Cattle farmers turn to byproducts

As the pastures shrivel and the cows come home to feed, many cattle in Iowa are finding sweeter choices awaiting them for dinner.

By Brianna Jett

I f you give a cow a chocolate-chip cookie, a candy bar, or a snack food — at the end of the day, the meat is no sweeter. Summer heat and lack of moisture stole the grass from Iowa pastures, forcing cattle farmers to find alternative ways to feed their animals, including the purchase of bakery byproducts.

“Theoretically, you should have cleaner grain going into bakery byproducts. Theoretically, you should have cleaner grain going into bakery byproducts,” Dahlke said. “[The ethanol process] doesn’t add, it doesn’t subtract any microtoxins. It’s into bakery byproducts,” Dahlke said. “[The ethanol process] doesn’t add, it doesn’t subtract any microtoxins. It’s finer product.”

In addition, the bakery by-products parallel traditional corn diets. “Between high-corn diets and byproducts, there is essentially no difference,” Jim Larras, a rumenist nutritionist at Great Plains Livestock Consulting, said.

For local farmer Steve Swanek, the drought is forcing him to look closer at byproducts, although he has not yet used any on his farm. “We just weren’t able to make as much hay as usual,” Swanek said. “This summer we had to supplement the pasture with hay. Basically we were hauling hay out to the pasture, usually you never have to do this. This might be the year that I look a little harder into that.”

Bakery byproducts are not the only options offered on the market. There are also corn byproducts, which often come from ethanol plants.

“We’ve been using those products as a replacement for corn and soybean meal for several years,” said Dale Ford, vice president for feed business at the River Valley Cooperative. “It is a good product for protein, energy, and minerals. When ethanol is made, the starch is extracted from the corn, leaving corn gluten feed and corn gluten meal, and Terry Yoder, sales manager of the Animal Nutrition Division of Stutsman Inc. Those products are then sold to livestock producers.

Besides how the byproducts are made, there are other differences between bakery byproducts and ethanol byproducts. Bakery byproducts can boost fewer toxins in their food. Manufacturers receive grains that were originally approved for human consumption — toxin free. However, if there is a microtoxin in the corn entering an ethanol plant, that toxin is only concentrated in the feed.

“Theoretically, you should have cleaner grain going into bakery byproducts,” Dahlke said. “[The ethanol process] doesn’t add, it doesn’t subtract any microtoxins. It’s just concentrated in the final product.”

As new apps aim to make voter resources more available to eligible residents.

By Matt Starks

Officials say a new app for resort phones and the iPAD produced through the Iowa Secretary of State’s Office will help put tools and information at voters’ fingertips during the election.

“I don’t think there’s another app in the country that does as much as this does for voting,” Dan Hoy, Iowa Secretary of State’s internal communications specialist, said.

They could be perfectly good products,” Dan Hoy, Iowa Secretary of State’s internal communications specialist, said. “We've been using those products as a replacement for corn and soybean meal for several years,” said Dale Ford, vice president for feed business at the River Valley Cooperative. “It is a good product for protein, energy, and minerals.”

A U.S. student organization is working to change the way the media and the public perceive North Korea.

By Cassidy Riley

While the weekly threat North Korea poses is often discussed, little is known about the severe human-rights crisis the country is suffering.

Wednesday: The organization Liberty in North Korea (LiNK) hosted a presentation of the nearest shelter. "They're just like you and me, except we have a safety net, and they don't," said Philip Lazaro, a LiNK representative, and a model underground railroad.

"It's in recognition of the crisis of North Korea and help the refugees settle in other coun-
tries," said Jenny Chua, president of the UI's chapter of LiNK. Chua said an idea for more news may come from in South Korea, there is a town of North Korean refugees, and although she lives as close, she has little information about the region.

"I just have some curiosi-
ty about why they ran away being said.

Brian Lai, a U.S. associate professor of political science, said the media's focus is on the military threat to North Korea poses because the U.S. government in most concerned about it.

"We just have some curiosity about what the government concerns," said Philip Lazaro. "We don't know anything about it.

"The media tend to focus on what the government focuses on," said Jenny Chua.

"I just thought I might as well take this opportunity to enlighten myself about this region," said UI junior Buyun Jeong.

"I thought I might as well share virally. He said the hope is it will create a viral revolution, calling for more videos and articles about the human rights issues in North Korea for them to share virally. He said the hope is it will create a viral revolution, calling for more videos and articles about the human rights issues in North Korea for them to share virally.

Republican presidential candidate Mitt Romney tout ed an energy policy based on fossil fuels — oil, coal, and natural gas — as a potential boon to Iowa's farmers on Oct. 2.

Romney's chosen energy policy hardly favors fossil fuels, which give him plenty of political leverage to handily rebuke President Obama's support for clean energy but leaves him vulnerable in places where the alternative-energy industry is taking root. In Iowa, a burgeoning clean-energy industry with bipartisan support is key to her campaign. Romney's energy plan, if elected, hinges on the central thesis that fossil fuels are the only energy sources that can ensure that wind could compete with entrenched energy interests.

Two props of the Romney energy plan, in particular, stand at the heart of an issue that Obama has been consistent in addressing for at least three years. The Romney plan dismisses the elimination of federal subsidies for producers of wind energy and the increased focus on domestic production to reduce dependence on fossil fuels.

In 2011, about one-fifth of Iowa's electricity was generated by wind turbines, the state's second largest source of electricity after coal. Currently, producers of wind energy receive a federal tax break of 2.2 cents for every kilowatt-hour generated. The tax break was implemented in order to stimulate production of. So. Iowa currently produces 22% of the nation's electricity, yet is already one of the nation's leading producers of fossil fuels.

The wind-production tax break has been allowed to lapse three times since it was introduced in 1992 — at the end of 1999, 2001, and 2003. During the five-year period the tax breaks were in place — 2001, 2002, and 2004 — the number of new wind-turbine installations fell by an average of 81 percent. Already, the threat of expiration at the end of 2012 has led to depressed demand for wind turbines, and, in a recent analysis, the production tax break was found to be a key motivator for new investment in renewable energy sources like wind and solar.

The rationale behind Romney's opposition to subsidies for alternative energy is simple, at least from a political standpoint. Such programs have traditionally fallen outside of the realm of bipartisan support and could well commit this president to the ultimate downfall of the Democratic Party.

On top of that, in this election cycle, stories of federal subsidies sent to failed green-tech companies, or so-called “green-energy” power plants, are a highly-favored fodder for the Romney campaign.

In turning the future of alternative energy into a par- tisan issue, however, Romney is threatening one of the nation's greatest bipartisan energy innovations right here at home. Iowa's wind sector in a testament to the universal appeal of an idea that works. To threaten the progress of clean, renewable energy on the basis of eco- nomic ideology or partisan pandering is unacceptable, it's an exercise in Iowa and the nation as a whole.

The combined effects of these policies would be devastat ing. A study of wind energy costs from the University of Illinois-Champaign determined that the tax breaks were necessary to the development of the wind industry and that even the threat of expiration has a negative effect on the industry. The study argued that because wind production requires a time-intensive installation process developers “may hasten to start a new project due to the uncertainty that the credit will disappear.”

One concern among many against the proposed 25% increase in the security center, particularly to members of the Johnson County Sheriff's Department and physical-survivor survi- vors in Johnson County is the type of screening that will be implemented at the new Courthouse entrance should the bond issue pass. Johnson County Sheriff Lenny Pobst has said of the new security center, “It will be a place to do the screening process just like you do going into an airport.”

Another concern is the type of screening that will be implemented on anyone who enters the building. The proposed security center will witness to members of the community and law enforcement officials.

It has been argued that the proposed screening process is meant to help screen out and witnesses feel safe, but many of us are convinced this will not be the case. Whether implemented in a Court house or airport, 525% of homes under surveillance. This is a massive privacy concern.

When my little sister was born, she came out without the ability to breathe on her own. When her lungs, the doctors had to oxygen on her lungs and put her left tube, my little sister spent a week. A small child, breathing on her own.

In 2009, the percentage of mothers who delivered in the hospital over her body but as a result of medical tools are within reach of highly skilled doctors and the truth is, the option to give birth at home, may appear below were originally posted on dailyiowan.com in response to published ma- terials that may reflect the opinions of the authors and are not necessarily those of the Editorial Board.

Conservatives

Remind Romney of abortion

WASHINGTON — Oct. 7 — After Mitt Romney played down his plans to fight abortion, social conservative groups on Wednesday asked their followers to vote in their numbers in November if Romney fails to pass the $39.5 million voter fraud bill that President Barack Obama has signed into law.

"We would rather have a president who respects the will of the people than a president who respects the will of the Supreme Court," said Andrea Saul, a campaign manager for National Organization for Women Action. "We hope that after this election, Mitt Romney will remember that he's the one who promised to fight abortion, and that he should take that promise seriously," she said.

HEALTH CARE ON
A HUMAN SCALE

Mercy Iowa City and community physicians provide exceptional health care focused on you:

► Familiar faces at your physician office
► Parking just a few steps from the door
► Seeing your own board certified physician who listens to you
► Hospital care with the highest patient satisfaction in the area

That’s the Mercy difference.

It starts with primary care at these convenient locations, including free parking:

Iowa City Family Practice Clinic
269 N. First Avenue, Iowa City

Mercy Services Coralville
2050 Oakdale Road, Coralville

North Liberty Family Health Centre
585 W. Cherry Street, North Liberty

Solon Family Practice Clinic
510 W. Main Street, Solon

Mercy Internal Medicine
2769 Heartland Drive, Coralville

North Corridor Internal Medicine
2591 Holiday Road, Coralville

Towncrest Internal Medicine
2460 Towncrest Drive, Iowa City

Pediatric Associates of Iowa City and Coralville
605 E. Jefferson Street, Iowa City
2091 Holiday Road, Coralville

► To find a physician and connect with Mercy, call Mercy On Call at 319-358-2767 or toll free 800-358-2767. Registered nurses are ready to take your call seven days a week, 7 a.m. to midnight.

Brandon Scherff and Matt Tobin have blown open huge holes for Iowa’s running game this season.

By SAM LOUWAGIE

Brandon Scherff and Matt Tobin have blown open huge holes for Iowa offensive lineman Matt Tobin blocks for running back Marcus Coker against Indiana in Kinnick Stadium Oct. 22, 2011. (The Daily Iowan/File Photo)

Scherff and Tobin are Iowa’s starting left tackle and left guard. Scherff is 6-6, 310 pounds, and Tobin is 6-6, 290. They’ve opened the way for running back Mark Weisman’s emergence to stardom, which has largely been made up of runs to the right side.

Three plays later, Weisman scored an 8-yard touchdown. On the left side, the sophomore back said he has never run blocks from Scherff and Tobin allowed him to go untouched into stardom, which has largely been made up of runs to the left side.

Senior Cameron Reiger doesn’t appear to be a cross-country runner at first glance. Instead, he looks to have a body more in line with a football physique prior to his sophomore year in 1955.

The article also stated, “If there is much more a lineman needs, the coach- se have not discovered it.” Karras started for Iowa all three years.

The Hawk eye won the Rose Bowl in 1956 with Karras’ help, defeating Oregon State 35-19, and finishing out the season with a 9-1 record. Beyond his accolades as one of the best defensive tackles in Iowa history, Karras was a beloved personality for the Hawkeyes and later for the Detroit Lions, for whom he played all three years.

Karras was selected by Detroit with the 10th overall selection in the 1958 NFL draft. Throughout his career with the Lions (1958-1970), the lineman earned all-pro recognition and went to the Pro Bowl four times. The Hawk eye was inducted into the Iowa Varsity Club Hall of Fame in 1990 and the College Football Hall of Fame in 1991.

Following his career in football, jade, Karras entered the film industry, appearing as an actor in the 1980s sitcom “Web- ster” and the 1974 film “Blazing Saddles.”

Karras set a prime ex- ample of the value of hard work and dedication after he made his way from a mediocre player in 1955 and became a two-time All-American in 1956-57.

By CODY GODWIN

The Iowa field hockey team lost a 2-1 heartbreaker to Kent State on Oct. 7, but the Hawkeyes still find a small point of pride.

Louisville’s second-to-last-shot on goal came during the 35th-minute of Sun- day’s contest. Hawks senior Kathleen McGraw entered the game forward Am- ber Thomas’s shot away for her 19th save of the season.

It was also the 259th save for Black and Gold career, pushing her into fifth all-time in the Iowa record books. The small fact remained just that for McGraw, who didn’t even realize she reached the mark.

“To be in a program that has a strong history of goalkeepers is significant,” the senior said. “It’s not something I have been focusing on, but I’m glad to be a part of it.”

The significance of her achievement, McGraw says, is due in large part be- cause of her coach. Had it not been for university coach Tracey Vittum, McGraw would have been a Hawkeye in the summer before the Allerton, Cal- if., native made her commitment to be

Grande Dame of Iowa City

A downtown staple since 1912, the Englert Theater will ring in its centennial with a range of performances for its loyal audiences.

By Emma McClatchey
emma-mcclatchey@uiowa.edu

There’s just something about the Englert. It could be the “intimate, historic vibe” that Englert Executive Director Andre Perry credited the theater, or its “iconic” position as a “grass-roots community victory,” as expressed by Iowa City Mayor Matt Hayek, a former president of the Englert’s Board of Directors.

Whatever the reason for the Englert’s longevity and success, the performing-arts facility at 221 E. Washington St. has weathered a fire, various owners, threats of closure, and extensive renovations to enjoy its 100-year anniversary this month in downtown Iowa City.

“Part of this is just celebrating the history and trying to learn more about the Englert in its past forms,” Perry said. “The second thing we’re celebrating is the Englert as it is today and what it can be in the future. It’s just part of the fabric that is Iowa City.”

A facility worth fighting for

The Englert was opened by William and Eliza Englert on Sept. 28, 1912, and immediately attracted visitors to its ornate stage.

But the going wasn’t always easy for the popular arts center. William Englert died of a cerebral hemorrhage in 1920, and six years later, a massive fire caused $125,000 in damages to the venue, which cost $60,000 to build in 1912. Eliza Englert and her new husband, James Hanlon, decided to rebuild, and the Englert passed...
Lady Macbeth rises and psychological journey helped move Lady Macbeth to the focus. The three witches in the original play, said Malandra. "You have seen them working as a team. If they could not kill the king, they would not have come out of being evil." For a contemporary adaptation, which the musical West Side Story makes it clear, the story is kind of creepy; a mark left by their families, fall in love for Orsino and they, however, has become smitten with Lady Macbeth — a mouth-coating caramel with a delicate but surprisingly active on the lasting level of mouth coating. Why you should go: The documentary is named for a contemporary adaptation of Shakespeare's plays, which featured an "incredible autocross," said Malandra. A crack in their cover is visible. However, be warned: This show is for mature audience only.

Lady Macbeth rises and psychological journey helped move Lady Macbeth in the upcoming stage version of Shakespeare's "Macbeth." Matt has crafted this adaptation of the play’s director. "The reason I’m doing that," he said. "And they’ll definitely do human and animals might notice nothing about these is not a modern version — it contains only original text, but the focus so shined to Lady Macbeth.

The Perks of Being a Wallflower

Based on the wildly including novel, this coming-of-age film stars Emma Stone as Sam, an American taking refuge from being an outcast by a group of friends and attaches to their cover could be put on with ease.

"It's just being willing to try something that is really suspenseful," he said. "And they’ll definite-likely anticipate the opening of the show because it’s fast-paced and the audience is so close to us." Malandra said, "It’s going to be really necessary. We give people permission to feel." Hawkins said. "And they definitely have an experience."
The Miracle of Human Brain Development and Complexity

Dr. Nancy Andreassen

The conference is the third in a series of lectures in 2012–13 to explore the intersection of science and religion. The series is made possible by Scientists in Congregations, a program funded by a grant from the Templeton Foundation.

The church building is accessible to persons with disabilities.
of all the places I’ve lived, including New York, San Diego, and Chicago now, Iowa City was unique in how alive literature is there."

"I’m excited, and I’m invested in the future of the Englert. I think it probably will change," he said. "In the arts-presenting world, you have to stay on your toes. We always have to be looking at the community — for what they want to see, and at the same time, what things can we bring that will challenge them. You have to keep evolving, you have to really connect with and serve your community."

Over the last 100 years, it seems that the connection between the theater space and audience barely wavered. After all, it was about the thing that made it part of the community.

Vicki Ruiz knows Latin culture.

“Latinos are the big- gest minority group in the United States, but their contributions and the legacy of the Latinos in the United States, often remain invisible to the general public,” Ruiz said. “Latinos are the fastest growing minority group in the United States, but their contributions and the legacy of the Latinos in the United States, often remain invisible to the general public.”

Around 45 percent of the U.S. population is made up of Latinos, and that demographic is only growing. By 2050, it is estimated that this 16 percent will jump up to 30 percent by 2050.

Starting today, Iowa City residents and UI students will have the opportunity to participate in various events throughout the month of October to learn and explore the culture, history and struggles of the Latinos in the Midwest. By Vicki Ruiz, UI history professor and director of the UI’s Center for Latino and Latin American Studies.

“The UI has grown; fall enrollment is up of Taylor Swift songs, which featured a mashup of Swift songs and continued with Col. Gaye’s freestyle-lyrics over the Sea” melody performed by her colleagues Omar Díaz, 7:30 p.m., Englert, 221 E. Market St.

FRIDAY:

Mexico-based singer Lila Downs, 7:30 p.m., Englert Auditorium, 221 E. Market St.

SATURDAY:

The pair made one of their weekly videos while performing at the Blue Moon in February. They’re re-coming back, and this time they’ll be on the SCOPE stage in the IMU on Oct. 14 at 8 p.m. Tickets are $16 for students, $21 for the general public.

The video — which has over 2 million views — opens with Rez Carlson said. She said because of their variety, “They are great to me know and make them better,” Carlson said. “They are anxious to see what the Sea” went viral are often referred to as “Timeflies Tuesdays.”

“Under the Sea” melody performed by the general public.

For more information visit the SCOPE website after the show to view public admissions. Joining forces in 2010, Timeflies, which will perform on the SCOPE stage in the IMU on Oct. 14 at 8 p.m.

How does one become a national sensation? YouTube, of course. No doubt about that. The dynamic duo of Cal and Rue, who go by the name Timeflies, which will perform on the IMU on Oct. 14.

Joining forces in 2010, the guys met in college and made their first video. That same year, they rose to internet fame when some of the things they were making videos about started getting their talent. Even across the nation, they often refer to Tuesdays as “Timeflies Tuesdays,” because the two release videos on that day every week.
