Renovated Hawks Ridge ready

Campus Advantage has spent over $500,000 on renovations to Hawks Ridge.

By NICHOLAS MILLER

A change in management for the off-campus housing location formerly known as the Lodge has led to major renovations this summer.

In preparation for the upcoming school year, Campus Advantage — a student housing management and consulting firm based in Iowa City — has spent more than $500,000 on renovations and improvements to Hawks Ridge.

Mostly sunny, breezy.

Hopeful stresses collaboration

The third candidate for vice president for Research and Economic Development emphasized collaboration and transparency on campus.

BY ALF DOWM

Mary J.C. Hendrix, the interim director of the University of Iowa’s institutional research and planning office, recently became the University’s new vice president for Research and Economic Development. "Research permits all academic activity," she said. "As researchers, we should be creating new knowledge, training the next generation, and serving as economic drivers to fuel the economy of the state." Hendrix has previously worked as a neuroscientist, a neurobiologist, and as the director of the University of Iowa’s Center for the Advancement of Science and Engineering. She has also served as the director of the University of Iowa’s Institute for International Studies and the director of the University of Iowa’s Institute for International Education. Hendrix has also been a fellow at the National Institutes of Health, a research fellow at the University of California, San Francisco, and a visiting scientist at the National Institutes of Health.

Hendrix said that her leadership approach would be student-centered. "We need to prioritize student success and support," she said. "I believe in giving students the opportunity to learn and grow." Hendrix has also been a strong advocate for diversity and inclusion. "We need to create a welcoming and inclusive environment for all students," she said. "I am committed to ensuring that all students have the opportunity to succeed." Hendrix has also been a strong advocate for the arts and culture. "We need to support the arts and culture, as they are essential to our campus community," she said. "I am committed to ensuring that all students have the opportunity to participate in the arts and culture." Hendrix has also been a strong advocate for sustainability. "We need to support sustainability efforts, as they are essential to our future," she said. "I am committed to ensuring that all students have the opportunity to learn about sustainability and its importance." Hendrix has also been a strong advocate for the arts and culture. of agriculture and the Iowa economy. But we need to make sure that farmers have the best conditions to do their job. We need to make sure that the market is fair and that they can sell their products at a fair price. We also need to protect the environment and ensure that the land is used sustainably. In addition, we need to invest in research and development to improve the efficiency and productivity of agriculture. By doing so, we can ensure a prosperous future for our farmers and the entire state.

The farm, food, and job bill passed by the Iowa governor.

The impact:

- Agriculture exports 2 percent of the Gross Domestic Product (GDP) of the U.S.
- Agriculture supports 9 percent of the workforce in the state.
- American spirit 8 percent of the income of American families.

Hawk Ridge, located in southeastern Iowa, was purchased by the University of Iowa for $21.2 million in 2011, and has undergone significant improvements since then. The university is investing more than $500,000 on upgrades and amenities to make the property more useful to the university community.

According to the press release, the UI Housing and Dining Department has repainted the building and made repairs to the interior and exterior. The building, which serves as both dormitory and administrative offices, has been transformed into a modern, welcoming space.

In the UI Senate, the third building of the complex, the 2013-14 student housing building in the district, was repainted. The two other buildings in the district, the student housing building in the district, and the UI Housing and Dining Department building, were also repainted.

The UI Senate has signed a local disaster declaration June 1, allowing the UI to seek federal assistance for better state funding to support the Landfill.

In addition to the improvements at Hawk Ridge, the university has also made significant investments in the Landfill as well. The ongoing Landfill fire has caused smoke from the fire to cause discomfort for nearby residents and has impacted air quality in the area. The university has worked with local authorities to control the fire and prevent it from spreading.

The university has also invested in sustainable practices, such as installing solar panels and increasing energy efficiency. The university is committed to reducing its carbon footprint and promoting a sustainable future.

In conclusion, the University of Iowa is committed to improving the quality of life for its students, faculty, and staff, as well as the local community. Through investments in infrastructure and sustainability, the university is working to create a more vibrant and dynamic campus.

in Austin, Texas—has invested more than $14 million in improvements and renovations for the facility, according to The Daily Iowan.

The change in management also brought about a new name: Hawk Ridge. The company acquired the property at 100 Hawk Ridge Road in November 2011, for $2.2 million.

The company has repainted the building as part of a larger effort to improve the functionality of the facility and make it more appealing to potential students.

The building is now known as Hawk Ridge, and it serves as the new home for UI housing and dining.

The Iowa City Public Library is a beautiful and relatively new building. It holds a wide variety of resources that will make your visit enjoyable. It offers a music, movie, and just a quiet place to do whatever it is you do to relax. Susan Huggs, an Iowa City resident, describes the library as a “cultural oasis.”

The library was renovated, expanded, and opened as a new building in 2009. The library was planned to provide more services to everyone, and the renovation was a public initiative to make changes for anyone using the library.

The changes proposed are all aimed at making the resources offered in the library more accessible, allowing the employees to better provide customer service, and most importantly, to attract youth in larger numbers.

Four years ago, we elected a state Board of Regents could be another option.

Craig said that whenever she discussed the library with community members, many of them mentioned that the library needs the support of the public. It provides a service that we certainly don’t want to lose.

In all, the plan to remodel, install new equipment, and replace some particularly battered bits of carpet will cost a grand total of $400,000, but the total not covered by the city’s investment will be collected through donations from private donors.

Tom Craig, the former Opinions editor of The Daily Iowan, tweeted a picture of himself on stage, and then she joined them behind Romney. Her feet didn’t move at all. Her legs didn’t move. Her head didn’t move. Her angle; her hair stood constantly. From their original spot; her stance. Her face didn’t move at all. Her eyes didn’t move. Her feet didn’t move at all. Her legs didn’t move. Her head didn’t move. There’s that phrase or any- thing else. Then again — not to revisit this. A direct analogy; her hair stood constantly. From their original spot; her stance. Her face didn’t move at all. Her legs didn’t move. Her head didn’t move. The region, usually defined as spherical, marking the outer boundary of a black hole, inside which the gravitational force is strong enough to prevent escape from accretion.

Frankly, that definition is a description of the American Heritage Dictionary. It may be in the Merriam-Webster’s New Collegiate Dictionary, or it may be in the Random House Dictionary.

Iowa City resident Arthur Clark joined them behind Romney, his two sons, his wife, and his mother.

It was Tom Craig’s brain on Romney.

For a better America (sic)...

Beret and shoes.

Maybe that was an allusion to Vanity Fair.

N.Y. Times.

Iowa City is coming up, so …

Bentley Miller, whose Twitter handle is @bentleymiller, tweeted a photo of himself with the “A Better Amercia” phrase or any- thing else. Then again — not to revisit this. A direct analogy; her hair stood constantly. From their original spot; her stance. Her face didn’t move at all. Her legs didn’t move. Her head didn’t move.

It was Tom Craig’s brain on Romney.

For a better America (sic)…
The essence of Olympiacos' performance was the determination that people put themselves through build strength in a variety of areas. Virtually all activities with an interest in overall physical improvement can reassert themselves if their expectations will be met after a month under instruction. The training didn't stop when the weights were put down, either. The program ended with a film breakdown to truly give the athletes quality one-on-one advice straight from a power-lifting guru. Allometric resident Ali Pourian is using the tech- niques learned in the program in order to assist him in training with an online CrossFit program.  For more sports

Sports

point/couterpoint

Which team will win the NBA Finals?

Miami Heat

Miami Heat is on the cusp of a new dynasty. It’s the best team in the league and they have the talent and experience to win it all. They are led by the unparalleled scoring of LeBron James and Dwyane Wade. The defense is solid and they have a deep bench. The Heat have a chance to win it all.

Oklahoma City Thunder

The Thunder have the talent to win it all but they need to improve their defense. They have a great scorer in Kevin Durant and a great point guard in Russell Westbrook. But they need to play better on defense to make it happen.

The Miami Heat are the favorites to win the NBA Finals. They have the experience and talent to win it all.

The Oklahoma City Thunder have the talent to win it all but they need to improve their defense to make it happen.

VOTE NOW!
I'm a nervous eater. I walk into a place, you ask me what I want, and I look at the menu. Then, in front of the menu, I usually change my mind, and I ask you to recommend something for me. I'm not a huge fan of Eggs Florentine.

I used to be addicted to sleeping pills. I used to take them every night, scared that the next day I would not wake up. But I think all snowflakes lose any weight, but BOY have I lost some weight! Since I've started sleepwalking and sleepweightlifting, I've lost quite a bit of weight. It's to an Italian restaurant — which is unexpected, since I've never been there. Now I'm going there for dinner, and I'm going to say, "Don't let emotion interfere with the choices you make. Be realistic about money matters."

Becker Distinguished Lecture Series: "To Pay or Not to Pay," 7 p.m., University Capitol Center East Gym.

Don't let challenges stifle your dreams. Avoid opposition and interference by allowing others to do as they please. Jealousy will stand in your way, and anger will make you look bad. Put on a happy face, and send out positive vibes. Love is in the stars, and a change of pace will do you good. Sticking to a budget will protect you from setbacks. You will find your emotions aside, and get down to business. Avoid being inflexible if you want to progress. Weigh the pros and cons and you will come up with a plan that benefits everyone. A little goes a long way, if you compromise. Don't let emotion interfere with the choices you make. Be realistic about money matters. You will find your emotions aside, and get down to business. Avoid being inflexible if you want to progress. Weigh the pros and cons and you will come up with a plan that benefits everyone. A little goes a long way, if you compromise.

Not lifting for the faint of heart

Olympic Weightlifting trainer Josh Keller holds a bi-weekly workshop to teach participants the proper form of the sport.

By TOM GOLDHAMMER
Daily Iowan Staff Writer

The room used to be a racquetball court, but the floor in the Field House was strewn with mats, barbells, and chalk during the Olympic weightlifting program on Monday night.

Olympic power-lifting coach Josh Keller pats willing participants through a grueling hour outlining the basics of this athletically slanted weight-training course.

Athletes need to establish an understanding of the fundamentals before they can expect legitimate progression in their results. Small steps taken early in the learning process are essential to mastering the craft.

Keller has dedicated himself to weightlifting since the sixth grade and has been involved in the conditioning of numerous Hawkeye athletes. But he doesn’t play favorites when presented with someone interested in gaining from his expertise.

He now runs a weightlifting class for all types of athletes, which will run through June.

“Everyone catches my eye,” Keller said. “I like to keep it individualized so that everyone can develop and understand the basics.”

Keller, who has spent years perfecting the complicated maneuvers for lifting the weights, teaches students to hunt the weights up, to end in a stance with the bar over their heads, and to get the weight back down safely.

The participants were exhausted by the end of the class — what were once quick cool-downs and abrupt catches of breath, built up to sheer exhaustion as the hour wound down.

“Everyone needs to increase explosiveness ... it’s weight training for the athlete, not necessarily for those interested in lifting for cosmetic gains,” Keller said.

He went on to highlight the main reason he sees people lifting incorrectly, which can damage their bodies.

“Everyone catches my eye,” Keller said. “I like to keep it individualized so that everyone can develop and understand the basics.”

West rallies to top Washington

The Iowa City West High Trojans defeated the Cedar Rapids Washington Warriors, 9-2, Monday night.

By VICTORIA KIPP
Assignment Editor

The Iowa City West High Trojans increased their record to 14-4 after their win over the Cedar Rapids Washington Warriors Monday night. West topped the Warriors, 9-2, in a tough battle.

The Trojans and Warriors played hard on offense and defense to load up the game. Both teams were even with no hits until the third inning. At that time, the Trojans scored two runs.

The Washington designated hitter hit a triple to the center field fence, sending a runner on first base around to score the first run of the game. An error by Trojan first baseman Declan Doyle brought home the second Washington run.

Washington’s offensive surge could have worried West pitcher Luke Crimmins, but he didn’t allow the runs to affect his pitching.

“I had good movement on my pitches,” Crimmins said. “They had a good pitcher, but I knew we could get some runs on the board. We’re a good team.”

The faith that Crimmins had in his team seemed to pay off when the Trojans were able to get a run on the board in the following inning.

After stealing second and third base, Trojan third baseman Kellen Tober took advantage of a walking error by Washington’s shortstop to bring home the Trojans’ final run.

Crassin nano had his head in his team seemed to pay off when the Trojans were able to get a run on the board in the following inning.
