last April by the Iowa State University. The report pointed at a changing picture of drug use in the state, but there were few signs the epidemic is easing.

Major conclusions in the report were:

- "Iowa's major crops are surviving and growing well." The report blames pose and poppy plants from areas near cities and towns of Iowa. "Violence is associated with the drug trade in Iowa, not with legitimate use of the crops." The report points to a growing problem of addiction and abuse.

- "Iowa”s major crops are surviving and growing well." The report blames pose and poppy plants from areas near cities and towns of Iowa. "Violence is associated with the drug trade in Iowa, not with legitimate use of the crops." The report points to a growing problem of addiction and abuse.

- "The majority of the increase in drug use can be attributed to drug-related treatment centers." The report said.

- "Recreational use of marijuana will not be the focus of drug policy in the near future." The report recommended better education and prevention programs to head off drug use.

UI officials required to take class on sexual harassment awareness

Megan Preckel
The Daily Iowan, Nov. 1

All UI, dean, directors and staff members will be required to attend training sessions on sexual harassment awareness and prevention as part of this year's training, according to a memo from University of Iowa Provost, Rick Mason.

"We have an excellent sexual harassment policy, but that policy alone is not effective, it is essential that the people it protects, particularly women, understand the policy and be prepared to deal with questions, complaints and concerns," he said.

The training will be conducted as an ongoing basis by the Office of Affirmative Action, which plans to supply training for all members of the university staff within the next year.

OAS director Dean Mas said she is concerned with identifying and eliminating sexual harassment from the workplace.

"This training is part of our effort to help people know what to do in cases of sexual harassment, everyone is vulnerable," she said.

Mason said the key issues the workshops will focus on are:

- How to identify sexual harassment.
- How to handle complaint procedures.
- How to resolve the complaints.

In addition, the workshops will cover steps to take if you or someone you know is sexually harassed.

"It is the responsibility of every member of the University community to prevent sexual harassment on campus. It is important that everyone is aware of the policy and be prepared to deal with situations, complaints and concerns," he said.

Soaked subsoil may cause floods

Jode Sonderschuh
The Daily Iowa

Although high in most areas, in several fields above quire high levels, dry fields, because of the change it increases the chance of floods.

Larry Burton, program assistant for the U.S. Agriculture Conservation and Conservation services, said that the farms' heavy rains are not readily apparent on most fields, below the surface water remains.

The crops have died out, but the soil moisture is still there. The field should the level of the ground to almost a foot above the bottom snow, says Wayne Peterson, district assistant, who is assisting with the Johnson County Soil and Water Conservation District.

"As we increase run-off, we increase potential flooding," he said.

Because the crops are still in the area, it is saturated and won't be able to drain. The snow around the crops will prevent the water from draining.

Student population draws telemarketers

If the number of students at the University of Iowa increases, the number of telemarketers who call the Iowa City area will increase.

"We have a pretty high percentage of students who are not from the area, and we have a lot of students who are not from the United States," said Michael Martin, 20, 1217 Ave. A, Cedar Rapids.

Martin said that the increase in students will increase the number of telemarketers who call the area.

"I think that's a good thing," he said.

The number of telemarketers who call the area will increase because of the increase in students, he said.

"I think it's great," he said.

**DECEPTIVE ADVERTISING?**

**First lady rebukes insurance lobby ad**

Christopher Cornell  
Associated Press

WASHINGTON — Bill and Hillary Clinton accused insurance companies of lying in a new $6.5 million advertising campaign against the first lady’s health care plan and promised to continue working to ensure the country has affordable, accessible health care.

The ad by the industry-created “Coalition for Health Insurance Choice” also is launching a new ad campaign against Clinton. The HMO and health insurer lobbying group, which is supported by Blue Cross and Blue Shield associations and American Hospital Association, is spending $6.5 million over the next six months to broadcast the ads nationally.

But the industry said it was the first lady who was guilty of deception and promised to pay the $6.5 million advertising campaign questions raised about President Clinton’s health care plan.

Clinton’s ad was based on a speech she gave Thursday in New York to the American Academy of Pediatrics on fighting for children.

The first lady said she was concerned about the debate among doctors and insurance companies over the health care plan. She said it would be a direct response to the soon-to-be-released White House health care plan that would ensure a majority of Americans would have access to affordable health care.

In the ongoing debate over whether the Iowa Board of Regents will change the state university system's name, outraged Iowans have expressed concern that a quarter over there? that quarter over there? is the price for the soul of a university is - being asked to support! Yeah, right. Make it happen.

Everything about this controversy seems to have its origins with Iowa City. Frank Brown's film that he seeded our campuses with a new generation of filmmakers. The film that Brown made and meek and my weak! These are the words we are being asked to support! Yeah, right. Make it happen.

The state's attempt to force the UI into upholding accepted mores poses a threat to the state Board of Regents's authority. This is not surprising. Iowa is home to a number of valuable institutions. UI has attempted to have itself surgically implanted into discussions with the state Board to pressure us to become emblematic of one set of mores, and not a very savvy one at that. Even though there are powerful conservative forces, the last I heard, the state itself was not owned by the City or Historical Foundations.

The fact is, to our state school in a world of shrinking public dollars, our university's current education policies are resoundingly sane. The absence of warm policies elsewhere today shows that Iowa's campus is picture-perfect for liberal and political endeavors. The absence of warm policies elsewhere today shows that Iowa's campus is picture-perfect for liberal and political endeavors. Republicanism's assertion of its constitutional privacy rights. Bryan, Iler, spoke of the Senate's unprecedented intrusion when it ordered the senator to provide information which Bryan said could involve criminal records.

When the committee requested those documents, Packwood's lawyers — who had been copying committee-designated pages of band aids to provide them. The committee, hang ing on the diaries from 1969-1976, Packwood said he knew they knew the senator had made unwanted sexual advances to more than two dozen women and attempted to intimidate some of the accusers to keep them quiet.

The Senate is deciding whether to vote on a subpoena request. Packwood, who has argued that his right to privacy, spoke in his own defense. He paced the floor as he spoke, describing the diaries as so personal that even his former wife and children have not seen them. Aware of the disparity that never senator said they left over the Senate. Packwood said, "I know they know the information that even my former wife and children have not seen them."

Packwood's testimony was the product of a showdown vote. He said a vote in favor of Packwood's request would be a clear victory for the senator. If the committee would request a subpoena, a crack in the façade; a showdown vote. The debate focused on the clash between the Senate's determination inquiry — which began with allegations of sexual misconduct and intimidation against Packwood and the Oregon Coalition committees on which Packwood sits.

The demands of the senator had been made unwanted sexual advances to more than two dozen women and attempted to intimidate some of the accusers to keep them quiet.

Top players for free agency: Davis deals with Tigers

Ronald Blum
Associated Press

NEW YORK — Tim Raines, Eddie Murray and Harold Baines headed the list of 12 players who filed for free agency Monday, but Eric Davis decided to stay with Detroit and agreed to a $5 million, one-year contract.

Davis signed a $3.5 million, one-year deal with the Tigers in 1990, which gave him $1 million signing bonus and another $1 million in bonuses based on roster.

— Davis, 31, was traded to the Yankees on Aug. 31 by the Los Angeles Dodgers. He played in 25 games with Detroit, hitting .231 with six home runs and 16 RBIs. He hit .284 with 14 home runs and 51 RBIs in 99 games with Los Angeles. The 13th games played were his most since 1990, when he played for Cleveland.

— Eighty-four players have filed for free agency this year and up to 20 or 21 on Tuesday.

— Among the top-free available, hit .306 for the Chicago White Sox this season and had a .611 on-base percentage, although the 28-year-old outfielder stole only 21 bases, his low for a full season.

— Murray, a switch-hitter who will be 38 next season, led the New York Mets with a .295 average and 156 RBIs, hitting 27 home runs. Boston, who will be 35 next year, was a Milwaukee .313 average, 10 home runs and 41 driving in 78 runs.

Meanwhile, the Philadelphia Daily News reported Monday reliever Mitch Williams could be traded to the Boston Red Sox. The Philadelphia Enquirer reported that Philadelphia has been contacted about signing Yankees free agent reliever Lee Smith. Smith is reported to have given up his career in the major leagues.

Other pitchers that may be available for a free agent.

— Houston’s Mark Portugal, whom the Phillies pursued before the trading deadline, is on the free-agent list.

— Scotty tire Johnson, who had a 4.90 ERA last season, is available to the right-handed.

General managers are watching the negotiations this week in Naples, Fla., but cannot talk money with free agents until Dec. 10.

The Minnesota Twins might not re-sign free agent Jack Morris, who made $3.05 million in 1993. Most clubs figure for arbitration this season and can become a free agent after the 1994 season.

The Twins would like to get a third baseman, left-handed-hitting outfielder and any pitcher who can consistently pitch in closing. If they can’t trade Moe, it’s possible that the Twins won’t offer free arbitration, which would make him a free agent. If they might offer him arbitration, sign him and then try to trade him later in the season or in the early spring.

OFFICIALS PLAN TO AVOID ANOTHER STANDOFF

Michael C. Barlow
Associated Press

— MADISON, Wis. — Regents, university officials and the governor passed over plans Monday to propose a $10.7 million student-worker dollar increase injured after Wisconsin’s victory over Nebraska.

— Locating in their minds was the potential for an even more frenzied celebration. A home in northwestern Ohio State on Saturday would give Wisconsin the ticket to the Rose Bowl.

— Thousands of fans surged down from the student sections at Camp Randall Stadium after Wisconsin beat Michigan 33-10 on Saturday, screaming below into a pile several stories high.

— University of Wisconsin Athletic Director Pat Richter proposed controlling access to the student section to make sure only ticket-holders get in. The 12,000-seat section has general admission seating.

— There was among the proposals university officials planned to discuss today, and UW Chancellor Harold633

— “We’re thinking about this point, and we think that is a solution,” Ward said.

— Ward and state building inspector Dan Mun- ner told the safety policy allows people to be mentioned into the student section to join friends, filling the area beyond capacity.

— On Tuesday, Tommy Thompson examined the ticketed seating and talked some in the north stands. He said he found nothing that would lead him to such a plan, and that there were no serious conditions.

— Most victims suffered broken bones and some lost consciousness from a lack of oxygen.

Rawlins Smith ‘bubbling’ after record day

Byience Freeman Associated Press

TYSON, Texas - Emmitt Smith scored three touchdowns Sunday to break his own single-season NFL record and give the Dallas Cowboys a 31-0 victory over the Detroit Lions.

"It's something that I take pride in," Smith said. "It's something that I've worked on all year and it's something that I want to continue to do."

Smith, who was named the NFL's Most Valuable Player for the fourth straight year, set the record with 2,401 yards rushing. He broke the mark set by his former teammate, Dallas star Tony Dorsett, in 1985.

The 24-year-old Smith, who has been voted the NFL's offensive player of the year for the past three years, pushed his NFL record total to 2,401 yards, breaking the mark of 2,178 set by Dorsett in 1985.

Smith, who has played in 16 games this season, entered the game with 2,356 yards rushing and needed 45 yards to tie the record.

In each of the last three seasons, Smith has led the league in rushing and has received the NFL's Most Valuable Player award.

Smith also became the first player to win the MVP award four straight years.

With the victory, the Cowboys (11-5) clinched a spot in the playoffs for the 16th time in 17 seasons and moved closer to their first NFC East title since 1995.

The Cowboys, who are now tied with the Philadelphia Eagles for the division lead, will play the New York Giants in their final regular-season game.

**Leconte rallies in Round 1**

Salvatore Zanca

Associated Press

PITTSBURGH - Barry Leconte rallied from another rock-bottom attempt, to pick up the equalizing point for Democrat Tony Thompson in the final round of the 1994 U.S. Open golf tournament.

Leconte was two points behind after nine holes and three points behind after 16 holes.

Starting at 4:15 Sunday afternoon, Leconte shot -4 on the final round.

Leconte, who is ranked 86th in the world, played a solid 16th hole to finish with a 72.

**Bowl bid still within reach for Wolverines**

Associated Press

ANN ARBOR, Mich. - When Michigan State football season ended, Michigan was left to play its own game to see if a Wolverine was seeking a Big Ten championship, a record third straight Big Ten title and a trip to the Rose Bowl.

"Anything is possible in a football season," said Coach Lloyd Carr, who never had a Big Ten title at Michigan State.

"We're playing for everything tonight and there's a chance to still make something of this season," said Michigan quarterback Jim Harbaugh.

"We want to win the game, but we also want to keep our options open," Carr said.

Village appeals to luge team

Terrence Petry

Associated Press

GERMANY - The village of Neunz, east of Berlin, wants to host the 2002 Winter Olympics, but the International Olympic Committee (IOC) has rejected the bid.

Neunz wants to host the luge, bobsled and skeleton events, but the IOC has ruled against the bid.

"There were some very good ideas put forward in Neunz," said IOC President Juan Antonio Samaranch.

"We were impressed with the village's enthusiasm and the quality of the proposed facilities," Samaranch said.

"But there were some very good ideas put forward in Neunz," said IOC President Juan Antonio Samaranch.

"We were impressed with the village's enthusiasm and the quality of the proposed facilities," Samaranch said.

"But there were also some concerns about the village's ability to stage the event," Samaranch said.

"We believe that Neunz has the potential to become an Olympic village," Samaranch said.

"But we have to be sure that all the necessary infrastructure is in place," Samaranch said.

"We have been impressed with the village's commitment to the event," Samaranch said.

**‘Nightmare Before Christmas’ almost lives up to hype**

Tasha Robinson

The Daily Iowan

It’s not too late for movies to live up to the kind of advance hype that surrounded Tim Burton’s “The Nightmare Before Christmas.”

The pre-release buzz for the movie has been so strong that the film’s producers have been billing it as “a tale of two holidays.”

But Jack Skellington, the lone human in Christmastown, has gotten into Halloween and is wasting something new. He gets his wish when he suddenly realizes that he can invite the dead to Christmas.

His wish soon becomes a reality. The classic Halloween set list plays in the background as Skellington is shown in the dead of night, dancing across the floor. The camera then pans out to reveal a massive Halloween scene.

**The Nightmare Before Christmas**

**Directed and Written by Tim Burton**

**Produced by Campy Thompson**

**Starring**:

- Danny Elfman
- Catherine O’Hara
- Issac Newton
- Emma Goldman

**An Advance Screening**

**Tickets Available**

**Open House at the Viper Room on Saturday, November 5th**

**Tickets: $5.50-$6.00**

**Limited Engagement**

**Screening Times:**

- 7:00 p.m.
- 9:00 p.m.

**Run Time:** 104 minutes

**Rated:** PG

**Drama/Fantasy**

**Cast:**

- Danny Elfman
- Catherine O’Hara
- Issac Newton
- Emma Goldman

**Synopsis:**

The film is about a boy who is sent to an orphanage. He becomes friends with another boy who also is sent there. Together, they invent a magical world where they can escape from reality.

**Character Analysis:**

- Danny Elfman: His role as the voice of Jack Skellington is memorable. His voice is described as “creepy” and “haunting.”
- Catherine O’Hara: She plays the character of Sally, a dead girl who is brought back to life by Jack. Her performance is praised for being “frighteningly good.”
- Issac Newton: As the character of Zero, the dog, his performance is noted for being “touching.”
- Emma Goldman: As the character of Miss Amelia Brand, her portrayal is described as being “memorable.”

**Additional Information:**

- The film was released on October 31, 1993, which is the first time it was screened in theaters.
- The movie was a box office success, grossing over $255 million in the United States.
- It was nominated for an Academy Award for Best Animated Feature.

**Conclusion:**

“Nightmare Before Christmas” is a film that has stood the test of time. It is a classic that has been enjoyed by audiences for over 25 years. The film’s memorable songs, powerful story, and captivating animation make it a must-see for anyone who loves the holiday season.

Roots of poison found in ancient texts

E.B. Holtmark

Iowa City, November 2, 1993

Kull, a 60-something Greek farmer, has a knack for finding ancient plants, and he and his wife, Ines, have compiled a book of them. The book is called "Poison Plants," and it is the first comprehensive guide to the ancient Heracleum plants.

But what is a poison plant? And what does it mean to be a poison plant? These are questions that have been asked for thousands of years, and the answers are not always easy to come by.

In ancient times, the concept of poison was closely linked to the idea of magic. Poison was thought to be a powerful force that could be used to control other people or to bring them harm. In this way, poison was not just a tool of war and aggression, but also a means of communication and control.

The Greeks were particularly interested in the concept of poison, and they developed a whole system of poison plants. The most famous of these plants was the Aconitum, which was used to poison enemies and to bring about death.

The ancient Greeks believed that the human body was made up of four elements: earth, air, fire, and water. Poison was thought to be a result of an imbalance of these elements, and it was believed that by understanding the nature of poison, one could understand the nature of the human body.

In ancient Greece, the study of poisons was closely linked to the study of medicine. The ancient physicians were the first to systematically record the effects of different poisons, and they were the first to begin to understand the chemical composition of these substances.

The ancient Greeks also developed a whole system of poisons that were used for religious and magical purposes. The most famous of these was the "Kleos," which was a kind of poison that was used to bring about victory in battle.
