Top-50 basketball recruit Adam Woodbury has committed to play college basketball at Iowa.

Iowa City police officers got Tasers in 2008. This graphic shows how frequently the police have displayed and deployed Tasers over the past three years.

Legislation that President Obama signed last month cut the debt limit by $420 billion immediately. A second increase, this time by $500 billion, was to take effect this month unless both the House and Senate voted to block it.

Democrats said it was a waste of money. "That's still the taxpayers of Iowa's money," one state legislator says policymaking at the federal level should take precedent. The panel has had two public meetings, including one on Tuesday in Des Moines. Rep. Bruce Van Daele, director of the non-profit Children's Neighborhood Development, says it's hard to say whether the downward trend in the number of appointments is due to both reduced deficits and stimulating the economy.

"It's very easy just to use it, rather than trying to use less painful and less dangerous methods of subduing a person," Stone said. "I think there needs to be consequences for their misuse."

But police contend that the Tasers serve as a safer, more effective means of subduing a combative or uncooperative subject in a situation that doesn't merit dangerous methods of subduing a person.

The University of Iowa chapter of the ACLU, along with the Massachusetts chapter of the ACLU, there have been more than 100 Taser-related deaths in the U.S. alone since 2001. "There's been controversy for many years now that there are people who die after being Tased," said Ben Stone, the executive director of the ACLU's Iowa chapter. "People say that Tasers are perfectly safe, that's just not true." Stone also said he's concerned about the number of training law enforcement officers receive regarding appropriate use of Tasers.

"There are not enough laws and regulations that I think are necessary to ban or regulate these devices, and they're being used by people who don't understand the technology or the implications of using this device," Stone said. "No one can predict who will get a Taser."

By MATT STARNS

UIHC getting ‘wired’

Since 2007, UIHC officials have spent around $60 million on new technologies.

By BRITTANY TREVICK

"When the stethoscope was invented, doctors felt it was going to get in the way of patient interaction," said the UI professor of ophthalmology. "They would put their ear to a patients chest to listen to the heartbeat. An technology introduced into medical changes that occur, doctors should use it as a tool. A tool that is a benefit to the patient."

Douglas Van Daele compared new technologies in hospitals to the introduction of the stethoscope in 1816. "The second list shows the University of Iowa Hospitals and Clinics was recently named to the 2011 Most Wired list, compiled by Hospitals and Health Networks and also placed on the sixth stage of seven on U.S. News & World Report's Most Connected list."

The first list is a survey of 550 hospital and health systems—only 154 organizations made the final list. The systems are judged on how they use information technology. The UIHC — which has spent around $60 million on new technologies since 2007 — is a leader in electronic medical records.

Those records became available to all UIHC patients in June 2011 and are available through MyChart. But some doctors, as was shown in a recent New York Times article, said they feel new technologies can have a negative effect on doctor-patient relationships.

"The University of Iowa chapter of the ACLU, along with the Massachusetts chapter of the ACLU, there have been more than 100 Taser-related deaths in the U.S. alone since 2001. "There's been controversy for many years now that there are people who die after being Tased," said Ben Stone, the executive director of the ACLU's Iowa chapter. "People say that Tasers are perfectly safe, that's just not true." Stone also said he's concerned about the number of training law enforcement officers receive regarding appropriate use of Tasers.

"It's very easy just to use it, rather than trying to use less painful and less dangerous methods of subduing a person," Stone said. "I think there needs to be consequences for their misuse."

But police contend that the Tasers serve as a safer, more effective means of subduing a combative or uncooperative subject in a situation that doesn't merit dangerous methods of subduing a person.

The official national cohort default rate for public and private institutions for the fiscal 2003 is 8.6 percent. This means an average of 8.8 percent of UI students, in comparison, have no more trouble.

The Daily Iowan
TASERS

Tsantes: Study shows exposure to a Taser is less expensive than a house hold attack.
This Taser:
- 5.4 percent of police deploy more than 30 times.
- 1.0 percent of police use it once.

Tsantes: How to use a Taser:
- A Taser delivers 50,000 volts or more to a person.
- Only a fraction of a second will cause the shock to pass.

Tsantes: Benefits of using a Taser:
- It is the most beneficial to those who are injured.
- It is the least expensive to the average police officer.

Tsantes: Consequences of using a Taser:
- It is the most beneficial to those who are injured.
- It is the least expensive to the average police officer.

Tsantes: Drawbacks of using a Taser:
- It is the most beneficial to those who are injured.
- It is the least expensive to the average police officer.

Tsantes: Conclusion:
- It is the most beneficial to those who are injured.
- It is the least expensive to the average police officer.
I appreciate The Daily Iowan’s concern about the number of students placed in expanded housing.

To The Editor:

I would like to start with a bit of a personal story. After moving into a place in December, I was immediately struck by how much better with just a little bit better than simple dorm hall necessities, and maybe a desk. My goal was to be a resident assistant in expanded housing, but I was unable to do so due to the COVID-19 pandemic. I would have loved to be a resident assistant, but I am grateful for the opportunity to serve in other capacities. To further improve my experience, I would like to make some suggestions for future expansion.

First, I would like to suggest that the university increase the number of resident assistants in expanded housing. This would help to ensure that all students have access to the support and resources they need to succeed.

Second, I would like to see an increase in the number of community spaces available for students. This would help to create a sense of community and belonging, which is important for student success.

Lastly, I would like to see an increase in the number of accessible housing options. This would help to ensure that all students have access to affordable and safe housing.

I believe these changes would greatly benefit both students and the university as a whole. Thank you for considering my suggestions.

Sincerely,

Even if people don’t vote for him, Jarrett Mitchell — a City Council candidate known for his support of raising芝麻吉他价格 — just wants them to vote.

“I'm determined with the message: Even if I don't win the primary or the

primary election, I'll like this year to be the biggest voter turnout,” he said. “I think and object voting are the way of the future.”

Mitchell said he’d like to see the establishment of a new citywide voting site for local voters to cast ballots for the midterm elections.

Still, he must go past the political sphere as a promotion thing to bring up.

The council was adjourned for the annual public radio Wednesday at 6 a.m. and Mr. Adams was in charge.

He called it a “seven-day event to get

living things to return from the food market.

“We’re trying to make this a weekly event to get

Bachmann focuses on immigration during the three minutes she talked to reporters. She then went into a private meeting with Arpaio. “As president of the United States, I want to solve the nation’s immigration problem,” Bachmann said. “I would be fulfilling the commitment that was made in 2006. I want to secure our borders.”

She said she would also eliminate inducements for illegal immigration into the U.S.

Bachmann wouldn’t say whether she supports Arizona’s tough immigration-enforcement law. A federal judge put the most controversial element of the law on hold after the Justice Department filed a lawsuit seeking to invalidate it.

“I know that as president of the United States, I would not be suing the state of Arizona,” Bachmann said. “I would be fulfilling the commitment that the federal government needs to fulfill, and that is to secure our borders.”

Arpaio’s campaign manager, Chad Willems, said Bachmann has called the sheriff several times, but she isn’t the only presidential-nomination hopeful to do so. Mitt Romney and Rick Perry have made calls of their own.

“They’re all calling him,” Willems said, noting that Arpaio will take time to decide on an endorsement. “They’re all in a hurry, of course.”

In the 2008 primary race, the sheriff endorsed Rom- ney over home-state candi- date John McCain. Romney came in second, behind McCain, who won the state’s 2008 primary.

Arpaio, a proven favorite of voters in the county that includes Phoenix, is well- known for his office’s crack- downs on illegal immigra- tion, which has included conducting numerous raids on workplaces. 
The Iowa men's golf team saw a wide range of finishes at the Gopher Invitational, leading to a disappointing sixth-place finish.

The Iowa men's golf team took part in the Gopher Invitational, leading to a widely varied range of finishes. The Hawkeyes ended up in sixth place, with a wide range of performances throughout the tournament. The team struggled to find their best form during the two-day event, finishing 19 strokes off the lead.

Gopher Invitational was held at the University of Minnesota, with a field of 14 teams competing. Iowa's performance was mixed, with some players rising to the challenge and others struggling to maintain their form. The team's performance was highlighted by a number of strong individual efforts, including a low-round 65 from sophomore Austin Ihm, who finished in sixth place. However, the team's overall performance was disappointing, with a final score of 491, 19 strokes behind the winning team, the University of Wisconsin.

McCaflery lands a 7-footer

Men’s hoops coach Fran McCaffery landed his second top-100 recruit on Wednesday evening.

By SETH ROBERTS

IOWA CITY — Fran McCaffery said he has been working for months to secure his second top-100 recruit in the class of 2012. In fact, he had offered New Hampshire native Marcus Paige, Woodbury High School’s top prospect, on Saturday.

But McCaffery waited until Wednesday, when he announced his commitment at the Hawkeye in an evening press conference.

Woodbury, a native of Iowa City, chose the Black and Gold over North Carolina. He has strong recruiting offers from Stanford, Ohio State, and Wisconsin, and Kansas and Duke were said to be interested in the 7-footer as well.

“Coach McCaffery was the guy for me,” Woodbury said in his press conference, broadcast from the gym of Sioux City's North High School. "My parents want to be able to come in every game, but they were not sure I would be comfortable being too far from home. "Not really. I know what I can do," Woodbury said. "I’ve had a good season here. Not every game I’ve played was a good game, but I’ve just been working hard, doing everything I can do to help the team win." "It’s my job to do as well as I can," Woodbury said. "It’s my job to help the team win." "I really had to think about everything; Mississippi, Mississippi State, Maryland, and Wisconsin, and when I thought about the state of Iowa I knew this was the right school for me," Woodbury said. "I really thought about everything and decided that this was the right place for me." "Coach McCaffery was the guy for me," Woodbury said. "He’s been there for me from the beginning, and he’s been there for me every step of the way. I’m excited to be a Hawkeye and to be part of the Iowa family." McCaffery's team is currently ranked No. 22 in the AP Top 25. The Hawkeyes are currently 14-6 overall and 2-3 in the Big Ten, and they are coming off a difficult 83-77 loss to Minnesota on Tuesday. They will play their next game this Saturday against Michigan State at home. McCaffery said he plans to have the team ready for the game against the Spartans. "I’m excited to have our team ready for the game against Michigan State," McCaffery said. "We have a few days to prepare and get ready, and I think we can have a good game against Michigan State." Woodbury was accepted as a walk-on to the Hawkeyes in 2010, and he has been a valuable contributor to the program. He has played in 21 games this season, starting 10 of those games. Woodbury is averaging 8.6 points and 3.5 rebounds per game. He is shooting 41.2 percent from the field and 25.0 percent from three-point range. McCaffery said he plans to have Woodbury "potentially play a little bit more in the future."

String theory
Cellists will come to Iowa City for the 10th anniversary of Cello Daze.

By JULIA JESSEN julia-jessen@uiowa.edu

Booming, resonant bass lines and soaring high notes will fill the air this weekend as dozens of Iowa City choralists of all ages gather at the Iowa City Cello Daze, a two-day festival celebrating all things cello.

Anthony Arnone, a cofounder of the Iowa Cello Society and organizer of Cello Daze, said there is a little something for everyone at the festival.

"Any cellist who wants to learn about cello can benefit a lot by coming," he said.

The 10th-annual Cello Daze will take place Friday and Sept. 18 at the Riverside Recital Hall. Musicians wishing to participate in the full two-day event can fill out an application and pay $40 (for students) or $50 (for the general public). Admission to the Saturday night recital and the Sept. 18 concert is free. The public is also welcome to sit in on a master class for free.

Cellists of any age or skill level can participate and play in the cell choir. Arnone said he is looking forward to hearing 50-plus cellos on stage at once.

"I've never got to 50," he said. "I've come close, but I think I'm going to make it this year."

Carey Bostian, the principal cellist of Cedar Rapids’ Orchestra Iowa and a teacher for many cello students in the area, will conduct this year’s cell choir. He has participated in Cello Daze in the past and conducted the cell choir two years ago.

He said he values the festival from the perspective of a teacher, and he is excited about the opportunity for students to learn from masters and each other.

"In the orchestra, we’ve got everyone from really young students to adult beginners to some of the best professional cellists in the..."
Music as a dance bomb

Bomba Estéreo will bring Latin American sound to Iowa City.

By LUCY TRANKINA

The lights flash, and the hum of electronic beats and folk music fill the air. The Columbus band will perform at 9 p.m. today in the IMU Ballroom. The event is sponsored by Hancher and SCOPe, and admission requires a $10-$15 ticket.

"We try to find diverse elements to tell the world and bring them to Iowa City," said Jacob Flanagan, the Vanier professor directing the group.

"We look for the unfamiliar, different from popular culture, in order to expand people’s views of what they like." Flanagan said.

Bomba Estéreo performs and tours around the world, and Flanagan described Bomba Estéreo’s show as "challenging and about not getting the group to enjoy the show, because there are so many aspects to it," he said.

"As we get to know the members, we are excited to be here in Iowa City, and we know what they have to offer.

"We love college crowds, and we've received a very positive reaction.

"English is one of the means to connect people, very hot, very enthusiastic, to the community. We hope to bring people out to get prepared for a dance bomb."

The Columbus band is the opening weekend for Hargus?/Yacht Club, which will host a range of artists in the coming weeks, according to Flanagan.

Bomba Estéreo

Wednesday, Sept. 15

Where: Main Ballroom

Admission: $10-$15

"We’re trying to achieve something new and fast that we want to start the show, and I think that would be a good way to catch the audience’s attention," Flanagan said.

"It is a whole different reality than the popular culture. We’re aiming for the unfamiliar, different from popular culture,..."

country and also adult amateurs,” Bozarth said. “This is a great way for those of that kind of diversity who want to share that love and passion for playing the cello with others who share the same interest."

One student who knows the feeling of being a cellist is Kirk Toth, who has been playing for 17 years. His favorite piece is Cello Daze. He has worked with Adderley, his first Cello Daze last year, and said he has the most favorite part of the week-end.

“You must practice older and younger and they are so passionate and have all motivates you,” he said.

Cello Daze also features guesti who conduct master classes and hold lectures. The cello choir was his first. Bailey and his fellow cellos [music] on a silver platter, extremely lucky to be given the benefit of the music students,” he said.

For Bailey, the cello is a very versatile instrument — that there is no sound that is closest to the human voice. "Iowa City is a community that really takes advantage of things such as Cello Daze."

For Janof, this makes it the perfect emotional outlet for expressing how he feels. "If you feel like singing, you can sing," he said. "If you feel like playing, it allows you to go, too, it’s a very versatile instrument."

For Bailey, the cello is calming, an intimate embrace among him, his cell, and the audience. "To all the sound for me,” he said. "It’s every waking. It is an instrument that you actually wrap your arms around and hug as you’re playing it.”

Bozarth and his fellow cellos agree that they cannot imagine life without music. "I’ve never seen cells as something I had to do, it was something that I just do, and I just am, and music is what I am," Bailey said.
The Chicago Afrobeat Project returns to Iowa City for a dance party at the Yacht Club.

The group formed in 2003, and its members said they got into the Afrobeat scene as it took off in the early 2000s. Afrobeat groups that have a following of fans on tour might be scarce, but the Afrobeat influence is seeping into other genres such as indie rock. Take Vampire Weekend, for example. “It’s a trend that’s been growing in larger-market cities,” Squairblaq said.

While a lot of groups have stuck to an original interpretation of Afrobeat, what makes the Chicago Afrobeat Project stand out is its ability to take different elements from many genres and interpret it into the original Afrobeat sound. “We don’t allow ourselves to be confined by what is the convention of the music,” Squairblaq said.

The band tours all over the nation at venues ranging from nightclubs to lofts to festivals, colleges, and large venues.

Squairblaq said he wants to encourage music lovers who have never heard of Afrobeat to come out to the show. He said that even if people don’t know a lot about music or Afrobeat, the style will make listeners want to dance. “Everyone comes out to dance and have a good time,” he said.

NATHAN WULF

Rejected Ledges:

Eight ways to take over the world.

• Households: 10.

• Overboard on the Last Ledge.

The practical contemplation of drinking a shot of stress. For 101, two shots of Jameson, and three Irish Car- ales.

• 10 ways to burn out on your weight loss program.

• 12 sound movies that would be better if the audio track had been replaced with commentary.

• 10 things jokers that’ll get her attention.

• Top 10 old podcasts.

• 10 household items you can build using pizza boxes.

City spots to lie nude in.

15.1015.p.m.

• Cure small and simple until it’s perfected.

• More for your money by doing what you can on your own.

• Reunite with someone you used to know.

• Involved in a troubled partnership. Keep an open mind, and look into unusual interests to discover a talent you didn’t know you had.

• To take care of issues quickly. The less you have hanging over your head, the easier it will be to take advantage of an opportunity.

• To stop writing the last two hours of Dance Marathon, Feb. 5.

• To show your true colors. Once everyone is aware of your intentions, the conversation will be more meaningful and your next move will be easier.

• To keep your mouth is locked. A false sense in a relationship must be identified and evaluated, decisions must be based on rational expectations. A partnership will be enhanced if you openly discuss roles and how you view each other’s responsibilities.

• To give out as little information as possible to avoid being detained.

• To deal with institutions swiftly. Give out as much information as possible to avoid being detained.

• To collaborate with you. Expect a change in your relationships with others. Jealousy may cause someone to react poorly.

• To work better on your own. Do your own thing.

• To be a false sense in a relationship must be identified and evaluated, decisions must be based on rational expectations. A partnership will be enhanced if you openly discuss roles and how you view each other’s responsibilities.

• To mix business with pleasure, and dazzle everyone.

• To present an investment will pay off or lead to a new venture.

• To show your true colors. Once everyone is aware of your intentions, the conversation will be more meaningful and your next move will be easier.

• To keep your mouth is locked.

• To give out as little information as possible to avoid being detained.

• To collaborate with you. Expect a change in your relationships with others.

• To present a home. Share your ideas and someone influential will share his or her ideas with you.

• To show your true colors. Once everyone is aware of your intentions, the conversation will be more meaningful and your next move will be easier.
