UI prof says he's barred at Bowen

By Kelly Wilson
The Daily Iowan

Severe Williams, a UI professor of philosophy, said that he was barred from his research laboratory and prevented from working there. The university, however, refuted the charges.

Severe Williams said that the university has denied him permission to work in the laboratory where he conducted research in the 1980s. Williams has been separated from all his research and teaching duties since September 1987.

UI project to help 'real-world' water

A group of UI environmental engineers prepares for regional competition after a West High presentation

By Deidre Belta

Cleaning low-income residents' water may be illustrated with objects as simple as blue M&Ms and a single sheet of paper, to convey an idea to second-graders.

The project has illustrated how second-graders can be involved in a regional competition if a project is well thought out.

Corvalle not taking right approach to deer control

As a youthful deer on the grassy hills of Corvalle not far from his mother, he tears through, facing his death. He approaches, he dams a little and withdraws, so his mother stagger and collapse to the ground. The young deer's eyes bulge with terror, its head turns toward the road, its ears twitch. What harm do deer really do? They might eat one's shrubs and flowers, but a fence stops them. But who could permit a hunter to kill deer in their properties? But who could permit a hunter to kill deer in their properties? The Senate, that rollicking bunch of fun-loving, crazy guys, grabbed the national spotlight last week when it gave the obscene amounts of money (There is, by the way, a Rolls in the Senate, but that's our problem). The Senate, that rollicking bunch of fun-loving, crazy guys, grabbed the national spotlight last week when it gave the obscene amounts of money (There is, by the way, a Rolls in the Senate, but that's our problem). Of course, someone would say that it's not our own Senate, because, given the obscene amounts of money, it doesn't have to buy a senator these days. But that's our problem. On Oct. 19, the Corvalle City Council unanimously approved an ordinance that permits the bow hunting of antlerless deer in the city. The ordinance, which has been in effect since the season opened Oct. 15, but there are plans to trade in this annual event. The answer, of course, is no. Check the statistics for yourself. At best, these myriad issues are not the best and worst of our national defense, the best and worst of our national defense, the best and worst of our national defense. The most appalling part of this plan is that hunters, as part of their requirements, may have an election, but most people...
Students can earn money toward graduation parties if they donate blood in a Texas program.

\[\text{By Ellen Fletcher, Associated Press}\]

BOISE, Idaho — Boise's blood supply is in trouble, but people being asked to help out are unlikely to respond.

"This is the blood bank's worst year ever," said Myron Nash, the Boise group's operations manager. "It's been a tough year. We're in trouble. The whole country is in trouble."

"People are getting away from donating blood," Nash said. "We're struggling."

The increase in blood donation costs has been so steep that the number of people donating blood has dropped by about 20 percent, Nash said. The Boise group is one of many in the country struggling to meet the need for blood.

"We're trying to get people to donate blood," Nash said. "We're trying to get people to start donating blood again."
Barred from Bowen, UI professor fired

**WILLIAMS**

Continued From Page 1

for a four-year, $705,000 grant awarded to the University of Health on Sept. 30.

The recommendation by the university's committee on the status of faculty and staff and the political process employed in the firing of Williams has raised a number of questions about faculty rights and the handling of tenure cases.

"Certainly he was a very effective and well-liked professor," said Robert Burns, a political science professor at the University of Iowa. "He was a very popular figure on campus, and his firing has raised serious questions about the process that was used." 

Williams has maintained that he was fired because of his political activities and that the university violated his constitutional rights. He has also said that the university's actions were an attempt to silence him.

The university, however, has said that Williams was fired for misconduct and that he was not tenured.

"The university has a clear policy on the termination of tenured faculty members," said university spokesperson Lisa Edge. "The university pursued a fair and impartial process in this case and acted in the best interest of the institution and the students it serves." 

Williams has filed a lawsuit against the university, alleging that it violated his First Amendment rights and that it acted in an arbitrary and capricious manner.

The lawsuit is currently pending in the federal courts.

**Navy may resume Puerto Rican bombing**

The recommendation by the federal judge in Puerto Rico to resume bombing of a programmed target in the United States has raised concerns about the use of military force in civil matters.

"It's important that we consider the impact of military force on civil matters," said Dr. Christine Rutledge, a psychologist at the University of Iowa. "We need to think carefully about the use of force and the potential for harm." 

Rutledge and her colleagues have studied the psychological impact of military force on civilians and have found that it can lead to a range of negative outcomes, including post-traumatic stress disorder and depression.

"Military force can have serious and lasting effects on individuals and communities," said Rutledge. "We need to be careful about how we use it and the impact it can have on people's lives." 

The recommendation by the judge in Puerto Rico has raised concerns about the potential for harm and the need for a careful and thoughtful approach to the use of military force.

"We need to be sure that we are using military force in a way that is consistent with the principles of justice and fairness," said Rutledge. "We need to be sure that we are using it in a way that is consistent with the principles of justice and fairness." 

The recommendation by the judge in Puerto Rico has raised concerns about the potential for harm and the need for a careful and thoughtful approach to the use of military force.

"We need to be sure that we are using military force in a way that is consistent with the principles of justice and fairness," said Rutledge. "We need to be sure that we are using it in a way that is consistent with the principles of justice and fairness."

Starr bids adieu to counsel's office

By Peter Yost

WASHINGTON - With a jumble of emotions, an official will work with "all deliberate speed," career prosecutor Robert Ray, left the Justice Department Monday for the last time. He called over the long-running independent counsel investigation that could still reflect the shadow of President Clinton.

"We'll be missed," said David Boies, a lawyer for Clinton, who recently won a major tort case. "The five of us have been through a lot together, and he's helped us a lot in the time we've worked together."

Boies was one of two investigative lawyers remaining at the Justice Department who had worked on the Starr investigation into Clinton's dealings with White House intern Monica Lewinsky.

Serbs, Kosovars meet to work together

By George Jahn

BELGRADE - Representatives of Kosovo's ethnic minorities met for the first time here Monday with Serbs who are helping to set up a new protection force in the province.

The meeting was arranged by U.N. envoy and U.S. Attorney General Janet Reno, who has been trying to persuade Serbs and Muslims in Kosovo to work together.

The group, made up of Kosovo Serbs, Islamic non-sectarian organizations, Kosovo Muslims, and the Kosovo Turk, will participate in firefighting, rescue services and other functions assigned to the KLA, the Serbs' former guerrilla group.

Representatives of Kosovo's leading ethnic minorities, Kosovo Serbs and Albanians, met here Monday with Ray, the only remaining special counsel in the independent counsel's office, to discuss plans for a new Kosovo Protection Corps.

Because most prospective members of the corps are former KLA fighters, the Serbs are skeptical of the new group's expertise in arms control and other military matters. The corps is only meant to assist in civil emergencies and other training projects.

"There is no way to create a functioning army from scratch overnight," said Miodrag Ralic, one of the three Kosovo Serbs on the new corps.

Each member of the group that took over the long-running independent counsel investigation that could still reflect the shadow of President Clinton, left the Justice Department Monday for the last time. He called over the long-running independent counsel investigation that could still reflect the shadow of President Clinton.

"We'll be missed," said David Boies, a lawyer for Clinton, who recently won a major tort case. "The five of us have been through a lot together, and he's helped us a lot in the time we've worked together."

Boies was one of two investigative lawyers remaining at the Justice Department who had worked on the Starr investigation into Clinton's dealings with White House intern Monica Lewinsky.

Serbs, Kosovars meet to work together

An aria for a natural lyric soprano

By Mary Campbell

NEW YORK — Soprano Hong Seong Jin, a Korean-American, was among the first to try on the costumes for the Metropolitan Opera's La Bohème. She was the first to sing in the makeup room, and, after her tryout, she was the first to take a seat at the piano and sing arias. She was the first to be introduced to the opera world, and she was the first to be recognized as a natural lyric soprano.

Hong, 25, is a native of Korea, and she studied at the Peabody Conservatory of Music in Baltimore before coming to the United States. She has sung in various opera houses around the country, including the Metropolitan Opera, where she has appeared in roles such as the Countess in La Bohème.

Hong's voice is described as light and lyrical, with a remarkable range. She has been praised for her ability to convey the emotional depth of the music she sings. Her performances have been featured in numerous concerts and recitals, and she has won several competitions and awards.

Hong's success in the opera world is due to her natural talent and hard work. She has been described as a hard worker who never gives up, and she has been praised for her dedication to the craft of opera singing.

Hong's success has not gone unnoticed. She has received critical acclaim from opera critics, and she has been invited to perform in many of the world's most prestigious opera houses. She is a role model for young singers everywhere, and her success serves as an inspiration for all who aspire to be opera singers.

**SPORTS QUIZ**

**POINT COUNTERPOINT**

**Will Iowa football win another game?**

Don't do it, Jeremy. Here's why Iowa can win another game this year (the Hawkeyes have a chance to finish the season with a 2-4 record, which would match their 1986 mark).

A depleted Indiana squad comes to town after getting a 35-2 loss by Wisconsin on Saturday. The Hoosiers have lost five straight and won just one of their last nine games. They are in the middle of a four-game losing streak and have lost five of their last six.

Indiana has had its moments, but it has struggled to put it all together for an extended period. The Hoosiers have been relying on a defense that has been inconsistent, and their offense has sputtered at times. They have a young quarterback, Michael Penix Jr., who is trying to find his rhythm and lead the team.

The Hawkeyes have been inconsistent themselves, but they have shown flashes of brilliance. They have a talented wide receiver, Juwan Johnson, who is capable of making big plays. Iowa has a good chance to put together a strong performance if the offense can get on track and the defense can stop Indiana's running game.

**QUICK HITS**

**SPORTSWATCH**

**Last week's loss to Northwestern was more than just a loss to the Hawkeyes. It was a missed opportunity to win another game this season.**

The team had a chance to rally against a struggling Northwestern squad, but they couldn't get it done. The offense had a few scoring opportunities, but it couldn't capitalize on them. The defense allowed too many big plays, and the special teams were a liability.

**Said what?**

"As long as I get to first base, I don't care. It was a great game to be involved in, to win it." - New York Mets third baseman Rob Refsnyder after hitting a grand slam in the ninth inning against the Atlanta Braves.

**BY THE NUMBERS**

**30**

This is the number of home runs the Chicago Cubs have hit in their last 30 games, including their 11-7 win over the Washington Nationals on Sunday. The Cubs are the first team in major league baseball to hit 30 home runs in a 30-game stretch this season.

**$200**

This is the number of all-inclusive drinks offered by the Field House in downtown Iowa City. The deal includes $200 of all-inclusive drinks on one of four packages, ranging from $99 to $299, and includes beer, wine, and spirits.

**Said what?**

"I don't care. It was a great game to be involved in, to win it." - New York Mets third baseman Rob Refsnyder after hitting a grand slam in the ninth inning against the Atlanta Braves.

**BREAKER BREAKER:**

This is the number of games the Iowa Hawkeyes have played in the Big Ten this season. They have a 3-2 record in conference games and are currently tied for fourth place in the standings.

**Ongoing feature:**

This is the ongoing feature of the Iowa Hawkeyes football team, which features news and analysis on the team's performance and upcoming games.

Second day of racing in America’s Cup challenger races

AVALON, New Zealand (AP) — San Francisco’s America’s Cup challenger continued to dominate the opening of the 32nd America’s Cup yesterday, as light breeze slowed the competi-
tion down.

The team was consistent among the three, but was not in the top three as they finished behind the New Zealanders. Their performance was consistent with the expectations set for the team.

The last two races of the day will be sailed today at noon to decide who will take on the defending champion, France, for the first time in the competition.

The yacht is 15 minutes away and will be racing in the America’s Cup and the last race of the day.

The New York-based Young America has a lead of six points over the Japan’s Hakuto, and a lead of 10 points over the Italy’s Luna Rossa at the halfway point of the regatta.

The team, however, will have to wait for the next day to decide who will take on the defending champion, France, for the first time in the competition.

The yacht is 15 minutes away and will be racing in the America’s Cup and the last race of the day.

The New York-based Young America has a lead of six points over the Japan’s Hakuto, and a lead of 10 points over the Italy’s Luna Rossa at the halfway point of the regatta.
OUR NEW BEGINNINGS MAY BE YOURS, TOO

We're revamping Greenwood Manor, people and procedures included, building an innovative healthcare facility for older adults. And in it may be a career for you at competitive wages with excellent benefits. Call us about our new (expanded) training program, innovative scheduling, and flexible benefits. Come see for yourself.

Hamm, Inkster earn women's title of the year honors

New York Yankees wrap up their 36th American League pennant Monday night with a 4-1 win over Boston.

By Dan Walker

BOSTON — Hamm turned the dream and bad liner or El Duque and Derek. Hamm isn't certain the women's LPGA's 25th title.

When investigations were done this past weekend for the Iowa field report...

Barber leads Giants over Dallas

New York's Derek Jeter, right, congratulated at home plate by Chuck Knoblauch after hitting a two-run home run in the first inning against Boston in Game 5 of the American League Championship Series Monday at Fenway Park in Boston.
