A group of National Guard soldiers from eastern Iowa returned from overseas on Monday. The troops were part of the Iowa National Guard’s largest deployment since World War II. Soldiers will have three months before they return to training.

Loebsack announces hospital funding
U.S. Rep. Dave Loebsack, D-Iowa, announced Monday the Centers for Medicare and Medicaid will give nearly $54 million in additional funding to five Iowa hospitals’ 2nd Congressional District, according to a press release. Mercy Hospital and the University of Iowa Hospital and Clinics received payments of $509,898 and almost $2.4 million, respectively. Mercy Medical Center and St. Luke’s Hospital in Cedar Rapids and Unity Hospital in Muscatine also received funding.

The money is part of the Affordable Care Act, which President Obama signed into law last year, and it comes as a reward to Iowa hospitals for providing high-quality, inpatient care. It is designed to focus on the geographic disparities that face many hospitals in Iowa.

“This payment is an important step in starting to shift on the quality and technology of care to one in which healthcare providers are rewarded for making patients healthier as opposed to the number of tests and procedures they order,” Loebsack said in the release.

Twenty-one hospitals received additional Medicare funding across the state.

And the heat goes on

‘The darker yellow it is, the more water you should be drinking’

By BRIAN ALBERT

A stifling heat wave blanketed Iowa City on Monday, causing residents to shed warm clothing and seek shade.

Air temperatures escalated to 98 degrees, and humidity pushed the heat index up to 105. And, said Dea Sheets, a meteorologist with the National Weather Service in the Quad Cities, local residents can expect those temperatures to persist into late Thursday.

“We’re not quite into record high temperatures for the week, but it’s close,” he said. “It will be quite hot in the following days, so use your air conditioners. Stay home. Drink a lot of water.”

Some locals, however, are choosing not to heed his advice.

Bake Hopkins, a 27-year-old Iowa City restaurant worker, juggled along the Pentacrest Monday afternoon. He said heat exhaustion can occur “if you’re not drinking enough water.”

“It’s insanely hot today, but you can’t let that stop you inside,” he said. “Before you know it, there will be so much smoke on the ground.”

Attached to his back was a 25-pound hiking backpack filled with water. Stephens removed the bag, holding it up and down.

“You can’t fail to run in this weather without a ton of water,” he said, wiping his forehead with a cloth.

Patricia Quinlisk, the medical director of the Iowa Department of Public Health, said heat exhaustion can occur suddenly, and there are a few things people can do to avoid health problems.

As governor of Minnesota, Tim Pawlenty drove the economy into a ditch, Iowa Demo- cratic Party ChairmanogpSue Dvorsky said during a press conference Monday morning. “The reality in this race for Tim Pawlenty includes the $6.2 billion public he left his successor in ill.”

Former Minnesota Gov. Arne Carlson, a Republican, and the Pawlenty administration used accounting tricks to put together what looked like a balanced budget when a budget gap still existed.

“The Province moved to the right, he adapted

Profs react to Gartner

The UI has closed 13 graduate degrees since 2009.

By LUKE VOELZ

Former Regent Michael Gartner wants the Board of Regents to consider changes in the classroom, but University of Iowa faculty say they’re working more toward that goal than the former board of Regents president thinks.

In a Sunday Des Moines Register opinion piece, Gartner said full-time UI faculty spend one-third of their work hours in teaching activities, passing too many courses onto graduate assistants and adjuncts.

“The teaching load — six hours or fewer of classroom teaching per week up to nine hours at (the University of Northern Iowa) —

Editorial
Raise Iowa Gateway to 500-year level, Congress says

Across eastern Iowa, the damage from the 2008 flood was still felt this week. The memories of the attività and the clean up operations are still fresh in the minds of the residents. The Iowa City and Johnson County officials are working hard to prevent such a disaster from happening in the future. One of the main goals is to raise the Iowa Gateway to a 500-year level.

The bridge is a crucial choke-point for the river when it floods. The 2008 flood, along with debris, stayed under the bridge causing the floodwaters to rise. After the flood, the backwater at the Park Road bridge was still stuck under the bridge, causing the floodwaters to rise when it floods. During the 2008 flood, logs and debris were trapped under the bridge and had to be removed to prevent further flooding. When the logs were removed, the floodwaters continued to rise. The continued town-hall meetings and open forums on the subject are laudable, and the continued town-hall meetings are important. It's important for residents to remain involved with their local officials; the Taft Speedway project is controversial, and the residents of the area need to be heard.

In response to published comments about transparency being a big-name issue since President Obama took office, some people argue that the White House's pledge to be transparent is absolutely ridiculous. I think all big-name issues need to be addressed, and one of those issues is solving the budget deficit. The United States' national debt is over $20 trillion, and the deficit is still increasing. The government needs to find a way to balance the budget and reduce the national debt.

Guest Opinion
Accountability, transparency go hand-in-hand

Transparency has been a big-name issue since President Obama took office, and it is still an issue today. We have heard the most about transparency being applied to financial transactions, but there is another important aspect of transparency that needs to be addressed:

Accountability. We live in a world where the federal level of government is expected to be accountable to the citizens. The government has the responsibility to provide services to the citizens, and the citizens have the right to know how their tax money is being spent. One of the main goals of transparency is to ensure that the government is being held accountable for its actions. This is important because the government is expected to provide services to the citizens, and the citizens have the right to know how their tax money is being spent.

Accountability and transparency go hand-in-hand. Without accountability, transparency cannot be achieved. And without transparency, accountability is impossible. The government needs to be transparent, and the citizens need to be accountable. The government needs to be transparent in its actions, and the citizens need to be accountable for their actions.

Accountability and transparency are the two sides of the same coin. If the government is not being held accountable, it cannot be transparent. And if the government is not being transparent, it cannot be held accountable. Accountability and transparency are essential for a functioning democracy. Without accountability and transparency, the government cannot be trusted, and the citizens cannot be held accountable for their actions.

The government needs to be transparent, and the citizens need to be accountable. The government needs to be transparent in its actions, and the citizens need to be accountable for their actions. Accountability and transparency are the two sides of the same coin. If the government is not being held accountable, it cannot be transparent. And if the government is not being transparent, it cannot be held accountable. Accountability and transparency are essential for a functioning democracy. Without accountability and transparency, the government cannot be trusted, and the citizens cannot be held accountable for their actions.

The government needs to be transparent, and the citizens need to be accountable. The government needs to be transparent in its actions, and the citizens need to be accountable for their actions. ## Animal shelter offers pet deals

A half-off promotion to try to relieve overcrowding will run through July 31.

**By ZACHARY FOUNTAIN**

Expect for a home, one gray kitten slid its paw through the bars of its cage Monday afternoon, as its eyes glamoured in the fluorescent lighting of the Iowa City Animal Care and Adoption Center.

And with the current overcrowding at the temporary facility, 4622 Sand Road S.E., one could see that man has not been animal’s best friend.

This summer, the Animal Shelter has seen a large increase in animals being brought in, which Misha Goodman, the director of the shelter, attributed to Iowa City’s growing population and people moving.

“Because of overcrowding, the shelter is selling pets who are more than 1 year old for half the normal price.”

“It’s unfortunate that it has to happen, but people have to move and might not be able to take their pets with them or their new place just isn’t big enough,” Goodman said.

Lori Henning 47, a resident of Coralville, visited the shelter with her daughter to socialize with the animals Monday afternoon.

“Goodman told me that we have three cats, and we're looking at the animals,” said Henning. “We love them very much, and they have been terrific pets.”

The current shelter has reached maximum capacity with 90 cats and 28 dogs. There are also 25 cats in foster care, in which people are able to take the cats home and look after them until a permanent home is found for them.

Goodman said the center’s current budget is $675,000 a year, and it costs around $15 to house an animal per day.

“The price of buying a cat ranges between $65 to $85 and dogs go between $215 to $250. This price includes feeding, socializing, and maintaining the animals, which have been spayed or neutered, vaccinated, and microchipped.”

There is no time limit for how long the animals are kept at the shelter. The length of stay is usually based on their health, but it can be affected if the animals are deemed being adopted at a faster rate than they are coming in.

“We do not ‘hold’ the animals, but instead provide the necessary space for them until we can find a home for them,” Goodman said. “And with the overcrowding, we will have more people in these summer months coming in and looking at the animals,” said Tobiason, who helps with feeding, socializing, and maintaining the animals during their stay in foster care.

Some Popular Degrees at the University of Iowa:

• B.S. in Accounting: Real value. Don’t forget to come back for the new improved introduction, or vice-versa.

• B.S. in Business: Your future is in the hands of someone who used to give you all your candy and then took it back. The Ped Mall afterthought is designed to commodify and commercialize with a master’s-level education in psychology AND sociology.

• Master’s in Avoiding Slutpery: Your only hope of mastering a changeable market. You will have peace of mind knowing your new, improved formal education will fit anywhere in any set of facts.

• Master’s in Avoiding Professional Relations: How to have sex with someone who has big, baggy pants and call money made on your head.

• Master’s in Evolution: Same degree, and really, you have more sex. This is not your chance to be "always happy to be sexy," just a hundred miles on the problem scale. Deal with your mouth appropriately with "Is this the goal if you have to clear your brain and bring it, a selfish from Iowa history?"

• Master’s in Relationship Communication: Admit it, you only did decide to concentrate in this area because of your many failed past relationships. You’ll now have a chance to go through this, and you’ll also probably have a better time with a man or wife age 27.

• Bachelor of Fine Arts: You can make wise money moves if you invest in personal life. Don’t wait until you are forced to make a move. An innovative approach to making money will pay off. You can make wise money moves if you invest in your personal life. Don’t wait until you are forced to make a move. An innovative approach to making money will pay off.

Local troops return

The company will have three months off before resuming its usual duties of weekend training.

By CHASTITY DILLARD

Steven Moore, along with approximately 110 members of the Bravo Company, is finally home after nearly a year of service in Afghanistan. Family and friends circled around the young soldier and his fiancée with big, bright smiles and tears of joy.

“It’s just good to be back,” said the University of Iowa alum, hugging his fiancée of a year. “Everything looks familiar again. I get to see my family again.”

Company B of the First Battalion, 133rd Infantry, 2nd Brigade Combat Team, 34th Infantry Division, also known as the Bravo Company, was part of the largest deployment for Iowa National Guard soldiers since World War II.

The Iowa City-based National Guard troops — part of the biggest deployment of Iowa National Guard personnel since World War II — were the guests of honor at a homecoming ceremony Monday at the Coralville Marriott Hotel and Conference Center, 214 W. Ninth St. Hundreds reunited with loved ones after the soldiers were formally dismissed. Soldiers were grabbed up in hugs and kisses, and cameras captured the moment.

UI Registrar Larry Lockwood, who works with student veterans, said the office is preparing for the numerous homecomings that will take place during July and August.

“We are looking forward for our students to come back,” he said. “So that they can get their life back together.”

While officials expect 45 students to return this fall, Lockwood said for some soldiers, it’ll be too soon to return to school.

“This is a pretty severe change of a lifestyle,” he said. “Sometimes all that freedom isn’t beneficial for the soldier.”

Teary-eyed but with a smile, Moore’s mother, Anita Moore, joined family and friends in welcoming her son back.

“Take all the good words and put them together, because that’s what this day is,” she said.

Having experienced his first deployment, Steven Moore said he’s glad he made the decision to enlist in 2004. And his fiancée, Jessica Saurman, is also very happy to have him back.

“It’s awesome,” said Saurman, who dated Moore for more than four years.

“Looks like we’re going to get to have a normal life again,” she said.

Many of his supporters wore black T-shirts decorated with a bright red bull on the back — a common theme throughout the hall because the division is known as the Red Bulls.

A member of Bravo Company is welcomed home with a kiss from his daughter on Monday in the Coralville Marriott. The company was part of the largest deployment of Iowa National Guard soldiers since World War II.

FAMILY members pose for pictures with their returning soldiers on Monday. The soldiers were members of Bravo Company.
For GOP, pledge season

By Nancy Denic

WASHINGTON

Republican presidential<br>nomination<b> </b>contenders<b> </b>may<b> </b>be<b> </b>finding<b> </b>meaning<b> </b>in<b> </b>the<b> </b>days<b> </b>for<b> </b>a<b> </b>candidate<b> </b>to<b> </b>put<b> </b>just<b> </b>one<b> </b>pledge<b> </b>on<b> </b>the<b> </b>nail.<b> </b>

With pledges spilling<b> </b>like<br>kinda on the campaign<br>trail, candidates this<br>year<b> </b>are<b> </b>being asked<b> </b>—<b> </b>in<br>some<b> </b>cases,<b> </b>pressured —<b> </b>to<br>proselytize<b> </b>their<br>faulty to a whole<br>host of positions:<b> </b>supporting<a> </a>marriage,<b> </b>opposing tax increases,<b> </b>reducing<b> </b>the<br>deficit,<b> </b>fighting abortion and<br>gay rights, and more.<b> </b>

And those aren’t just<br>empty<a> </a>staples<b> </b>of<b> </b>support for<br>broad issues.<b> </b>

There’s a 14-point “mar-<br>riage”<b> </b>in<b> </b>a<br>three-pronged<br>“cut, cap, and balance”<b> </b>de-<b>claration</b><b> </b>on<b> </b>the<br>national<b> </b>level,<b> </b>a<b> </b>four-pro<em> </em>“life, liberty, and pursuit of happiness”<b> </b>pro-<b>clama-</b>tion<b> </b>in<b> </b>a<b> </b>four-<b>point</b> “pro-life”<b> </b>pledge,<b> </b>and<b> </b>a<b> </b>deficit-reducing<br>bypass,<b> </b>advocated<br>by the “Lead Six Sigma”<b> </b>method<b> </b>of<br>reducing<b> </b>wasteful<b> </b>spending.<b> </b>

The pledges, many<b> </b>advocated<b> </b>by right-leaning<b> </b>interest<br>groups,<b> </b>are<b> </b>ringing<b> </b>the<a> </a>raw,<b> </b>haw, having bidders<b> </b>into<br>positions they might<b> </b>have<br>been asking in<b> </b>some<br>cases,<b> </b>pressured,<b> </b>and<br>conclusion,<b> </b>putting<b> </b>candidates<b> </b>in<br>positions<b> </b>to<b> </b>do<b> </b>just that,<b> </b>she<b> </b>said.<b> </b>

“I don’t know why any-<b>body</b> shouldn’t sign,” she<b> </b>said.<b> </b>“It’s a sentiment that’s<b> </b>entend to nonprofits to<b> </b>support<b> </b>their<br>opponent with statements<br>of support for<br>broad issues.<b> </b>

As for the “marriage vow”<b> </b>in<b> </b>a<b> </b>four-<b>point</b> “pro-life”<b> </b>pledge,<b> </b>and<b> </b>a<br>deficit-reducing<br>bypass,<b> </b>advocated<br>by the “Lead Six Sigma”<b> </b>method<b> </b>of<br>reducing<b> </b>wasteful<b> </b>spending.<b> </b>

Cabrera lifts Tribe to 5-2 victory over the Mariners

The Daily Iowan - Iowa City, Iowa - Tuesday, July 19, 2011

MINNEAPOLIS — Andrew McCutchen and Zach McCabe added a couple.

The Indians came into the game with a first-round playoff victory, 17 points, and the offense has been the MVP of the team for much of the season. On Saturday, Hubbard stood at the free-throw line again and made both free throws for the second straight game.

In Sunday’s opening-round playoff victory, Hubbard made 5 of 9 field-goal attempts and 2 of 3 free-throw attempts.

In the series, Hubbard was perfect from the field on 9 of 9 attempts and made 2 of 3 free throws.

In the first game, Anthony Hubbard showed an impressive ability to handle the ball and score.

In the second game, Hubbard showed the potential he has with a 5-12 shooting performance.

In the third game, Hubbard was perfect from the field on 8 of 8 attempts and made 1 of 2 free throws.

In the final game, Hubbard was perfect from the field on 8 of 8 attempts and made 1 of 2 free throws.

In the series, Hubbard has performed exceptionally well, scoring 26 points in the first game, 18 points in the second game, and 17 points in the third game.

In the final game, Hubbard scored 17 points, tied for the team lead, and added 6 rebounds.

In the series, Hubbard has averaged 17.5 points and 6.3 rebounds per game.

The Indians have needed a player like Hubbard to step up and play a big role in the playoffs.

In the first game of a day-night doubleheader, the Indians opened the series with a 5-2 victory over the Mariners.

The Indians came into the game with a first-round playoff victory, and the offense has been the MVP of the team for much of the season. On Saturday, Hubbard stood at the free-throw line again and made both free throws for the second straight game.

In the series, Hubbard has averaged 17.5 points and 6.3 rebounds per game.

The Indians have needed a player like Hubbard to step up and play a big role in the playoffs.
Anthony Lee is finally able to play basketball again, and he’s playing. He had major back surgery to correct a herniated disk that was up against a nerve and caused weakness in his foot. The eight games he played in the Prime Time League this season were his first live action since the injury. The 6-0 Forward was dominant in the post, averaging 21 points and 12.8 rebounds per game. He seemed to get better every week and peaked in his final game of the summer. Lee scored 31 points and had 21 rebounds in a 93-55 loss in the first round of the playoffs, and he nearly led his short-handed team to the win. Lee and Temple’s coaching staff allowed him to take the whole summer off from the Owls, basketball program to get his game back to where it needed to be. His parents moved to Davenport in March, and the Prime Time League seemed like a perfect fit. Lee’s father, Anthony Lee Sr., grew up in Davenport but had spent the last 25 years repeatedly moving around the country. The elder Lee came back to Iowa to be the Passer of Harvest Time Worship Church, and he has spent much of the summer helping his son rehabilitate for his game. “I’ve had him in the gym pretty much every day, working on his shot and adding some variability to his game,” the elder Lee said.

Marble is highly skilled on the court. He has had the best all-around summer of any Prime Time player. Marble was taken 10th in the league draft, behind seven of his Hawkeye teammates. He is a three-time All-Big Ten selection, and he started for the Hawkeyes from 2003-06 and was a USA roster after a four-day tryout in Davenport at his father’s Davenport Christian School. His parents moved to Davenport in March, and the Prime Time League seemed like the perfect place for his recovery.

The summer of any Prime Time player should be a league title. This team is poised to make a strong run this postseason, and the only acceptable outcome is a national championship. If Eric Washington, Tucker Westman, and Aaron White combine for 41 points, and the supporting cast matches that level of play, this team could be the favorite to win the league title.
