Council moves on 21 exceptions

If passed, the split-venue ordinance would allow underage patrons to enter bars separating alcohol and alcohol-free areas for special events.

By LILY HENDERSON

University of Iowa seniors Weston Slater had hoped to get a job at a downtown bar working tips could help fund his college education. However, when the ordinance went into effect June 1, and remaining staff members are getting far fewer hours.

He said the decreased foot traffic down-town affects the number of employees he can have working in a night. “It’s like clockwork down here,” he said. “The bars are dead, then the clock hits 11:45, and we have somewhat of a crowed. I’ve interviewed my employees, hired them, and trained them, and I can’t get them hours anymore.”

While Slater is facing cutbacks, John Shulow — a University of Iowa associate professor of economics — said it’s important to remember the number of bar employees is a relatively small fraction of the Iowa City work-force — not big enough to have a major affect on the city’s overall economy.

DOCTORATES CONTINUED FROM 1A

She achieved a master’s degree in clinical psychiatry and developmental society, and a Ph.D. in behavioral medicine. Now 31, she is concentrating on cancer pain research.

The number of female doctoral students enrolled at the UI surpassed the number of men in 2005. “Very successful females,” she said, describing her fellow female doctors.

John Keller, the dean of the UI graduate school, said he thinks the increase has to do with the slow progress of women’s rights and a growing population of females in the United States. “I think that we are seeing a culmination of the women’s movement,” he said. “It’s finally started coming after 40 years.”

Another member of the rising female demographic, Elizabeth Sutton, received a Ph.D. in anatomy, physiology and business. Women have been trailblazers in subjects such as engineering, physical and math sciences, and business. Women still make up only 25 percent of science, technology, engineering and math graduates, and business. Women still make up only 25 percent of science, technology, engineering and math graduates.

While women are excelling specifically in nursing, health sciences, and education, they continue to trail behind men in subjects such as engineering, physical and math sciences, and business. Women still make up only 25 percent of students in the graduate business school.

“There are still areas to improve,” Keller said.

“It’s not just me,” he said. “The kids aren’t coming in to attract the under-21 crowd any longer,” Lenoch said, noting that many 25-year-olds don’t come if their underage friends aren’t allowed in.

Lenoch also points to a trickle-down effect. “It won’t happen overnight, however, and certainly, in the meantime, some bar owners will face losses.”

John Solow, a University of Iowa associate professor of economics, said bars that were previously open only to under-21 patrons are now being forced to open only to 21-year-olds.

“Other bars have been hit hard,” said Molly Nis-son, an employee at the Mill, 120 E. Burlington St. “But not this one. We don’t attract the under-21 crowd typically unless we are putting on a show.”

Still, officials and authorities agree there are fewer students downtown. Slater said last semester, he spent at least three nights a week downtown.

“Now, that’s changed,” he said. “It’s just we don’t attract the under-21 crowd typically unless we are putting on a show.”

The view from behind the bar of Jake’s on Sept. 2, 2009. The bar has seen a significant loss in customers since the 21 ordinance took effect.

What should be the bigger issue in the gubernatorial race, jobs or education?

**Opinions**

**Editorial**

I will give you fair warning: I am going to use the “E" word. It’s a word we’ve all heard too often in the past year, and it doesn’t go away. Because of job creation, and then there’s the issue: If you don’t want to really use the word “economy" appear your eyes now.

Although the economy drum has been beaten strongly in the past couple of years, and attention, and then there is the issue. If you don’t want to really use the word “economy" appear your eyes now.

Biologist and author Robert Michael Pyle will read from his book Mariposa Road tonight at Prairie Lights. The nonfiction book documents his recent road trip around the U.S., looking for butterflies.

**By ALYSSA MARIE HARN**

After a long day of hiking in Yosemite National Park, author and butterfly enthusiast Robert Michael Pyle noticed a street sign that read “Mariposa Road” while driving his car.

“I guess butterflies are doing their job,” Pyle said. He’s following the 63-year-old’s latest nonfiction book, Mariposa Road, after taking a yearlong journey across 37 states in search of butterflies.

“Mariposa means butterfly in Spanish, and Mariposa Road is actually a metaphor for the entire journey,” he said.

He will read from his book at 7 p.m. today at Prairie Lights Books, 15 S. Dubuque St. “We don’t have many readings devoted to science, and there are many people in the community who would really like serious and nature-related authors to visit the store,” Paul Ingram, a buyer for Prairie Lights said.

Mariposa Road details Pyle’s actual cross-country adventure, and author hopes the book reads like a novel. The adventure began on Jan. 1, 2008, at the stroke of midnight and ended at midnight exactly one year later.

“I found a macabre butterfly in my wood stove the night before I left for my tour, and at the stroke of midnight, I mailed my book to the publisher. OK, you are No. 1, this is No. 2, just as I had said,” Pyle said.

“Mariposa Road” is a metaphor for the entire journey, the butterfly conservationist of 40 years visiting the only place in the world the butterflies would choose to hibernate, he said. Pyle found 30 of the 40 butterflies he was searching for in Catalina Island, the one place in the world where butterflies in Yosemite National Park would choose to hibernate, he said. Pyle hoped to encounter and the blossoming of a high fashion top model — that is, until they realize they aren’t the ones calling the shots about their new looks.

“It’s a metaphoric journey — that is, until they realize they aren’t the one calling the shots about their new looks,” he added.

**Taking a pointer from Lady Gaga and Beyoncé**

In a predictive style of glamourous celebrity fashion, Pyle will read from his book at 7 p.m. tonight at Prairie Lights. Residents say they plan to increase their efforts to stop the City Council from approving the ordinance.

University Heights zoning ordinance

The controversial ordi-
nance was discussed dur-
ing the University Heights City Council meeting Sept. 30.

• Councilor Mike Hausknecht, Jim Lane, Stan Laverman, and Pat Yeggy voted in favor of the ordinance. Councilor Brennan McGrath and Mayor Louise From.

Residents opposed to the measure have demanded city councilors post all let-
ters and e-mails as public domain.

Mayor Louise From.

“America is the only country will hold it
against us for voting against their way of doing business,” Graham said.

“If there’s some commer-
cial development up there, people from different neighborhoods can co-exit each other,” said Councilor Pat Yeggy. “A coffee shop could be added to the property, and the ordinance would allow someone in another business as well.”

“Don’t see any way of stopping this,” Breverman said. “But we’re not going to stop trying.”

The DREAM Act allows young people to become legal U.S. residents after spending two years in col-
el or the military. It applies to those under age 16 when they arrived in the U.S., have been in the country 5 years and resi-
tance to the DREAM Act.

Sen. Dick Durbin, the
Democratic leader in the Senate, said in ref-
ence to the DREAM Act. Durbin, D-Ill., said in ref-
tence to the DREAM Act.

Sen. Lindsey Graham, who has supported legisla-
tion legalizing, illegal immigrants in the past, and Senate Republicans were “putting their way of doing business,” Graham said.

“Don’t Tell” policy and repealing the “Don’t Ask,

The bill also included a money provision that would have benefited the University Heights. The Hill included a money provision that would have benefitted the University Heights. The Hill included a money provision that would have benefitted the University Heights.

“I have no problems with the ordinance,” said Councilor Pat Yeggy. “I would like to see a professional move that can be voted on by the public.”

Several young people who would have benefited from the DREAM Act will continue to watch the vote from the gallery, some wearing graduation caps and gowns. Many say they’re dis-

Brian Duncan said.

“America is the only country the only country that will hold it against us for voting against their way of doing business,” Graham said.

Red, D-Nev., said Republican’s were “putting party politics above the best interests of the men and women who courageously defend our nation” by blocking the bill, which would have authored $700 Billion in defense spending, includ-
ing a pay raise for troops.

ing a pay raise for troops.
ENGINEERING CONTINUED FROM 1A

"The first few weeks were tough, but you kind of have to get the hang of things," Suhjada said.

To help Suhjada and other students deal with being new to the major, the Student Development Center and the UI College of Engineering started a new program this fall aimed at giving the new influx of students more academic direction. Hoping to continue to meet the demands of its students, the center created Academic Advising Workshops, which help students in the college deal with different courses, from stress to time-management.

Officials have also increased the number of tutoring hours available, and 30 students took advantage of that offer on Monday alone, said Megan Allen, the student records manager for the engineering school.

This summer, the Student Development Center changed its office layout, located in 3124 Seamans Center, to include more space for tutoring, and Alec Stranton, the college’s associate dean for academic programs, said he’s used the tutoring area to plan events to attend a time-management workshop today.

Other efforts to accommodate students in the college include opening more sections to encourage consistent class sizes, Stranton said.

"From everything I’ve heard, it’s gone smoothly," he said. "I think we anticipated the changes well."

Engineering students are taking part in the optional workshops,averaging around 20 students, said Nancy Schmueser, the director of student development and scholarships for the college.

"Part of the goal is to have them be informal," she said. "We don’t want to end up with a classroom style discussion, just talking at them."

The Tippie College of Business is also experimenting in changes with its workshops, averaging around 30 students, said Nancy Schmueser, the director of student development and scholarships for the college.

"The program previously required students complete other online or at a sewage within the first two weeks of class. Now, Arthur said, students are making their own workshops choices and the college has seen a good response."

UI sophomores Caitlin Andersen, a chemical engineering major, said the workload can be difficult and worried her freshman peers about coping with stresses of college.

"I have a test in organic chemistry this week," she said, rolling her eyes. "I’ll say I’ve spent about 15 hours studying for it."

Andersen said she’s looked to the engineering student development center for the past for tutoring help and said she would consider attending the new workshops.

Academic Advising Workshops

The UI College of Engineering is hosting Academic Advising Workshops which include:

- Timing management 2 p.m.
- De-stress 12 p.m. on Sept. 30
- Where do I stand? 12 p.m. on Oct. 27

Keeping the creative fires burning

Nancy Westwig, the co-owner and operator of Fired Up Iowa City, provides fun, local activities for groups and friends at a unique, contemporary ceramics studio.

By AMY TIFFANY

As a child, Westwig and Burt created art in grade school. She was inspired to pursue art after seeing a ceramic studio in California, which she noted was unusual for that area, and decided to open a studio of her own in Iowa City.

Westwig and Burt opened Fired Up Iowa City, a retail and teaching ceramics studio, in 1997. They initially sold handmade bowls for the Domestic Violence Intervention Program’s annual fundraiser and soon realized the need for a ceramic studio in Iowa City.

Since then, Fired Up has become a popular destination for family, friends, and neighborhood children to engage in creative activities. The studio offers classes and events for various age groups and skill levels, making it a fun place for people of all ages to get together and paint.

The most common birthday parties consist of the typical workday: painting, firing, and picking up. The process can take around a week, depending on the size of the project.

Both Westwig and Burt enjoy the variety of activities they offer, including classes, workshops, and events. They also appreciate the opportunity to interact with people and see the finished products.

Westwig and Burt both have personal hobbies and continue to pursue their passion for art. They enjoy the satisfaction of seeing a job done and the gratification of creating something unique.

Westwig notes that computers cannot replace the joy of creating something tangible from scratch. She encourages people to take advantage of the creative opportunities that Fired Up Iowa City offers.

“Computers don’t do that.”

### Hampton out for the season

Running back Jewel Hampton suffered his second season-ending knee injury against Arizona on Sept. 18.

By SCOTT MILLER

The sophomore running back suffered a season-ending knee injury on Sept. 18 against Arizona. Head coach Kirk Ferentz confirmed the injury at a Tuesday press conference.

The prevailing theme: How do the Hawkeyes handle Hamp ton's injury?

Ferentz said he was caught in a state of disbelief. "I don't know how it happened," he said. "It's terrible. I don't even imagine what he's going through, what he's thinking."

And the bad news didn't stop there. Also announced was senior Pauk O'Meara, who had been the team's third-string running back, would miss Saturday's Ball State game with a concussion. Andrew Wegher's return to the team for personal reasons — a status that has gone unconfirmed since camp began this summer.

The 12-year head coach iterated Tuesday that Wegher's return to the team is "unrealistic" at this point.

---

### Life backstage with the ‘SportsNation’ folks

A first-person account of a day with Colin Cowherd, Michelle Beadle, and the ‘SportsNation’ crew.

Colin Cowherd doesn’t shake hands. At least he didn’t shake mine. After I got done interviewing the cohost of “SportsNation” about his take on Airliner pizza (positive), he gave me a fist bump. It seemed like an unconventional gesture, but maybe he saw me as more student than journalist.

Yet later, I saw Cowherd again fist-bump one of his producers. Somehow, I got the feeling this was a usual thing — just one of the many quirks of one of the quirkiest crews in sports gambling.

10:38 a.m. — The morning begins with a 10-minute interview with Michelle Beadle, the other cohost of “SportsNation.” Among other things, I learn the reason Big Ten campuses were chosen for the first-ever road trip for “SportsNation” ("It’s perfect, it’s fall, it’s football."). I tell her about our campus and how it’s a far walk and a one-hour bus ride to most classes from the West Side. And she says she’s grown fond of Pittsburgh’s mass-transit system.

1:30 p.m. — I have the chance to interview Cowherd for the first time. He’s taking a break between his morning radio show “The Herd,” and “SportsNation.” I asked about often having the label of a con man, someone who would make fun of him, he told me: “Whatever the public’s doing, I’m the opposite way. Because if the public knew what they were doing, they’d be sports gamblers.”

2:03 p.m. — Beadle and Cowherd are now on stage in Hubbard Park talking to the hundreds of fans who have shown up for the show Tuesday in Hubbard Park.
Spartans lose head coach

Michigan State is off to its best start since 2007, but is without its head coach for an extended period of time.

By MEGAN BERG

Michigan State head coach Patcit Lecky is out, recovering from surgery to repair a broken knee. The expectation is that he will return to the sidelines sometime this season.

Michigan State is 4-0 after beating the Spartans earlier this season. They are the only team in the conference that hasn't played in September or October.

The Spartans' nonconference schedule has included matches against teams from the Big Ten and the Pac-12. The team has had an easy schedule so far, but Lecky said he is excited to see what kind of team will emerge.

The Spartans' next match is scheduled for Oct. 12 against Northwestern. They are looking to extend their winning streak to 12 matches.

“We’ve very excited about the progress at this time,” Lecky said.

Not having a head coach for an extended period of time is something that the team is having to adjust to.

“Early in its weekly preparation, the Spartans’ nonconference schedule was changed due to injuries,” Lecky said.

Michigan State is off to its best start since 2007, but is without its head coach for an extended period of time.

The Spartans’ nonconference schedule was changed due to injuries, and he has been in the same position since October 2009.

Spartan football

Spartan football coach Mark Dantonio has been placed on administrative leave until further notice. He will be ready to go when he returns.

Spartan football head coach Mark Dantonio has been placed on administrative leave until further notice.

Dantonio is also the Ohio State head coach.

Aninternal investigation is being conducted into Dantonio's behavior.

The investigation comes after a series of sexual assault allegations against Dantonio were made public.

Dantonio said he will cooperate with the investigation.

Women's tennis has high hopes

The Hawkeyes hope to have even more success than last season.

The Iowa women's cross-country team rallies around the book Pulling Together: The 10 Rules for High-Performance Teams.

**The Rule: A Different Person’s Confidence**

By MAGGIE CUNNINGHAM

The first meet for the women's cross-country team started off at the Ashton Cross Country Course on Sept. 3.

“Each chapter has a different topic, like team work,” senior Lauren Hardesty said. “The book addresses different areas that we want our team to have, and we really try to focus each week on the new one.”

Senior Betsy Flood said, “The book’s aid here running.”

The book addresses different aspects that we want our team to have, and we really try to focus each week on the new one. The team gathered for the moment of silence Sunday before their game against Indianapolis and players will wear white decals with the No. 11 in navy on their helmets. Woodyard said he saw McKinley less than two weeks ago in the team cafeteria and saw him smiling as usual.

“Nothing that would alarm us to anything like this.”

Junior McKenzie Melander, who presented a chapter on teamwork, said the book is unique because, although it teaches on ideas that are obvious, it makes each person stop and think about the effect she has on the team.

“I think it develops a sense of trust among the team and coach,” junior Brynne Kiker said. “Knowing that our coach believes in us and is willing to do these extra things really helps us.”

Not only does the author bring the team closer, Kiker and other Hawkeyes pointed out that incorporating the book helps familiarizes freshmen who are just beginning their running career at Iowa.

“He’s been his usual smiling as usual. He left the door open for them to communicate and talk outside of practice.”

By ARNIE STAPLETON

Arapahoe County coroner Michael Dobersen said Tuesday that McKinley, 23, died of a gunshot wound to the head. He said a preliminary investigation “suggests the wound to be self-inflicted.”

The players decided to leave McKinley’s locker in place for the remainder of the season as a shrine to their teammate.

The team gathered Monday morning and met with grief counselors to help them deal with the death of their friend, who was an injured reserve after breaking his left knee in August and requiring surgery for the second time in eight months.

The players decided to leave McKinley’s locker in place for the remainder of the season as a shrine to their teammate.

Linebacker Wesley Woodyard said McKinley was his usual joking and jovial self in recent weeks, something his college teammates agreed with after he visited the South Carolina campus earlier this month.

McDaniel said the Broncos will observe a moment of silence Sunday before their game against Indianapolis and players will wear white decals with the No. 11 in navy on their helmets. Woodyard said he saw McKinley a week and a half ago when the receiver was retrieving some food and chips and said, "I didn’t have anymemories that are really negative about Kenny, because of the spirit he had.”

 Woodyard said he saw McKinley a week and a half ago when the receiver was retrieving some items from his locker at Dove Valley. They chatted as usual. "He had a big smile on his face. He just walked out of the building." Woodyard said, "That’s the last thing we remember, that huge smile."

Hampton, Iowa—The Arc of Southeast Iowa seeking career and part-time sales reps—The fun, part-time—The fun, part-time—A saying—Perhaps according to Rivals.com, have excellent vision.”

Coach [Chris] Doyle and [Beadle] when meeting [Rivals.com], “They have the next six matches against each other, and we have to compete and improve, which is an essential role.”

David has five tackles so far this season.

Parker still hospital

“I just have to mental—” Parker said. And “with a little bit more sleep and physical—” Parker said. “It’s basically all hands on deck—” Parker said. “But I am bombed” as part of the plan next small group’s season. He was a linebacker and special- turned up early and, while preparing the plan next season. He was a linebacker and special- turned up early and, while preparing

In tennis fall means work

Despite the fall tennis season not counting toward official records, members of the Iowa men’s tennis team use the time on the court in practice and conditioning to prepare for the spring season.

Iowa has four tournaments remaining in its fall schedule following last weekend’s opener at the College of Charleston. However, two of those tournaments are to be held near Iowa City, allowing the Hawkeyes to stay at home for practice and conditioning.

The Hawkeyes enter this stretch of time, both in the form of tournaments and practice, as vital for every- one on the squad, great or parity on the Iowa roster.

“They have the next six matches against each other and we have to compete and improve, which is an essential role.”

In addition to weekend competition, the Hawkeyes have strength and depth in that they have players throughout the course of the week as normal Tuesday through Friday and in the mornings, and practices on the after- noon. Houghton gives his players an extra day solution for players, junior Austen Kauss, Vasos, and pretty much tell them “You have to be the Hawkeyes’ lone back, carrying the ball 24 times for 109 yards and improve, which is an essential role.”

Frank Ferentz said a more

ARIES has to learn there will be plenty of temptations. Jumping into something without a lot of thought at all will cost you financially and emotionally. Instead, take your time and think before you act. Your awareness of what you have to offer is your best weapon.

TAURUS has to learn that good fortune is coming to you through the people you meet. When you meet someone who is enthusiastic about your work or your abilities, your network will make you happy. Remember to give back to your network whenever you can.

GEMS has to learn that it is important to show up at your best. Your past is behind you and you can start again. You will find that things start to settle down when you start looking at the skies. This is the time to aim for better things.

CANCER has to learn how to be a better listener. You have been working on something that is important and you need someone to listen. When this is done, you will do better.

LEO has to learn that you have more going for you than you realize. Use your natural talents and remember that you are a leader. When you're working on something new, be present and promote, and you will get the results you are looking for.

SAGITTARIUS has to learn how to be a better listener. You have a lot to offer, but you need someone to listen to you. This is the time to ask for help and to listen to what they have to say.

CAPRICORN has to learn that you cannot do it alone. You need the support of others to make what you want happen. Start to work on some of your ideas with those who can help you.

SCORPIO has to learn that you have more going for you than you realize. Use your natural talents and remember that you are a leader. When you're working on something new, be present and promote, and you will get the results you are looking for.

LEO has to learn that you have more going for you than you realize. Use your natural talents and remember that you are a leader. When you're working on something new, be present and promote, and you will get the results you are looking for.

SAGITTARIUS has to learn how to be a better listener. You have a lot to offer, but you need someone to listen to you. This is the time to ask for help and to listen to what they have to say.

CAPRICORN has to learn that you cannot do it alone. You need the support of others to make what you want happen. Start to work on some of your ideas with those who can help you.

SCORPIO has to learn that you have more going for you than you realize. Use your natural talents and remember that you are a leader. When you're working on something new, be present and promote, and you will get the results you are looking for.

SAGITTARIUS has to learn how to be a better listener. You have a lot to offer, but you need someone to listen to you. This is the time to ask for help and to listen to what they have to say.
