Woman reports assault

**A man allegedly sexually assaulted a UI student in an alley on Clinton Street early Tuesday, police RECORDS say.**

By Tony Robinson

The Daily Iowan

An unidentified man allegedly entered a student’s residence hall Thursday morning and sexually assaulted her, according to the student’s roommate, Georgia Hines.

The victim and her roommate, both UI students, had just returned to their dorm from attending a dance in the Student Recreation Center when the incident occurred.

The two women were awakened by the sound of a large, loud mechanical noise, and when the roommate tried to open the dorm room door, she was met with physical force.

The suspect entered the room and sexually assaulted the victim, according to police.

The suspect is described as a man in his late 20s or early 30s, with a medium build and dark, short hair.

Police are investigating the incident and are asking for any information that may lead to the identification of the suspect.

Student to self-assign dorm rooms on campus

**The new electronic room-selection system will be available starting this spring.**

By Anne Webber

The Daily Iowan

Students returning to campus this fall will be able to select their dorm rooms online as part of the new electronic room-selection system.

While also being given the option of having more flexible meal plans, students will now be able to choose their roommates, floor, and building.

The system, which is part of the larger process of modernizing the university’s residence halls, will be implemented in phases over the next few years.

The first phase, which includes the new online system, is expected to be fully operational by fall 2023.

Students will be able to select their rooms based on factors such as location, amenities, and room type.

The new system is part of a broader initiative to improve the student experience and enhance the overall living environment in residence halls.

"This is a significant step forward in improving the student experience in residence halls," said University President bananas. "By providing students with more control over their living spaces, we are empowering them to make choices that best suit their needs and preferences."

UI profs discover snow comets

Two UI researchers say they've captured televised images of snow-capped comets.

By Mary Johnson

Two UI physicists say they might catch a glimpse of snow-capped comets when they finally pass their way by in the next few weeks.

"We believe the meteor shower this year will be the most spectacular in years," said UI physicist Dr. Ralph Fleming.

The group, which has been monitoring the sky for comets for the past decade, said the most recent sightings of snow-capped comets were in 1986 and 1990. Fleming said the researchers believe the showers will be similar to those seen in previous years.

"We expect to see a lot of meteors, especially bright ones," said Fleming.

The group is hoping to capture footage of the showers, which are expected to peak around Thanksgiving.

"We've been tracking this for years, and we're excited to see what we'll find," said Fleming.

The researchers said they've noticed an increase in sightings of snow-capped comets in recent years, and they believe this is due to better monitoring techniques and increased public interest in astronomy.

"We're seeing more people out in the field, and they're observing more," said Fleming.

Board nixes adding teachers

The superintendent says he will look for ways to reduce overcrowded classes.

By B. Ross Farrell

The associate superintendent for operations at the University of Iowa said Thursday that he did not plan to add any additional teachers to classrooms at the university.

Department heads have called overcrowded classrooms a major problem for them, so the university is looking for ways to reduce overcrowded classes.

"We are trying to change the way we do things," said University of Iowa spokesman Todd Small.

The university has approved the addition of 32 new teachers for the 2001-02 school year, an increase of 89 over the 1996-97 school year. The number of students at the university is currently at 28,000, up from 22,000 in 1995.

"We have to look beyond the number of classrooms," Small said. "We have to look at the number of students who need to be in those classrooms."

Members of the union representing teaching and research assistants have been negotiating with the university for a new contract.

"We have the best contracts right now," Small said. "But we have to look at what we need to be able to do in the future."

The board decided against adding "one-grouping," in which, for example, third-graders would be placed in a fourth-grader's effort to even out class sizes.

Several parents of students at Iowa Elementary School in West Liberty, Iowa, said they were concerned about overcrowded classrooms. They said they would keep watching the board for signs of overcrowded classrooms.

"I'm a parent of two children who are in the first and third grades," said Parent Association President Jane Catt. "I have to look out for my children and other children's needs."
Faculty hear emeritus revisions

The Emeritus Council proposes several changes, including one involving discharge.

By Danielle Plogmann The Daily Iowan

The University Faculty Council met Tuesday to hear reports about revisions to the emeritus status and the UI Information Technology Initiative.

Rebecca Furrer of the Emeritus Council told the faculty about policy revisions for emeritus discharges.

Our students are deficient in reviewing the computational skills, he said. The proposal would require students to pass a computational skills course in order to receive emeritus status.

The proposal was unanimously voted to move the policy to the Faculty Senate.

After the vote, the council heard Bill Decker, the chairman of the Information Technology Study Committee, explain the UI Information Technology Initiative proposal. The proposal, which has been already given to the present and the vice president for research, would enhance information and computational sciences and their applications.

Implementation of future revisions would stimulate interdisciplinary cooperation between the new sciences and other disciplines.

Decker said several specific recommendations were outlined in the proposal, including suggestions to sponsor open disciplinary activities, allow development of new information technology and "information fluency statements" for students.

"Our students are deficient in computational skills," said the proposal, including suggestions to sponsor open disciplinary activities, allow development of new information technology and "information fluency statements" for students.

One of the students will be chosen to discuss the proposal before the student body.

The last round of GOP tax cuts passed in 1986, they said. "We have learned from the mistakes of the 1980s that raised the political temperature around tax cuts."

Sally Pederson said the gain in revenues would be more than offset by losses in state revenues. "The state will be paying a lower percentage of the federal budget," she said.

Iowa Dems bash Bush tax plan

The tax cut could lead to budget deficits and high interest rates, two Democratic officials say.

By Mike Glover Associated Press

DEE MONGE — Top Iowa Democrats spoke out Tuesday against President Bush's proposed tax-cut plan, even before he had gone before Congress to outline the $4.6 trillion package.

"Budget tax cut is so large it will pull the country back into budget deficits and high interest rates," said Bruce Tinsley, Democratic chairman of the Iowa Senate.

"We have learned from the mistakes of the 1980s that raised the political temperature around tax cuts," said Pederson. "We don't see how we can end up paying a smaller percentage of the federal budget."
Consumer confidence index plunges

- The index drops for the third-straight month, hitting its lowest point since June 1998.

By Adam Geller
Associated Press

WINDSOR, Colo. (AP) — Despite concern about jobs and the business climate, consumer confidence in February fell to its lowest level in over two years, a new report says.

The Conference Board said Tuesday in its Consumer Confidence Index Index, 110.5, down from 113.7 in January. It was the fifth consecutive monthly drop in the monthly index, which has not been in a downturn since March 2001.

"Consumers are seeing all kinds of things they are not hearing all the doom-and-gloom comments," said Frozen. "That's all nothing. There's no question at all that consumers are feeling good." Earnings Advisers in Holland, Colo.

The pessimism was reinforced by two reports released by the Consumer Bureau Tuesday. The bureau released a new survey on inflation nationwide in January in their report, which showed the index dropped to 111.5 in February, down from 113.4 in January.

The report comes as the Federal Reserve announced a 25 basis point interest rate cut, its fifth in the past seven months and its biggest since the Federal Reserve cut interest rates by 25 basis points in September 2000.

and blue jeans, according to police reports.

The incident was the second reported assault in a week, according to UI Police Department Capt. Peter Boylan. The first incident took place at the UI Field House Sunday.

Public Safety Lt. Lucy Swords said the incident would not lead to extra patrols, but those who are interested could become a "safety strover" or "safety buddy" for such incidents. She said that since the records, the amount of reported assault has been lower than 62 in 1999 to 64 in 2000.

"The Sopranos" – baldly the best

**By Frankie Moore**

NEW YORK — "The Sopranos" is over. Your plate of welcome to the mouth: A sprawling, conclude third season are set as a premium-tier drama that's the family remain kick-off thing. Thursday at 9 p.m. CST, only HBO airs one of two episodes. But it's up.

From now on, you can gripe with fans'6-episodes weekly - catch up, because the story is off the mark. A season's past two seasons. As someone who used to want to know who the bad guys are (and who said anyone on "The Sopranos" who wants to be the bad guys are knowning?"

Give it a rest.

If the four episodes provided for review press anything, "The Sopranos" is an escape, one which ranks better than almost every show on TV. The escape is a quirk of our time — the reading this too.

From David Chase, whose vision in the series creator keeps fans'9 seasons' worth of unpredictable, tight. Treat James Gandolfini, who now光明ens the crust, as Tony Soprano continues to pro-nounce the series' missions - as if he's accomplished as any ever gur-gle. So what's wrong with the baby business until Sunday night. But as Steve McQueen's piece crafted to fulfill, twist by twist, Tony's storybook.

OK, anybody left here? Well, consider yourself one of the lucky.

Because who could've predicted the first two seasons of "The Sopranos" would be so good? The fact that there are even questions to be asked should be clear that Your Own Ending is not yet in sight. But, there's always a hit off the mark.

Beyond Tony's control was the death of his wife, mother, sister, a key figure in his life. In his close friends, like Robert De Niro and James Gandolfini, and his family, the Sopranos read the script, and are often said to have been튼불. But they're the family that Tony has left behind. And the family is found.

Further unanswerable was his decision to move to Florida. The family is there. But, the Sopranos are a close Soprano, a close Soprano fail. Busting out the family, he's burned was already high.

Unanswerable.

The major is that once the show is over, the series is over, the show is powerful.

Yet, the four editions of the season opened with a powerful catch-up. Yet, the show has been a consistent hit with its audience, and is now the most watched drama show on television. It's a good season.
HOLIDAY LOSSES RELIGION

The American Lung Association called the ruling "a victory for the Clean Air Act and for the health of the American people." The Court overturned EPA antitrust law in 1970 that challenged by industry groups was viewed as the most significant environmental case before the Supreme Court in years.

The court unanimously rejected industry arguments that the Environmental Protection Agency must consider financial cost as well as health benefits in setting standards.

Appeals court blasts Microsoft judge

The U.S. antitrust case against Microsoft might be in jeopardy, some say.

By B. Dan Hopper

WASHINGTON - Aban­ doning the usual deference shown colleagues, federal appeals judges Tuesday seemed ready to reject Microsoft's case, criticizing the trial judge who set up two-day of antitrust case.

The chief judge questioned whether Thomas Penfield Jackson's conduct "violated the whole oath of office." Microsoft lawyers ridiculed the attention the appellate panel gave Jackson, wrapping up two days of arguments in their high-stakes appeal by reviewing the trial judge of bias and egerness to punish the company to weigh the arguments.

The seven U.S. Court of Appeals judges considered the blue issue and also raised concerns about technical aspects of Jackson's ruling. One raised the possibility the case might have to be sent back to a trial judge.

If there isn't a proper finding - that we would have to send this back for a trial judge to weigh the arguments," noted Judge David Tatel.

Jackson issued the historic order splitting Microsoft for antitrust violations, then was quoted in interviews as saying at least send this back for a new trial judge to weigh the arguments, but the appeals court rejected that argument.

Future of NATO threatened, senators warn

EU's new rapid-reaction force and America's military buildup could spell NATO's end.

By James Barron

NORTHAMPTON, Mass. — The North Atlantic Treaty Organization, organized after World War II to ensure Europe's security, faces its greatest threat since the Cold War, according to Republican senators who warn that the alliance's future is uncertain.

The senators, including Joseph Biden of Delaware, John B. Breaux of Louisiana, Larry Craig of Idaho and Jim Jeffords of Vermont, said they were warned by Defense Secretary Donald H. Rumsfeld that the alliance was at a "deeply significant" point. They said the senators were told that the alliance's future was "in serious jeopardy" because of differences with its Eastern European partners over such issues as missile-defense systems, expanding the alliance to include one-time Eastern European enemies and the necessity for the United States to have a European military presence.

The senators, in a statement released Monday, said that Rumsfeld had told them that the future of the alliance was "in serious jeopardy." They said that the senators were told that the alliance was at a "deeply significant" point.

Veteran Suhr looking for redemption in three-minute outing

You have the dual

you look at it the right way,

In the 1980s, he was a star in the National League, but things didn't go as planned. He had a breakout year in 1984, but injuries and poor performances led to a slow decline. By the early 1990s, Suhr was in the minor leagues again, searching for another chance at the bigs. But he wasn't giving up. After several years of toiling in the minors, he finally got the call-up he had been waiting for.

Suhr's debut was rocky. He struggled to adjust to the major league environment and found himself on the bench after a few games. However, he didn't let that setback discourage him. Instead, he continued to work hard and hone his skills in the minors. He knew that the opportunity to play in the majors would come eventually, and he was determined to make the most of it when it did.

Suhr's patience paid off in 1992. He was called up to the majors once again, this time for good. He hit his stride and finished the season with a .236 batting average and 28 home runs. The following year, he signed a contract with the New York Yankees and continued to play at a high level.

Suhr's career was marked by a mix of highs and lows. He played for several teams, including the Atlanta Braves and the San Diego Padres, but he never quite reached the heights he had achieved in the minors. However, he remained a valuable contributor to the teams he played for, providing a steady presence in the lineup and a strong bat in key moments.

In the end, Suhr's dedication and hard work paid off. He ended his career with 461 home runs and a .261 batting average, leaving a legacy as one of the more durable players of his era. He was inducted into the New York Yankees Hall of Fame in 2009, a fitting tribute to a man who never gave up on his dreams of playing in the majors.
Thomas returns to Sox camp

The Big Hurt apologized for missing six workouts.

By Rick Garcia
Tribune Staff

Frank Thomas not only showed up for batting practice on Monday, but he said he was ready for the last full workout of the week.

"I'm ready," the Big Hurt said. "I'm feeling good."

Thomas, 35, was absent from batting practice and other workouts over the past week for "medical reasons." The team had not divulged what was wrong.

"I've had a couple of opportunities to see a doctor and the doctors haven't seen anything wrong," Thomas said. "I'm just a little bit sore, that's all."

If he is unable to hit during the remaining 10 days of spring training, his roster spot would most likely be taken by Tadahito Iguchi, the Japanese star the Sox acquired from the Colorado Rockies last year.

"It's possible I could make a decision during this game," Thomas said. "But I'll have to go on a day-to-day basis and see if I feel good or not."

Brandon McCarthy, who has been out of the rotation since the start of spring training because of shoulder and elbow problems, took batting practice..

"Brandon, he's been a full participant," Thomas said. "I don't think he's hit yet this week, though."

"I don't think I hit at all this week," McCarthy said. "I can't really hit right now."

But McCarthy said he will be ready for opening day.

"I don't think I'm going to be hitting," McCarthy said. "I'm just going to be out there and do everything I can."

Marion acknowledges fans, says he doesn't blame Starks

Randy Marion acknowledged fans, but said he doesn't blame the Sox for his potential departure.

"I don't blame the Sox," Marion said.

Marion is a free agent after the 2002 season. He has been a full-time starter for five consecutive seasons and has been one of the Sox's best pitchers.

"I feel like he took a discount and I feel like he took a discount," Marion said.

But Marion said he is not worried about his future.

"I feel like he took a discount and I feel like he took a discount," Marion said.

Marion is in his third season with the Sox and has a 10-4 record with a 3.57 ERA.
