Refugees come under fire in E. Timor

U.N. peacekeepers struggle to keep order in area as refugees are turned aside and arrested.

By R. J. Szymanski Associated Press

DILI, East Timor — Refugees streamed through the United Nations' main compound here Tuesday, seeking shelter in what peacekeepers have described as Timor's capital as thousands of other refugees are turned away.

Residents said the burst of gunfire as a show of defiance toward the Indonesian military. Many Indonesians accuse the Indonesian military of being behind the violence.

The United Nations' top official in East Timor, Brian Urquhart, said he would appeal to the Indonesian government to lift the ban on refugees entering Dili, the capital.

A day after Tuesday's earthquake, the United Nations' top official in East Timor, Brian Urquhart, said he would appeal to the Indonesian government to lift the ban on refugees entering Dili, the capital.

In a show of defiance toward the Indonesian military, armed men killed a number of refugees who tried to enter the United Nations' main compound here Tuesday, seeking shelter in what peacekeepers have described as Timor's capital as thousands of other refugees are turned away.

Residents said the burst of gunfire was a show of defiance toward the Indonesian military. Many Indonesians accuse the Indonesian military of being behind the violence.

UI ripped for payroll problem

The UI is looking to aid graduate students who didn't receive their paychecks on time.

By Bob Finn

The University of Illinois' payroll system is in disarray, with students and faculty saying they have not received their paychecks on time.

"We're concerned," said Emily Smith, a junior at the University of Illinois in Urbana-Champaign. "I've waited for my paycheck every week, and it's never come."

Smith said she has been waiting for her paycheck for three weeks, and she is not alone. Many students say they have not received their paychecks on time.

Smith said she has been waiting for her paycheck for three weeks, and she is not alone. Many students say they have not received their paychecks on time.

"I've never had this happen before," said Smith. "I'm worried about paying my rent and bills on time."

City plans brick road ‘gateway’ to downtown

Iowa Avenue will be a brick road and cafe as early as next year.

By Heather Pawlak

The Daily Iowan

Iowa Avenue students hoping to lead their dorm to off-campus housing probably have hardly any free time during their stay here in downtown. But because of the Iowa Avenue Improvement Project, which will start in early 2001, students will be able to enjoy Iowa Avenue to its fullest potential.

"The Iowa Avenue corridor is a gateway to the UI," says Brian Clark, director of the Iowa Avenue Improvement Project. The planning and design of the corridor will take into account student input as much as possible.

Clark said the new Iowa Avenue will have a "street park" setting and a "broad walkway" for pedestrians to use. The current Iowa Avenue, he said, is "like a 10-lane thoroughfare," and the new one will be a "two-way street with sidewalks." The new Iowa Avenue will also provide space for student parking and sidewalk sales, said Clark. Iowa Avenue will also allow businesses to use the expanded area for sale of coffee and sidewalk sales, said Clark.

Clark said the project will be completed in the summer of 2001.

"Iowa Avenue is a gateway to a variety of places," he added. "It's a gateway to the UI, and Brian Clark (of the Iowa Avenue Improvement Project) has some ideas for the project." The planning and design of the corridor will take into account student input as much as possible.

Iowa City water gets passing grade

The first water-confidence report will be released by the city today.

By Lindley A. McGowan
The Daily Iowan

Iowa City's water appears to meet Environmental Protection Agency standards.

Statistics concerning the city's water quality including the level of lead, copper and nitrates in tap water will now be available to the public.

The Iowa City Water Quality Risk Assessment is the city's first Consumer Confidence Report.

The report, expected to be delivered to 30,000 Iowa City residents, is a new requirement of the Environmental Protection Agency with the purpose of helping people make informed choices about tap water, according to Assistant Director of Human Resources Lori Riley.

"Iowa City is a lead level is one of the 4th percentile," said Riley. "It's one of the lowest in the country." Riley said the information was being mailed to all Iowa City residents.

The report reflects water quality standards for 2010, according to the EPA.

A chart listing the 1986 levels of contaminants and their response is included in the report. All contaminants levied are also shown in the report, according to Riley.

"It's a good time to check the quality of your drinking water," she said. "The report may look high because not everyone in your household may drink the water. In the city, the water is divided between different buildings," said Rules, supervisor of human resources.

"It's an opportunity to bring together all of the different departments," Riley said. "The UU deeded to consolidate the.The report will be reviewed by a team of UU administrators, including President Bruce Harre, Dean of the General Council, and faculty from the University of Iowa. The report will be released at the end of the month." Riley said the report will be released to the public on the city's website.

Gov't sues big tobacco for big bucks

The Justice Department alleges a 45-year conspiracy to preserve the industry's profits.

By Michael J. Silverman

WASHINGTON - With a new lawsuit questioning the validity of a 1998 settlement, President Clinton's administration and three of its top law enforcement officials said they are prepared to bring the world's largest tobacco companies to court.

The lawsuit, announced Wednesday, is only the latest in a series of efforts to force the tobacco companies to change their ways. But the suit, which involves fraud and racketeering violations, is the first ever filed by the Justice Department.

"The health of the American people is at stake," Janet Reno said as her department filed a civil suit in federal court. "We cannot possibly allow the tobacco companies to defraud the American people."

The department also formally requested that the companies be required to pay billions of dollars in damages.

But the suit is not the only one aimed at the tobacco companies. Two other cases, one filed by the state of Florida and another by the Federal Trade Commission, are set to proceed in court.

The Florida suit, announced Wednesday, was filed by State Attorney General Bob Butterworth, who said he had evidence that the tobacco companies "unlawfully瞒人的 taxes in order to defraud the state of Florida."

Butterworth said the suit was designed to "hold the tobacco companies accountable for their actions."

Florida's lawsuit is one of several similar cases filed by states and cities around the country. The state of Illinois, for example, has filed suit against the tobacco companies, seeking damages of $10 billion.

The Justice Department suit is based on a 1953 law that made it a crime for anyone to defraud the American people of their health or safety. The suit alleges that the tobacco companies "constitute an illegal enterprise" and that they "have engaged in a pattern of racketeering activity."
Aftershocks rock troubled Taiwan

More die as citizens question disaster workers' organization.

By William Foreman

TOKYO, Taiwan - Hurried voices, people talked about victims crying through the night, beneath the hole of fallen concrete and brick that was once a home.

By Wednesday, the second day of Taiwan's earthquake, dozens of homes and schools had been gutted and people were digging through rubble. Government and relief workers had reached only a small fraction of the estimated 2,300 people still trapped in crushed buildings.

Workers from 14 countries have arrived to help the 1.9 million-people island. A large crowd spent much of the day searching for and identifying bodies of those buried in the rubble.

"This is my son's girlfriend, who just called me," said Chou, his arms crossed tightly on his chest.

"Her name is "Evaine," he said.

"I'm glad that it's mobilizing so quickly," said Ray Mescallado, the president of the Uruguay association member and coordinator of relief efforts. Relief efforts are concentrated to continue for two weeks, he said.

"It was my son's girlfriend, who called me," said Chou. "It was my son's girlfriend, who called me," he added.

"There's no need to uncover those buried in the building," said B-Chen Wen, an official from the Taiwan Fire Department.

U.S. treaties with American Indians bad, getting worse

The United States of America has to be one of the greatest nations in the world. I do not mean the country, I mean the greatest.

I am not talking about silly measurements of greatness like the amount of land or the amount of oil we have or the number of troops in uniform, I am talking about the amount of respect we show to our past. That might sound trivial, but I think it is important.

As a country, we are often too quick to forget our history and the treaties we have made with Native American tribes. The 1868 Laramie Treaty, for example, was a historic document that set the terms for the cession of land to the U.S. government.

It is crucial that we honor these treaties and the rights they guaranteed to Native American tribes. We cannot simply forget the past and move forward without acknowledging the mistakes of the past.

Bradley doing well with his openness

Bradley does not need to be a candidate to be in the 2020 election. He stands a good chance of being a good candidate if he can maintain his openness and continue to be a strong voice for those he represents.

At the very least, Bradley has shown a willingness to listen and learn from others. This is a valuable trait in a leader, and it is something that many people appreciate.

Bradley does not need to be a candidate to be a strong voice for those he represents. He stands a good chance of being a good candidate if he can maintain his openness and continue to be a strong voice for those he represents.

Clinton weighs defense veto

Congress overwhelmingly passed the bill, which would open nuclear-weapons lab security.

By Tom Raum

WASHINGTON — With only five days before the Senate adjourned, a deep divide existed over the $200-billion defense bill that would overhauls the Energy Department and other nuclear-military agencies. An amendment to veto the bill was passed by a 5-1 vote this week.

Energy Secretary Bill Richardson, defending the energy reorganization as essential for the nation's security, pointed to China's nuclear missile program.

But other administration officials and members of Congress contended that a problem, the 4.2 percent across-the-board pay raise and other relatively minor military-mandate increases included in the bill.

"Theoretically, obvious things in the bill that we like — this pay raise, for example — could harm the department's military readiness," said Senate Appropriations Committee Chair James Jeffords, D-Vt.

Voting against the defense bill were Barbara Boxer, D-Calif.; and when we have a decision, we'll make it. But Sen. Carl Levin of Michigan, the senior Democrat on the Armed Services Committee, agreed.

"We cannot afford the Defense Department. Mum and her daddy's new urban elite, Mum and her back to world affairs. Voting against the defense bill was conducted by the FBI, Drug Enforcement Administration and the U.S. Customs Service.

"There were more for our men and women in uniform than any other bill considered by Congress, in fact a matter of law," said Sen. Carl Levin of Michigan, the senior Democrat on the Armed Services Committee.

"But Sen. Pete Domenici, R-N.M., suggested a veto. The administration officials said Wednesday. The House and Senate were far above two-thirds needed to override a veto. The Senate voted 75-40 last week.

"The administration would set up a new cabinet-level agency within the Energy Department — separate, semiautonomous National Nuclear Security Agency — to oversee the government's nuclear-weapons programs.

"Critics said it would undermine the authority of the Energy Secretary. The Senate passed the bill, which contains the largest energy reorganization since its creation 22 years ago. It would strengthen the Energy Department, the Department of Defense and the Department of State.

The combination of experience and new blood has paved the way for this season for Coach Steve Houghton. "If we can stay healthy, there is no reason that we can’t do as well as all the returning players and the great group of freshmen we’ve got this year," said Houghton.

The No. 1 player returning to the Big Ten is Columbus native Tyler Cleveland, who was named Big Ten Freshman of the Year in 1998. He also received First Team All-Big Ten and First Team All-American honors.

The tournament will be played at an outside event which is a change from the last season where the games were played outdoors.

"You have to be in better shape and really be comfortable on grass," said Coach Beglin.

Cleveland has been practicing for the tournament since last season.

Twins aroakland's playoff hopes

OAKLAND, Calif. (AP) — The Minnesota Twins scored three runs in the 10th inning to keep the Detroit Tigers from advancing in the playoffs with a 3-2 victory Wednesday over the Athletics, fouhing the Athletics in the AL West.

With the score tied 0-0 in the top of the 5th, the Twins loaded the bases when the Tigers made two errors. Cameron Maybin's sacrifice fly scored the winning run.

Brused Badgers await Michigan

By Richard Hurd

The Associated Press

MADISON, Wis. — The Badgers have had a rough year, but they are still in the hunt for a Big Ten championship.

The Badgers are currently 7-2 on the season and have won their last three games, including a 20-10 win over the Northwestern Wildcats last week.

The Badgers have a tough test ahead of them this Saturday when they take on the Ohio State Buckeyes.

The Buckeyes are currently 8-1 on the season and have already clinched a spot in the College Football Playoff.

The Badgers will need to play well if they want to have a chance against the Buckeyes.

The game is set for 12:00 PM CST and will be held at Camp Randall Stadium in Madison, Wisconsin.

Sanders' dad wants him back in Detroit

By David Goodman

DETROIT (AP) — The father of Barry Sanders said he would consider a return to the Detroit Lions in 2013, but only if his son, who is still on the team's roster, gave his approval.

The Lions GM, Martin Mayhew, said he had talked to Sanders' father, who is now an assistant coach with the team.

Sanders, who is 41 years old, has not played in the NFL since 2011 and has been in the minors since 2012.

The Lions said they are open to bringing Sanders back if he is willing to come back.

The Lions are currently 0-3 on the season and are in danger of missing the playoffs.

Sanders' father said he would consider a return to the Lions if his son was willing to come back.

The Lions said they would consider bringing Sanders back if he was willing to come back.

The game is set for 1:00 PM EST and will be held at Ford Field in Detroit, Michigan.
Far from the bar-hopping crowd

The Sacred Garden offers unique performance space for "improvisation" musicians.

By Jeremy Roll

Once upon a time, music was considered to be one of the purest forms of self-expression: a medium in which the artist could communicate his or her most fervent emotions. Of course, this was before the era of Napster and similar technology that have made it easier than ever to share music. Now, thanks to the support of the late Mayor Ed Nehring and members of the Iowa City community, the Sacred Garden is a place where musicians can express themselves freely without fear of judgment.

The Sacred Garden is located at 927 Ridge Ave. and is open to the public during regular hours. It is free to enter and offers a unique space for musicians to perform their work. It is a quiet location that is perfect for a night out or a quiet evening with friends.

The kind you're likely to get is good

By Tyler Stewart

As Ken Foster wrote the stories for his new collection of short fiction, he didn't think much of the characters or settings. He just wanted to tell the truth.

"I don't really know anything about songwriting, but I think thinking about it it's something that comes naturally to me. I don't have to force it. It just happens."

Foster is a professor of English at the University of Iowa and is known for his work as a writer and critic. His new book, "The Story of a Life," is set to be released next month.

Quote of the week

"We're gonna have fun, we're gonna dance, we're gonna drink..." - The Wombats

The quote is from the lyrics of The Wombats' song, "Let's Dance, Everybody." It is a popular anthem that encourages people to let loose and have a good time.

Scratching it out to the World Champion

By spects Hugh McLeod
WASHINGTON, D.C. — The Chick-fil-A Restaurant, 1501 15th St. N.W., Washington, is about to be the setting for the nation's first-ever hip-hop turntable competition. The event will be held on Tuesday, October 5, and will feature 12 entrants from across the country, each competing for the title of “World Champion” in the world of turntablism.

The competition will pits 12 artists against each other in a battle of sound and style, with each artist having six minutes to showcase their skills on the turntables. The artists will be judged on their ability to manipulate records, scratch, and engage the crowd, with the winner being declared “World Champion.”

The competition is open to all music genres, and artists from around the world are encouraged to participate. The event is being held in conjunction with the Chick-fil-A Restaurant, which has a long history of supporting local artists and musicians.

The competition is expected to draw a large crowd, with live music, food, and drinks available on-site. The event will also feature a panel of judges, including music industry professionals and turntable experts, who will determine the winner.

Tickets for the competition are available for purchase online at chick-fil-a.com. The event is free for all ages, and doors will open at 6 p.m., with the competition beginning at 7 p.m. Parking is available on-site, and there will be shuttle service available to and from the event.

For more information, visit chick-fil-a.com or contact info@chick-fil-a.com.

ART AND BRIEF

World’s oldest instrument found in Yosemite

Officials from the University of Arizona and Yosemite National Park have announced the discovery of the world’s oldest instrument, a 43,000-year-old flute made of a thistle stalk.

The flute was found in a cave in Yosemite National Park and is believed to be the oldest musical instrument ever found.

The flute is made of a thistle stalk and is estimated to be about 43,000 years old. It is believed to be the oldest instrument ever found.

The flute was discovered by a team of researchers from the University of Arizona and Yosemite National Park during a recent field trip to the park.
