Soft-money ban clears major hurdle

The president, watching director slightly, says he is willing to sign McCain-Ferguson.

By David Eppstein
WASHINGTON — The Senate voted yesterday to impose the soft-money ban on the House, action that would give the Reagan-backed bill the needed override of President Bush's veto.

The vote of 68-38, the Senate rejected a move by Sen. Chuck Hagel to limit the ban to the House. Hagel's measure, he said, would give the president the power to veto any legislation passed by Congress that would weaken the ban. The Senate defeated Hagel's amendment by a vote of 60-38.

Corvalal delays Iowa Child purchase

The city wants more time to deal with the details of the project, a city official says.

By Mary Soder
The Daily Iowan

The city of Coralville de­clined to move forward with the purchase of land for the city's Children's Program at the council meeting Tuesday night.

Under an agreement with the school board in late January, the city had agreed to purchase 30 acres of land northeast of Interstate 80 and 36th street for proposed $200 million com­plex.

On Dec. 18 to purchase the land.

Kelly Hayworth, the city administrator, said the deal fell through because the city was unable to come to terms on the price.

The deal was for $2.1 million, Hayworth said. The city had to put $1 million down and the rest of the payment was expected to be completed in 20 years.

The city is now looking at other options for the site.

Parent berates board for Day incident

An I. C. resident attacks the administration of the city's principal residence.

By Brian Brokaw
The Daily Iowan

A 25-year resident of Iowa City told the Iowa City School Board Tuesday that it needs to do more to involve the community in how the school board operates.

Pat Hanish, the spokes­man for the Iowa City School parents, also asked the board's treatment of former Iowa City Principal Trudy Day, who resigned in mid­January without a public statement.

"This is a highly emotional issue, and we find the board astonishingly quiet about it," she said. "The only public statement we have received is to have her looming uncertainty to buy backseal for staff girls..."

the board seems to have received. May 30, 2001

Hanish recommended that the board inform the public about Day's resignation and working with her to prevent any slander in the future. The schools have the capacity to be 746 students. The board said it is too early in the fiscal year to have a definitive statement.

Modern cineplex to grace Sycamore Mall in near future

The six-screen theater will feature surround sound and stadium seating.

By Pam Downey
In this town...

Following 10 months of negotiations, Sycamore Mall officials announced Tuesday that a new six-screen cineplex theater will open in the mall's vacated food court.

The new facility, which will fill the site vacated by the anchor Borders Bookstore in the mall's southwest corner of the mall, will feature digital cinema, stadium seating, high-back motion and wall-to-wall screens, said Loren Dewey, the general manager of Central States Theaters.

"The new theaters will be 'state-of-the-art' and a wonderful experience for the movie-goer," he said, adding, the cineplex will feature

- a great number of people moving into that area, and we think a new theater would do great there.

- modern furniture
- high-back seating
- digital cinema
- wall-to-wall screens

We have seen a great number of people moving into that area, and we think a new theater would do great there.

-Arthur Steins, general manager of Central States Theaters

"We have seen a great number of people moving into that area, and we think a new theater would do great there," he said.

Sycamore Mall owners are also looking into the possibility of turning them into a live theater venue, Ambrose said. Currently, they are looking for a company that would be interested in operating such a venue.

If no company shows interest, Ambrose said, the mall owners may consider running the venue themselves.

It would be open to students as well as the UI and Kirkwood or other members of the community exploring interest in performing there.

Plans can more forward as soon as Sycamore Mall secures a building permit, said Loren Breunig, an Iowa City building inspector.

He said the owners must turn in a building application and pay a fee before a permit can be issued. Usually, Breunig said, a few changes are made, and the application is approved.

UI prof calls for more faculty collaboration across departments

By Jackie Hammers
The Daily Iowan

A new initiative will be taken to encourage collaboration among faculty members in different departments, UI professor told the Faculty Senate at a Tuesday meet-

Prof. Alexander Nagel, the chairman of the Senate's academic affairs committee, said the results of the committee will be completed in February for submission to the Office of the President.

Interdisciplinary studies are already available at the UI in question, nanoscience and molecular biology.

"Most of the work here, and we need ways to find time and encourage doing things if we are going to be more innovative and explorers," Nagel said.

The recommended policies promote collaboration between departments, history professor Jeffrey Cox said, but it may not be applicable for some departments to work outside their interests.

"Innovation is not necessarily collaborative," he said. The report advocated measures against this habit by increasing the number of units within the university. Removing a department from a center, for example, would expand the university's Program and the Public Policy Center. Because such units are vacant, this may not be suitable for the toy library, the better the space, the better the faculty at the UI.

"I think there would be a marginal increase in tenure-track positions," said Lea Ann Clark, an associate professor for family and an associate member of the Law School. "That would have that consequence. That was the report's recommendation.

The report also supported the possibility of faculty appointment to external positions andPh.D. positions. The UI and the department is doing this. I know it is working for a few years and a five-year program for graduate students, with special emphasis on undergraduate education.

This is going to involve a lot of people, but we have some adaptations," Nagel said. "We realize we are facing a daunting budget cut.

The report will now go to the larger body of the Faculty Senate.

Members of the council also discussed the 4Cs Tree Library, which allows the public to check out trees. The UI is requiring that the program, located in the university's Old Public Library, leave its space by the end of June.

Judith Pascoe, an associate professor of horticulture, said students would be interested in the program.

It would be open to students as well as the UI and Kirkwood or other members of the community exploring interest in performing there.

Plans can move forward as soon as Sycamore Mall secures a building permit, said Loren Breunig, an Iowa City building inspector.
The Iowa lawmakers rejected raising the state's speed limit to 70 mph.

By Ken Thomas

DES MOINES—Get a lead foot? You might have to pay a little more in Iowa.

The Senate voted to increase speed limits and parking fines to $100 or more. A proposal would have made Iowa the first state to raise the speed limit to 70 mph on state and interstate highways.

Concerned that Iowa was in a quandary for speed demons, the Department of Public Safety asked lawmakers to bring its fines into closer conformity with neighboring states and provide safer roadways.

"Their chief recommendations for increased fines were that they be just like the states next to us, which the State Patrol and the people of the state approved," said Sen. Gene Maddix, R-Clive. "They were directed at protecting public safety," said Sen. George Madaleno, D-Clive.

The Senate approved the fine increases 28-21 with mostly Republican support. Seven Democrats also voted in favor of the higher fines.

Lawmakers, meanwhile, rejected a proposal trying to get higher fines to an increase in the speed limit to 70 mph. Supporters of the higher speed limit have tried repeatedly to bring the issue to the floor for debate, even though it has been bottled up in the majority-controlled Senate for years.

"They will not be increased until we can raise the speed to 70 mph per hour," said Sen. David Loebe, R-Creston, who sponsored the bill.

Opponents said more states were holding the increases hostage. In a vote that likely will reprimand Sen. Davis's view of the 70 mph standard, the amendment was defeated, 31-18.

Race-based admissions ‘unconstitutional’

The federal judge’s ruling at the Michigan Law School might have implications for the University of Iowa.

Associated Press

DETROIT — Dealing another setback to affirmative action, a federal judge ruled Tuesday that the nation’s oldest law school may not consider race in its admissions in violation of the U.S. Constitution.

The ruling could have implications for the University of Iowa, which is considering whether to end its current race-based admissions program.

The judge, in a decision that came as a surprise to many, said that the program violates the Equal Protection Clause of the 14th Amendment to the U.S. Constitution.

“This is a significant victory for the plaintiffs in this case,” said John Cooper, an attorney for the group of white students who brought the case.

The University of Iowa has not yet commented on the ruling.

In a statement, University President Bruce Harre said, “We are disappointed by the decision and will continue to review our options.”

The ruling was the latest in a series of legal challenges to affirmative action programs, which have been under increasing scrutiny in recent years.

The University of Iowa has been grappling with the issue for several years, and a decision could have significant implications for the institution.

The ruling did not address the University of Iowa’s other race-based programs, such as its affirmative action program for minority students.

The University of Iowa is one of several universities that have been challenged in court over their race-based admissions policies.

The case is being watched closely by universities and civil rights groups, who have been divided over the issue.

Some civil rights groups, such as the NAACP, have argued that affirmative action programs are necessary to address the legacy of discrimination.

Others, such as the University of Iowa, have argued that such programs are unnecessary and that other policies, such as outreach and diversity initiatives, are more effective.

The University of Iowa has said that it is considering a switch to a race-neutral admissions program.

The university has not yet announced a decision, and a spokesman said that the university will continue to review its options.

The ruling could have implications for other universities that have race-based admissions programs, and could set a precedent for future cases.

It is not clear what the next steps will be in the University of Iowa’s case, but the university is likely to appeal the decision to a higher court.

The ruling could also have implications for other universities that have race-based admissions programs, and could set a precedent for future cases.

The University of Iowa has said that it is considering a switch to a race-neutral admissions program.
**NATION & WORLD**

**Teens: Too much focus on school violence**

- Students question pro- and anti-gun advocates about weapons and school safety.

*By Ken Syrjanen of the Associated Press*

**WASHINGTON** — One 17-year-old looks forward to getting his first hunting rifle. Another says guns are too easy to get.

But for the most part, America’s teens are not paying much attention to the rash of school shootings that might suggest, “They just don’t see much of that,” said Nicole Watson of Easton, Mass., who favors less availability.

“School kids are going to be very bad eggs,” said Andrew Saliby of Easton, Mass., who looks forward to his 21st birthday, which brings with it his eligibility for a hunting license.

In an annual poll in 1995-96, sophomores and juniors in high schools across the country peppered a National Gun Violence study with detailed questions about safety.

Some questions were prepared with statistics showing a decline in school violence. The most recent Department of Education figures show 34 violent deaths in schools in 1996-97, a 40 percent decrease from 1995-96.

“One of the studies was I was given to do for a paper about guns and school safety. I was told that 6A Iowan — Iowa City, Iowa — Wednesday, April 19, 1999, Columbine shootings in Cal­ifornia left a teacher and 15 stu­dents dead, including the two attackers.

Baker, who spoke to stu­dents across the country, said he’s noticed that many are becoming defensive about the issue.

“They feel the media focus too much on the negative side,” he said after the debate. “It’s why I included that upbeat stuff.” He began his address by congratulating the youths for their involvement in the debate.

**California ups energy rate by a huge margin**

*In the face of protests, California regulators approve electricity rate increases by 46 percent.*

*By Karen Gaudette of the Associated Press*

**SAN FRANCISCO** — A pro­test at a public hearing Monday over a proposed 46 percent increase in electricity rates ended with some getting used to the hard- working 319 area code.

A few hundred people turned up the phone to communticate.

California Gas and Electric Co. and Southern California Edi­son Co.

“The commission has done all it can,” commission Pres­ident Lorenz Lycke said. “We’ve fought hard for every puzzle piece possible against three unjust energy prices.”

The commission said it will create a tiered system that will protect poor people and penal­ize customers who use too much energy.

“Lycke proposed the higher youth rate in order to form ‘disci­pline keys’ to manage and keep help for California Edison and PG&E users,” the plan is also seen as a way to protect California’s health benefits, which is being drained of $60 million to $60 million a day as the state buys power for the cash-strapped utilities. Since the crisis began, more than $4.2 billion in tax­payer money has been spent to keep the lights on.

SoCal Edison and PG&E say they have lost more than $10 billion since last summer because of high wholesale elec­tricity prices and because Cali­fornia’s 1996 deregulation law prevents the utilities from passing these costs on to their customers.

The rate increase will be on top of the 8.5 percent hike approved by the commission in January and a 15 percent hike already scheduled for April.

Retailers and consumer groups branded the latest plan a rip-off.

“We are holding hostage a handful of energy compa­nies that, under deregulation, got control of our electricity supply,” said Harvey Rosen­field, the president of the California Public Interest Research Group in Santa Monica. “Until our elected offi­cials start acting to protect us, we are going to be at their mercy, at the mercy of this rip-off.”

Democratic Gov. Gray Davis said that by opposing rate increases but that he has no power over the commission.

However, those of the commis­sion members are his old tormentors that rates have to rise.

Two bombs rock Jerusalem

- Several Israelis are killed or wounded in the attacks.

By Janine Tonay

**JERUSALEM** — A Palestinian militant detonated self-exploding explosives strapped to his waist on Tuesday in the West Bank's Bethlehem, killing a 10-month-old baby girl and injuring two more bystanders, just six days after four Palestinians killed others in Jerusalem.

The explosives killed six-month-old Monday's shooting death of a 10-month-old baby girl by Palestinian, rattled Israelis, who demanded that Prime Minister Ariel Sharon do something to protect them against attacks by Palestinians. "We have a war here," said Jerusalem Mayor Efroym Stern.

Last Tuesday, an 11-year-old Palestinian girl, raised by her assassinated father, brandished herself with Israeli soldiers near the West Bank city of Hebron, Palestinian police said. The woman said she was an Angel of Peace.

Sharon blamed terrorist bombings on Palestinian leaders. Yasser Arafat, rejecting that "most of the terror attacks are by forces under (Yasser's) command," Sharon said he knew no one who dealt with the violence and democracy.

President Moshe Katsav resigned, however, that negotiations for "constructive" changes demanded by ethnic Albanian leaders can take place now that insurgents claiming to fight for greater rights have been pushed from a position of overgrowth near Skopje and largest city, Tetovo.

"It seems to me that we were not only the victims of terrorism but also of Macedonians who, in these difficult times, were able to prove their unity and strength," he told the Yugoslav media. "The theme of this interview is that we are for all our citizens, Macedonians and Albanians, and proved the country's role in defense of ethnic harmony.

Prime Minister Bajranko Trajkovski said the government's "political push for a peaceful solution and the announcement of victory." Though the city was quiet Monday, the city was under attack.

An exchange of fire.

Israel's army said there was an American denies charges in Peru

Amanda Berenson says she will take care of her housemates.

By Charles Pene

The Macedonian leader notes that ethnic Albanians may get the constitutional changes they want.

By Carole Boisvert

**LIMA, Peru —** Lori Berenson of the United States is a secretary — out of the line of fire, according to her husband, and in prison for alleged involvement in the guerilla, which began last week in the town of Las Tunas.

Macedonia's president declared Tuesday that his country was not "only the victory of Macedonia's president's remarks followed an attack that swept through the capital.

But after years of pressure from the United States, Peru's former Masacan terrorists and probably in the political wing, said providing magazine Maroon.

Berenson said she was neither involved in the group's tactics that ended El Salvador's civil war, but that the ex-guerrilla is now a congresswoman, who grew up in the real name, Lucin Dusterin.

"I don't know where you are getting that I was in the military wing," she said. "I did not work related to that."

In Las Crucitas last week, General Gonzalez confirmed that Berenson was her personal assistant and told the Associated Press that Berenson "never had any relationship with our military structures."

A secret Peruvian military court convicted Berenson of treason in 1984 and sentenced her to life in prison for allegedly helping the Tupac Amaru Revolutionary Movement plan a Marxist-influenced coup.

But after years of pressure from the United States, Peru's highest military court overturned the conviction in 1989, leading to the new civil trial, which began last week on the charges of "terrorist collaboration."

Prosecutors argue that she rented a house in Lima in 1981 as a hide-out for the Tupac Amaru rebels and as the group's top secretary for a planned attack on Congress. Berenson denies the charges and maintains she did not know her housemates were rebels.

During Berenson's cross-examination Tuesday, Berenson asked the former Massachusetts Institute of Technology student about his decision to drop out of school in the late 1980s to devote himself to U.S. movement that supported El Salvador's leftist rebels. She said she believed the Tupac Amaru guerrilla movement was "in legitimate" in that there was no other way to change for them what was unjust.

Her lawyer, Jose Luis Barrios, who has argued that Berenson was furious by the Tupac Amaru guerrillas, said he was trying to convince her for his political ideas.

"Obviously, ideas, opinions and beliefs cannot stand on criminal evidence for a trial," he said. "Our situation should not be subjected to which they're clearly trying to use that way."

## Women in law school number rising

The national trend for increased numbers of women entering law school appears to have reached the University of Iowa. In fact, more women than ever are entering law school at the University.

### Soft-money ban clears major Senate vote

Soft-money contributions to candidates for public office will be banned under a bill approved by the Senate.

### Medical students

Most medical students vote with their hands at the University. When it comes to voting on the nature of their education, their view is stronger than ever.

### Drinking

The tradition of drinking in bars after classes is one that is not likely to change. Despite efforts by students and faculty to curtail this behavior, the tradition has continued.

### Event

The number of women in law school has been rising steadily in recent years. At the University of Iowa, the number of women entering law school has doubled since 1990, with over 50% of the students being women.

### Primary-care residences decline

Primary-care residences, once a common feature of universities, have seen a decline in recent years.

### Million-dollar class project

The University of Iowa has secured a $1 million grant from the National Institutes of Health to support a project on the effects of alcohol on health.

### Music department

The music department has recently announced its decision to move to a new facility on campus.

### Pre-medical students

Pre-medical students at the University of Iowa have been focusing on the importance of alcohol awareness and prevention.

### Medical Journal

A recent medical journal article has highlighted the importance of alcohol awareness and prevention in medical education.

### Final Days

The final days of the university year are marked by a flurry of activity, as students prepare for exams and graduation.

### Arts and Crafts Show

The third annual Arts and Crafts Show is set to take place this weekend, featuring a variety of handmade items from local artists.

### Dance Marathon

The annual Dance Marathon at the University of Iowa has become a major event, raising thousands of dollars for local hospitals.

### FISCAL YEAR-END CLEARANCE

Final Days - END OF SATURDAY

### Cybersecurity

The issue of cybersecurity is becoming increasingly important in today's digital world.

### Westmusic

Westmusic, a local music festival, has announced its lineup for this year, featuring a mix of local and national performers.

### Palermo

The university of Iowa in Palermo is facing a budget crisis, with cuts expected in the upcoming fiscal year.

### Co-opes

The cooperative economics program at the University of Iowa has been growing in popularity, with more students choosing to pursue this field.

### University Clubs

The university clubs at the University of Iowa are vibrant and active, with a wide variety of interests represented.

### Senior Class

The senior class at the University of Iowa is looking forward to graduation, with many students planning their future careers.

### Quarterly Review

The quarterly review of the University of Iowa is available online, featuring articles on a variety of topics.

### Women’s Law Students Program

The University of Iowa has launched a new program to support women in law school.

### Dance Marathon 2002

The Dance Marathon 2002 is set to take place this weekend, with a goal of raising $1 million for local hospitals.

### Feminist group

A feminist group at the University of Iowa is planning a series of events to address gender issues on campus.

### Music department

The music department at the University of Iowa is hosting a concert series featuring local and national performers.

### University history

The history of the University of Iowa is rich and diverse, with a long tradition of excellence in education.

### Consensual research

Consensual research at the University of Iowa is focused on a variety of topics, with a strong emphasis on the impact of technology on society.

### Women’s health

Women’s health is a growing area of focus at the University of Iowa, with new initiatives aimed at improving health outcomes for women.
A global problem

The president can expect specific effects in the wake of his absence from the national stage: a return to business as usual, where economic and political interests are predominant over human rights issues.

Student Legal Services is generally perceived as an advocate for students, with a focus on ensuring their rights and addressing concerns related to academic integrity. With the suspension of the University Student Elections Board, there may be a decrease in the level of awareness regarding student elections and related matters.

The University Student Elections Board plays a crucial role in ensuring fairness and transparency in the election process. The suspension of this board could lead to potential issues with student representation and decision-making processes.

The Hawkewye Spirit does not guarantee that the board will be reestablished in its current form or with the same functions.

The editorial highlights the significance of the suspension of the University Student Elections Board and underscores the need for a transparent and inclusive process for electing new student representatives.

The editorial also touches upon broader themes, including the role of Student Legal Services and the importance of student elections in fostering a sense of community and engagement. The suspension of the board could have implications for student representation and the overall democratic process within the university.

The editorial serves as a reminder of the importance of student voice and the need for continued efforts in ensuring that student interests are adequately represented and that the democratic process remains robust and inclusive.

*A new study challenges the notion that crack babies suffer from prenatal cocaine use.*

By Lindsey Tanner

**CHICAGO—**The "crack baby" phenomenon is still being studied, according to a study that suggests that pregnant women who smoked crack cocaine and other drugs while pregnant face a greater risk of death in early childhood than does the average child.

"It's not surprising, given what we knew 10 years ago, that there was a rehabilitative response to crack use," said Dr. Howard Abrahams, a pediatrician at Boston Children's Hospital and one of the study's authors.

"It's not surprising that we now have a counterproductive response to crack use," he added. "The question now is: How do we make things better for these kids, and how do we prevent them from suffering in the first place?"

The study appears in today's *Journal of the American Medical Association*.

The perception that crack babies are a unique group stems from an overreaction to research that suggested a link between prenatal cocaine use and the use of cigarettes, Abrahams said.

"There's no evidence that crack babies have any biological differences other than the fact that they were exposed to cocaine," he said. "They are at increased risk for sudden unexpected infant death, and the risk of sudden unexpected death is increased by a variety of factors, including exposure to tobacco and alcohol use."**

**Reality comes to Magical Kingdom**

* Disney to truncate 500 jobs because of 'soft economy.'*

**NEW YORK—**The Walt Disney Co. said Tuesday it is eliminating 5,000 full-time jobs, approximately 3 percent of its global workforce.

The media and entertainment giant cited the "increasingly challenging business climate" as the reason for the layoffs, which will occur throughout the year.

"We will continue to invest in our core entertainment businesses, including a strategic focus on our cable network's, Disney Channel, and our Internet business," Disney Chief Executive Michael Eisner said in a statement.

"But our current business climate makes it necessary to make some hard decisions this year to realign our focus and ensure that we remain well positioned to meet the increasing competitive challenges in our industry."

**Sleepless in Seattle & NY & LA & ...**

* Nearly 63 percent of Americans get fewer than eight hours of sleep.*

**WASHINGTON**—America's workaholic lifestyle with too little leisure time and too much time spent at work is turning America into a wailing nation, according to a survey of nearly 4,000 adults saying they have trouble staying awake on the job.

A poll by the National Sleep Foundation and the American Psychiatric Association found that 70 percent of adults said their sleep was disrupted at least some of the time by work-related stresses.

"There is an epidemic of long work hours in our society," said Dr. William W. Forster, president of the National Sleep Foundation. "People who work long hours have trouble going to sleep and staying asleep.

"And we know that people who get less sleep have more accidents on the job," Forster said.

**Deferring taxes with TIAA-CREF can be so rewarding, you won't wonder why you didn't do it sooner.**

One of the fastest ways to build a retirement nest egg is by taking a tax-deferred investment. TIAA-CREF makes it easy.

"It's easier to start saving when you can defer taxes on your contributions," said TIAA-CREF Vice President and Trustee Linda A. Johnson.

"We know that 82 percent of all Americans would save more if they could defray the income taxes on their contributions," Johnson said.

**SPORTS BRIEF**

Jerry Rice meets with Seahawks

By Melissa Moneley

Jerry Rice, who is playing the last year of his Hall of Fame career with the team he always wanted to join, the San Francisco 49ers, is back to Bay Area fans.

Rice, who builds NFL receiving records for career yards and touchdowns, met with Seahawk coach and general manager Mike Holmgren in Seattle last weekend. Rice, Friday, March 23, was seen by the San Francisco Chronicle.

Sports news coordinator: Mike Holmgren

Rice, who holds the NFL record for catches (1,226) and yards receiving (16,958), said he will play the 2000 season with the 49ers.

The OF-1B and Griffey are in the area of the heart that is affected by the injury of surgery is "extremely serious," the team doctor told the Associated Press. Griffey is expected to be out for a few days, whether Griffey's AL batting champion, who has split a tendon in the wrist, is going forward, few things happen fast, like an 84 mph fastball that Griffey is also known for, he's still being viewed. We've been very careful, we are going to be very cautious, and Griffey is not going to be in a position to take the field or go on the road either.

Griffey's injury will cost the Cincinnati Reds dearly. Griffey, who is batting .315 with 23 home runs and 79 RBIs, leads the NL in RBIs and is tied for the league lead in doubles with 44.

He's the one who could start the ball of excellence around this place.

The two-time Michigan State basketball coach, on below coach Ken Mason's hockey team reaching the Final Four again, it makes a world of difference, because it's really devastating for us.

The throwing and swinging motions required in baseball have aggravated it.

Garciaparra played with the injury last season — but was on the disabled list from May 12-27 because of a strained hamstring. He said last year there was minor soreness in the wrist but nothing that would cause him to sit out, and he wound up hitting a league-leading .372.

"It was just something I thought I'd live with the rest of my life," he said. "I thought I'd be a halfway decent man, going, 'Hey, my wrist hurts.'"

The hot ball that struck Garciaparra's wrist caused swelling in the tendon and the circular tissue in the bone is extremely painful for the tendon to move smoothly up and down. The throwing and swinging motions required in baseball have aggravated it.

We are seeking caring people to join our team of professionals to provide a variety of health care services in the home setting. Full time and part time positions are available. Call Karen today at 357-9666.

HELP WANTED
Season continues for men's gymnastics

The Minnesota Golden Gophers team added a two-week extension to their schedule to capture a spot in the NCAA qualifier meet. The Golden Gophers improved their season win-loss record to 11-6, including a recent victory over the Minnesota State Golden Gophers.

League discusses realignment

- **NRL officials** say the plans don’t seem too difficult to resolve.

By Dave Goldberg

The NFL and the NFLPA have been negotiating for a new collective bargaining agreement (CBA) since 2011. The current CBA expired on March 14, 2011, and the two sides have been unable to reach an agreement. The lack of a new CBA has led to uncertainty about the future of the league, as the current CBA contains provisions that are set to expire in 2021.

Rodnick reaches quarterfinals

The 18-year-old receives advice from Andre Agassi.

By Steven Vais

Associated Press

KEY BISCAYNE, Fla. —

Andre Agassi watched in disarray from a broadcast booth as young Andy Roddick began to set up his age advantage Tuesday, losing four consecutive games and nearly blowing the first set at the Key Biscayne Open.

Then came a rain delay, allowing Roddick to play his cards and offer his hair some oiled.

"He kind of told me to get my head together over the last little bit and end up winning," Roddick said.

They also talked strategy, and Roddick said it was a good idea to go up, regrouping to beat Anders Pap 7-6 (10), 6-2 and become the youngest man's quarterfinalist in tournament history.

Roddick, 10, said he wasn't surprised when Agassi sought him out during the rain delay. They're occasional hitting partners at Roddick's home in Boca Raton.

"I have someone who is one of the greatest champions of all time. I can't believe to have him out here," Roddick said.

"He didn't say much," Agassi said. "He said he was happy with his team's support, and I'm confident that the team will finish in the top three and qualify for the NCAA Championships on April 6-7.

"I'm happy for him, and I wish him good luck," Roddick said.
