Taco shells may contain biotech corn

The owner of the restaurant hopes to reopen as soon as next week.

By Aspel Todd

In the immediate after­
math of the fire at Vito's, 118 E. College St., owner Louie Louisa­

no what would become of his restaurant. But thanks to the efforts of a city ­

is the store closed, he will be able to open his restaurant in a week.

The fire damage is in the kitchen, while the rest of the restaurant has only minor water damage from the sprinkler system, and had no smoke or soot damage.

"It's like getting the kitchen cleaned up," he said.

While Louisa has put its disaster plan into action, the family of the fire, actors who appear to be in their 20s, has not been contacted at all.

New jail gets a resounding ‘No’

Panelists blame local leaders for not examining why the current jail is overcrowded.

By Dave Kiang

Citizens for Alternatives to the Iowan, a group that opposes building a new jail in Iowa City, was among those who spoke at a forum last week. The group’s leaders said they were concerned about overcrowding and other issues that have resulted in jail overcrowding.

In an effort to address the overcrowding issue, city officials have proposed building a new jail to replace the current one. However, many in the community have expressed concern about the proposed jail and have called for alternatives. At the forum, panelists discussed the need for a new jail and the potential consequences of building one.

One panelist, John DeProsse, a junior at the University of Iowa, said the proposed jail would not solve the overcrowding problem.

DeProsse said, "We have a number of jobs that require jail time, but we need a jail that can accommodate the needs of the community. The current jail is not large enough to handle the number of inmates who are being held there."

Another panelist, Tony DeLisle, a senior at the University of Iowa, agreed with DeProsse and added that the proposed jail would not provide adequate space for inmates.

DeLisle said, "The proposed jail would not provide enough space for inmates and would not solve the overcrowding problem. We need to find an alternative solution that addresses this issue.

Panelists also discussed the potential consequences of building a new jail. One panelist, Lisa Pearson, a senior at the University of Iowa, said, "The proposed jail would not be able to accommodate the number of inmates who are being held there."

Pearson added, "We need to find an alternative solution that addresses the overcrowding problem. The proposed jail would not provide adequate space for inmates and would not solve the issue.

Overall, the panelists agreed that the proposed jail would not solve the overcrowding problem and that alternatives need to be considered. They urged local leaders to examine the issue more thoroughly and to find a solution that addresses the needs of the community.

Mary Sue Coleman, a former president of the University of Iowa, said, "We need to find an alternative solution that addresses the overcrowding problem. The proposed jail would not provide adequate space for inmates and would not solve the issue."

Coleman added, "We need to find a solution that addresses the overcrowding problem and that provides adequate space for inmates.

The panelists concluded that a new jail would not solve the overcrowding problem and that alternatives need to be considered. They urged local leaders to examine the issue more thoroughly and to find a solution that addresses the needs of the community.
Serbs put NATO on trial for bombing

- Supporters of Slobodan Milošević hope to free him at NATO feeling before the Yugoslav elections.

By Elizabeth Becker
Associated Press

BELGRADE, Yugoslavia - A bogat rally in front of the residence of Slobodan Milošević on Thursday drew thousands to a protest to demand an end to the war against his country.

"We have seen just enough in the news," said a man in the crowd. "We are sick of war."

The rally, which was organized by the Democratic United Party, drew thousands of people who carried signs and banners demanding an end to the war.

"We want peace," said one man. "We want our children to grow up without fear of bombs."

The rally was one of many that have taken place in Yugoslavia in recent weeks.

"We are fed up with the violence," said another man. "We want our country to be free and democratic."

The Yugoslav government has been accused of human rights abuses and war crimes by international organizations.

"We demand an end to the bombings," said a woman. "We want our country to be safe and secure."

The rally was attended by many political leaders, including Milošević himself.

"We will not give up," said Milošević. "We will continue to fight for our country."

The war in Yugoslavia has been going on for over a decade, and there is no sign of an end in sight.

"We will not be silenced," said another man. "We will continue to demand peace and justice."

Knight's firing a result of his recent failures

Pulling into the exit of the Iowa Union on a cold winter night, I was beasts of burden. I had made a wrong turn out of the airport and was now rapidly approaching tourist-friendly East University. But then I did not bother my thoughts and just continued back to the car with a map of heart and immersed elsewhere. It was such an amazing evening.

The last read army we passed out the road of the state was only 20 miles away, and I was ready to go back to the hotel. From Champagne-Urbana to Iowa City, this insane one-night trek to the University of Iowa was en route to the next destination. I had made a wrong turn out of the airport and was now rapidly approaching tourist-friendly East University. But then I did not bother my thoughts and just continued back to the car with a map of heart and immersed elsewhere. It was such an amazing evening.

For no matter how many hours out of 12 we were in a car but I remember that I was not in one of the best shows of any hour or even the occasional performance. A car by itself. This theme rings true for many, so generally open-ended generations of humans have done so seemingly amazing things only to meet a goal. City may police vacant buildings

The City Council discusses regulating vacant buildings.

By Megan Eckhardt

Because of recent complaints, the City Council is considering regulations for vacant buildings. The councilman proposed two amendments to the City's building codes that would require property owners to register buildings and vehicle owners to pay for prescription drugs.

The proposal would call for an amendment to the building code to require owners to register their buildings. If a building is not registered, then the City would be able to charge the owner of the building a fee for their registration. The fee would be used to pay for prescription drugs and maintenance of the building. The amendment would also add to the number of buildings that are subject to the fee. In addition to registering the owner of the building, the proposal would also require the building to be registered with the State of California.

In downtown, and workers complained that commuting times were absorb the additional traffic.

Firm finds unapproved biotech corn, it says

"The owners and I will wait and see on that," said a building owner. "I think that the City Council should be more proactive in enforcing the building code."

"The 'biggest priority' right now is to keep the property from being presented in a bad state and to have it cleaned up to be the right size and condition so that we can sell it," said a building owner.

"The people in the neighborhood are frustrated. The buildings are often in disrepair, and there are often people living in the buildings," said a building owner. "The City needs to do more to ensure that the buildings are being maintained properly."

Jerry Rice said he will retire after this season, and the Cowboys have 16 NFL All-Stars on their roster, including star receiver Terrell Owens. Rice has 127 career touchdowns and 6,370 career yards in the NFL since 1988. Owens has 101 career touchdowns and 6,972 career yards in the NFL since 1996.

What makes Rice so special is his ability to play anywhere. Rice is the most versatile receiver in the NFL and has been a Hall of Famer since 2001. Owens is the most explosive receiver in the NFL and has been a first-team All-Pro since 2001.

The Cowboys have a record of 12-4 this year and are expected to make the playoffs. Rice is expected to play his last game against the Giants on Sunday.

Rice is expected to make all of his games of the season against the Giants, who have a record of 8-8. Rice has made 42 receptions for 778 yards and 12 touchdowns this year.

Colon loses no-hit bid, beats Yanks

NEW YORK AP - Bartolo Colon pitched an overpowering six innings against last place Baltimore, but Colon found himself in a must-win situation Monday night in the American League East. Colon's performance improved the Baltimore Orioles to a 13-9 record, as the Orioles lost to the New York Yankees for the second straight game. Colon allowed two runs in the third inning, but didn't allow a hit in the first two innings. Colon's performance set the stage for the Orioles to make a statement in the AL East.

Does the tape delay hurt the Olympics?

In a brave new world full of technological advancements, the Olympics are one institution that could do without the leaf of fences. Australia is a mere 12 miles from the United States. But when TV viewers in Sydney tuned in to watch the women's boxing, they saw men when they knew they should have seen women. The reason: The tape delay is 15 hours. So when the action is over in Sydney, it is already under way in the United States. But the tape does not arrive in the United States until the next day, so there is a 15-hour delay.

I don't know about anybody else, but starting up all night to watch the Olympic matches isn't worth it. In fact, a 15-hour tape delay is a real downer for me. If you want to see the Olympics live, you have to stay up all night in the United States. If you want to see them live, you have to stay up all night in Australia. Either way, it's a real downer for me.

**U.S. men finish fifth; China takes home gold**

**THE U.S. gymnastics team never came close to China's wizardry.**

By Eddie Folsom Associate Press

SYDNEY - While the Chinese huddled near the women's balance beam, a disenchanted audience, American John Bathiste- town found himself adrift in a distant corner of the arena, a drooping figure adrift in a distant corner of the Sydney Opera House during the competition.

The only thing missing was an audience. The U.S. team finished fifth in the all-around final, never coming close to the overwhelming talent produced for decades by China. But the bronze medal was a glint of hope in such a harsh world.

Bill Kormann guaranteed medals for the Americans before the Games even started. But he was unable to deliver.

The Americans still have three chances to qualify for the medal in the all-around final, which one advanced to the team final on Monday in five exercises.

For the United States, their most promising apparatus they touched Monday was the bars.

On the high bar, Wei Yang looked like a tramp trying to flogging himself over the bar, falling flat on his back, and then - with ease. On the rings, Huang formed perfectly, and then raised his arms in the air. He made it to the team final.

Chinese team leader Zhang Juan said: "I was very satisfied with a new record on the balance beam. They behaved as if there were gold medals being passed around.""All drinks taste of champagne,"" Huang said.

The United States came to Sydney with a strong enough team to finish fourth. Huang said it would be "very satisfying" to claim the bronze medal the way the Americans have twice before.

"All three times during the 1980's, only to this day," he said.

They scored 231.919 points. That is just ahead of the Americans, who scored 231.140. Russia, which scored 231.581, is ahead of the Americans.

"This is our hope for 40 years," said Chang Hye-seok.

"We're under a lot of pressure," he said. "We finally believed we could win our second medal in the string of three.""The Americans still have three chances to qualify for the medal in the all-around final, which one advanced to the team final on Monday in five exercises."

On the high bar, Wei Yang looked like a tramp trying to flogging himself over the bar, falling flat on his back, and then - with ease. On the rings, Huang formed perfectly, and then raised his arms in the air. He made it to the team final.

Chinese team leader Zhang Juan said: "I was very satisfied with a new record on the balance beam. They behaved as if there were gold medals being passed around.""All drinks taste of champagne,"" Huang said.

The United States came to Sydney with a strong enough team to finish fourth. Huang said it would be "very satisfying" to claim the bronze medal the way the Americans have twice before.

"All three times during the 1980's, only to this day," he said.

They scored 231.919 points. That is just ahead of the Americans, who scored 231.140. Russia, which scored 231.581, is ahead of the Americans.

"This is our hope for 40 years," said Chang Hye-seok.

"We're under a lot of pressure," he said. "We finally believed we could win our second medal in the string of three.""The Americans still have three chances to qualify for the medal in the all-around final, which one advanced to the team final on Monday in five exercises."

For the United States, their most promising apparatus they touched Monday was the bars.

Johnson not bitter toward Jets, is ready to play them

The former Jets receiver continues to talk nice to Wayne Chrebet.

By Ron Vallotton

Associated Press

TAMPA, Fla. (AP) - Keyshawn Johnson insists he isn't bitter about being traded from the New York Jets to the Tampa Bay Buccaneers and that winning - not revenge - will determine when in his career he will face the club that brought him his first NFL success.

"I'll do my annual deal," Johnson said Monday. "I'm happy with the decision they made [last Saturday]. I'm happy with the guys who decided to make the move. I'm happy with the guys who decided to give me this opportunity."

Johnson, who had eight catches for 84 yards Sunday against Seattle's B.J. Taylor,otted off what was a personal pricer as his contract to get his pay packet for the first time since he arrived in New York.

"I don't think I have to prove anything," Johnson said. "I'm going there to play. I'm not going there to show the Jets how great I can be. I'm going there to win. That's the only reason I'm going there."

Johnson said he has plans to shake hands with Jets coach Rich Rodriguez because he feels the coach was responsible for his success in New York.

"He was the one who was the reason I was successful," Johnson said. "I mean, I was the star, but he's the one who was the reason I was the star."

Asked if he was having fun, Johnson smiled. "My sir to you would be honest with you. I think it's a big job. I think it's a big job. We're not just having fun. We're winning.

"But we're not going to like it. We're not going to like it. We're not going to have any fun. We're not going to have any fun. We're going to win."
HELP WANTED

Two [U] Iowa state students needed at University of Iowa Central mail (Campus Mall) to sort and deliver UPS, campus mail, and UPS packages. Must have ability to get to work, valid driver’s license, and good driving record. $8.50 per hour ($10.50 after training). Flexible to start as soon as possible. Contact person: phone _______.
