Locals react to protests

*By RISHABH R. JAIN
rishabh@dailyiowan.com*

A Pakistani worker shouts anti-U.S. slogans during a rally in Islamabad, Pakistan on Sept. 15 as part of widespread anger across the Muslim world about a film ridiculing Islam’s Prophet Muhammad. The banner at bottom reads, “Immediately hang the killer.”

A YouTube video titled ‘Innocence of Muslims,’ which depicts the Prophet Muhammad unfavorably, has stoked a variety of reactions around the world.

Mariam El-Hattab — who has hopes of rehosting the discussion session at the Mosque on Sept. 22. The women-only discussion session at the Mosque on Sept. 22. The women-only discussion session at the Mosque on Sept. 22. The women-only discussion session at the Mosque on Sept. 22. The women-only discussion session at the Mosque on Sept. 22. The women-only discussion session at the Mosque on Sept. 22.

I know it is very common to make religious cracks and jokes here in America; Muslims are more sensitive to that because we take our religion very seriously.

— Mariam El-Hattab

The way these protesters are acting is not the Islamic way to act, because they are giving Muslims a bad reputation around the world.

UI chilling on energy

‘Chiller-heaters’ to supply energy for new dorm.

*By ERIC CLARK
eric-clark@uiowa.edu*

UI chilling on energy

As the University of Iowa moves toward its goal of being 40 percent renewable energy efficient in 2020, UI energy engineers are working to implement a new heating and cooling system in the newest dorm.

The system, which involves “chiller-heaters,” recovers excess heat from buildings and machines that are cooled by air-conditioning all year round.

The process involves sending chilled water at 42 degrees to buildings that need to be cooled. The water comes back out of the building at approximately 55 degrees and goes back to the chilled-water plant, where it is prepared to heat other buildings.

“Some buildings need to be cooled during the entire year, due to computers and other machinery that need to stay cool in order to be functional,” said Ben Fish, the UI Facilities Management assistant director of utilities and energy. “It seems odd, but you can use this-degree water to heat the building.

The system uses the chemistry of coolant, and the coolant takes the heat out of the building. Fish said the new indoor football practice facility uses a similar heating system, but unlike the new dormitory, the practice facility will not be cooled in the summer.

“The new dorm will be the first building occupied by a large number of people that will use this system,” Fish said.

Coe for the project was not readily available Sunday evening.

Luqman Al-Ahmad, the director of the UI Office of Sustainability, said the process is in accordance with the UI 2020 Sustainability Vision.

The process involves sending chilled water at 42 degrees to buildings that need to be cooled. The water comes back out of the building at approximately 55 degrees and goes back to the chilled-water plant, where it is prepared to heat other buildings.

Roosevelt makes comeback

BY LAUREN COFFEE

Although the elementary schools throughout the Iowa City School District may stay much the same when the new school year starts, the new名称 school district is one among the very few that have Roosevelt Elementary at its center.

The School District announced earlier this month that Roosevelt, now referred to as Roosevelt Education Center, will be a new program for the 2012-2013 school year. As part of the 25 new programs, two of the three bridge connections and Connections

"It helps share the cote," the assistant principal of Roosevelt Elementary "We are just trying to do what is best for the community," said Kate Cal, the principal of Roosevelt Elementary.

"It is a good thing," she added. "We don't want to do anything that will be harmful to the students."

The school board meeting on May 27 decided to hold last night to hold the decision. The new program could be used for the new program at Roosevelt Elementary. The decision was made by the students, and the new program is being used.

"The decision was made by the students, and the new program is being used."

"We will be doing everything we can to make sure it is successful," said Cal. "We will be doing the best we can to make sure it is successful."
More than 600 students signed up Sept. 19 for UISG’s Wingman initiative, which aims to inform students about safety in party situations and encourages them to look out for friends.

By Nick HASSETT

University of Iowa Student Government officials relaunched their Wingman campaign Sept. 19, and the program has received mixed reactions from students.

"It seems to me that it’s something I think is long overdue," said UI Associate Professor Sasha Waters Freyer, a film director and board member on FilmScene. "I think that it’s something that’s more of a permanent home."

"I think [a theater is] something Iowa City residents have been lacking for a while," he said. "It’s a shame there’s no existing business cards. Much of the planning stages for temporary locations in the space previously occupied by Vito’s bar, 118 E College St., is a sponsor of the FilmScene’s screening of the third film (The Daily Iowan/Joshua Hough)

"It could be a home for FilmScene before we do something even bigger," said UI Associate Professor Sasha Waters Freyer, a film director and board member on FilmScene. "I think that it’s something Iowa City residents have been lacking for a while," he said. "It’s a shame there’s no existing business cards. Much of the planning stages for temporary locations in the space previously occupied by Vito’s bar, 118 E College St., is a sponsor of the FilmScene’s screening of the third film (The Daily Iowan/Joshua Hough)."
The University of Iowa is taking another step toward environmental sustainability with the construction of the new West Campus residence hall. The new facility will be a model of sustainable design and operation, with features such as solar panels, rainwater harvesting, and energy-efficient appliances. The university hopes to increase its level of non-fossil-fuel-based energy to 40 percent by the end of the decade, in addition to coal at the Power Plant. Cereal-making purchased from the Quaker Oats plant efficiency, she cited the increase in alternative energy production as a key component of the university's long-term environmental plan.

The university's use of biomass fuel at the university has a positive track record. Biomass has produced significant environmental and economic benefits since the fuel's introduction in 2001. According to the Office of Sustainability Management, more than 168,000 tons of coal have been displaced and 376,000 metric tons of carbon dioxide have been avoided thanks to the burning of biomass over the past nine years. Specifically, since the university has been able to purchase biomass fuel at roughly half the cost of coal, burning it has saved the university nearly $17 million in fuel costs. Because the biomass fuel is produced locally, money that would have otherwise been spent on coal produced outside of Iowa is allowed to stay in the local economy.

The university must be careful to maintain the advan-
tages offered by biomass fuel while also being mindful of the need to use biomass fuel such as oat hulls. The use of biomass-energy needs, there must be a continued focus on the environmentally and economically responsible production and use of combustible biomass such as oat hulls and cow horn. To this end, the use of biomass fuel at the university has a positive track record; biomass has produced significant environmental and economic benefits since the fuel's introduction in 2001.

Iowa 31  CENTRAL MICHIGAN 32

**Box Score**

**First Quarter**
- Iowa: Martin-Manley 10-yard pass from Vandenberg (Meyer kick), 12:32
- Central Michigan: Tipton 8-yard run (Harman kick), 8:04
- Central Michigan: Harman 33-yard field goal, 5:45
- Iowa: Weisman 34-yard run (Meyer kick), 3:10

**Second Quarter**
- Central Michigan: Davis 29-yard pass from Radcliff (Harman kick), 11:51
- Central Michigan: Harman 25-yard field goal, 2:00
- Central Michigan: Harman 20-yard field goal, 0:12

**Third Quarter**
- Iowa: Weisman 5-yard run (Meyer kick), 9:18

**Fourth Quarter**
- Iowa: Meyer 46-yard field goal, 8:07
- Iowa: Weisman 12-yard run (Meyer kick), 2:18
- Central Michigan: Davis 13-yard pass from Radcliff (2-point attempt failed), 0:45
- Central Michigan: Harman 47-yard field goal, 0:03

**Rushing**

**Passing**

**Receiving**
- Iowa: Davis 6-88, Martin-Manley 5-65, Fiedorowicz 3-13, Cotton 2-49. Central Michigan: Wilson 8-105, Davis 5-74, Williams 4-44, Lombardo 3-23, Tipton 3-20, Lavallii 1-8, Southworth 1-6, Garland 1-3.

**By the Numbers**

- The last time Iowa lost twice in nonconference play was in the 2003 season.
- Times Iowa has lost as a double-digit point favorite since 2006.
- Consecutive PATs made by kicker Mike Meyer, an Iowa record.

**Quoted**

- Defensive end Joe Gaglione on his fourth-quarter unnecessary roughness penalty.
- Central Michigan head coach Dan Enos on kicker David Harman.

Most Iowa fans expected some growing pains this season. Nobody expected a loss to Central Michigan, which finished last in the Mid-American Conference West last season. But a touchdown, a successful onside kick, and a field goal in the game's final 45 seconds sunk the Hawkeyes in a 32-31 loss.

CENTRAL MICHIGAN 32

KEY PLAYS
• Central Michigan had just tied the game at 7-7 with a first-quarter touchdown drive. On the very first play of Iowa’s ensuing possession, running back Mark Weisman couldn’t hang on to a handoff, fumbling before he ever had full control of the ball. The Chippewas recovered and kicked a field goal two minutes later.

• Central Michigan had successfully recovered an onside kick in the game’s final minute and was trying to move into position for a game-winning field goal. The Hawkeyes essentially did that for them. An after-the-play unnecessary roughness penalty on Joe Gaglione moved the Chippewas into Iowa territory. Shortly after, they kicked a field goal that gave them the upset.

GAME BALLS
IOWA
Mark Weisman
Weisman was good on Sept. 15. This week he was even better, showing more patience in the backfield and a frightening stiff-arm in the open field. The Hawkeyes seem to have a real star on their hands.

CENTRAL MICHIGAN
David Harman
Harman made four field goals, including a career-long 47-yarder with the game on the line. It was a clutch performance, and the gamewinner came just a few minutes after he perfectly placed an onside kick to give the Chippewas new life.

THUMBS UP
Punting. Senior punter John Weinke played well, booting the ball three times for an average net of 41 yards. Two of those kicks were downed inside the 20-yard line, including a perfectly placed ball that Micah Hyde downed on the Central Michigan 1-yard line. It was the second time this season Weinke has pinned an opponent to their own goal line.

THUMBS DOWN
Penalties. Iowa committed four personal-foul penalties and were hit with two pass-interference flags. Head coach Kirk Ferentz called the team’s performance “undisciplined” and “sloppy.” The 106 yards, worth of penalties prove that point.

‘I tell our team all the time, we get what we deserve. And that’s what we got today.’
— head coach Kirk Ferentz

Most Iowa fans expected a rebuilding year or some growing pains this season. Nobody expected a loss to Central Michigan, which finished last in the Mid-American Conference West down, a successful onside game’s final 45 seconds 32-31 loss.

PARENTING IS

You don’t have any idea how humiliating it is to lose 500 games of Connect- 4 to your 10-year-old. You know what? Good.

You just have to suffer.

Parenting doesn’t get any easier for getting it clean out the garage of the ferret you just fasted to have and now even needs toilets of favour and evil and ever.

You’d wish you’d kept that shittier beatnik— kids start driving at 11 in Iowa and you wish you could get a school permit at 12.

How do you punish children when they pick up a pack of PBR— “but replace” it with Blue Moon?

They welcomed you to ask to look through the old DVR-satellite thingie so you can watch “Star Trek” reruns on Netflix.

Having a high school grade really is like selecting the worst year of your life, complete with alpha horse-

ork.

You learn all those dazzling tasting sym-

bols and how to communicate with your smartphone, but you can’t even do the damn thing.

You have no Bloody Christmas wrapping paper, and you have never used that shiny gift bag that you can win at a plastic app.

You take measures, meet them, and provide them with the best of everything. You are a part-time job at Quick Trip and babysitting at home until they’re 28. The laughter of a 16-year-old has been replaced by joint rolling really stings.

Duncan Stewart is still paying for that trip to Disney World that they had as a last-minute surprise.

**Women’s golf alumnus bogey event**

Because of low alumnus turnout, the Iowa women’s golf team held a practice instead of participating in its annual Hawkeye Alumni Challenge at Finkbine.

*By Ryan Probasco*

The Hawkeye volleyball team responded with three set points two match points. The Iowa squad Hawkeyes led late in the third set. Iowa hit .234 while holding teams hit poorly in the first set: to hit the ball effectively. Both themselves by not being able to hit the ball effectively. Both could have won either of the first two sets but doomed to hit the ball effectively. Both could have won either of the first two sets but doomed tonight and were very competitive. "It’s a little earlier getting it going on our end, though," said Head coach Tracey Griesbaum said in a release prior to the event. The event will be held in conjunction with the University Athletics Club. The Alamance Challenge will group former members of the Hawkeye golf team a chance to meet current players, coaches, and administrators. "The Alamance Challenge will group former members of the Hawkeye golf team a chance to meet current players, coaches, and administrators." Head coach Mark Hankins said in a release prior to the event.

**Volleyball struggles**

The Hawkeye volleyball team came out of its opening weekend of Big Ten play with a 2-0 record after sweeping Iowa on Sept. 22 at Carver-Hawkeye Arena. Iowa won 25-19, 25-14, 27-29, and also cut short because of inclement weather, the men’s team played in the event.

**Field hockey takes 2 in Michigan**

Iowa’s field hockey team delivered a dominating 10-0 victory over the Spartans on Sept. 21, becoming one of three teams to beat Michigan State this season. Iowa’s 25 former Hawkeyes show up to participate in the event, the women’s team had only four alumnus in attendance. Because of that, the women decided to hold a practice and chose not to participate in the event.

**Women’s head coach Megan Menzel, who spoke prior to the event, speculated that the Alamance Challenge would be geared more toward the men’s team.**

"The men have been doing it for a few years, but we’ve been trying to get the women involved as well," she said. "It’s a little earlier getting it going on our end, though.

Prior to the scheduled shotgun start at 2:30 p.m., members of the men’s team gathered around one another and their approximate 50 alumni members for a photo opportunity. While the men jovially posed behind a banner indicating their participation in the Alamance Challenge, the women’s team was practicing putting at an adjacent green.

Sherry thereafter, the men piled into their golf carts and sped off to their appropriate, starting holes.

The women continued to talk to each other on their own cart. The substantial difference between the two teams’ turns may have been expected, but that didn’t stop the confusion that ensued among the women golfers. Some players, including sophomore Ashley English, were puzzled by the day’s events.

"We thought it was kind of odd," she said. "We thought it was weird and expected more people to be involved. I was expecting to play but it just didn’t work out that way."

The Hawkeye golf alumnae Challenge was meant to be a fun event for both the Iowa men’s and women’s teams. As it turned out, only the men’s team played in the event.

"We would have liked to play, but we only had one group of people show up," sophomore golfer Lauren English said.

The Alamance Challenge is intended to unite past and present Hawkeye golfers. It also gave former Hawkeye teammates a chance to reunite and meet alumni from different generations of Iowa golfers. The format for the event is a four-alumni scramble in which each alumni group is paired with a current Iowa golf coach.

Each group then played a round of golf at Finkbine Golf Course and competed for several different prizes, including the Alamance Challenge title. The teams invited former Hawkeye golfers from all over the country to participate. Afterwards, an awards social was held at the University Athletics Club.

"The Alamance Challenge will group former members of the Hawkeye golf team a chance to meet current players, coaches, and administrators," head coach Sharon Dingman said in a release prior to the event. "The men have been doing it for a few years, but we’ve been trying to get the women involved as well," she said. "It’s a little earlier getting it going on our end, though.

Despite good offensive production in both phases, the Iowa defense couldn’t back up its own scoring, allowing a season-high 32 points.

Hawk soccer notches two wins
The Iowa women’s soccer team moved to 2-1 in the Big Ten with a 3-2 victory over Purdue at the Iowa Soccer Complex on Sunday.

Senior midfielder Dana Dylamczyk’s insurance goal in the 77th minute proved to be vital as the Iowa women’s soccer team moved to over .500 (2-1) in Big Ten play with a 3-2 victory over Purdue at the Iowa Soccer Complex on Sunday.

The win was the Hawkeyes’ second-consecutive victory and pushed the Black & Gold to 11-0-0 overall.

“We’re pretty excited that we just beat a pretty good team,” sophomore midfielder Katie Nasenbenny said. “Last season, we started off conference play with two ties and a loss, and this year we have a season and a loss, so we’re already ahead of last year.”

Dylamczyk’s shot from in close the box off a ball from junior forward Ashley Catrell put the Hawkeyes up 1-1. The score was the upperclassmen’s fifth of the season and second point of the game. “Today we really took it to them, finishing our chances and getting our reps in,” Dylamczyk said. “It’s a good thing I misfired off of that chance because we needed it in the end.”

The tally stood as the game-winner after a defensive lapse led to an own goal by the Hawkeyes in the final minute of the contest.

Rainey was confused about what happened on the miscue and attributed the mistake to his team relaxing a bit prematurely. “We’ll have to break down the film and take a look at it,” he said. “We allowed a person to get wide, and maybe we just didn’t do a good enough job of closing the game out.”

Junior defendermen Alex Melin put the Hawkeyes up 2-0 with a header off of a free kick in the 15th minute, four minutes after the Buckeye backthree notched an equalizer.

Iowa head coach Ron Rainey thought that Melin’s goal was in the turning point of the game. He said that a key to his squad’s success this season has been an ability to bounce back from opposing scores, and that the Melin’s goal was another example.

“It was huge, just a great job of finishing a kick,” Rainey said. “We’ve been doing that after a couple of games.”

The win was the Hawkeyes’ second-consecutive victory and pushed the Black & Gold to 11-0-0 overall.
