**A true holiday gift**

**By Iora Cotter**

In this issue of the Corvallis Argus, the Democrat reporter wrote a story about a local family who had donated a car to the Red Cross. The article described how the family had decided to donate the car after it was damaged in a flood. The reporter praised the family for their generosity and noted how it had helped others. The story ended by saying that the family had been recognized for their contributions.

---

**Correction**

In Monday's story, "Complainants Review Awards" The Daily Iowan incorrectly reported that the United States spent $124 billion each year. The United States actually spent around $20 billion each year. The article should have stated that the United States spent around $20 billion each year. The article should have also noted that the United States spent around $20 billion each year.

Conceptual distortion

The UI painting student said some of his work can take months to complete.

By CASEY WINTER

Deep into the night, Nate Wilson, a junior in studio art, works in the sound recording studio and sketching on his computer. He tutors his students in drawing and animation, and his work has been featured in galleries and publications. "My work is kind of a labor of love," he said. "I try to make it as detailed as possible." He has a complex vision of what it means to be a painter. "It comes from the nature of the work," he said. "It's not really about the paint, it's about the process." 

Wilson and his family have been painting for generations. "My grandfather, my father, and myself," he said. "We've all been painters in one form or another." He describes his work as a form of meditation, an escape from the world. "I want my paintings to be a place where people can find solace," he said. "I want them to feel like they're in a different world." 

Nate Wilson talks about his paintings in the Studio Art Building on Tuesday morning. Wilson paints about the interweaving of popular culture and visual culture. (The Daily Iowan/Dominic Lippert)

Paul HO CONTINUED FROM 1

Paul supporters,” Peters said. “Clearly, there’s a lot of support among stu-

dents.”  

Shannon, who raised the $1,000 in funds needed to open the new headquar-

ters, said she, too, hopes the new location will encourage students from UI and Kirkwood Community College to get involved with the cam-

paign.  

The new headquarters will provide space for sup-

porters to set up phone banks, assemble door-

knockers for volunteers, and answer questions, Shannon said.  

“We love all of the univer-

sity students and Kirkwood students,” she said. “We have several stu-

dents who come in here and work here, and they will work with us
day after day through the ca-

nus. They are welcome to come down here at any point.”  

UI political-science Asso-

ciate Professor Tim Hagle said the building is a huge asset for Paul’s cam-

paign.  

“Is that the campus that’s going to be open, (students) can gather and get together,” Hagle said. “Paul’s supporters are the great drum sys-

tem, and that creates for a much more fun environment.”  

Ingram said the special dif-

ferentiation in the new sys-

tem for students and fac-

ulty will be a delay in the final schedule distrib-

ution.  

The final exam schedule won’t be generated until the fifth or sixth week of the semester, when students have ended their sem-

ster and are taking the last class of the year.  

The software is used at numer-

ous testing rooms so that there can be many exams as possible.

That’s something to look for, he said. Lockwood said the new on-campus software will help ease the demand for more professional and additional proctors and minimize student and faculty conflicts, especially with an increase in fresh-

men for the last few test periods.  

Last year’s influx of students contributed to a more expensive system. Lockwood told The Daily Iowan in December 2010 that the University Hospitals of Iowa City, which make up the University Hospitals and Clinics of Iowa system, have expanded and increased the number of tests that need to be scheduled.  

When you talk about space, there are essential questions young people have to ask to answer these questions.”  

“Anytime that something happens that wouldn't be if alcohol wasn’t involved is cause for concern,” he said.  

“We have a few serious

Trends of Violence

Use beet juice to deice icy roads

The Iowa Department of Transportation should follow the lead of other states and some of its own cities and advocate the use of sugar-beet juice to secure its streets, save money, and help the environment.

One week ago, Iowa City experienced the first snowfall of the season. While Congress was debating who would pay for the snowfall, the City of Iowa City recognized the advantages of beet-juice formula — one of the companies that sells the beet mixture to the University of Iowa. “It was much cheaper,” said Scott Secor, the president and owner of Secor Group, one of the companies that supplies the beet mixture to the UI. “It will freeze again as it gets cold later in the night. With GeoMelt, it won’t refreeze until it’s 20 below. So there’s plenty of warm days when the ice is there to stay. “

Iowa has a DOT that is basically only considering and advocating for road-salt runoff. The DOT has “seen” the results. “Currently, the DOT has a brand-new recommendation that will be effective to 40 degrees below zero — a factor that can save lives at lower temperatures, as well as save money from salt, concrete, and soil preservation.

“When the DOT puts plain salt on the street, the water makes and goes into the crack of the pavement” said Scott Secor, the president and owner of Secor Group, one of the companies that supplies the beet mixture to the UI. It will freeze again as it gets cold later in the night. With GeoMelt, it won’t refreeze until it’s 20 below. So there’s plenty of warm days when the ice is there to stay.

“I do not, in the slightest, think that this new technique should be everywhere — many municipalities, especially Iowa cities, cannot afford beetJR000H.

One natural substance can make the substances we use today obsolete. It’s been said that beet juice can melt ice at temperatures down to 10 degrees Fahrenheit. “We receive 1,500 of the 3,000 companies that sell the beet mixture to the UI. “The older formula, however, it can be effective up to 40 degrees below zero — a factor that can save lives at lower temperatures, as well as save money from salt, concrete, and soil preservation.

“Of course, there are many factors to consider when choosing which substance to melt the road ice. Effectiveness is without a doubt the most important, but political considerations are also to be considered — many municipalities, especially Iowa cities, cannot afford beetJunction.

Martin Chilton

Nominating Paul, restore dignity to the GOP

If you pick a GOP presi- dential candidate from the media’s field of “mainstream wisdom," you may have settled for a consolation prize. Even if you make sure to read (or at least review) all the campaign ads plastered on your television, you understand that you need to “fix” gay people, a terrorist, and whites. “The white head and tail feathers until the birds are red. Watch them flinch. If they flinch, you can immediately draw your own conclusion that they are really Portland, Ore., the city of beet juice, uses beet juice to deice its streets. “We receive 1,500 of the 3,000 companies that sell the beet mixture to the UI. "It will freeze again as it gets cold later in the night. With GeoMelt, it won’t refreeze until it’s 20 below. So there’s plenty of warm days when the ice is there to stay.

“GeoMelt, it won’t refreeze until it’s 20 below. So there’s plenty of warm days when the ice is there to stay.

Like many states, Transportation Departments have endorsed the sugar-beet-salt formula. Nebraska, for example, buys millions and millions of pounds each year. “Not as great, but it’s better than the DOT’s recommendation.”

One city in Iowa, Des Moines, also to be considered — many municipalities, especially Iowa cities, cannot afford beetJR000H.

for more news

MOORE CONTINUED FROM 10

just an advantage for the Hawkeyes from a scoring standpoint, either. The four-year assistant coach said the team gained a leader when Ryan Donahue returned to the truck.

"Raven is a natural leader for us," said Moore. "When the girls see her back, they think, 'We've got our leader back,' to help the team progress. Anything times you can add something to the team with leadership qualities, it makes you a better track and field team."

So Moore has added another role of responsibility to her résumé, and she said she enjoys her leadership role.

"It's not a responsibility. It's something else that makes me happy, I have to remember that these girls are like my family, so I'm happy that (Raven) chose me (to lead)."

Head coach Layone Anderson said she was impressed with Moore's performance at the intrasquad meet on Dec. 3, when she set the 600-meter mark in 1:39.94 seconds. She said this is only the beginning of what could be a big season for her runner.

"When the girls see her back, they think, 'We've got our leader back,'" Anderson said. "It's something else that makes me happy, I have to remember that these girls are like my family, so I'm happy that (Raven) chose me (to lead)."

Karl Klug, Tennessee DT

In 2010, Iowa’s defensive lineman recorded 37 tackles — including 13 for a loss and 5.5 sacks. His teammate, meanwhile, had 69 tackles, 2 fumbles and 2 interceptions. The first player was Karl Klug, and despite a less-than-productive season for the Hawkeyes, his numbers remained steady. Karl Klug was better than his former teammate. He recorded 5 tackles against Carolina and its 27th-ranked rushing defense.

Klug has now one. Clayborn has none, and Karl Klug only started all 13 of Tampa’s games of the season, a 16-13 trimester. He had 5 tackles against Carolina and its 28th-ranked rushing defense. He is currently in the NFL.

Adrian Clayborn, Tampa Bay DT

This season has been dis- appointing for the Tampa Bay Buccaneers. The team started 4-2, then stumbled to seven-straight losses.

But one of the brightest spots of the season for the Buccaneers has been their defensive tackle, of the season, a 16-13 trimester. A first-year player, Clayborn — chosen by the Buccaneers with the 20th overall pick in the NFL draft — has had a more successful story. Until then, Stanzi has had the best year of any Hawkeye rookie. Think about this like the Stanzi hasn’t played, so Hawkeye rookie.

And while he has record- ed some good individual statistics, they have not translated into big plays for a winning team making him Iowa’s best NFL rookie this season. In just the second game of his career, he recorded two sacks of Pro Bowl quarterback Drew Brees as the Titans brought the New Orleans Saints down to the final minute. In addition to his team-leading sack total, Clayborn has swatted four passes at the line of scrim- mage, one of which led to an interception against the Buccaneers.

What’s most impressive of all for the 6-3 rookie is that he’s making all these contributions to a good defense and a winning team. The Titans are 7-6 overall and in second place in the AFC South, and Klug’s con- tributions have helped them hold opponents under 20 points per game this season. According to the annual Pro Football Focus grading, he is the best defensive end in the NFL for the 10th week in a row.

And while he has record- ed some good individual numbers, Clayborn plays on the Titans’ 27th-ranked scoring defense, its 27th-ranked rushing defense, and its 24th-ranked rushing defense.

Klug was better than his former teammate in their final college seasons. In his senior season, he could throw a wrench into the history of the sport. Tyler Palmer has been horrendous to the tune of 2 touchdowns and 9 interceptions in his games. But head coach Ricky Ray’s fang on Monday morning could throw a wrench into the argument, though. It seems entirely thatwhere. He has a huge role over the gunners that he would make it to the NFL. He is on the 40-man list of the Buccaneers. If for the Titans. If for the Titans. If for the Titans.

You could prop up your Ping-Pong table.

Or, get up to 70% back for your used textbooks.
scary days of my life, said D.C. Sieg, the head coach at the NCAP championships. "When the trains were late, every time the steam pipes used to steam, the car doors would bang on the wall where it was all packed, and we used to turn it all over, or we'd get out and walk the dog," Sieg said.

Bob Rhynes, who has been Iowa's assistant swimming coach for 19 years, said he and former head coach Bud Wilkinson had differing opinions on what the teams should be like. Wilkinson, he said, tended to stay low and prevent divers from getting too much height, while Rhynes, he said, believes the teams can't have too much height.

But Zabel also mentioned that he had taken the job after his son had been seriously injured. The son had been a member of the national team, but had been injured in a car accident. Zabel said he had been looking for a job that would allow him to spend more time with his family, and the job at Iowa had been the perfect opportunity.

"The Locker rooms were warm, or their races would have been in danger," Zabel said. "They were good divers. They were able to compete like we believe we can win."
HELP WANTED

RESEARCH PARTICIPANTS WANTED

The Accounting Program at The University of Iowa is conducting research to better understand perceptions of the value of nontraditional accounting software products. Participating in the study involves completing a survey and discussing the results of the survey with the researcher. If interested, please call (319)358-2537 for more information.

HELP WANTED

Running for all the family

Hawkeye sprinter Raven Moore sat out last season to prepare for and take care of her newborn child.

By CODY GOODMAN

The anchor of the Iowa women's 400-meter relay team that placed fifth at the 2010 outdoor Big Ten championships was Raven Moore, a freshman from Atlanta.

Many of her coaches expected a breakout year during her second go-around in the program — but she didn't compete.

She was pregnant with her son, Amare.

Having added another title to her list of student-athlete, Moore and her son is helping motivate her this season, both on and off the track.

"He has brought so much to my life, it that makes me more determined and focused," she said. "Now I have a reason to succeed and become just a great role model, all for him. This whole experience has made me more focused and ready for this year."

Moore admitted to being nervous about her teammates' response when the news first broke after pregnancy. She said she thought "the team would look at her differently."

But to her surprise, the entire program was welcoming in her return and treated her as part of the family. "I missed them so much," she said. "They were all really supportive."

"I feel so good to have all of that motivation from them. Being back around them is just great."

Moore is the first to admit that being a mother is no easy task. The sprinter has to balance her athletically and career with being a mother. But the drive to reach her athletic goals is only fueled by her son, she said, and she aspires to win the 60 meters at the indoor Big Ten meet in Lincoln, Neb. in February. But her coaches believe she can accomplish that goal.

"I'm pretty excited," assistant coach Chris Roberts said. "She's really come a long way. It's beyond what I was before. They really surprised me with how quickly she's come back."

Roberts said Moore's return isn't...
