Focusing passion at Iowa

By STACEY MURPHY

While most students at the University of Iowa might be distracted by their off-campus lives, one group has a focus that's hard to beat. "I want to be in school," junior Kate Burns said. "I have a passion for computer science and I want to be a computer science major."

Burns, a 20-year-old computer science major, is one of the many students at the university who are passionate about their careers. "I think it's really important to have a passion for what you do," Burns said. "I want to be able to go into a job and be passionate about it."}

An effort in order to make space for a new underground parking facility, the University of Iowa Hospitals and Clinics is parking ramp 2 to be torn down on Jan. 2, 2013.

The project will cost $400 million and include construction of the new underground facility. The underground parking is now serves daily to the UIHC complex, will be rezoned to residential use, said the Lot 49 and the new Main Avenue parking lot.

President Sally Mason previously told the Daily Iowan that the opening of the Iowa River Landing Clinic in the fall helped push this project forward.

“The clinicals’ opening is really the reason we can move the parking ramp and start the new Children’s Hospital with the configuration of the parking underground,” Mason said on Sept. 25.

The underground facility, which is slated to open in the spring of 2015, will primarily serve the new UI Children’s Hospital.

“Cars enter parking ramp 2 at the University Hospitals and Clinics on Tuesday. The ramp will be demolished on Jan. 2, 2013 (The Daily Iowan/Nicholas Fanelli)"

Shooting in Portland leaves 3 dead

PORTLAND, Ore. — A gunman wearing camouflage and a mask opened fire Thursday afternoon at a busy Portland mall, leaving three people dead and two others injured.

The shooting occurred about 9:50 a.m. at the shoe store Foot Locker in the Multnomah Mall. The shooter, who was described as wearing camouflage and a black beanie, ran inside and began shooting, police said.

A言語は、私たちの存在を誇りに思う理由です。
L eft last week, the U.S. Supreme Court decid ed to hear the arguments of two separate cases dealing with the legality of same-sex marriage. The court’s decision has been a huge and important development in the ongoing political debate surrounding same-sex marriage.

The court’s decision to take the case against the federal Defense of Marriage Act (DOMA), which defines marriage as the union between one man and one woman, and the case against California’s Proposition 8, which defined marriage as the union between one man and one woman, is an appeal from the California courts after the state’s Supreme Court decided that the equal-protection clause of the U.S. Constitution was violated by Proposition 8. The court will hear two cases, one against the Defense of Marriage Act, which defines marriage at the federal level as the union between one man and one woman, and the other against Proposition 8, which defined marriage as the union between one man and one woman.

However, the case before the Supreme Court is not the first time these issues have been argued before higher courts. In 2004, those courts struck down a state referendum passed by voters in 2000 known as Proposition 22, which defined marriage as the union between one man and one woman. Just like the case before the Supreme Court, the Proposition 22 case centered on the rationale that same-sex couples lack the ability to have children and that children are necessary for the survival of society.

In fact, according to a 2010 Pew Research Center report, 58% of Americans believe that gay men and lesbian women are unable to make committed and loving relationships, compared to 46% who believe that gay men and lesbian women are just as capable of raising children.

The court’s decision to take these cases is an important development in the ongoing political debate surrounding same-sex marriage. However, it is unlikely that the court will be able to resolve the issue of same-sex marriage with a simple majority decision. The court has a 5-4 split, with Justice Anthony Kennedy, who has been a focal point in the ongoing debate surrounding same-sex marriage, authoring the majority opinion in the 2004 Proposition 22 case.

Justice Kennedy stated in his majority opinion that the court should defer to the decisions of the states regarding the definition of marriage. However, the court’s decision to take these cases demonstrates the growing importance of same-sex marriage in the political and social landscape.

Amid the political impasse that has come to define the current political climate, the Supreme Court has the opportunity to make a significant decision that will have far-reaching implications for the rights and freedoms of all Americans. If the court decides to rule in favor of same-sex marriage, it could have a transformative impact on the rights and freedoms of all Americans. If the court decides to rule against same-sex marriage, it could have the opposite effect and reinforce the political impasse that has defined the current political climate.

Ultimately, the court’s decision in these cases will have important implications for the rights and freedoms of all Americans. The court’s decision will likely be a significant development in the ongoing political debate surrounding same-sex marriage, and it will be important to continue to follow the court’s deliberations and decisions in order to fully understand the implications of this important decision.
Spacecraft relaunched

By MARCIA DUNN
CAPE CANAVERAL, Fla. — The military’s small, secret version of the space shuttle rocketed from Florida for a repeat mystery mission, two years after making its first flight.

The Air Force launched the unmanned spacecraft Tuesday on top of an Atlas V rocket. As if on cue, clouds quickly swallowed the rocket as it disappeared out over the ocean.

It is the second flight for this original X-37B space plane. The craft circled the planet for seven months in 2010. A second X-37B space plane spent more than a year in orbit.

wrestling

One Iowa swimmer has already taken home all three honors — Swimmer of the Week award.

Luisa Tironi, Iowa's top diver, won the 1-meter and 3-meter diving events at the Big Ten conference after a 10,000-person crowd witnessed her victory.

Iowa junior Derek St. John was named the Big Ten's Wrestler of the Week on Tuesday afternoon. He is Iowa's 13th wrestler to win the award.

Iowa can take some pride in the accomplishments of its athletes, but there are still many more records to be broken. The next step is to focus on the season's goals.

---

WOMEN'S BASKETBALL
Talent, experience leads to win

The Hawkeyes are off to a great start, having won their first two games of the season. They have shown off their talent with their quickness, defensive skills, and ability to create opportunities on the court.

Iowa head coach Lisa Bluder said that the team is ready for the challenges that lie ahead. She emphasized the importance of teamwork and hard work, and she is confident in her players' abilities.

The team has a lot of depth, with many players contributing to the win.

---

CLEMSONS CONTINUED FROM P. 7

The Hawkeyes will return to action on Dec. 17, when they face Michigan State in Ann Arbor.

---

SPORTS

Big Ten honors Iowa swimmers, diver

Iowa's swimming and diving team dominated the Big Ten meet in Iowa City on Dec. 1. The Hawkeyes captured the men's and women's titles for the first time in school history by taking all three awards.

SPORTS

Thursday, December 13, 2012

The Week, Door of the Week, and Freshman of the Week awards are given to the best performers on the field at Iowa. This week, Shaugnessy won the 500 free, 100 free, and 200 fly, which matched her for the record-breaking Secretariat award.

Shaugnessy's success this season has led to many accolades, including being named Big Ten Swimmer of the Week.

---

Iowa's Deterline leads the ball against Illinois State in Carrier Bank Arena on Nov. 9. (The Daily Iowan/Carson Stach)

---

Iowa's John Timmerman takes the prize for Best Explanation for Why Iowa is Such an Appealing Destination for Minnesota Players. He said that it's easier to access free

---

"I don't offer him [a scholarship] just because he's good, but because he has the potential to be a top-level performer," Clemmons said.

The family atmosphere here, "Doolittle said. It's like Warren Sapp."
Cory Clark is redshirting this season behind Matt McDonough. But he made a statement when he beat the nation's No. 2-ranked wrestler at the UNI Open.

Clark scored his first takedown on a scramble, then trapped Delgado on his back when the Illinois wrestler tried to roll over him, I guess."

Teams are allowed one unpaid volunteer per sport. But a "sport" can be as specific as pole vaulting or director of operations. While all Big Ten track teams have four or more volunteer assistant coaches, some of the best coaches in the country have only had one volunteer assistant coach who takes advantage of the opportunity to gain college coaching experience. (The Daily iowan/Rachel Jessee)
