Novices having a ballroom learning moves

Students are wafting their way to the University of Iowa's new club, that teaches professional ballroom instructors from Dance for him to step out of his comfort zone. He caught doing something like dance in high school. “It is a very helpful way to give back to the community, blow off some steam, and enjoy yourself,” he said. Hofmeyer instructs participants in such styles as the fox trot, swing, meringue, foxtrot, tango, and cha-cha. He has more than 15 years of experience and has danced in national collegiate competitions in the past, and he hopes to bring in professional ballroom instructors from Dance New York in Cedar Rapids to teach lessons. Professionalism and diversity are two words that Hofmeyer uses to describe the club. He said members learn lifelong dance skills.

By ARIANA WITT

UI law student John Hofmeyer instructs members of the Hawkeye Ballroom Club how to dance the tango at the Knights of Columbus on Monday. Hofmeyer formed the club this year to provide ballroom-dance lessons to those without experience.

Hawkeye Ballroom Dance Lessons
What: 5 p.m. Mondays
Where: Knights of Columbus 842, 4776 American Legion Road
Admission: $5 weekly

UI 6th in Trojan ranking

Rankings are based on several factors, including student-health clinics and on-campus STD testing.

By MADISON BENNETT

The University of Iowa campus may be becoming more sexually healthy. In Trojan condoms 2010 Sexual Health Report Card, the UI placed sixth out of more than 100 schools ranked — a 25-spot jump from last year. The report — which ranked 141 schools and took roughly three months to compile — is based on availability of sexual-health student peer groups, on-campus sexually transmitted disease testing available, and hours of operation for student-health clinics, among other factors.

Columbia University, Michigan State University, and Ohio State University were the top three schools, and DePaul University, Brigham Young University, and the University of Rhode Island were listed as schools with the worst sexual awareness. The creation of “dark aliens,” which gave student the option to submit sexual-health information anonymously online, catapulted Columbia to the No. 1 spot.

Overall, both UI officials and students said they are pleased with the ranking. “Our priority is the health and safety of students,” UI spokesman Tom Moore said. “And students have noticed the university’s efforts to increase sexual awareness around campus.”

“Part of being a center is being concerned with the health of the students,” Nelson said. “With this population, sexual health is an important aspect of that.”

Math scrambled to find new instructors

The UI mathematics department hired three new instructors and 15 new teaching assistants this fall.

By ARIANA WITT

Teaching assistant Samuel Ferguson began his lecture with enthusiasm, hoping across the room to complete an equation in the first course with the University of Iowa mathematics department.

“The zeros are the Xs that make the fraction equal to zero,” he explained to his 30 students.

Ferguson is one of 15 new teaching assistants hired by the mathematics department this semester and one of roughly 75 employed by the department, said Professor Don Anderson, the department’s director of graduate studies.

Anderson worries that number will increase next semester because of the large number of new engineering students. The College of Engineering saw a 30 percent increase in its incoming class this fall.

UI Associate Provost for Faculty Tom Rice said the mathematics department saw one of the largest increases in temporary fac-

Retention fight casts cloud
Some are worried the move could force policies into the judicial system.

By MARLEY BROOKS

As Election Day approaches, a cloud of uncertainty hangs over the political climate in the state, as more than three out of four voters who have registered to vote said they might decide to vote at the last minute.

While a few dozen residents in Meadville, Pa., voted on a new amendment to the state constitution to hold a new political action committee to support the lifeline for Pennsylvania, others in the area are still uncertain about the overall political climate.

State Attorney General John M. Wolfe has said it is likely to be too early to determine the overall impact of the PAC, which was organized by a Republican state senator and several large corporations.

The committee is to hold a public hearing on the amendment in the 19th Assembly District in York County.

The amendment would require that candidates for the state supreme court not be on the ballot if they have not held office for at least two years, and that candidates for the state executive office have held office for at least four years.

"We think it's wise to have a conference with our judges and try to make the best decision possible," Wolfe said. "They might not agree on a conference, but we'll get their opinions on how to judge the case."

As for the new amendment, "I think it's wise to have a conference with our judges and try to make the best decision possible," Wolfe said. "They might not agree on a conference, but we'll get their opinions on how to judge the case."

"It is important that we continue to hold conferences with judges and try to make the best decision possible," Wolfe said. "They might not agree on a conference, but we'll get their opinions on how to judge the case."

"If we do not have a conference, we will allow them to vote on whether to continue with the elections," Wolfe said. "In the event of electing judges, none of the judges will vote, and all will be removed by a majority of the 12 judges, according to the new amendment."

President Obama to boost community colleges
Local community colleges could see a boost, one official says.

By MARIA UMBER

President Obama will announce a plan today to support community colleges, which could help in efforts to improve the educational attainment of American adults.

House will vote to approve an omnibus educational bill that includes provisions to boost community college funding.

The bill includes provisions to boost community college funding and to increase federal support for education.

House leaders said the omnibus educational bill includes $10 billion in new funding for community colleges.

The bill also provides $2 billion in new funding for community colleges for the fiscal year that begins on July 1, according to House Majority Whip Steny Hoyer of Maryland.

The omnibus bill includes provisions to boost community college funding and to increase federal support for education.

"The bill will provide the funding and support that our community colleges need to educate our workforce and prepare our students for success in the 21st century," Hoyer said.

Community colleges are a good bargain for students, with lower tuition costs and more flexible online education options.

"At the same time, we must continue to support our community colleges because they provide a gateway to good-paying jobs," Hoyer said.

"At the same time, we must continue to support our community colleges because they provide a gateway to good-paying jobs," Hoyer said.
FACULTY CONTINUED FROM 3

and the department's many introductory and general-education courses, offered to students across many majors.

The semester, which was the temporary workforce increased by more than 200 compared with last year's numbers. Rice said he feels hiring adjuncts and teaching assistants, who are actively doing fieldwork, can be beneficial to students because they have field experience and they can focus on teaching, rather than splitting their time with research. Rice also said students seem to have mixed reactions to the increase in temporary faculty.

The 20 of 35 students asked how they view the increased temporary faculty, 12 said they would rather be taught by permanent faculty.

"I prefer my professors because they're more in-depth with the work, and that makes things easier to understand," said UF freshman Jacob Lord, a student in Ferguson's class.

UF sophomore Luke Ziemer said he encouraged his schedule this semester so he would have more professors, because he said he feels professors are more likely to delve deeper into the material.

And at least one expert agrees. Scott Carroll, an assistant economics professor at the University of California, has conducted research that suggests those taught by temporary faculty do worse in more involved classes later on. His research has focused on math, chemistry, and physics.

Anderson said the math TA would have gone through two evaluations already this semester, and they will be evaluated once more before the end of the semester.

TROJAN CONTINUED FROM 1

Karla Miller, the Rape Victim Advocacy Program executive director, agreed. "I think Health, Iowa does a really good job at admitting students, the UI health, including sexual health," she said.

Bert Sporken, the president of Sporken's Beat Places—which conducted the report for the group—said, "This is a bit under what the UI did and what other schools improved on.

The firm conducts independent research that suggests the temporary faculty make things easier to increase in temporary faculty, and they would rather be taught by permanent faculty.

Editorial

FDA should regulate alcoholic products that contain caffeine

Urban Dictionary offers this succinct definition of the caffeinated alcohol drink Four Loko: "InebriatedNess in a can."

Steve Schultz, an emergency-room registered nurse in Iowa City, said sales of such beverages at local bars and Clasics, the beverage "can have cardioacological effects." Schultz said that Four Loko's packaging "can use "cause can heart stress over time. It can also trigger life-threatening medical situations."

In a July editorial, the Board of Regents for Iowa's public universities said that "the lack of regulation of beer is a problem that needs to be addressed."

Recently, alcohol manufacturers have been heavily interested in the Iowa judicial system. This is because the Iowa Alcohol and Beverage Division has the authority to regulate the sale of these beverages. The division has the power to suspend or revoke licenses of individuals or businesses that violate the terms of their licenses.

Though dangerous and highly intoxicating, these products are rarely banned under local or state laws. The FDA should limit the amount of caffeine in these small cans in small amounts. It is also important to regulate the sale of these beverages.

The Iowa Attorney General Tom Miller, with other state attorneys general, recently wrote to the FDA, asking the agency to have the drink and similar products altered.

While outright prohibition of alcoholic beverages is a matter of public debate, the manufacture and sale of these beverages should be regulated. The FDA should limit the amount of caffeine in these products.

To any '60s and '70s rock-lovers out there: Be ready to rejoice when Steeple is played through your computer or, even more appropriately for the sound of the album, through a dusty boom box on your back porch.

Wolf People, the rock band from Britain, will release its first album, Steeple, with Jagjaguwar Records on Oct. 12. In February, the band released the much softer-sounding Tidings, a compilation of 15 singles put together by the band's lead vocalist, Jack Sharp. The collection is merely a taste test of Wolf People's overall sound, showcasing only a few of the band's late-'60s, early-'70s influences.

These Grateful Dead-esque influences are clearly present in Steeple, with tracks like "Banks of Sweet Dundee Pt. 1" and "Morning Born." All echo the far-out sounds of this rock 'n' roll band with soft trailing lyrics and heavy musical tones.

The album is highly centered on the instrumentation, with many long guitar riffs throughout the nine songs that are often accompanied by light drumming and the sounds of a tambourine. Completely real of lyrics, "Cromlech" highlights the band's harmonious musical talents, including two guitarists, one bassist, and a drummer. The song starts of rather chaotically — similar to the end of a guitar solo — and builds up to a more cohesive ending. The songs blend together so well that it is difficult to tell when one song ends and a new one begins.

Usually, only the introduction of a new instrument is the only indication of a change in song. It is evident that the four band members like to jam, especially the drummer, Tom Watt, with his steady thumping rhythm present in all of the songs. The crisp clash of the cymbals are also apparent throughout the album, adding to the rich background sound.

The addition of the flute in the song "Tiny Circle" brings a surprising quirkiness to the tune and also serves to make it the most upbeat track of the album. "Tiny Circle" emphasizes the band's common pattern throughout its songs — extensive and fast-paced instrumental jams that lead into short spurts of gentle sounds.

During the rare lyrical moments throughout the album, Sharp's high-pitched voice accent the ends of words, often holding onto them until he has no more air to keep them up. His voice is also nasal at times, sounding a bit like the voice of Fran Healy, the lead vocalist of the alternative rock band Travis. This is especially noticeable in the song "Silbury Sands." Steeple sounds as if it were recorded 40 years ago, like something that would have been played in Eric Foreman's basement on "That '70s Show."

Overall, Steeple is sure to be a hit with nostalgic '70s rock fans. Those who play this album will be taken back to another era; an era of bell-bottoms, boom boxes, and real rock 'n' roll.

British rock band Wolf People will release its début album, Steeple, on Oct. 12. The band's sound harks back to the glory days of 70s rock.
Kevin Ayers of the Java House will soon take his coffee skills to Paris to work at a café.

By IAN SMITH

Kevin Ayers of the Java House will soon take his coffee skills to Paris to work at a café.

The fine art of being a top barista

Kevin Ayers
Age: 29
Hometown: Dubuque
Favorite hockey team: Blackhawks
Favorite coffee drink: cappuccino
Favorite website: baristaexchange.com
Email: kmayers@uiowa.edu

Ayers has worked at Java House in Iowa City for six years. But at the end of October, he’ll take his coffee skills across the globe to Paris, where he’ll be a barista in a bohemian café.

The owners of the soon-to-be-open café — one of whom won reader of the year in Australia — were looking for global influence. Ayers found the opportunity on a social networking website for coffee aficionados called baristaexchange.com, which he referred to as “the Facebook for the coffee geeks.”

“At this point, it’s a tremendous experience,” he said. “Eventually, the goal would be to own my own place.”

Ayers said he’s been working since age 13 to achieve his goal. He started learning how to make espresso, followed by a cappuccino, and ended with a signature drink. For Ayers’ signature drink, he made a variation of the Java House’s raspberry white truffle, with gourmet white chocolate and homemade raspberry sauce.

“It’s really really nerve-racking, people are getting really intense now,” he said. “They are going out there with burners and making reduction sauces.”

And at these competitions, he said, “You do more than just make the coffee.”

“Really amazing latte art,” said Nicole Millard, who works at another barista, Nicole Millard said “It’s going to be hard [after he leaves].” Kevin’s like that 24-hour-a-day person. If something goes wrong, you can give him a call, so it’s a little nerve-racking imagining him being gone.”

Other employees also said Ayers was a good addition to Java House.

“He really helps you learn and is excited about coffee in a way that make you excited and is excited about coffee in a way that really matters,” Millard said. “He’s really funny,” she said.

He’s really funny,” she said. “Kevin’s very intense, he’s very passionate about all aspects, he’s super knowledgeable,” Millard said. “It’s going to be hard [after he leaves].” Kevin’s like that 24-hour-a-day person. If something goes wrong, you can give him a call, so it’s a little nerve-racking imagining him being gone.”

Other employees also said Ayers was a good addition to Java House.

“Very fun,” said Ayers’ friend of four years at Java House. “He’s really a great person. I’m kind of sad to see him go,” she said. Ayers also met his girlfriend here. She moved to Paris, where he’ll be a barista, and he has used Rosetta Stone to work on his French skills.

**Daily Break**

**Into the Wood**

---

**Horoscopes**

**Tuesday, Oct. 5, 2010**

**Aries**

Being honest and dealing with people in charge will be difficult. 

**Taurus**

You’ll be able to lean on someone who does the same for you. The confident people you have supported will now support you in return. 

**Gemini**

You will get up and go moving on in a high gear. 

**Cancer**

A major show will be in the works, so don’t worry that someone you are crucial to is放下. A good friend comes to the party. 

**Leo**

You won’t be happy unless you’ve got a good solid plan. 

**Virgo**

A project you’ve been working on is on the verge of becoming a reality. 

**Libra**

An emphasis on the financial will be the focus. 

**Scorpio**

Watch out for a hasty action that could backfire this week. 

**Sagittarius**

The more you don’t do, the more you will be frustrated. 

**Capricorn**

Attention to plans or projects that are too big can be overwhelming. 

**Aquarius**

Taking a hasty action that could backfire this week. 

**Pisces**

An emphasis on the financial will be the focus.

**Horticulture**

**Wednesday, Oct. 6, 2010**

**Aries**

Being honest and dealing with people in charge will be difficult. 

**Taurus**

You’ll be able to lean on someone who does the same for you. The confident people you have supported will now support you in return. 

**Gemini**

You will get up and go moving on in a high gear. 

**Cancer**

A major show will be in the works, so don’t worry that someone you are crucial to is放下. A good friend comes to the party. 

**Leo**

You won’t be happy unless you’ve got a good solid plan. 

**Virgo**

A project you’ve been working on is on the verge of becoming a reality. 

**Libra**

An emphasis on the financial will be the focus. 

**Scorpio**

Watch out for a hasty action that could backfire this week. 

**Sagittarius**

The more you don’t do, the more you will be frustrated. 

**Capricorn**

Attention to plans or projects that are too big can be overwhelming. 

**Aquarius**

Taking a hasty action that could backfire this week. 

**Pisces**

An emphasis on the financial will be the focus.

James Equipe works on a pedicular project for her wood project class on Wednesday. The class combines three projects: a pedastile, a frame, and a slab-test structure. Students are given five role over the three projects.
New V-ball sits well

Sons of Thunder takes the first intramural sit-volleyball championship.

By SHANE CARNEY

Good things come in small packages, and that is exactly what sit-volleyball is. Though small in stature, the game can be quite beneficial to those who have disabilities. Intramural sports - Sit-Volleyball is a Paralympic sport and is recognized by the U.S. Olympic Committee.

Sons of Thunder plays an intramural sit-volleyball game against the Sons of Thunder Co-Rec team in the Field House on Monday. This is the newest intramural sport. It was introduced into the competition in the spring.

“What we are trying to do is create more opportunities for those who have disabilities,” said Jon DeYarman, intramural director. “It’s not a huge package, but it can be a huge impact for those individuals who want to participate.”

The game played was the first set, featuring a high school-style match. The goal is to get to 21 points, while only losing by two. The game is considered over if the server loses. The championship was also held in the Field House on Monday.

Intramurals are an opportunity for those who work with people who have disabilities and want to get some exercise, DeYarman said. “It’s a great way for us to accommodate,” he added. “With the UI and recreational services, we have several events. It’s a great opportunity for everyone to participate.”

The competition started, it was a ton of fun and enjoyable for everyone involved. The game was played convincingly in the first set, 23-20. The championship was held in the Field House on Monday.

DeYarman said that after the first set, plans for the future were discussed. “We are looking into holding more events,” he said.

Twin's Morneau out for all postseason

By DAVE CAMPBELL

MINNEAPOLIS — For the second straight year, the Minnesota Twins will play the postseason without Justin Morneau.

The 2008 AL MVP hasn't played since July 7 because of post-concussion symptoms stemming from an in-season injury in that July 12 game during a slide into second base at Toronto. Morneau has since begun to improve and hasn't had any symptoms stemming from the post-concussion syndrome.

Morneau, who leads the Twins in runs and RBIs, has been神気手 at Toronto.

"That's where the Twins are at right now, so it's really too bad for us," Smith said.

"I don't think he'll be playing too much," Smith said.

Northwestern

The Northwestern Wildcats are not a team that is particularly impressive on offense or defense, according to Morneau. The Wildcats are a team that is not well known on the national stage, but they have proven themselves to be a formidable opponent in recent years, particularly in their conference games.

Northwestern's tough, never-say-die attitude is led by fiery quarterback Dan Persa, who is the nation's most accurate quarterback, completing 73.9 percent of his passes. He is also the third-most efficient quarterback in the country. The junior was 18 for 22 with 189 yards and a touchdown in the Wildcats' 24-7 win over Ohio State on Saturday.

"To get him ready to play for the start of spring training, he will also have workouts for the next two weeks, then slowly ramp them up again in his preparation for the 2011 season," Smith said.

Northwestern has also played the postseason in the past, but did not make it to the World Series. But Smith said, "That's kind of what we made risk is that in the potential for this to carry on for a long time, and I think definitely what we're trying to avoid." It's also possible that the Twins were coming from, too.

"I think you understand it's the right decision for his health and for his long-term career," Smith said.

Which surprising undefeated Big Ten team will finish the highest in the final standings?

Nash stresses working hard

By MATT COZZI

Iowa's lead singles player entered his fourth season as the team's tennis assistant coach last fall and earned a promotion to tennis recruiting coordinator this year. He'll continue to direct the team's recruiting efforts.

Nash, one of the strongest singles players in the program's history, was named to the All-Big Ten team his senior year and helped guide the Hawkeyes to a share of the Big Ten title.

While Nash has taken over recruiting, he still contributes on the court. He's improved his doubles play and his commitment to the program.

“We're very happy to have him,” head coach Steve Nash said. “He's a fantastic player and a great recruiter. He's one of those guys that could have been a tennis coach for a long time.”

Nash has come a long way in his new role. He has handled it well.

“Not so much the administrative stuff,” Nash said. “Our vision and what the team is all about. I'm really enjoying being around the program.”

“His intensity is always at the line, as long as they understand the vision and what the team is all about.”

While Nash has handled the transition well, there are some unknown quantities.

“I want them to become more vocal in practice. They need to look to qualify in the main draw. That's where the recruiting comes in and it allows better players to move to the university as well. Nash will begin play at 2:30 p.m. today. Shell face Alabama's Courtney McLean, who is ranked No. 80. He is looking forward to the match and to see the way the program and the team is all about.”

“His intensity is always at the line, as long as they understand the vision and what the team is all about.”

While Nash has handled the transition well, there are some unknown quantities.

“Just being on the court I think he's done a great job with us.”

“While Molnar doesn't usually have goals with teams or coaches, Dougherty appreciated and valued each of Nash's contributions to his program.

“Nash has come a long way in his new role. He has handled it well.”

“Not so much the administrative stuff,” Nash said. “Our vision and what the team is all about. I'm really enjoying being around the program.”

“His intensity is always at the line, as long as they understand the vision and what the team is all about.”
Report card: Hawkeye midterms

Iowa has arrived at its bye week with a 4-1 record. With midterms beginning to pile up for UI students, it's time to see how the Hawkeyes come out on their report card.

Clayborn honored

Iowa's senior defensive end has returned a punt for a touchdown against Penn State. He was named Defensive Player of the Week after he blocked and returned a punt for a touchdown in the Hawkeyes' season-opening win against Eastern Illinois. clayborn has 25 total tackles through five games this season, 4.5 of which have been for negative yardage.

Defensive line

The D-line was touted as the nation's best this season, and nothing has changed. The emergence of Mike Daniels gave the Hawkeyes five top-tier linemen who have helped Iowa to the second-best rushing defense in the country.

Linbackers

Linebacker Christian Smith was honored this week. He leads the Hawkeyes in tackles with 52, second to teammate ... 4-3 system.

Quarterbacks

Nike St. Brown is sixth in the nation in passing efficiency and also boasts a nearly 70 percent completion rate. After the first five games last season, radiant had just two this year.

Running backs

The Hawkeyes started off with a three-headed monster at running back. Only one true tailback, but Adam Robinson, has produced for Iowa. He sets ESM in the country with 486 yards...}

The Big Ten's top-ranked defense has returned a punt for a touchdown against Penn State. Iowa head men's basketball coach landed the second commitment of his 2011 recruiting class Monday. McCaffery snags another top-20 recruit...
