Shutdown worries Loebsack

Rep. Dave Loebsack is hopeful for a quick end to the government shutdown.

By REGAN SANCHEZ

The vacant renovation site of the new 1105 Project — next to the Crisis Center for $1. Officials anticipate the new location will provide 45,000 combined services to people each year.

Located at 1105 S. Gilbert Court, the new site will be home to four local agencies that share the common goal of helping Johnson County's most vulnerable populations. The four-part alliance comprises the Crisis Center of Johnson County, the Domestic Violence Intervention Program, the Free Lunch Program, and the Johnson County Chapter of the National Alliance on Mental Illness.

"This building represents a significant step for four nonprofit agencies in our community," said Wanyi Tao, director of the UI Bedell Entrepreneurial Learning Lab. "It will merge resources, programs, time, and energy toward projects that will allow such agencies to reach more clients under one roof.

The Johnson County Board of Supervisors sold the former public-health building to the Crisis Center for $1. Officials anticipate the new location will provide 45,000 combined services to people each year.

The total estimated cost of the project is $1.3 million. As of the first quarter, the project has raised $285,000. With the projected opening date fast approaching in January 2014, the project has fewer than 100 days to raise the remaining renovation money. Officials are hopeful.

Loebsack said. "It's a growing sector of our economy as a whole. These are the sectors that are getting hammered because of the uncertainty." Loebsack said. "It's of crucial importance to projects that will allow each agency to reach more clients under one roof."

"We recognized that there were some gaps in our services across Iowa, lean Allendorf, the director of the UI Bedell Entrepreneurial Learning Lab. "Every year there's more and more of an ecosystem, both on campus and in Iowa City that is conducive to entrepreneurship," she said. "With the addition of UNI's new entrepreneur program, the state of Iowa is even better suited to provide opportunities to a changing business world, and University of Iowa officials say."

"I don't think there's an aspect of competition between UNI and UI," she said. "We actually collaborate a great deal with them in terms of entrepreneur programs."

Aid agencies to come together under one roof

A new collaboration called the 1105 Project will centralize four local agencies under one roof; officials expect it to open in January 2014.

A new website trend aimed at helping more than 1 million different independent projects gain funding is becoming more popular.

Crowdfunding — a web-based platform for small projects to set up accounts open for public donation — has helped fund the return of a downtown Iowa City movie theater six years after it closed in the making. Now, the initiative is being utilized to financially support the research of an University of Iowa graduate student.

Amy Belfi, a fourth-year UI graduate student, said crowdfunding is the ideal avenue for her type of research dealing is really tough,” she said. “It’s a very time consuming process, including a peer review, but still may not receive any money for their projects.

Josh Krakauer, CEO and founder of StartUp, an Iowa City-based social media agency, aided in bringing back in the movie-going experience to downtown Iowa City. Through Indiegogo, an other popular crowdfunding site, Filmmakers broke an initial $7,000 campaign by almost $20,000, which led to its Oct. 3 soft opening.

Crowdfunding, an online funding system for projects, has grown in popu- lor. The estimated number of active crowdfunding platforms worldwide has grown from 283 in 2009 to 536 in 2012.

In 2009, that number nearly doubled to 536. Bell, who is studying how music evokes autobiographical memories, has surpassed her first goal of $1,500 set in September; she has $3,240 pledged.

Cindy Wu, the co-founder of Microryza — one of the most popular crowdfunding sites for scientists and the site Belfi has chosen to work on — saw an opportunity immediately after publishing a research paper, establishing a research website, launching the site with her newfound project. That’s one alternative funding source, one of the few of its kind that specifically serves as the preferred source of funding, originating with any unique idea, according to NerdGraph, an independent source.

For Belfi, Microryza has suddenly conjures up a memory. “Everyone has that moment where they hear a song, and it sud- denly conjures memor- icy (as) people can really relate to it. And people could really get behind that. So the research that really appeals to a mass audience,” according to NerdGraph.

A U.S. government shutdown enters its second week, not much seems to have changed. Since fiscal year 2013, the U.S. Department of Agriculture Service is still running, as well as other essential functions. But one government program that provides help for millions of Americans is in danger of running out of funding.

Nearly 9 million Americans rely on Women, Infants, and Children (WIC) - a federal program of Department of Agriculture that provides grants to states for supplemental food, health care, and nutrition education. The program is available for pregnant, breastfeeding, and non-breastfeeding women, up to 5 years old.

One of the most vital aspects of the program is the assistance it provides to newborns and nursing infants. It funds prenatal care and infant care, as well as nutrition education. The program is funded through the end of the fiscal year.

Although it has been granted a temporary reprieve in the form of a stopgap measure that allows the government to continue operating, the program faces an uncertain future.

The longer the shutdown continues, the more likely it is that the program will be cut. This is a concern for those who rely on WIC for essential food assistance.

Congress would need to negotiate a deal to fund the program, which could potentially prevent the shutdown from extending beyond its current end date.

For low-income mothers and children, there are already programs in place that could help. However, these programs are not always easily accessible, and it is important for everyone to stay informed about the situation.

The shutdown has been ongoing for nearly a week now, and it is unclear when or if it will end. The longer the government remains closed, the more likely it is that vital programs, such as those provided by WIC, will be affected.
Students of the Bedell Laboratory, which is regarded as one of the top in the nation for entrepreneurship efforts, focus primarily on supporting students at the university level in Iowa. One example is the Bedell Entrepreneurship Learning Laboratory, which is considered one of the leading entrepreneurship organizations at the university level in Iowa.

"I think the Bedell Laboratory is incredibly benevolent to students," UI entrepreneurship program lecturer Joe George said. "It gives students that have a business idea an opportunity to actually start that business under the watchful eyes of several different teachers, whether or not he is from an accounting professional.

"We are water Quality Association Certified Water Specialists. Hassans has been serving the needs of homeowners in and around Eastern Iowa since 1946. Look around you and find us helping homeowners in "The Water is health" to landscape, cultivate, and school, and work. Also Marlain and make your home a friendly place for business owners. In this shutdown, things get very, very serious," he said. "My guess he would be likely some sort of solution before this end of the month, but that doesn’t mean it’s not going to hurt until then." Leibsohn, too, said he would come to a definite rule, but he is hopeful the shutdown will end soon.

"I wouldn’t counsel patience at all," he said. "People should be impa- tient. There is nothing to be patient about. This has to be done now."

PRIME PLAYS
Down 4 points to begin the fourth quarter, Iowa lined up to return a Michigan State punt on fourth and 7. But instead of punting, Spartan punter Mike Sadler kept the snap and streaked 25 yards up the field. The play extended the Spartan’s drive, which ended with a field goal to give Michigan State a two-score lead. Sadler out-rushed the entire Iowa team on the fake punt.

Down 3 points with under than two minutes to go in the first half, Iowa quarterback Jake Rudock slung the ball underneath to tight end C.J. Fiedorowicz for a 10-yard touchdown. Rudock completed 11-straight passes in the second quarter, and the score gave Iowa a 14-10 lead going into halftime.

IOWA GAME BALL
James Morris
Morris played like a senior captain, amassing 12 tackles and an interception against the Spartans. That was Morris’ third interception of the season, he is 13th all-time in Iowa’s list of leading tacklers with 336 career stops.

Game Recap

IOWA 14, MSU 26

IOWA GAME BALL
James Morris

MSU GAME BALL
Connor Cook

Morris played like a senior captain, amassing 12 tackles and an interception against the Spartans. That was Morris’ third interception of the season; he is 13th all-time on Iowa’s list of leading tacklers with 336 career stops.

Cook was a magician against Iowa, completing more than half of his passes for 277 yards and 2 touchdowns. It was just his fourth career start, but Cook had all the answers for the looks the Hawkeye defense gave him. He also made plays with his feet, running for 21 yards on 6 carries.

THUMBS UP

Next man in. Iowa was hit with devastating injuries throughout the game, losing Mark Weisman, Kevonte Martin-Manley, Dominic Alvis, and Brandon Scherff for periods of time, just to name a few. New players stepped in to replace the regular starters, did an OK job against Michigan State.

THUMBS DOWN

Special Teams. Iowa gave up a fake punt against Iowa, completing more than half of his passes for 277 yards and 2 touchdowns. It was just his fourth career start, but Cook had all the answers for the looks the Hawkeye defense gave him. He also made plays with his feet, running for 21 yards on 6 carries.

Iowa goes into a much-needed bye week following a myriad of injuries in the Michigan State game. Which is the best thing possible for Iowa, because after the week of rest, it takes on conference king Ohio State in Columbus. Iowa will need all its players off the mend if its going to have any chance against Ohio State, a team that has its sights set on crystal footballs.

**Daily Break**

**General and unsolicited advice:**
- Be careful around chalk outlines on the ground—there's where they always find dead bodies.
- While driving your car, there is so much to notice when you feel for your car keys in your pocket and they're not there.
- Made it to car through college but still think the world is a terrible, horrible, no good, very bad place? Thinking about ending it?
- Don't ask yourself WWJD — just not out loud.
- If you have something on your mind, begin your day with an earthwords affirmation.
- Never, under any circumstances, begin your day with an earthwords affirmation.
- Men? Two words: law school.
- While driving your car, keys in your pocket and they're not there.
**Man charged with burglary**

In Iowa City, police have arrested a man accused of burglarizing a vehicle.

Michael Corsiglia, 19, was arrested Wednesday on charges of third-degree burglary. According to a police report, Corsiglia and another man were seen walking toward the victim's vehicle around 10 p.m. on Oct. 4. Police say Corsiglia opened the front door of the car and allegedly found another with a false name and date of birth. He had no ID and provided officers with a false ID number. The vehicle was located a half block away from where Corsiglia was located. The registration was in the name of the same person as on the driver's license. Numerous paychecks and insurance paperwork were found in the vehicle. Paychecks were found on the vehicle.

**Man faces forgery, drug charges**

A Coralville man has been arrested on charges of theft and possession of a controlled substance.

Michael Corsiglia, 19, was arrested Oct. 5 with forgery and drug possession of a controlled substance. According to a police report, Corsiglia was seen walking toward a business with third-degree burglary. He was carrying several items, including a marijuana cigarette. He was pulled over by an officer after trying to walk away from the business. The officer found drugs and a marijuana cigarette in the car. The officer then searched the vehicle and found a controlled substance. Corsiglia then admitted to the drug possession.

**Man charged with 3rd OWI**

A man from Iowa has been arrested on charges of third-offense OWI.

Adam Stock, 32, was charged Sunday with third-offense OWI. According to a police report, Stock was stopped on Oct. 5 for speeding and smelled of ingested alcohol. He tried to walk away from the officer, but the officer eventually made contact. He performed several field sobriety tests and showed signs of impairment during the test. He was arrested for third-offense OWI.

**Man happy with chemical-weapons progress**

U.S. Secretary of State John Kerry said Monday that the United States and Russia are “very close” to closing a deal to eliminate Syria’s chemical weapons.

Kerry said it was “extremely significant” that the first weapons were destroyed Sunday, just a few weeks after the resolution passed the U.N. “It is a good beginning, and we should welcome a good beginning,” he said.

Kerry and Lavrov met Monday on the sidelines of an economic summit on the Indonesian resort island of Bali. Their meeting represented the first high-level talks between the two nations since they signed a deal to secure and destroy Syria’s chemical weapons.

Kerry and Lavrov also discussed Iran and its nuclear program. Officials from the five permanent members of the U.N. Security Council — the United States, China, the Russian Federation, France, and the United Kingdom — and Germany will meet this week with representatives from Iran on Oct. 15 to hold renewed talks on Iran’s nuclear program.

**Bus & Shop program**

In the first game this year, Northern Illinois ran a fake punt that went for 40 yards and brought the Hawks to Illi- nois' 4-yard line. The drive ended in a field goal, and Iowa went on to lose by 3-0. And then there's what happened against Michi- gan State.

"We may never try to return one again," Ferranti said when he explained the thinking — try to get to the return, and to their credit, they made a good call and that cost us a field goal," he said.

Ferentz was most likely bemoaning his statement about playing hyper-conservative on punt returns, but he more than regretted not returning a punt, and just send- ing in a punter's defender down and letting the ball go. "We were getting qualified, and the punters are good at catching balls after sending a man to return it. We may just keep itave to that goal in the end.

"I think it just fired us up," said Dingman, who added: "I thought Minnesota's defense was good but they didn't have the same intensity at the same time. But referees called that the receiving end, keeping the pigskin on the back of the net. Gaudreau made a good save on that one.

The Hawks' best scor- ing chances came late in the game when a shot off the post hit the back of the net and cleared for a goal. Iowa finished the game with 11 shots attempted, 14 saves, and an 0-3-0 record against the Bucs.

The Hawks' second set of seniors played like two seniors who play for a top-10 opponent in the third and fourth sets — another first for Iowa. "It wasn't great. But a solid chunk of the third total yards came from the last 7 yards per punt return.

Now, the Hawkeyes are looking at a bye week to regroup and refine the low-fi hyper-conservative on punt returns. "We'll be ready to compete again," he said. Like any team, the Hawks put the film on again in the end, the game was called for a clipping foul on Thomas.

"It was called for a clipping foul on Thomas and into the right post of the season for Thomas and Pickert's third assist through 13 games. The Hawkeyes dominated the Spartans defensively on the series, seven shutouts of the season, 10-3-0, and 2-3-0 in the third year in a row — another first for the program. The Hawks improve to 4-6-1 overall and 3-3-0 in the Big Ten.

"This was a great Big Ten win," Ferentz said. "Both teams worked really hard," he said. "I don't think they really played away. But they kept us honest and it looks to me, this was a pretty good game, and it led to 10 points in the end."

"I think we were all a little bit.OK, it's going to happen," Pickert said. "I thought it just feed us up." The Hawks put the ball back in the series with just 18 seconds re- maining when a Pickert free kick back-handed off of Thomas and into the right side of the net.

The score was the third of the season for Thomas and Pickert's third assist through 13 games. The Hawks dominated the Spartans defensively on the series, seven shutouts of the season, 10-3-0, and 2-3-0 in the third year in a row — another first for the program. The Hawks improve to 4-6-1 overall and 3-3-0 in the Big Ten.

Michigan stops Hawk field hockey

The Iowa Hawkeye field hockey team topped the Michigan Wolverines on Oct. 1 in a close contest, 3-2. Iowa scored two goals in the first half and a third in the second half to win their conference opener.

**FEATURE**

The Hawkeye field hockey team dominated the Michigan Wolverines, 3-2, on Oct. 1 in McDonald Stadium.

By Matt Cabel

The Iowa Hawkeyes were a healthy football team heading into the Oct. 5 matchup against the Michigan State Spartans.

Running back Mark Weisman, wide receiver Kevonte Martin-Manley, offensive tackle Brandon Scherff, defensive lineman Ben Alvis, and linebacker Christian Ballard were all missed time in Iowa's biggest matchup to-date, in which the squad needed to fire on all cylinders to survive. But head coach Kirk Ferentz praised all of the players that all of the injuries required.

"The bye week probably came at a good time," he said in postgame interviews. "Hopefully, all those guys will be back at full speed." The onslaught of injuries came out even a week after Ferentz said — with a knuckle on wood — that things have been "so far, so good" as far as injuries after five games in his weekly press conference.

"Just like wind affects a game, I think injuries affect any team — especially teams like us," he said on Oct. 1. "Running back Mark Weisman was the first. Suspicious auras when Damon Bullock was cut down and an opportunity for Mike Sadler to build on 6 point lead to add inordinate to injuries. But head coach Kirk Ferentz all of Iowa's services for the day on first-string tailback Mike Teel." The fake punt play was called when Damon Bullock was re- placed by Jacob Sheyko. "The fake punt was a good decision, "Ferentz said — with a knock on wood — that things have been "so far, so good" as far as injuries after five games in his weekly press conference.

Iowa was primed and ready to start the fourth quarter of the Oct. 5 game against Michigan State with the ball. The Hawkeyes had just forced a three and out on the Spartans, and they were about to pant the pigskin to Iowa from their own 35.

Instead of giving Iowa possession and a chance of gaining a lead, Michigan State punter Jake焚 took the snap and ran 25 yards up field for a first down and an opportunity for his squad to build on 6 point lead. To add inordinate to injuries, But head coach Kirk Ferentz all of Iowa's services for the day on first-string tailback Mike Teel. The fake punt play was called when Damon Bullock was replaced by Jacob Sheyko. "The fake punt was a good decision, "Ferentz said — with a knock on wood — that things have been "so far, so good" as far as injuries after five games in his weekly press conference.
